EU (CE) Declaration of Conformity

Product: ThinkCentre M70q Gen 5
Machine Type: 12TD*******, 12TE*******, 12TF*******, 12TG*******
12TN*******, 12TQ*******, 12TR*******, 12TS*******
(where * can be a series of numbers 0 – 9 and/or letters A-Z)

Name and address of the manufacturer or his authorized representative:

Lenovo PC HK Limited
23/F Lincoln House,
Taikoo Place, 979 King's Road
Quarry Bay, Hong Kong, China

Manufacturer Representative within the EU:

Lenovo (Slovakia), Landererova 12, 811 09 Bratislava, Slovakia
Tel: +421 2 6868 3018

This declaration of conformity is issued under the sole responsibility of the manufacturer.

The products listed above are in conformity with the requirements of the following EU Directives:

- **Directive 2014/53/EU – (Radio Equipment Directive).**
- **Directive 2009/125/EC – (EU EcoDesign Directive).**
- **Council Directive 2011/65/EU - (EU RoHS Directive) as amended by Directive 2015/863/EU.**

The conformity assessment procedure referred to in Article 17.4a of Directive 2014/53/EU has been followed in accordance with Article 3.2:

Notified Body Name/Number: TIMCO Engineering, Inc./ 1177
Issued the EU-type Examination Certificate: E1177/244002

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 245

EU Declaration of Conformity

For the << TIO24Gen5, A23TIO24 >>
Machine Types: <<12NA-****-**>>
(the * in the model name can be 0 to 9, A to Z, a to z or blank for marketing use only)

We, Lenovo (Singapore) Pte Ltd., declare under sole responsibility that the above products, manufactured for:

Lenovo PC HK Limited.
23/F, Lincoln House, Taikoo Place 979 King's Road,
Quarry Bay, Hong Kong, China

- **Council Directive 2014/35/EU-relating to the making available on the market of electronic equipment designed for use within certain voltage limits.**
- **Council Directive 2014/30/EU relating to electromagnetic compatibility.**
  Council Directive 2009/125/EC ,EU 2019/2021, (EU) 2021/341 , EU 2019/2013 & (EU) 2021/340 establishing a framework for the setting of Ecodesign requirements for Energy-related products.
- **Council Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment as amended by Directive 2015/863/EU.**

Conformity with these Directives has been assessed for this product by demonstrating compliance to the following harmonized standards and/or regulations:

EN55032:2015+A11:2020; EN55035:2017+A11:2020
EN IEC 61000-3-2:2019+A1:2021
EN 61000-3-3:2013+A2:2021

EN IEC 62368-1:2020 + A11:2020, EN 62368-1:2014+A11:2017
EN IEC 63000: 2018.
EN 62087-1:2016
EN 62087-2:2016

1. Main Test report (71 pages)

2. Photos (19 pages)

3. Chinese differences (8 pages)

4. Singapore differences (3 pages)

5. Korean differences (1 page)

6. Israeli differences (7 pages)

7. Power adapter CB test report with IEC 62368-1:2014 (2nd Edition); and/or EN62368-1:2014; A11:2017, refer to table 1.5.1 for detail.

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 256

Summary of testing:

Tests performed (name of test and test clause):

Clause	Test(s)
1.6	Input Current Test
1.7	Marking and instructions
2.2	SELV circuits
2.5	Limited power sources
4.1	Stability
4.2	Mechanical strength
4.5	Thermal requirements
4.6	Openings in enclosure
5.3	Abnormal operating and fault conditions

Load condition: Refer to general product information.

Testing location:

See page 3

1.7.2.1 Language of safety markings/instructions.	Instructions and equipment marking related to safety is applied and checked in English and German, the instruction and marking should be checked again when marketed in the countries using other language.
2.5 Limited Power Source.	The main board of monitor has complied with LPS (after F101). The output of main board complying with subclause 2.5 LPS requirement and the components mounted on V-1 or better PCB according to sub-clause 4.7.2.2. Refer to sub-clause 2.5 for detail.
4.2 wall or ceiling mounted equipment	VESA compatible wall mounting kit 100mm x 100mm, 4 piece screw M4 x 10mm used.

Wall Mounting (Optional)

Refer to the instructions that come with the base mounting kit. To convert your LCD display from a desk-mounted to a wall-mounted display, do the following:

Step 1: Verify that the Power button is turned Off, then disconnect the power cord.

Step 2: Lay the LCD display face down on a towel or blanket.

Step 3: Remove the base and stand from the monitor.

Step 4: Attach the mounting bracket from the VESA compatible wall mounting kit (100mm x100mm distance), the type of VESA mounting screw is M4 x 10 mm.

Step 5: Attach the LCD display to the wall, and follow the instructions in the wall-mounting kit.

For use only with UL Listed Wall Mount Bracket with minimum weight/load: 8kg

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 257

Summary of compliance with National Differences

The sample(s) tested compliance with the requirements of IEC 60950-1: 2005 (2nd Edition); Am1: 2009; Am2: 2013.
At the time of issuing this test report, not all countries are listed for IEC 60950-1:2005 (2nd Edition); Am1:2009; Am2:2013. Therefore this test report includes national differences for IEC 60950-1:2005(2nd Edition) Am1:2009 and IEC 60950-1: 2005 (2nd Edition).
All national differences listed in the IECEE Online CB Bulletin are covered by the Common Modifications, Special National Conditions, National Deviations, and the National Requirements noted above except for the countries which are documented in Attachment.
National Differences attached to this test report:
list from IEC 60950-1, 2nd edition: China and Singapore.
list from IEC 60950-1: 2005 (2nd Edition); Am1: 2009: Korea.
list from IEC 60950-1: 2005 (2nd Edition); Am2: 2013: Israeli.

Copy of marking plates:

The artwork below may be only a draft. The use of certification marks on a product must be authorized by the respective NCBs that own these marks.

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 259

Calibration	All instruments used in the tests given in this test report are calibrated and traceable to national or international standards. Further information about traceability will be given on request.
Measurement uncertainty	Measurement uncertainties are calculated for all instruments and instrument set-ups given in this report. Calculations are based on the principles given in the standard EA-4/02 (Dec. 1999), IEC Guide 115:2007 and other relevant internal Nemko-procedures. Further information about measurement uncertainties will be given on request.
Evaluation of results	If not explicitly stated otherwise in the standard, the test is passed if the measured value is equal to or below (above) the limit line, regardless of the measurement uncertainty. If the measured value is above (below) the limit line, the test is not passed - ref IEC Guide 115:2007. The instrumentation accuracy is within limits agreed by IECEE-CTL.

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 260

Test item particulars..... :	
Equipment mobility……..:	[X] movable [] hand-held [] transportable [] stationary [] for building-in [] direct plug-in
Connection to the mains……:	[] pluggable equipment [] type A [] type B [] permanent connection [] detachable power supply cord [] non-detachable power supply cord [X] not directly connected to the mains
Operating condition……..:	[X] continuous [] rated operating / resting time:
Access location ……:	[X] operator accessible [] restricted access location
Over voltage category (OVC) ……:	[] OVC I [] OVC II [] OVC III [] OVC IV [X] other: Supplied by AC/DC adapter
Mains supply tolerance (%) or absolute mains supply values ……:	N/A
Tested for IT power systems ……:	[] Yes [X] No
IT testing, phase-phase voltage (V) ……:	N/A
Class of equipment ……..:	[] Class I [] Class II [X] Class III [] Not classified
Considered current rating of protective device as part of the building installation (A) ……:	N/A
Pollution degree (PD) ……..:	[] PD 1 [X] PD 2 [] PD 3
IP protection class ……...:	IPX0
Altitude during operation (m) ……:	≤5000m
Altitude of test laboratory (m) ……..:	< 2000m
Mass of equipment (kg) ..... :	For model: A23TIO22**, TIO22Gen5, TIO22Gen5Touch 5.7 kg with base only not include PC, base 2.3kg Dimensions: Horizontal position of the unit: Approx.490mm x 195mm x max.510mm(min.418mm) with Base Vertical position of the unit: Approx.335mm x 195mm x max.610mm(min.505mm) with Base The base: Approx.265mm x 195mm x 415mm For model: A23TIO24**, TIO24Gen5, TIO24Gen5Touch 6.28 kg with base only not include PC, base 2.3g Dimensions: Horizontal position of the unit: Approx.540mm x 195mm x max.545mm(min.418mm) with Base Vertical position of the unit: Approx.350mm x 195mm x max.635mm(min.553mm) with Base The base: Approx.265mm x 195mm x 415mm
Possible test case verdicts:

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 263

General product information:

The models are an LCD monitor intended for general office use with following features:

1. The unit is configured with LCD panel (with LED backlight)
2. External approved adapter used, which was evaluated 5000m and maximum ambient temperature 40℃ . The output of external approved adapter complied with SELV circuit, but not evaluated according to LPS, therefore LPS test was evaluated for input of main board and LCD panel in this report.
3. Main boards 715GD726 and 715GD745 with HDMI, DisplayPort and USB 3.0 upstream ports, which is embedded with DC/DC converter circuit.
4. Extend board for connecting to tiny PC with DC outlet, DisplayPort and USB 3.0 ports. The tiny PC is supplied by approved adapter too, and the unit under test was tested with tiny PC to simulate normal working condition of LCD monitor. But requirements of tiny PC related to this standard were not evaluated in this report by the request of client.
5. The internal metal chassis is considered as fire enclosure and internal plastic enclosure for extend board connecting to Tiny PC is considered as fire enclosure.
6. The external plastic enclosure is regarded as decorative part.
7. Digital camera on top of LCD monitor (optional).
8. Touch screen (optional).
9. Stand base (optional)

Model difference:

Model name	Mainboard	Panel
A23TIO22**, TIO22Gen5, TIO22Gen5Touch	715GD726	21.5”
A23TIO24**, TIO24Gen5, TIO24Gen5Touch	715GD745	23.8”

Load condition: maximum brightness, maximum contrast, full white screen; speakers were loaded with 1KHz sinusoidal signal and turned to maximum volume; each USB 3.0 port was loaded 5V/0.9A; tiny PC (which is mounted in rear storage of LCD monitor) turned to maximum loading condition by client’s specified software.

Under DP mode represent the worst condition for all tests, if not specified.

Additional information (requested by manufacturer):
The manufacturer declared that the product also fulfilled of the requirements of SANS 60950-1:2014 (Edition 2.2)/IEC 60950-1:2013 (Edition 2.2)

Maximum recommended ambient (Tmra): 40℃

Circuit characteristics: The equipment contains Secondary circuits (SELV).

1.1.2 – Additional requirements:

Exposure to extreme temperatures, excessive dust, moisture or vibration; to flammable gases; to corrosive or explosive atmospheres:

This equipment is intended to operate in a ”normal” environment (Offices and homes).

Electromedical equipment connected to the patient:

This equipment is not an electromedical equipment intended to be physically connected to a patient.

Equipment used in vehicles, ships or aircrafts, in tropical countries, or at elevations > 2000m:
This equipment is intended to operate in a "normal" environment (Offices and homes) and is intended to

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 264

be operated under altitude up to 5000m, so the clearance is multiplied by the altitude correction factor (1.48 linear interpolation used), specified in table A.2 of IEC 60664-1.

Abbreviations used in the report:

- normal conditions	**N.C.**	- single fault conditions	**S.F.C**
- functional insulation	**OP**	- basic insulation	**BI**
- double insulation	**DI**	- supplementary insulation	**SI**
- between parts of opposite polarity	**BOP**	- reinforced insulation	**RI**

Indicate used abbreviations (if any)

3.5.1	General requirements	Considered.	—
3.5.2	Types of interconnection circuits ..... :	SELV circuit.	P
3.5.3	ELV circuits as interconnection circuits	No ELV.	N/A
3.5.4	Data ports for additional equipment	Class III equipment, SELV circuit of data ports on main board protected by fuse F101 which complied LPS and mounted on PCB of flammability class V-1 or higher.	P
4	**PHYSICAL REQUIREMENTS**		P
4.1	Stability		P
	Angle of 10°	Unit does not overbalance at 10°.	P
	Test force (N) ..... :	The unit is not floor-standing.	N/A
4.2	**Mechanical strength**		P
4.2.1	General	Complies with the requirement also after tests described below are applied.	P
	Rack-mounted equipment.	No rack-mounted equipment.	N/A
4.2.2	Steady force test, 10 N		N/A
4.2.3	Steady force test, 30 N		N/A
4.2.4	Steady force test, 250 N		N/A
4.2.5	Impact test		—
	Fall test		N/A
	Swing test		N/A
4.2.6	Drop test; height (mm) ..... :		N/A

IEC 60950-1			
Clause	Requirement + Test	Result - Remark	Verdict
4.2.7	Stress relief test		N/A
4.2.8	Cathode ray tubes	CRT(s) not used in the equipment.	N/A
	Picture tube separately certified .....:		N/A
4.2.9	High pressure lamps	No high pressure lamps in the equipment.	N/A
4.2.10	Wall or ceiling mounted equipment; force (N) .....:	For model: A20TIO22**, TIO22Gen4, TIO22Gen4Touch Mass of equipment=4.88kg (include PC and without base), tested=144N for 1min. For model: A20TIO24**, TIO24Gen4, TIO24Gen4Touch Mass of equipment=5.46kg (include PC and without base), tested=161N for 1min. 4 piece screws M4 x 10mm used, see summary of tesing for details. The equipment and its associated mounting means still remain secure during the test.	P
4.3	**Design and construction**		P
4.3.1	Edges and corners	All edges and corners are rounded and/or smoothed.	P
4.3.2	Handles and manual controls; force (N) .....:	No knobs, grips, handles, lever etc.	N/A
4.3.3	Adjustable controls	No hazardous adjustable controls.	N/A
4.3.4	Securing of parts	Class III equipment. Not applicable.	N/A
4.3.5	Connection by plugs and sockets	SELV connectors do not comply with IEC 60320 or IEC 60083.	N/A
4.3.6	Direct plug-in equipment	Not intended to plug directly into a wall socket-outlet.	N/A
	Torque .....:		—
	Compliance with the relevant mains plug standard .....:		—
4.3.7	Heating elements in earthed equipment	No heating elements provided.	N/A
4.3.8	Batteries	No batteries in the equipment.	N/A

V.2	TN power distribution systems		N/A
W	**ANNEX W, SUMMATION OF TOUCH CURRENTS**		N/A
W.1	Touch current from electronic circuits		N/A
W.1.1	Floating circuits		N/A
W.1.2	Earthed circuits		N/A
W.2	Interconnection of several equipments		N/A
W.2.1	Isolation		N/A
W.2.2	Common return, isolated from earth		N/A
W.2.3	Common return, connected to protective earth		N/A
X	**Annex X, MAXIMUM HEATING EFFECT IN TRANSFORMER TESTS (see clause C.1)**		N/A
X.1	Determination of maximum input current		N/A
X.2	Overload test procedure		N/A
Y	**ANNEX Y, ULTRAVIOLET LIGHT CONDITIONING TEST (see 4.3.13.3)**		N/A
Y.1	Test apparatus .....:		N/A
Y.2	Mounting of test samples .....:		N/A
Y.3	Carbon-arc light-exposure apparatus .....:		N/A
Y.4	Xenon-arc light exposure apparatus .....:		N/A
Z	**ANNEX Z, OVERVOLTAGE CATEGORIES (see 2.10.3.2 and Clause G.2)**		N/A
AA	**ANNEX AA, MANDREL TEST (see 2.10.5.8)**		N/A
BB	**ANNEX BB, CHANGES IN THE SECOND EDITION**		—
CC	**ANNEX CC, Evaluation of integrated circuit (IC) current limiters**		N/A
CC.1	General		N/A
CC.2	Test program 1.....:		N/A
CC.3	Test program 2.....:		N/A
CC.4	Test program 3.....:		N/A
CC.5	Compliance.....:		N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 291

IEC 60950-1			
Clause	Requirement + Test	Result - Remark	Verdict

DD	**ANNEX DD, Requirements for the mounting means of rack-mounted equipment**		N/A
DD.1	General		N/A
DD.2	Mechanical strength test, variable N……..:		N/A
DD.3	Mechanical strength test, 250N, including end stops……:		N/A
DD.4	Compliance……:		N/A

EE	**ANNEX EE, Household and home/office document/media shredders**		N/A
EE.1	General		N/A
EE.2	Markings and instructions		N/A
	Use of markings or symbols……:		N/A
	Information of user instructions, maintenance and/or servicing instructions……:		N/A
EE.3	Inadvertent reactivation test……:		N/A
EE.4	Disconnection of power to hazardous moving parts:		N/A
	Use of markings or symbols……:		N/A
EE.5	Protection against hazardous moving parts		N/A
	Test with test finger (Figure 2A) ……:		N/A
	Test with wedge probe (Figure EE1 and EE2) ……:		N/A

ATTACHMENT: CHINESE DIFFERENCES
Test results according to CB BULLETIN

Clause	Requirement - Test	Result - Remark	Verdict
1.1.2	GB 4943.1-2011 applies to equipment for use at altitudes not exceeding 5000m above sea level, primarily in regions with moderate or tropical climates. Amend the third dashed paragraph of 1.1.2 as: ——equipment intended to be used in vehicles, on board ships or aircraft, at altitudes greater than 5000m;	See main test report	N/A
1.4.5	After the third paragraph, add a paragraph: If the equipment is intended for direct connection to an AC mains supply, the tolerances on RATED VOLTAGE shall be taken as +10%,-10% unless a wider tolerance is declared by the manufacturer. The first dash paragraph "-the RATED VOLTAGE is 230V single -phase or 400V three-phase, in which case the tolerance shall be taken as +10% and -10%" of IEC 60950-1:2005 is deleted in GB 4943.1-2011		N/A
1.4.12.1	Tma in clause 1.4.12.1 amended as: Tma: is the maximum ambient temperature permitted by the manufacturer's specification, or 35 ℃, whichever is greater. Add note 1: For equipment not to be operated at tropical climatic conditions, Tma: is the maximum ambient temperature permitted by the manufacturer's specification, or 25 ℃, whichever is greater. Add note 2: For equipment is to be operated at 2000m-5000m above sea leave, its temperature test conditions and temperature limits are under consideration.	Considered.	P
1.5. 2	Add a note behind the first break off section in Clause 1.5.2: A component used shall comply with related requirements corresponding altitude of 5000m.	Must check with marketing china.	—
1.7	Add one paragraph before the last paragraph: The required marking and instruction should be given in normative Chinese unless otherwise specified.	Must be considered when market to China.	—

1.7.1	Based on the AC mains supply of China, the RATED VOLTAGE should be 220V (single phase) or 380V (three-phases) for single rated voltage, for RATED VOLTAGE RANGE, it should cover 220V or 380V (three-phases), for multiple RATED VOLTAGES, one of them should be 220V or 380V (three-phases) and set on 220V or 380V (three-phases) when manufactured. And the RATED FREQUENCY or RATED FREQUENCY RANGE should be 50Hz or include 50Hz.	Class III equipment supplied by a separately certified adaptor.	N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 344

1.7.2.1	Add requirements of warning for equipment intended to be used at altitudes not exceeding 2000m or at non-tropical climate regions: For equipment intended to be used at altitude not exceeding 2000m, a warning label containing the following or a similar appropriate wording, or a symbol as in annex DD shall fixed to the equipment at readily visible place. "Only used at altitude not exceeding 2000m."  For equipment intended to be used in not-tropical climate regions, a warning label containing the following or a similar appropriate wording, or a symbol as in annex DD shall fixed to the equipment at readily visible place. "Only used in not-tropical climate regions."  If only the symbol used, the explanation of the symbol shall be contained in the instruction manual. The above statements shall be given in a language acceptable to the regions where the apparatus is intended to be used. If only the symbol used, the explanation of the symbol shall be contained in the instruction manual. The above statements shall be given in a language acceptable to the regions where the apparatus is intended to be used.	5000m and tropical.	N/A
2.7.1	Amended the first paragraph as: Protection in PRIMARY CIRCUITS against overcurrent short-circuits and earth faults shall be provided as an integral part of the equipment except special provisions. And the protective device shall meet the requirement of Clause 5.3. Delete note of Clause 2.7.1.	No such protective device	N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 345

2.9.2	First section of Clause 2.9.2 amended as two sections: Where required by 2.9.1, 2.10.8.3, 2.10.10 or 2.10.11, humidity conditioning is conducted for 120 h in a cabinet or room containing air with ambient temperature 40±2℃ and a relative humidity of (93±3)%. During this conditioning the component or subassembly is not energized. For equipment not to be operated at tropical climatic conditions, Where required by 2.9.1, 2.10.8.3, 2.10.10 or 2.10.11, humidity conditioning is conducted for 48 h in a cabinet or room containing air with a relative humidity of (93±3) %. Th e temperature of the air, at all places where samples can be located, is maintained within 2 ℃ of a ny convenient value between 20 ℃ and 30 ℃ such that condensation does not occur. Due to pretreatment of equipment operated at high altitude area is humidity conditioning withstand hot shock, specific requirements are to be considered. Add note: For equipment to be operated at 2000 m - 5000m above sea level, assessment and requirement of humidity conditioning for Insulation material properties are considered.	Class III equipment	N/A
2.10.3.1	Amend the third paragraph of Clause 2.10.3.1 to be: These requirements apply for equipment to be operated up to 2000 m above sea level. For equipment to be operated at more than 2000 m above sea level and up to 5000m above sea level, the minimum CLEARANCE shall be multiplied by the factor 1.48 corresponding altitude of 5000m given in Table A.2 of IEC 60664-1. For equipment to be operated at more than 5000 m above sea level, the minimum CLEARANCE shall be multiplied by the factor given in Table A.2 of IEC 60664-1. Linear interpolation is permitted between the nearest two points in Table A.2. The calculated minimum CLEARANCE using this multiplication factor shall be rounded up to the next higher 0,1 mm increment.	Class III equipment	N/A
2.10.3.3 & 2.10.3.4	Add "(applicable for altitude up to 2000m)" in header of Table 2K、2L and 2M.	Class III equipment	N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 346

2.10.3.4	Add a new section above Table 2K and in Clause 2.10.3.4: Minimum CLEARANCES determined by above rules apply for equipment to be operated up to 2000m above sea level. For equipment to be operated at 2000 m - 5000m above sea level, the minimum CLEARANCE shall be multiplied by the factor 1.48 corresponding altitude of 5000m given in Table A.2 of GB/T16935.1（ IEC 60664-1）. For equipment to be operated at more than 5000 m above sea level, the minimum CLEARANCE shall be multiplied by the factor given in Table A.2 of GB/T16935.1.	Class III equipment	N/A
3.2.1.1	Add a paragraph before the last paragraph: Plugs connected to AC mains supply shall comply with GB 1002 or GB 1003 or GB/T 11918 as applicable.	Class III equipment	N/A
4.2.8	Clause 4.2.8 cathode ray tubes quoted Clause 18 of GB8898-2011. Delete note of Clause 4.2.8.	No such equipment.	N/A
Annex E	Last section of Annex E amended as: For comparison of winding temperatures determined by the resistance method of this annex with the temperature limits of Table 4B, 35 °C shall be added to the calculated temperature rise. And add note: for equipment not to be operated at tropical climatic conditions, 25 ℃ shall be ad ded to the calculated temperature rise to compare with the temperature of Table 4B.	Thermocouple measurement method	N/A
Annex G.6	Change the second section of Clause G.6 to be: For equipment to be operated at 2000 m - 5000m above sea level, the minimum CLEARANCE shall be multiplied by the factor 1.48 corresponding altitude of 5000m given in Table A.2 of GB/T16935.1. For equipment to be operated at more than 5000 m above sea level, the minimum CLEARANCE shall be multiplied by the factor given in Table A.2 of IEC 60664-1. Linear interpolation is permitted between the nearest two points in Table A.2. The calculated minimum CLEARANCE using this multiplication factor shall be rounded up to the next higher 0,1 mm increment.	Must check with marketing into China.	—
Annex BB (informative)	Amended as : The differences between Chinese national standards GB 4943.1-2011 and GB 4943-2001.		P

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 347

Annex DD (normative)	Added annex DD: Instructions for the new safety warning labels. DD.1 Altitude warning label  Meaning of the label: Evaluation for apparatus only based on altitude not exceeding 2000m, therefor it's the only operating condition applied for the equipment .There may be some potential safety hazard if the equipment is used at altitude above 2000m . DD.2 Climate warning label  Meaning of the label: Evaluation for apparatus only based on temperate climate condition, therefor it's the only operating condition applied for the equipment .There may be some potential safety hazard if the equipment is used in tropical climate region.	5000m and tropical	N/A
Annex EE (informative)	Added annex EE: Illustration relative to safety explanation in normative Chinese、Tibetan、Mongolian、Zhuang Language and Uighu.	Must be considered when market into China.	—
Other amendments	In accordance with the relevant CTL decisions and the amendments of IEC 60950-1, the specific requirements or mistakes in IEC standard are corrected or editorially modified in this part, Including clause 1.7, 2.1.1.7, 2.9.2, Table 2H, Figure 2H, F.8, F.9, M.3 and Annex U.	Considered.	P

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 348

Quoting standards and reference documents	The principles of quoting and referring to other standards in Annex P and reference documents of IEC 60950-1 are as follows: If the date of the reference document is given, only that edition applies, excluding any subsequent corrigenda and amendments. However, parties to agreements based on this part are encouraged to investigate the possibility of applying the most recent editions of the reference documents. For undated references, the latest edition of the referenced document applies, including any corrigenda and amendments. For the usage of international standards in Chinese national standards and industry standards is various, in the aim of achieving easy operation and based on the requirements of GB/T 1.1 and GB/T 20000.2, when quoting an entire international standard in the normative quoting files and reference documents of Annex P of this part, the principles of quotation are as follows: - If there is no national standard or industry standard corresponding to the international standard, then the international standard is quoted; - If there is national standard or industry standard corresponding to the international standard, then either the national or industry standard is quoted; - If the date of the national standard or industry standard is not given, the latest edition of the standard applies; - The national standard or industry standard number, corresponding international standard number and the consistency level code should be identified in parentheses behind the listed national standard or industry standard. When quoting several chapters or clauses of the international standard, the principles of quotation are as follows: - If there is no national standard or industry standard corresponding to the international standard, then the international standard is quoted;	Considered.	P

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 349

	- If there is national standard or industry standard corresponding to the international standard, then either the national or industry standard is quoted. Meanwhile, in order to retain the relevant information on international standards, informative annex CC is increased, which gives the table about the comparison of the normative quoting files and reference documents in IEC 60950-1: 2005 and GB4943.1-2011.

	National Differences		
Chapter 4.2	**Special national conditions (if any)** Controlled goods under the Consumer Protection (Safety Requirements) Registration Scheme (CPS) are required to be tested to additional requirements stipulated by the Consumer Product Safety Office (CPSO) of Enterprise Singapore in Chapter 4.2 of the CPS information booklet. The CPS information booklet is updated on an ongoing basis. At the point of testing, refer to the latest copy of the CPS information booklet for the minimum edition of standard to apply for testing of products under the CPS scheme and any new requirements. Link to CPS information booklet: https://www.consumerproductsafety.gov.sg/files/cps-info-booklet.pdf		-
Clause 1	All appliances must be tested to 230 VAC, 50 Hz.	Class III equipment	N/A
2	Circuit diagrams must be indicated with component's values for products tested to IEC 60065 and IEC 60950.		P
4	Appliance fitted with voltage selector shall be tested as follows: Connect appliance to 230 VAC mains with voltage selector switch to settings not suitable for operation at 230 VAC.		N/A
5	All appliances (with tropical test requirements in applicable Standards) shall comply with the tropical condition test as stated in the relevant IEC Standards.		P

IEC60950_1G ATTACHMENT			
Clause	Requirement + Test	Result - Remark	Verdict
7	All Class I appliances must be fitted with 3-pin mains plugs that are registered with the CPSO.	Class III equipment	N/A
8	a) All Class II appliances must be fitted with 2-pin mains plug complying with EN 50075. b) Class II appliances that are fitted with 3-pin mains plugs must use plugs that are registered with the CPSO.	Class III equipment	N/A
9	Detachable power cord set must be listed in the test report critical component list.		N/A
14	AC Adaptor incorporated with 13A socket-outlet to be tested to additional tests clauses 13, 17 and 18 of SS 145-3: 2020.		N/A
15	Supplier who is supplying AC adaptors with detachable interchangeable plug pins must include with its products, written instructions to inform customers on the type of detachable interchangeable plug pins that are approved and suitable to use in Singapore. These instructions are to be submitted to the Conformity Assessment Body for verification when applying for Certificate of Conformity.		N/A
16	For AC Adaptors supplied together with Personal Mobility Devices: 1. Registered Supplier to declare the model of the AC adaptor that is to be used with/ bundled together with the PMDs; 2. Registered Supplier to provide valid IEC 60950-1 or IEC 62368-1 test reports for certification and registration of the declared AC adaptor under the CPS scheme; and 3. Registered Supplier to provide the UL 2272 test report as a supporting document, showing that the listed AC adaptor in the UL 2272 test report is the model declared to be used with/ bundled together with the PMDs.		N/A
18	CD/ DVD ROMs (used in personal computers) to have test certificate showing that CD/DVD ROM drive has complied with IEC 60825- 1.		N/A
19	Modem card incorporated in the personal computer must be tested at set level (sub-clauses 5.1 & 6 of IEC 60950) or at component level.		N/A
20	Powerline Ethernet Adaptor incorporated with 13A socket-outlet, to be tested to additional test clauses 13, 17 & 18 of SS 145-3: 2020.		N/A

IEC60950_1G ATTACHMENT			
Clause	Requirement + Test	Result - Remark	Verdict
46	Plasma/LCD display monitor tested to IEC 60950 would require additional test to clauses 9 (related to antenna only), 10.1, 10.2, 10.3 and 12.5 of IEC 60065.		N/A
	Other additional requirements which may be included in Chapter 4.2 of the information booklet in ongoing basis at the time of testing.		N/A

	National Differences		—
1.6	**Power interface**		—
1.6.1	**AC Power distribution systems** At the end of the clause, the following note shall be added: Note: In Israel, the clause is subject to the Electricity Law. 1954, Electricity Regulations (Earthings and protective means against electrification for voltages up to 1,000 V), 1991, with their updates.	Must be considered when marketing into Israel.	—
1.7	**Marking and instructions**		—
1.7.1	**Power rating and identification markings** At the beginning of the clause, subclause 1.7.1.201 shall be added as follows:		—
1.7.1.201	**Marking in the Hebrew language** The marking in the Hebrew language shall be in accordance with the Consumer Protection Order (Marking of goods), 1983. In addition to the marking required by clause 1.7.1, the following details shall be marked in the Hebrew language: 1.Name of the apparatus and its commercial designation; 2.Manufacturer's name and his address; if the apparatus is imported, also the importer's name and his address; 3.Manufacturer's registered trademark, if any; 4.Name of the model and serial number; 5.Country of manufacture. The details shall be marked on the apparatus or on its packaging, or on a label well attached to the apparatus or its packaging, by bonding or sewing, such that the label cannot be easily removed.	Must be considered when marketing into Israel.	—
1.7.2	**Safety instructions and marking**		—
1.7.2.1	**General** - The following shall be added at the end of the clause: All the instruction and all the warnings related to safety shall also be written also in the Hebrew language.	Must be considered when marketing into Israel.	—
-	At the end of clause 1, clause 1.201 shall be added as follows:		

1.201	**Power consumption in standby mode** The equipment shall comply with the requirements of the Energy Sources Regulations (Maximum electrical power in standby mode for domestic and office electrical appliances), 2011, with a permitted deviation of up to 10 %	Must be considered before marketed in Israel.	—
2	**Protection from hazards** At the end of the clause, clause 2.201 shall be added as follows:		—
2.201	**Prevention of electromagnetic interferences**		—
2.201.1	Emission of electromagnetic interferences shall be tested in accordance with Israeli Standard SI 961 Part 6.1 or in accordance with the Israeli Standard that is an adoption of the International Standard CISPR 32. Note: At the time of writing this Standard, the Israeli Standard that is an adoption of the International Standard CISPR 32 is in preparation. Until publication of the Israeli Standard. the International Standard CISPR 32 may be used for testing the emission of electromagnetic interference. If the apparatus contains transmitters, it shall be tested according to Israeli Standard SI 961 Part 48.1 and according to another relevant part of the SI 961 Part 48 series or from the EN 301 489 series, according to the type of transmitter in the apparatus.	Must be considered before marketed in Israel.	—
2.201.2	Immunity to emission of electromagnetic interferences shall be tested in accordance with Israeli Standard SI 961 Part 6.2.	Must be considered before marketed in Israel.	—
2.201.3	Emission of electromagnetic interferences to the public electricity network shall be tested in accordance with the Israeli Standards SI 961 Parts 12.3 and 12.5 or in accordance with the Israeli Standards SI 61000 Part 3.12 and SI 961 Part 12.11, according to the current consumption of the equipment.	Must be considered before marketed in Israel.	—
3	**Wiring, connections and supply**		—
3.2	**Connection to a mains supply**		—
3.2.1	**Means of connection**		—
3.2.1.1	**Connection to an a.c. mains supply** After the NOTE, the following note shall be added: Note: In Israel, the supply plug shall comply with the requirements in Israeli Standard SI 32 Part I.I.	Refer to Summary of Testing in main test report.	—

	Special national conditions (if any)		—
	ANNEX P **Normative references** In place of some of the International Standards cited in the Standard and noted in this annex, the following Israeli Standards shall apply:	Must be considered before marketed in Israel.	—

The referenced International Standard	The substituted Israeli Standard	Comments
IEC 60065: 2001 Amendment 1	SI 60065 - Audio, video and similar electronic apparatus – Safety requirements	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60065 - Edition 8.0: 2014-06
IEC 60227-1: 2007	SI 60227 Part l – Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V: General requirements	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60227-1 - Edition 3.0: 2007-10
IEC 60227-2: 1997 Amendment 1: 2003	SI 6022 7 Part 2 – Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V: Test methods	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60227-2 Edition 2.1: 2003-04
IEC 60245 (all parts)	SI 60245 (all parts) - Rubber insulated cables - Rated voltages up to and including 450/750 V	The Israeli Standard series, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard series IEC 60245 (all parts)
IEC 60309 (all parts) [(a)]	SI 1109 Part l - Plugs, socket-outlets and couplers for industrial purposes: General requirements	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60309-1 - Fourth edition: 1999-02
	SI 1109 Part 2 - Plugs, socket- outlets and couplers for industrial purposes: Dimensional interchangeability requirements for pin and contact-tube accessories	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60309-2 - Fourth edition: 1999-4

The referenced International Standard	The substituted Israeli Standard	Comments
IEC 60317 (all parts) [a]	SI 1067 Part 1 – Enamelled [b] round copper wires with high mechanical properties	The Israeli Standard is identical to the International Electrotechnical Commission Standard IEC 317-1: 1980-02
	SI 1067 Part 2 – Self-fluxing enamelled [b] round copper wires	The Israeli Standard is identical to the International Electrotechnical Commission Standard IEC 317-1: 1980-02
	SI 1067 Part 3 – enamelled [b] round copper wires with a temperature index of 180 ℃	The Israeli Standard is identical to the International Electrotechnical Commission Standard IEC 317-1: 1980-02
IEC 60320 (all parts) [a]	SI 60320 Part 1 – Appliance couplers for household and similar general purposes: General requirements	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60320-1 - Edition 2.1: 2007-11
	SI 60320 Part 2.1 – Appliance couplers for household and similar general purposes: Sewing machine couplers	The Israeli Standard, excluding nation al modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60320-2-1 - Second edition: 2000-07
	SI 60320 Part 2.2 – Appliance couplers for household and similar general purposes: Interconnection couplers for household and similar equipment	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60320-2-2 - Second edition: 1998-08
	SI 60320 Part 2.3 – Appliance couplers for household and similar general purposes: appliance coupler with a degree of protect ion higher than IPX0	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60320-2-3 - First edition: 1998-09
IEC 60364-1: 2001	Electricity Law, 1954, with its Regulations and updates	
IEC 60730-1: 1999 Amendment 1 (2003)	SI 60730 Part I - Automatic electrical controls: General requirements	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60730-1 - Edition 5.0: 2013-11

The referenced International Standard	The substituted Israeli Standard	Comments
IEC 60825-1	SI 60825 Part 1 – Safety of laser products: Equipment classification and requirements	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60825-1 – Second edition: 2007-03
IEC 60825-2	SI 60825 Part 2 – Safety of laser products: Safety of optical fibre communication systems (OFCS)	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60825-2 – Edition 3.2: 2010-12
IEC 60825-12	SI 60825 Part 2 – Safety of laser products: Safety of free space optical communication systems used for transmission of information	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60825-12 – First Edition: 2004-02
IEC 60947-1: 2004	SI 60947 Part l – Low-voltage switchgear and controlgear: General rules	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60947-1 – Edition 5.0: 2007-06
IEC 60998-1	SI 60998 Part 1 – Connecting devices for low-voltage circuits for household and similar purposes: General requirements	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60998-1 – Second Edition: 2002-12
IEC 60999-1	SI 60999 Part 1 – Connecting devices - Electrical copper conductors - Safety requirements for screw-type and screwless-type clamping units: General requirements and particular requirements for clamping units for conductors from 0.2 mm^2 up to 35 mm^2 (included)	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60999-1 – Second Edition: 1999
IEC 60999-2	SI 60999 Part 2 – Connecting devices - Electrical copper conductors - Safety requirements for screw-type and screwless-type clamping units: Particular requirements for clamping units for conductors above 35 mm^2 up to 300 mm^2 (included)	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 60999-2 – Second Edition: 2003-05

The referenced International Standard	The substituted Israeli Standard	Comments
IEC 61058-1: 2000	SJ 61058 Part l - Switches for appliances: General requirements	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 61058-1 – Edition 3.2: 2008-04
IEC 62471: 2006	SI 62471 – Photobiological safety of lamps and lamp systems	The Israeli Standard, excluding national modifications and additions, is identical to the International Electrotechnical Commission Standard IEC 62471 (CIE S 009: 2002) – First edition: 2006-07
ISO 262	SI 876 – ISO general purpose metric screw thread: Basic dimension and selected sizes for screws	The Israeli Standard is based on the International Organization for Standardization publications ISO R 724 - 1968 ISO 262 - 1973
ISO 3864 (all parts) [(a)]	SI 3864 Part l – Graphic symbols – Safety colours and safety signs: Design principles for safety signs in workplaces and public areas	The Israeli Standard, excluding national modifications and additions, is identical to the International Organization for Standardization Standard ISO 3864-1: First edition: 2002-05-15
Notes: (a) In the International Standard series, there are parts not yet adopted as Israeli Standards. This table notes the existing Israeli Standards, and in the Comments column, the corresponding parts of the International Standard series. (b) Not relevant to the translation.		

The following shall be added to the annex:	
Israeli Standards	
SI 32 Part 1.1	Plugs and socket-outlets for household and similar purposes: Plugs and socket-outlets for single phase up to 16A – General requirements
SI 961 Part 6.1	Electromagnetic compatibility: Information technology equipment – Radio disturbance characteristics – Limits and methods of measurement
SI 961 Part 6.2	Electromagnetic compatibility: Information technology equipment – Immunity characteristics - Limits and methods of measurement
SI 961 Part 12.3	Electromagnetic compatibility: Limits – Limits for harmonic current emissions (equipment input current ≦16 A per phase)
SI 961 Part 12.5	Electromagnetic compatibility: Limits – Limitation of voltage changes, voltage fluctuations and flicker in public low-voltage supply systems, for equipment with rated current ≦ 16 A per phase and subject to conditional connection
SI 961 Part 12.11	Electromagnetic compatibility: Limits – Limitation of voltage changes voltage fluctuations and flicker in public low-voltage supply systems for equipment with rated current ≦ 75 A and subject to conditional connection
SI 961 Part 48 (all parts)	Electromagnetic compatibility: Electromagnetic compatibility (EMC) for radio equipment and services
SI 961 Part 48.1	Electromagnetic compatibility: Electromagnetic compatibility (EMC) for radio equipment and services – Common technical requirements
SI 61000 Part 3.12	Electromagnetic compatibility: Limits – Limits for harmonic currents produced by equipment connected to public low-voltage systems with input current > 16 A and ≦ 75 A per phase

Israeli Laws, Regulations and documents Electricity Law, 1954, with its Regulations and updates Consumer Protection Order (Marking of goods), 1983, Kovetz HaTakanot 4465 dated 1983-02-24, with its updates Electricity Regulations (Earthings and protective means against electrification for voltages up to 1,000 V), 1991, with their updates Energy Sources Regulations (Maximum electrical power in standby mode for domestic and office electrical appliances), 2011, with its updates	
European Standards	
EN 301 489 (all parts)	Electromagnetic compatibility and Radio spectrum Matters (ERM); Electromagnetic Compatibility (EMC) standard for radio equipment and services

Product Noise Declaration in Compliance with ISO 7779 and ISO 9296

ThinkCentre M70q Gen 5

Ⅰ.Configuration Information[1]

Components	High Configuration
FFs	1L
CPU	Intel i7-14700T 1.3GHz/20C/32T/33M 35W vPro
Memory	32GB 5600 DDR5 SODIMM
SSD	M.2 2280 Performance 1TB PCIe Gen4
VGA	Onboard graphic
PSU	Tiny PC 135W 89% adapter
FSC Mode	BP

Ⅱ.Machine Types

MT	12TD,12TE,12TF,12TG,12TN,12TQ,12TR,12TS

Ⅲ.Acoustic Noise Emissions Declaration[2]

High Configuration			
Stress Mode	L_{WAd}(bels)	L_{pAm}(dBA)	
		Operator	Bystander
Idle	2.8	19	18
Disk Operating	2.9	21	20
Test Photos			

Legend:

L_{WAd} -Declared (upper limit) A-weighted sound power levels for a random sample of machines, in bels.

L_{pAm} -Measured A-weighted sound pressure levels for a random sample of machines, in dBA

Operator -Mean value of A-weighted sound pressure levels at the operator position, for a random sample of machines, in dBA. The operator position is located 0.5m away from the front of unit.

Bystander -Mean value of A-weighted SPLs averaged over four bystander positions, for a random sample of machines, in dBA. The bystander position is located 1.0m away from the edge of unit

Idle -Indicates idle condition (system is powered on, but no disk activity).

Disk Operating -Indicates HDD or SSD operating condition (disk drive is randomly seeking).

Notes:

1. All test are performed according to ISO 7779 and declared according to ISO 9296.
2. The declared acoustic noise value is based on a typically configured product. If optional items be added or removed, the acoustic noise value should be changed correspondingly.

Approved by:Sophia Liu ***Signed by: yangwp3***

Issued Date: 2024/3/1

Ⅳ.Appendix: CNAS 17025 certificate

China National Accreditation Service for Conformity Assessment

LABORATORY ACCREDITATION CERTIFICATE

(Registration No. CNAS L2356)

Lenovo (Beijing) Co., Ltd. Reliability Laboratory

(Legal Entity: Lenovo (Beijing) Co., Ltd.)

Building 2, No.10, Xibeiwang East Road, Haidian District, Beijing, China

is accredited in accordance with ISO/IEC 17025: 2017 General Requirements for the Competence of Testing and Calibration Laboratories(CNAS-CL01 Accreditation Criteria for the Competence of Testing and Calibration Laboratories) for the competence to undertake the service described in the schedule attached to this certificate.

The scope of accreditation is detailed in the attached schedule bearing the same registration number as above. The schedule forms an integral part of this certificate.

Effective Date: 2023-01-18

Expiry Date: 2029-01-18

Signed on behalf of China National Accreditation Service for Conformity Assessment

China National Accreditation Service for Conformity Assessment (CNAS) is authorized by Certification and Accreditation Administration of the People's Republic of China (CNCA) to operate the national accreditation scheme for conformity assessment. CNAS is a signatory of the International Laboratory Accreditation Cooperation Mutual Recognition Arrangement (ILAC-MRA) and the Asia Pacific Accreditation Cooperation Mutual Recognition Arrangement (APAC MRA).

The validity of the certificate can be checked on CNAS website at http://www.cnas.org.cn/english/findanaccreditedbody/index.shtml

COMPUTERS & DISPLAYS

Product Summary:

Product Type:	Desktop
Registered In:	United States
Manufacturer:	Lenovo
EPEAT Tier:	Gold
Registration Date:	2024-06-14
Product Status:	Active
EPEAT Climate+:	Achieved 2024-06-14
Manufacturer Part Number(s):	12TD, 12TE, 12TF, 12TG, 13E2

All unique product identifiers existing for this product may not be listed here. If the unique product identifier you are looking for is not listed, please contact EPEAT at EPEAT@GEC.org.

EXPORT PRODUCT SUMMARY

EPEAT Tier Score Detail

For a product to be listed on the EPEAT Registry, it must, at a minimum, meet the applicable "required" criteria. Click here to see a list of the required criteria for this product category.

This product has met the necessary required criteria.

Along with required criteria, products can also meet optional criteria and score optional points. It is not required for a product to achieve any optional points.

Products that meet all required criteria and	Products that meet all required criteria and	Products that meet all required criteria and

achieve **less than 50%** of the optional points are rated at **EPEAT Bronze**	achieve **50 - 74%** of the optional points are rated at **EPEAT Silver**	achieve **75 - 100%** of the optional points are rated at **EPEAT Gold**

The optional criteria for this product category and optional points achieved by this product are listed below.

Optional Criteria	Scores
4.1 Substance Management	**11 / 16**
(4.1.2.1) Restrictions of the use of cadmium	1
(4.1.4.1) Restriction of the use of beryllium	1
(4.1.5.2) Further reduction of bromine and chlorine content of plastic materials	0
(4.1.6.1) Avoidance or elimination of substances on EU REACH Annex XIV (authorization list)	1
(4.1.6.2) Reduction of substances on the EU REACH Candidate List of SVHCs	0
(4.1.8.1) Chemical assessment and selection	0
(4.1.9.1) IEC 62474 declarable substances	1
(4.1.9.2) Requesting substance inventory	1
(4.1.9.3) Acquiring substance inventory	2
(4.1.10.1) Reduce fluorinated gas emissions from flat panel display manufacturing	2
(4.1.10.2) Reduce fluorinated greenhouse emissions from semiconductor production	2
4.4 Product longevity/life-cycle extension	**2 / 2**
(4.4.2.2) Publicly available service information	1
(4.4.2.5) Product upgradeability and repairability	1
4.5 Energy Conservation	**1 / 3**

(4.5.1.4) Energy efficiency for external power supplies exceeding International External Power Supply Efficiency Level VI	1
(4.5.1.5) Product energy consumption less than the ENERGY STAR Maximum Energy Limit	0

4.7 Packaging — 2 / 2

(4.7.3.2) Packaging composed of recycled, and/or biobased, and/or sustainably forested content	1
(4.7.4.1) Offering of a bulk packaging option	1

4.8 Life cycle assessment and carbon footprint — 6 / 6

(4.8.1.1) Product life cycle assessment and public disclosure of analyses	2
(4.8.1.2) Product specific greenhouse gas emissions—product carbon footprint	2
(4.8.2.1) Corporate carbon footprint	1
(4.8.2.2) Greenhouse gas emissions from product transport	1

4.9 Corporate Environmental Performance — 9 / 9

(4.9.1.2) Third party certified environmental management system (EMS) for supplier manufacturing facilities	1
(4.9.2.2) Corporate environmental performance reporting by suppliers	1
(4.9.3.1) Energy management system/energy performance improvement –manufacturers	1
(4.9.3.2) Energy management system/energy performance improvement for suppliers	2
(4.9.4.1) Renewable energy use by manufacturer	2
(4.9.4.2) Renewable energy use by manufacturer suppliers	2

4.10 Corporate social responsibility	**2 / 6**
▪ (4.10.1.1) Socially responsible manufacturing: Labor	0
▪ (4.10.1.2) Socially responsible manufacturing: OHS	0
▪ (4.10.2.2) Participation in an in-region program that advances responsible sourcing of conflict minerals	1
▪ (4.10.2.3) Smelter and refiner participation in OECD-aligned third party mechanisms	1
TOTAL OPTIONAL CRITERIA SCORE:	**33 / 44**

Please note that it is not required for a product to achieve any optional points.

Some optional criteria may not be applicable to a product. Optional criteria that are not applicable (N/A) to the product are not included in the Total Optional Criteria Score, and are not reflected above.

Annex B2 - Product environmental attributes
Computers and computer monitors

The declaration may be published only when all rows and/or fields marked with * are filled-in (N/A for not applicable). Additional information regarding each item may be found under P15.

Brand *	***Lenovo***	Logo
Company name *	***Lenovo***	
Contact information * e-mail address	***Lenovo Environmental Social and Governance*** ***environment@lenovo.com***	
Internet site *	***https://www.lenovo.com/us/en/sustainability-resources/***	
Additional information	***The latest version of this document can be found at:*** ***http://www.lenovo.com/ecodeclaration***	

The company declares (based on product specification or test results based obtained from sample testing), that the product conforms to the statements given in this declaration.	
Type of product *	***Desktop Computer***
Commercial name *	***ThinkCentre M70q Gen5***
Model number *	***12TD,12TE,12TF,12TG***
Issue date *	***2024-04-08***
Intended market *	☒ **Global** ☒ **Europe** ☒ **Asia, Pacific & Japan** ☒ **Americas** ☐ **Other**
Additional information	***EPEAT(12TD,12TE,12TF,12TG);Energy Star(12TD,12TE,12TF,12TG);TCO(12TD,12TE,12TF,12TG)***

This is an uncontrolled copy when in printed form. Please refer to the contact information for the latest version.

About Annex B2
Annex B2 reflects Product environmental attributes relevant for Computers and Computer Monitors. The following items from the ECMA-370 Main body are not shown in the template:
P4.1 – P4.3 Consumable materials
P9.1 TEC and Print speed
P10.2 - P10.3 Chemical emissions from printing products
P11.1 - P11.3 Consumable materials for printing products.

Anexo PROPOSTA ITEM 1 - ER SOLUÇÕES (1661785) SEI 2025.001317 / pg. 384

Model number *	***12TD,12TE,12TF,12TG***	**Logo**	Lenovo
Issue date *	***2024-04-08***		

Product environmental attributes - Legal requirements		**Requirement met**		
Item		Yes	No	N/A
P1	**Hazardous substances and preparations**			
P1.1*	Products comply with current European RoHS Directive. (See legal reference and NOTE B1)	☒	☐	
P1.2*	Products do not contain Asbestos (See legal reference) Comment: Legal reference has no maximum concentration value.	☒	☐	
P1.3*	Products do not contain Ozone Depleting Substances: Chlorofluorocarbons (CFC), hydrobromofluorocarbons (HBFC), hydrochlorofluorcarbons (HCFC), Halons, carbontetrachloride, 1,1,1-trichloroethane, methyl bromide (See legal reference). Comment: Legal reference has no maximum concentration values	☒	☐	
P1.4*	Products do not contain more than; 0,005% polychlorinated biphenyl (PCB), 0,005% polychlorinated terphenyl (PCT) in preparations (See legal reference)	☒	☐	
P1.5*	Products do not contain more than 0,1% short chain chloroparaffins (SCCP) with 10-13 carbon atoms in the chain containing at least 48% per mass of chlorine in the SCCP (See legal reference)	☒	☐	
P1.6*	Parts with direct and prolonged skin contact do not release nickel in concentrations above 0,5 μg/cm²/week (See legal reference) Comment: Max limit in legal reference when tested according to EN1811:2011-5	☒	☐	☐
P1.7*	REACH Article 33 information about substances in articles is available at (add URL or mail contact): ***https://www.lenovo.com/us/en/Lenovo-REACH-SVHC-Disclosure***	☒	☐	☐
P2	**Batteries**			
P2.1*	If the product contains a battery or an accumulator, the battery/accumulator is labeled with the disposal symbol. Information on proper disposal is provided in user manual. (See legal reference)	☒	☐	☐
P2.2*	Batteries or accumulators do not contain more than 0,0005% of mercury or 0,002% of cadmium. (See legal reference)	☒	☐	☐
P2.3*	Batteries and accumulators are readily removable. (See legal reference)	☒	☐	☐
P2.4*	Documentation includes the number of cycles the (secondary) battery can withstand. (See legal reference)	☒	☐	☐
P2.5*	When internal batteries of a notebook computer cannot be “accessed and replaced by a nonprofessional user”, the related text is present and legible on the external packaging (See legal reference)	☒	☐	☐
P3	**Conformity verification & Eco design (ErP)**			
P3.1*	The product is CE-marked to show conformance with applicable legal requirements (see legal reference). The Declaration of Conformity can be requested at (add link or e-mail address): ***https://www.lenovo.com/us/en/compliance/eu-doc for EU*** ***https://www.lenovo.com/us/en/compliance/uk-doc for UK***	☒	☐	☐
P3.2*	The product complies with the applicable Eco design requirements for energy-related products, (See legal reference)	☒	☐	☐
	Required information is; ☒ given in item P15 or added to this document, ☒ available at (add URL): ***http://www.lenovo.com/ecodeclaration***	☒	☐	☐
P5	**Product packaging**			
P5.1*	Packaging and packaging components do not contain more than 0,01% lead, mercury, cadmium and hexavalent chromium by weight of these together	☒	☐	
P5.2*	The packaging materials are marked with abbreviations and numbers indicating the nature of the material(s) used (See legal reference)	☒	☐	☐
P5.3*	The product packaging material is free from ozone depleting substances as specified in the Montreal Protocol (See legal reference) Comment: Legal reference has no maximum concentration values	☒	☐	☐
P6	**Treatment information**			
P6.1*	Information for recyclers/treatment facilities is available (***https://lenovo.com/recycling***).	☒	☐	☐

NOTE B1 Restriction applies to the homogeneous material, unless other specified and expressed in weight %. Stating “Yes” means that the product is compliant with the mandatory requirements.

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 385

Model number *	***12TD,12TE,12TF,12TG***	**Logo**	Lenovo
Issue date *	***2024-04-08***		

Product environmental attributes - Market requirements (See General NOTE GN below) **- Environmental conscious design**		**Requirement met**		
Item	*=mandatory to fill in. Additional information regarding each item may be found under P14.	Yes	No	N/A
P7	**Design** **Disassembly, recycling**			
P7.1*	Parts that have to be treated separately are easily separable	☒	☐	☐
P7.2*	Plastic materials in covers/housing have no surface coating	☐	☒	☐
P7.3*	Plastic parts > 100 g consist of one material or of easily separable materials	☐	☐	☒
P7.4*	Plastic parts > 25 g have material codes according to ISO 11469 referring ISO 1043-4	☐	☐	☒
P7.5	Plastic parts are free from metal inlays or have inlays that can be removed with commonly available tools	☒	☐	☐
P7.6*	Labels are easily separable (This requirement does not apply to safety/regulatory labels)	☒	☐	☐
	Product lifetime			
P7.7*	Upgrading can be done e.g. with processor, memory, cards or drives	☒	☐	☐
P7.8*	Upgrading can be done using commonly available tools	☒	☐	☐
P7.9	Spare parts are available after end of production for: ***4*** years			☐
P7.10	Service is available after end of production for: ***4*** years			☐
	Material and substance requirements			
P7.11*	Product cover/housing material type (e.g. plastics, metal, aluminum): Material type: ***SGCC*** Material type: ***PC/PC+ABS*** Material type: ***PC*** Material type: ***ABS*** Material type: ***PC+ABS*** Material type:			
P7.12	Insulation materials of external electrical cables are PVC free	☐	☒	☐
P7.13	Insulation materials of internal electrical cables are PVC free	☐	☒	☐
P7.14	External plastic casing/cover parts > 25 g contain no more than 0,1% weight (1000 ppm) bromine and 0,1% weight (1000 ppm) chlorine attributable to brominated flame retardants, chlorinated flame retardants, and polyvinyl chloride or 0,3% weight (3000 ppm) bromine and 0,3% weight (3000 ppm) chlorine in parts containing more than 25% post-consumer recycled content	☐	☐	☒
P7.15	Printed circuit boards, PCBs (without components) are low halogen as defined in IEC 61249-2-21. (See NOTE B2): Only PCBs > 25g ☐ or All PCBs ☐	☐	☒	☐
P7.16	Flame retarded plastic parts > 25 g in covers / housings are marked according to ISO 1043-4: Marking:	☐	☐	☒
P7.17	Alt. 1: Chemical specifications of flame retardants in printed circuit boards > 25 g (without components): TBBPA (additive) ☐, TBBPA (reactive) ☒ (See NOTE B3), Other; chemical name: , CAS #: Alt. 2: Chemical specifications of flame retardants in printed circuit boards (without components) > 25 g according to ISO 1043-4:	☒ ☒	☐ ☐	☐ ☐
P7.18	Alt. 1: Flame retarded plastic parts > 25 g contain the following flame retardant substances/preparations in concentrations above 0,1%: 1. Chemical name: , CAS #: (See NOTE B4) 2. Chemical name: , CAS #: " 3. Chemical name: , CAS #: " Alt. 2: Chemical specifications of flame retardants in plastic parts > 25 g according to ISO 1043-4:	☐ ☐	☐ ☐	☒ ☒
P7.19	In plastic parts > 25 g, flame retardant substances/preparations above 0,1% are used which have been assigned the following Risk phrases; and Hazard statements: The source(s) for these classifications is/are found at (add URL(s)): , (See NOTE B5)	☐	☐	☒

GENERAL NOTE Standard references should direct to the latest version of a standard. If an older version of a standard is used, section P15 shall be used for explanation.

NOTE B2 IEC 61249-2-21 defines maximum limits of 900 ppm for each of the substances chlorine and bromine and a maximum limit of 1500ppm of these substances combined. The standard does not address fluorine, iodine and astatine which are included in the group of halogens.

NOTE B3 and B4 A Guidance document on Chemical substances is available; see http://www.ecma-international.org/publications/standards/Ecma-370.htm.

NOTE B5 If a certain substance has been assigned a certain risk phrases / hazard statement in the referenced source, this does not necessarily mean the substance has been tested for all of the hazards referred to by a certain customer.

About Annex B2

Annex B2 reflects Product environmental attributes relevant for Computers and Computer Monitors. The following items from the ECMA-370 Main body are not shown in the template:
P4.1 – P4.3 Consumable materials
P9.1 TEC and Print speed
P10.2 - P10.3 Chemical emissions from printing products
P11.1 - P11.3 Consumable materials for printing products.

Product environmental attributes - Legal requirements		**Requirement met**		
Item		Yes	No	n.a.
P1	**Hazardous substances and preparations**			
P1.1*	Products do comply with current European RoHS Directive. (See legal reference and NOTE B1)	☒	☐	
P1.2*	Products do not contain Asbestos (see legal reference). Comment: Legal reference has no maximum concentration value.	☒	☐	
P1.3*	Products do not contain Ozone Depleting Substances: Chlorofluorocarbons (CFC), hydrobromofluorocarbons (HBFC), hydrochlorofluorcarbons (HCFC), Halons, carbontetrachloride, 1,1,1-trichloroethane, methyl bromide (see legal reference). Comment: Legal reference has no maximum concentration values.	☒	☐	
P1.4*	Products do not contain more than; 0,005% polychlorinated biphenyl (PCB), 0,005% polychlorinated terphenyl (PCT) in preparations (see legal reference).	☒	☐	
P1.5*	Products do not contain more than 0,1% short chain chloroparaffins (SCCP) with 10-13 carbon atoms in the chain containing at least 48% per mass of chlorine in the SCCP (see legal reference).	☒	☐	
P1.6*	Parts with direct and prolonged skin contact do not release nickel in concentrations above 0,5 µg/cm^2/week (see legal reference). Comment: Max limit in legal reference when tested according to EN1811:2011-5.	☒	☐	☐
P1.7*	REACH Article 33 information about substances in articles is available at (add URL or mail contact): *https://www.lenovo.com/us/en/Lenovo-REACH-SVHC-Disclosure*	☒	☐	☐
P2	**Batteries**			
P2.1*	If the product contains a battery or an accumulator, the battery/accumulator is labeled with the disposal symbol. Information on proper disposal is provided in user manual. (See legal reference)	☐	☐	☒
P2.2*	Batteries or accumulators do not contain more than 0,0005% of mercury or 0,002% of cadmium. (See legal reference)	☐	☐	☒
P2.3*	Batteries and accumulators are readily removable. (See legal reference)	☐	☐	☒
P3	**Conformity verification & Eco design (ErP)**			
P3.1*	The product is CE-marked to show conformance with applicable legal requirements (see legal reference). The Declaration of Conformity can be requested at (add link or e-mail address): *https://www.lenovo.com/us/en/compliance/eu-doc*	☒	☐	☐
P3.2*	The product complies with the Eco design requirements for energy-related products, (see legal reference).	☒	☐	☐
	Required information is; ☐ given in item P15 or added to this document, ☒ available at (add URL): ***https://www.lenovo.com/us/en/compliance/eco-declaration***	☒	☐	☐
P5	**Product packaging**			
P5.1*	Packaging and packaging components do not contain more than 0,01% lead, mercury, cadmium and hexavalent chromium by weight of these together.	☒	☐	
P5.2*	The packaging materials are marked with abbreviations and numbers indicating the nature of the material(s) used (see legal reference).	☒	☐	☐
P5.3*	The product packaging material is free from ozone depleting substances as specified in the Montreal Protocol (see legal reference). Comment: Legal reference has no maximum concentration values.	☒	☐	☐
P6	**Treatment information**			
P6.1*	Information for recyclers/treatment facilities is available (see legal reference).	☒	☐	☐

NOTE B1 Restriction applies to the homogeneous material, unless other specified and expressed in weight %. Stating "Yes" means that the product is compliant with the mandatory requirements.

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 394

Model number *	***12NA/12NB/12NC***	**Logo**	
Issue date *	***2023/3/1***		

Product environmental attributes - Market requirements (See General NOTE GN below) **- Environmental conscious design**		**Requirement met**		
Item	*=mandatory to fill in. Additional information regarding each item may be found under P14.	Yes	No	n.a.
P7	**Design** **Disassembly, recycling**			
P7.1*	Parts that have to be treated separately are easily separable	☒	☐	☐
P7.2*	Plastic materials in covers/housing have no surface coating.	☒	☐	☐
P7.3*	Plastic parts > 100 g consist of one material or of easily separable materials.	☒	☐	☐
P7.4*	Plastic parts > 25 g have material codes according to ISO 11469 referring ISO 1043-4.	☒	☐	☐
P7.5	Plastic parts are free from metal inlays or have inlays that can be removed with commonly available tools.	☒	☐	☐
P7.6*	Labels are easily separable. (This requirement does not apply to safety/regulatory labels).	☒	☐	☐
	Product lifetime			
P7.7*	Upgrading can be done e.g. with processor, memory, cards or drives	☐	☐	☒
P7.8*	Upgrading can be done using commonly available tools	☐	☐	☒
P7.9	Spare parts are available after end of production for: 5 years			☐
P7.10	Service is available after end of production for: 5 years			☐
	Material and substance requirements			
P7.11*	Product cover/housing material type (e.g. plastics, metal, aluminum): Material type: ***ABS*** Material type: ***PC*** Material type:			
P7.12	Insulation materials of external electrical cables are PVC free.	☐	☒	☐
P7.13	Insulation materials of internal electrical cables are PVC free.	☐	☒	☐
P7.14	External plastic casing/cover parts > 25 g contain no more than 0,1% weight (1000 ppm) bromine and 0,1% weight (1000 ppm) chlorine attributable to brominated flame retardants, chlorinated flame retardants, and polyvinyl chloride or 0,3% weight (3000 ppm) bromine and 0,3% weight (3000 ppm) chlorine in parts containing more than 25% post-consumer recycled content.	☒	☐	☐
P7.15	Printed circuit boards, PCBs (without components) are low halogen: all ☒ PCBs > 25 g ☐ are low halogen as defined in IEC 61249-2-21. (See 1NOTE B2)	☐	☒	☐
P7.16	Flame retarded plastic parts > 25 g in covers / housings are marked according ISO 1043-4: Marking:	☐	☐	☒
P7.17	Alt. 1: Chemical specifications of flame retardants in printed circuit boards > 25 g (without components): ☐TBBPA (additive), ☒TBBPA (reactive) (See NOTE B3), ☐Other:, CAS #:	☒	☐	☐
	Alt. 2: Chemical specifications of flame retardants in printed circuit boards (without components) > 25 g according ISO 1043-4:	☐	☐	☒
P7.18	Alt. 1: Flame retarded plastic parts > 25 g contain the following flame retardant substances/preparations in concentrations above 0,1%: 1. Chemical name: , CAS #: (See NOTE B4) 2. Chemical name: , CAS #: " 3. Chemical name: , CAS #: "	☐	☐	☒
	Alt. 2: Chemical specifications of flame retardants in plastic parts > 25 g according ISO 1043-4:	☐	☐	☒
P7.19	In plastic parts > 25 g, flame retardant substances/preparations above 0,1% are used which have been assigned the following Risk phrases; and Hazard statements: The source(s) for these classifications is/are found at (add URL(s)): , (See note B5)	☐	☐	☒
P7.20*	Postconsumer recycled plastic material content is used in the product (See Note B6): If YES; at least one of the two alternatives below shall be answered; a) Of total plastic parts' weight > 25 g, the postconsumer recycled plastic material content (calculated as a percentage of total plastic by weight) is ***82.3%. (EPEAT calculation) / 85% (TCO calculation)*** or b) The weight of recycled material is ***995.52*** g.	☒	☐	☐

GENERAL NOTE Standard references should direct to the latest version of a standard. If an older version of a standard is used, section P15 shall be used for explanation.

NOTE B2 IEC 61249-2-21 defines maximum limits of 900 ppm for each of the substances chlorine and bromine and a maximum limit of 1500ppm of these substances combined. The standard does not address fluorine, iodine and astatine which are included in the group of halogens.

NOTE B3 and B4 A Guidance document on Chemical substances is available; see http://www.ecma-international.org/publications/standards/Ecma-370.htm

NOTE B5 If a certain substance has been assigned a certain risk phrases / hazard statement in the referenced source, this does not necessarily mean the substance has been tested for all of the hazards referred to by a certain customer.

NOTE B6 Applies to a product containing plastic parts whose combined weight exceeds 100 g with the exception of printed circuit boards, cables, connectors and electronic components and bio-based plastic material.

Summary of testing:

Tests performed (name of test and test clause):

Clause	Test(s)
1.6	Input Current Test
1.7	Marking and instructions
2.1	Access to energized parts
2.1	Protection from electric shock and energy hazards
2.2	SELV circuit
2.5	Limited power sources
2.6	Earthing conductor
2.9	Electrical insulation
2.10	Clearances, Creepage distances and distances through insulation
4.1	Stability
4.2	Mechanical strength
4.5	Thermal requirements
4.6	Openings in enclosure
5.1	Touch current and protective conductor current
5.2	Electric Strength Test
5.3	Abnormal operating and fault conditions
Annex C	Transformers

Load condition: Refer to general product information

Testing location:

See page 3

Radio and television interference suppression compliance with the EMC directive is necessary for achieving type certification. The appliance shall comply with the relevant EMC standards, depending on the equipment in question.	The LCD Monitor has not been tested for EMC and must be tested and considered before marketed into the country in which is to be sold.
1.5, 3.2.5 Power supply cord set	The equipment shall be provided with an approved mains cord set complying with the national regulations of the countries in which the appliance is to be sold.
1.7.2 Class I pluggable equipment type A intended for connection to other equipment or a network shall, if safety relies on connection to protective earth or if surge suppressors are connected between the network terminals and accessible parts, have a marking stating that the equipment must be connected to an earthed mains socket-outlet.	The marking text in the applicable countries shall be as follows: In Finland: "Laite on liitettävä suojakoskettimilla varustettuun pistorasiaan" In Norway: “Apparatet må tilkoples jordet stikkontakt In Sweden: “Apparaten skall anslutas till jordat uttag” In Denmark: “Apparatets stikprop skal tilsluttes en stikkontakt med jord, som giver forbindelse til stikproppens jord.” The texts for Finland, Denmark Norway and Sweden were shown on the label.
1.7.2.1 Language of safety markings/instructions.	Instructions and equipment marking related to safety is applied and checked in English, the instruction and marking should be checked again when marketed in the countries using other

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 411

	language.
1.7.2.4 The equipment is intended and tested for installation to IT power system (Norway)	The following information should be given (but it is not required) in the installation: “This Product is also designed for IT power system with phase to phase voltage 230 V”.
2.5 Limited Power Source.	Main board, key control board and LED driver supplied by +19V output comply with LPS requirement. The limited power sources complying with subclause 2.5 and the components mounted on V-1 or better PCB according to sub-clause 4.7.2.2. Refer to sub-clause 2.5 for detail.
2.7.5 Protection by several devices.	The standards require also a protective device in the neutral phase when connected to IT power system. For Norway, this is not required; refer to Lists of Decisions from OSM.
2.7.6 Warning to service personnel.	After operation of the protective device, the equipment is still under voltage if it is connected to an IT power system. A warning is required for service personnel. Norway does not require this warning.
4.2 wall or ceiling mounted equipment	VESA compatible wall mounting kit 100mm x 100mm, 4 piece screw M4 x 10mm used.

A. Wall Mounting (Optional)

NOTE: For use only with a UL Listed Wall Mount Bracket.

To obtain a wall-mounting kit or height adjustment base, contact your local dealer. Refer to the instructions that come with the base mounting kit. To convert your display from a desk-mounted to a wall-mounted display, do the following:

1. Find VESA compatible wall-mounting kit which meets the quaternions in section "Specifications".
2. Verify that the power button is turned Off, then disconnect the power cord.
3. Lay the display face down on a towel or blanket.
4. Remove the base. (Screws removal might be required.)
5. Attach the mounting bracket from the wall mounting kit using screws of the appropriate length.
6. Attach the display to the wall, following the instructions in the wall-mounting kit.

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 412

Summary of compliance with National Differences (List of countries addressed):

The sample(s) tested compliance with the requirements of IEC 60950-1: 2005 (2nd Edition); Am1: 2009; Am2: 2013 and all CENELEC members as listed in EN 60950-1: 2006 +A11: 2009+A1: 2010+A12: 2011+ A2: 2013.
At the time of issuing this test report, not all countries are listed for IEC 60950-1:2005 (2nd Edition); Am1:2009; Am2:2013. Therefore this test report includes national differences for IEC 60950-1:2005(2nd Edition) Am1:2009, IEC 60950-1: 2005 (2nd Edition) .
All national differences listed in the IECEE Online CB Bulletin are covered by the Common Modifications, Special National Conditions, National Deviations, and the National Requirements noted above except for the countries which are documented in Attachment.
National Differences attached to this test report:
list from IEC 60950-1, 2nd edition: China.
list from IEC 60950-1: 2005 (2nd Edition); Am1: 2009: Korea.
list from IEC 60950-1: 2005 (2nd Edition); Am2: 2013: USA, Japan, Israeli and Canada

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 413

Copy of marking plates:

The artwork below may be only a draft. The use of certification marks on a product must be authorized by the respective NCBs that own these marks.

(Additional requirements for markings. See 1.7 NOTE)

Calibration	All instruments used in the tests given in this test report are calibrated and traceable to national or international standards. Further information about traceability will be given on request.
Measurement uncertainty	Measurement uncertainties are calculated for all instruments and instrument set-ups given in this report. Calculations are based on the principles given in the standard EA-4/02 (Dec. 1999), IEC Guide 115:2007 and other relevant internal Nemko-procedures. Further information about measurement uncertainties will be given on request.
Evaluation of results	If not explicitly stated otherwise in the standard, the test is passed if the measured value is equal to or below (above) the limit line, regardless of the measurement uncertainty. If the measured value is above (below) the limit line, the test is not passed - ref IEC Guide 115:2007. The instrumentation accuracy is within limits agreed by IECEE-CTL.

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 417

General product information:

The equipment under tests is LCD monitor with internal non-certified power supply for use in general office environment.

The built-in power supply model 715GD297 is an non-approved component, which was manufactured by Top Victory, see appended table 1.5.1 for the detail information.

The unit has the following features:
1. The internal metal chassis which covering building-in switching power supply is considered as a fire enclosure.
2. The external plastic enclosure is regarded as mechanical enclosure and electrical enclosure.
3. The unit is configured with LCD panel (with LED backlight)
4. The unit is configured with HDMI x 1, DP x 1, VGA x 1, USB 3.0 x 4, USB upstream x 1 and audio out x 1 ports, all data ports on main board are optional used.
5. The unit has two bases, type A and type B. Base type A can rotate clockwise 90 degree or anti-clockwise 90 degree. The base type B can be installed a PC which comply with L.P.S. to provide the signal. The PC has not evaluated in this report.

Load condition:
Full white display with Max. Brightness and contrast, picture provided from a computer and load 0.9A for all USB 3.0 port.

Unit with mode DP is considered as the worst case for testing, if not specified.

All the models have same design, except model name and can be any configure as below:

Power board	Main board	Base
715GD297	715GD288	Type A, type B

Additional information (requested by manufacturer):

1)The manufacturer declared that the product also fulfilled of the requirements of SANS 60950-1:2014 (Edition 2.2)/IEC 60950-1:2013 (Edition 2.2)

Maximum recommended ambient (Tmra): 40℃
Connection to the supply: Pluggable equipment type A with detachable power supply cord.
Circuit characteristics: The equipment contains Primary circuits, Secondary circuits (SELV).

1.1.2 – Additional requirements:
Exposure to extreme temperatures, excessive dust, moisture or vibration; to flammable gases; to corrosive or explosive atmospheres:
This equipment is intended to operate in a ”normal” environment (Offices and homes).
Electromedical equipment connected to the patient:
This equipment is not an electromedical equipment intended to be physically connected to a patient.

Equipment used in vehicles, ships or aircrafts, in tropical countries, or at elevations > 2000m:
This equipment is intended to operate in a "normal" environment (Offices and homes) and is intended to be operated under altitude up to 5000m, so the clearance is multiplied by the altitude correction factor (1.48 linear interpolation used), specified in table A.2 of IEC 60664-1.

IEC 60950-1			
Clause	Requirement + Test	Result - Remark	Verdict
1	**GENERAL**		—
1.5	**Components**		P
1.5.1	General		P
	Comply with IEC 60950-1 or relevant component standard	(see appended tables 1.5.1)	P
1.5.2	Evaluation and testing of components	Certified components are used in accordance with their ratings, certifications and they comply with applicable parts of this standard. Components not certified are used in accordance with their ratings and they comply with applicable parts of IEC 60950-1 and the relevant component standard. Components, for which no relevant IEC-standard exists, have been tested under the conditions occurring in the equipment, using applicable parts of IEC 60950-1.	P
1.5.3	Thermal controls	No thermal controls.	N/A
1.5.4	Transformers	Transformer used are suitable for their intended applications and comply with relevant parts of this standard and particularly Annex C, see Annex C – Transformers.	P
1.5.5	Interconnecting cables	The interconnecting cables do not represent any hazard in the meaning of this standard.	P
1.5.6	Capacitors bridging insulation	X2, X1, Y1 or Y2 capacitors according to IEC 60384-14. (see appended table 1.5.1)	P
1.5.7	Resistors bridging insulation	Refer below:	—
1.5.7.1	Resistors bridging functional, basic or supplementary insulation	Bleeder resistors (R9901, R9908 in parallel; R9902, R9909 in parallel; R9903, R9910 in parallel, then three in series) between live and neutral located after main fuse.	P
1.5.7.2	Resistors bridging double or reinforced insulation between a.c. mains and other circuits	No resistors bridging double or reinforced insulation between a.c mains and other circuits.	N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 420

IEC 60950-1			
Clause	Requirement + Test	Result - Remark	Verdict
1.5.7.3	Resistors bridging double or reinforced insulation between a.c. mains and antenna or coaxial cable	No resistors bridging double or reinforced insulation between a.c mains and antenna or coaxial cable.	N/A
1.5.8	Components in equipment for IT power systems	Certified capacitors connected between line and earth, ref. List of Critical Components and Sub-Cl.1.5.6.	P
1.5.9	Surge suppressors	No such component.	—
1.5.9.1	General	See below.	—
1.5.9.2	Protection of VDRs	See below.	N/A
1.5.9.3	Bridging of functional insulation by a VDR	No such component.	N/A
1.5.9.4	Bridging of basic insulation by a VDR	No such component.	N/A
1.5.9.5	Bridging of supplementary, double or reinforced insulation by a VDR	No such component.	N/A
1.6	**Power interface**		P
1.6.1	AC power distribution systems	TN, and IT for Norway.	—
1.6.2	Input current	(see appended table 1.6.2)	P
1.6.3	Voltage limit of hand-held equipment	The equipment is not hand-held.	N/A
1.6.4	Neutral conductor	Neutral is insulated from earth with basic insulation throughout the equipment. Components connected between phases and earth are rated and certified for a working voltage: 250V.	P
1.7	**Marking and instructions**		P
1.7.1	Power rating and identification markings	The required marking is located on the outside surface of the equipment.	P
1.7.1.1	Power rating marking	See below	P
	Multiple mains supply connections.....:	Only one mains supply connections.	N/A
	Rated voltage(s) or voltage range(s) (V) ..... :	100-240V~	P
	Symbol for nature of supply, for d.c. only ..... :	The equipment is for a.c. supply.	N/A
	Rated frequency or rated frequency range (Hz) ... :	50/60Hz	—
	Rated current (mA or A)..... :	1.5A	—
1.7.1.2	Identification markings	See below.	P
	Manufacturer's name or trade-mark or identification mark ..... :	Lenovo	P

supplementary information:

See appended table C.2 for internal distances of transformer.
1) There is a slot > 1mm under the PCB. ***2)*** Measured on PCB side. ***3)*** Measured on component side
****)*** This equipment is intended to be operated under altitude up to 5000m, so the clearance is multiplied by the altitude correction factor 1.48, specified in table A.2 of IEC 60664-1
*****)*** The requirement for the creepage distance is less than the requirement for the clearance, therefore the requirement for the clearance apply also for the creepage distance requirement.
-. The following component is tested with 10N force: C902, BD9901, mylar sheet and secondary wire.
-. C902 was fixed by glue.
-. There was one mylar sheet located between panel and power supply board.

Supplementary information:						
s-c = short circuit, o-l = overload, o-c=open circuit ***1)*** Fuse current is more than fuse rating times 2.1. The tests repeated with all sources of fuse and same result came out.						

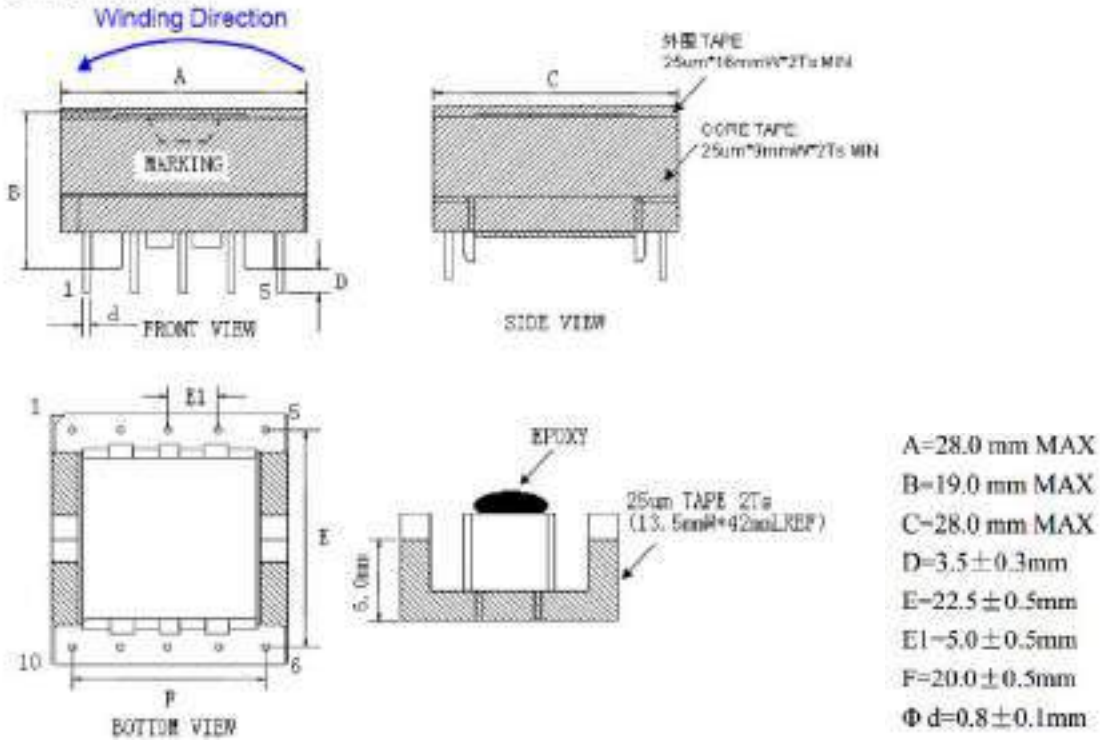
Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 496

C.2	TABLE: transformer	P

Loc.	Tested insulation	Working voltage peak / V (2.10.2)	Working voltage rms / V (2.10.2)	Required electric strength (5.2)	Required clearance / mm (2.10.3)	Required creepage distance / mm (2.10.4)	Required distance thr. insul. (2.10.5)
T901	Reinforced: Primary Windings –Secondary windings	519	289	3000V ac	6.6 ***1)***	6.6 ***2)***	*)
T901	Reinforced: Primary Windings – core – Secondary windings	519	289	3000V ac	6.6	6.6	*)

Loc.	Tested insulation	Test voltage/ V	Measured clearance / mm	Measured creepage dist./ mm	Measured distance thr. insul. / mm; number of layers
T901	Primary Windings -Secondary Windings	3000V ac	8.0	8.0	3 layers
T901	Primary Windings – core - Secondary Windings	3000V ac	8.4	8.4	3 layers

supplementary information:



*) 2 or 3 layers / 0.4mm / Annex U
1) This equipment is intended to be operated under altitude up to 5000m, so the clearance is multiplied by the altitude correction factor 1.48, specified in table A.2 of IEC 60664-1
2) The requirement for the creepage distance is less than the requirement for the clearance, therefore the requirement for the clearance apply also for the creepage distance requirement.

ATTACHMENT TO TEST REPORT IEC 60950-1 with A1:2009 and A2:2013
CANADA NATIONAL DIFFERENCES
Information technology equipment – Safety – Part 1: General requirements

Differences according to .....:	CAN/CSA-C22.2 No. 60950-1-07, Amd 1:2011, Amd 2:2014
Attachment Form No. .....:	CA_ND_IEC60950_1F
Attachment Originator.....:	CSA
Master Attachment .....:	Date (2015-05)

Copyright © 2015 IEC System for Conformity Testing and Certification of Electrical Equipment (IECEE), Geneva, Switzerland. All rights reserved.

	Special national conditions		
1.1.1	All equipment is to be designed to allow installation in accordance with the National Electrical Code (NEC), ANSI/NFPA 70, the Canadian Electrical Code (CEC), Part I, CAN/CSA C22.1, and when applicable, the National Electrical Safety Code, IEEE C2.	The equipment is provided with appliance inlet.	P
	Also, unless marked or otherwise identified, installation is allowed per the Standard for the Protection of Electronic Computer/Data-Processing Equipment, ANSI/NFPA 75.	The equipment is provided with appliance inlet.	P
1.1.2	Baby monitors are required to comply with ASTM F2951, Consumer Safety Specification for Baby Monitors		N/A
1.4.14	For Pluggable Equipment Type A, the protection in the installation is assumed to be 20A.	Equipment acceptable for connect to 20A Protection.	P
1.5.5	For lengths exceeding 3.05 m, external interconnecting flexible cord and cable assemblies are required to be a suitable cable type (e.g., DP, CL2) specified in the CEC/NEC.	No external interconnecting flexible cord or cable assemblies.	N/A
	For lengths 3.05 m or less, external interconnecting flexible cord and cable assemblies that are not types specified in the CEC are required to have special construction features and identification markings.		N/A
1.7.1	Equipment for use on a.c. mains supply systems with a neutral and more than one phase conductor (e.g. 120/240 V, 3-wire) require a special marking format for electrical ratings.	Only one phase conductor.	N/A
	A voltage rating that exceeds an attachment plug cap rating is only permitted if it does not exceed the extreme operating conditions in Table 2 of CAN/CSA C22.2 No. 235, and		N/A
	- if it is part of a range that extends into the Table 2 "Normal Operating Conditions."		N/A
	A voltage rating is not be lower than the specified "Normal Operating Conditions," unless it is part of a range that extends into the "Normal Operating Conditions."		N/A

1.7.7	Wiring terminals intended to supply Class 2 outputs in accordance with CEC Part 1 or NEC are marked with the voltage rating and “Class 2” or equivalent.	Not Class 2 equipment.	N/A
	- Marking is located adjacent to the terminals		N/A
	- Marking is visible during wiring		N/A
2.5	Fuse providing Class 2, Limited Power Source, or TNV current limiting is not operator-accessible unless it is not interchangeable.	No such component.	N/A
2.6	Equipment with isolated ground (earthing) receptacles is required to comply with NEC 250.146(D) and CEC 10-112 and 10-906(8).	No isolated ground receptacles	N/A
2.7.1	Suitable NEC/CEC branch circuit protection rated at the maximum circuit rating is provided for all standard supply outlets and receptacles (such as supplied in power distribution units) if the supply branch circuit protection is not suitable.	No standard supply outlets, receptacles, lamp holders or such transformers.	N/A
	Power distribution transformers distributing power at 100 volts or more, and rated 10 kVA or more, provided with special transformer overcurrent protection.		N/A
3.2	Wiring methods (terminals, leads, etc.) used for the connection of the equipment to the mains is in accordance with the NEC/CEC.	The equipment is provided with an appliance inlet.	N/A
3.2.1	Power supply cords are required to have attachment plugs rated not less than 125 percent of the rated current of the equipment.	Saudi Arabia power cord provided only. it must be checked when marketing this country.	N/A
3.2.1.2	Equipment connected to a centralized d.c. power system, and having one pole of the DC mains input terminal connected to the main protective earthing terminal in the equipment, is required to comply with special earthing, wiring, marking and installation instruction requirements.	The Equipment not connected to DC power system.	N/A
3.2.3	Permanent connection of equipment to the mains supply by a power supply cord is not permitted, except for certain equipment, such as ATMs.	The equipment is not permanently connected to the mains.	N/A
3.2.5	Power supply cords are no longer than 4.5 m in length.	Saudi Arabia power cord provided only. it must be checked when marketing this country.	N/A
	Minimum cord length is 1.5 m, with certain constructions such as external power supplies allowed to consider both input and output cord lengths into the requirement.		
	Flexible power supply cords are required to be compatible with Article 400 of the NEC, and Tables 11 and 12 of the CEC.		
3.2.9	Permanently connected equipment is required to have a suitable wiring compartment and wire bending space.	The equipment is not permanently connected to the mains.	N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 518

3.3	Wiring terminals and associated spacings for field wiring connections comply with CSA C22.2 No. 0.	The equipment is provided with an appliance inlet.	N/A
3.3.3	Wire binding screws are not permitted to attach conductors larger than 10 AWG (5.3 mm2).	The equipment is provided with an appliance inlet.	N/A
3.3.4	Terminals for permanent wiring, including protective earthing terminals, are suitable for Canadian/US wire gauge sizes, are	No permanent wiring.	N/A
	- rated 125 percent of the equipment rating, and		N/A
	- are specially marked when specified (1.7.7).		N/A
3.3.5	First column of Table 3E revised to require “Smaller of the RATED CURRENT of the equipment or the PROTECTIVE CURRENT RATING of the circuit under consideration.”	The equipment is provided with an appliance inlet.	N/A
3.4.2	Motor control devices are provided for cord-connected equipment with a motor if the equipment is rated more than 12 A,	No such motors in the equipment.	N/A
	- or if the motor has a nominal voltage rating greater than 120 V		N/A
	- or is rated more than 1/3 hp (locked rotor current over 43 A)		N/A
3.4.8	Vertically-mounted disconnect switches and circuit breakers have the "on" position indicated by the handle in the up position.	No disconnect switch in the equipment.	N/A
3.4.11	For computer room applications, equipment with battery systems capable of supplying 750 VA for five minutes have a battery disconnect means that may be connected to the computer room remote power-off circuit.	No such battery.	N/A
4.3.12	The maximum quantity of flammable liquid stored in equipment complies with NFPA 30.	No flammable liquids within the equipment.	N/A
4.3.13.5.1	Equipment with lasers is required to meet the U.S. Code of Federal Regulations 21 CFR 1040 (and the Canadian Radiation Emitting Devices Act, REDR C1370).	No laser is used.	N/A
4.7	For computer room applications, automated information storage systems with combustible media greater than 0.76 m3 (27 cu ft) are required to have a provision for connection of either automatic sprinklers or a gaseous agent extinguishing system with an extended discharge.	The equipment has no combustible area greater than 27 cubic feet.	N/A
4.7.3.1	For computer room applications, enclosures with combustible material measuring greater than 0.9 m2 (10 sq ft) or a single dimension greater than 1.8 m (6 ft) are required to have a flame spread rating of 50 or less. For other applications, enclosures with the same dimensions require a flame spread rating of 200 or less.	The equipment has no combustible material greater than 0.93m^2 or single dimension greater than 1.8m.	N/A
	Non-metallic enclosures of equipment for use in spaces used for environmental air (plenums) are required to comply with UL 2043.		N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 519

Annex H	Equipment that produces ionizing radiation is required to comply with the U.S. Code of Federal Regulations, 21 CFR 1020 (and the Canadian Radiation Emitting Devices Act, REDR C1370).	No such part.	N/A
	Other National Differences The following key national differences are based on requirements other than national regulatory requirements.		
1.5.1	Some components and materials associated with the risk of fire, electric shock, or personal injury are required to have component or material ratings in accordance with the applicable national (Canadian and/or U.S.) component or material standard requirements. These components include: attachment plugs, battery packs (rechargeable type, used with transportable equipment), cathode ray tubes, circuit breakers, communication circuit accessories, connectors (used for current interruption of non-LPS circuits), cord sets and power supply cords, direct plug-in equipment, enclosures (outdoor), flexible cords and cables, fuses (branch circuit), fuseholders, ground-fault current interrupters, industrial control equipment, insulating tape, interconnecting cables, lampholders, limit controls, printed wiring, protectors for communications circuits, receptacles, solid state controls, supplementary protectors, switches (including interlock switches), thermal cutoffs, thermostats, (multi-layer) transformer winding wire, transient voltage surge suppressors, tubing, wire connectors, and wire and cables.	Critical components are IEC certified. See list of critical components in main CB report (§ 1.5.1). There may be additional requirements for components in CSA.	—
1.6.1.2	A circuit for connection to the DC Mains Supply is classified as either a SELV Circuit, TNV-2 Circuit or Hazardous Voltage Circuit depending on the maximum operating voltage of the supply.	The Equipment not connected to DC power system.	N/A
	This maximum operating voltage includes consideration of the battery charging “float voltage” associated with the intended supply system, regardless of the marked power rating of the equipment.		N/A
2.3.1	For TNV-2 and TNV-3 circuits with other than ringing signals and with voltages exceeding 42.4 Vpeak or 60 Vd.c., the maximum acceptable current through a 2000 ohm resistor (or greater) connected across the voltage source with other loads disconnected is 7.1 mA peak or 30 mA d.c. under normal operating conditions.	No TNV circuitry.	N/A
2.3.2.1	In the event of a single fault between TNV and SELV circuits, the limits of 2.2.3 apply to SELV Circuits and accessible conductive parts.	No TNV circuitry.	N/A
2.6.2	Equipment with functional earthing is required to be marked with the functional earthing symbol (IEC 60417-6092).		N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 520

2.6.3.4	Protective bonding conductors of non-standard protective bonding constructions (e.g., printed circuit traces) may be subjected to the additional limited short circuit test conditions specified.	Considered	P
4.2.8.1	Enclosures around CRTs with a face diameter of 160 mm or more reduce the risk of injury due to the implosion of the CRT.	No CRTs in the equipment.	N/A
4.3.2	Equipment with handles complies with special loading tests.	The equipment has no handles.	N/A
4.3.8	Battery packs for both portable and stationary applications are required to comply with special component requirements.		N/A
5.1.8.3	Equipment intended to receive telecommunication ringing signals comply with a special touch current measurement tests.	No TNV circuitry.	N/A
5.3.7	Internal (e.g., card cage) SELV circuit connectors and printed wiring board connectors that are accessible to the operator and that deliver power are to be overloaded.	See main test report table 5.3.	P
	During abnormal operating testing, if a circuit is interrupted by the opening of a component, the test shall be repeated twice (three tests total) using new components as necessary		P
6.4	Equipment intended for connection to telecommunication network outside plant cable is protected against overvoltage from power line crosses in accordance with 6.4 and Annex NAC.	No TNV circuitry.	N/A
Annex EE	UL articulated accessibility probe (Fig EE.3) required for assessing accessibility to document/media shredders instead of the Figure 2A test finger.	This equipment is not Document shredding machines.	N/A
M.2	Continuous ringing signals up to 16 mA only are permitted if the equipment is subjected to special installation and performance restrictions.	No TNV circuitry.	N/A
Annex NAD	Equipment connected to a telecommunication and cable distribution networks and supplied with an earphone intended to be held against, or in the ear comply with special acoustic pressure requirements.	No TNV circuitry.	N/A

	Special National Differences		
1.1.1	All equipment is designed as to allow installation in accordance with the National Electrical Code (NEC), ANSI/NFPA 70, Canadian Electrical Code (CEC), Part I, CAN/CSA C22.1, and if applicable, the National Electrical Safety Code, IEEE C2	The equipment is provided with appliance inlet.	P
	Also, unless marked or otherwise identified, installation is allowed per the Standard for the Protection of Electronic Computer/Data-Processing Equipment, ANSI/NFPA 75	The equipment is provided with appliance inlet.	P
1.1.2	Baby monitors are required to additionally comply with ASTM F2951, Consumer Safety Specification for Baby Monitors		N/A
1.4.14	For Pluggable Equipment Type A, the protection in the installation is assumed to be 20A	Considered.	P
1.5.5	For lengths exceeding 3.05 m, external interconnecting flexible cord and cable assemblies are required to be a suitable cable type (e.g., DP, CL2) specified in the /NEC	No external interconnecting flexible cord and cable assemblies exceeding 3.05m provided.	N/A
	For lengths 3.05 m or less, external interconnecting flexible cord and cable assemblies that are not types specified in the NEC are required to have special construction features and identification markings		N/A
1.7.1	Equipment for use on a.c. mains supply systems with a neutral and more than one phase conductor (e.g. 120/240 V, 3-wire) require a special marking format for electrical ratings	Single phase only.	N/A
	A voltage rating that exceeds an attachment plug cap rating is only permitted if it does not exceed the extreme operating conditions in Table 2 of CAN/CSA C22.2 No. 235, and		N/A
	- if it is part of a range that extends into the Table 2 "Normal Operating Conditions"		N/A
	Likewise, a voltage rating is not to be lower than the specified "Normal Operating Conditions," unless it is part of a range that extends into the "Normal Operating Conditions"		N/A

1.7.7	Wiring terminals intended to supply Class 2 outputs in accordance with NEC or CEC Part 1 or NEC are marked with the voltage rating and “Class 2” or equivalent	No connectors and field wiring terminal for external Class 2 or Class 3 circuits.	N/A
	- Marking is located adjacent to the terminals		N/A
	- Marking is visible during wiring		N/A
2.5	Fuse providing Class 2, Limited Power Source, or TNV current limiting is not operator-accessible unless it is not interchangeable	No such fuse.	N/A
2.6	Equipment with isolated ground (earthing) receptacles is in compliance with NEC 250.146(D) and CEC 10-112 and 10-906(8)	No isolated ground receptacles.	N/A
2.7.1	Suitable NEC/CEC branch circuit protection rated at the maximum circuit rating is provided for all standard supply outlets and receptacles (such as supplied in power distribution units) if the supply branch circuit protection is not suitable.	No special external branch circuit overcurrent devices provided.	N/A
	Power distribution transformers distributing power at 100 volts or more, and rated 10 kVA or more, provided with special transformer overcurrent protection		N/A
3.2	Wiring methods (terminals, leads, etc.) used for the connection of the equipment to the mains is in accordance with the NEC/CEC	The equipment is provided with inlet.	N/A
3.2.1	Attachment plugs of power supply cords are rated not less than 125 percent of the rated current of the equipment	The equipment is provided with inlet.	N/A
3.2.1.2	Equipment connected to a centralized d.c. power system, and having one pole of the DC mains input terminal connected to the main protective earthing terminal in the equipment comply with special earthing, wiring, marking and installation instruction requirements	Not connection to DC mains supply.	N/A
3.2.3	Permanent connection of equipment to the mains supply by a power supply cord is not permitted, except for certain equipment, such as ATMs	The equipment is not permanently connected to the mains.	N/A
3.2.5	Power supply cords are no longer than 4.5 m in length	It must be checked when marketing this country.	—
	Minimum cord length is 1.5 m, with certain constructions such as external power supplies allowed to consider both input and output cord lengths into the requirement		N/A
	Flexible power supply cords are compatible with Article 400 of the NEC, and Tables 11 and 12 of the CEC		N/A
3.2.9	Permanently connected equipment has a suitable wiring compartment and wire bending space	The equipment is not permanently connected to the mains.	N/A
3.3	Wiring terminals and associated spacings for field wiring connections comply with CSA C22.2 No. 0	The equipment is provided with inlet.	N/A
3.3.3	Wire binding screws are not attached with conductors larger than 10 AWG (5.3 mm2)	The equipment is provided with inlet.	N/A
3.3.4	Terminals for permanent wiring, including protective earthing terminals, are suitable for Canadian/US wire gauge sizes, are	The equipment is provided with inlet.	N/A
	- rated 125 per cent of the equipment rating, and		N/A
	- are specially marked when specified (1.7.7)		N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 524

3.3.5	Revise first column of Table 3E to “Smaller of the RATED CURRENT of the equipment or the PROTECTIVE CURRENT RATING of the circuit under consideration”		N/A
3.4.2	Motor control devices are provided for cord-connected equipment with a motor if the equipment is rated more than 12 A,	No such motor.	N/A
	- or if the motor has a nominal voltage rating greater than 120 V		N/A
	- or is rated more than 1/3 hp (locked rotor current over 43 A)		N/A
3.4.8	Vertically-mounted disconnect switches and circuit breakers have the "on" position indicated by the handle in the up position	No switch acting as disconnect device	N/A
3.4.11	For computer room applications, equipment with battery systems capable of supplying 750 VA for five minutes have a battery disconnect means that may be connected to the computer room remote power-off circuit	No battery in the equipment.	N/A
4.3.12	The maximum quantity of flammable liquid stored in equipment complies with NFPA 30	No flammable liquids within the equipment.	N/A
4.3.13.5.1	Equipment with lasers meets the U.S. Code of Federal Regulations 21 CFR 1040 (and the Canadian Radiation Emitting Devices Act, REDR C1370).	No laser product used.	N/A
4.7	For computer room applications, automated information storage systems with combustible media greater than 0.76 m^3 (27 cu ft) have a provision for connection of either automatic sprinklers or a gaseous agent extinguishing system with an extended discharge	The equipment has no combustible area greater than 0.76 m^3	N/A
4.7.3.1	For computer room applications, enclosures with combustible material measuring greater than 0.9m^2 (10 sq ft) or a single dimension greater than 1.8 m (6 ft) have a flame spread rating of 52 or less	The equipment has no combustible material greater than 0.9m^2 or single dimension greater than 1.8m.	N/A
	For other applications, enclosures with the same dimensions require a flame spread rating of 200 or less		N/A
4.7.3.1	Non-metallic enclosures of equipment for use in spaces used for environmental air (plenums) are required to comply with UL 2043		N/A
Annex H	Equipment that produces ionizing radiation complies with U.S. Code of Federal Regulations, 21 CFR 1020 (and the Canadian Radiation Emitting Devices Act, REDR C1370)	The equipment does not produce ionizing radiation	N/A
	Other National Differences		

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 525

1.5.1	Some components and materials associated with the risk of fire, electric shock, or personal injury have component or material ratings in accordance with the applicable national (Canadian and/or U.S.) component or material standard requirements. These components include: attachment plugs, battery backup systems, battery packs, cathode ray tubes, circuit breakers, communication circuit accessories, connectors (used for current interruption of non-LPS circuits), cord sets and power supply cords, direct plug-in equipment, electrochemical capacitor modules (energy storage modules with ultracapacitors), enclosures (outdoor), flexible cords and cables, fuses (branch circuit), fuseholders, ground-fault current interrupters, industrial control equipment, insulating tape, interconnecting cables, lampholders, limit controls, printed wiring, protectors for communications circuits, receptacles, solid state controls, supplementary protectors, switches (including interlock switches), thermal cut-offs, thermostats, (multi-layer) transformer winding wire, surge protective devices, tubing, vehicle battery adapters, wire connectors, and wire and cables	Critical components are IEC certified. See list of critical components in main CB report (§1.5.1). There ma y be additional requirements for components in US.	—
1.6.1.2	A circuit for connection to the DC Mains Supply is classified as a SELV Circuit, TNV-2 Circuit or Hazardous Voltage Circuit depending on the maximum operating voltage of the supply	Not connection to DC mains supply.	N/A
	This maximum operating voltage includes consideration of the battery charging “float voltage” associated with the intended supply system, regardless of the marked power rating of the equipment		N/A
2.3.1	For TNV-2 and TNV-3 circuits with other than ringing signals and with voltages exceeding 42.4 V_{peak} or 60 Vd.c., the maximum acceptable current through a 2000 ohm resistor (or greater) connected across the voltage source with other loads disconnected is 7.1 mA peak or 30 mA d.c. under normal operating conditions	No TNV Circuit.	N/A
2.3.2.1	In the event of a single fault between TNV and SELV circuits, the limits of 2.2.3 apply to SELV Circuits and accessible conductive parts	No TNV Circuit.	N/A
2.6.2	Equipment with functional earthing marked with the functional earthing symbol (IEC 60417-6092)		N/A
2.6.3.4	Protective bonding conductors of non-standard protective bonding constructions (e.g., printed circuit traces) may be subjected to the additional limited short circuit test conditions specified	Considered	P
4.2.8.1	Enclosures around CRTs with a face diameter of 160 mm or more reduce the risk of injury due to the implosion of the CRT	No CRT used.	N/A
4.3.2	Equipment with handles complies with special loading tests	No handle used.	N/A
4.3.8	Battery packs for both portable and stationary applications comply with special component requirements		N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 526

5.1.8.3	Equipment intended to receive telecommunication ringing signals comply with a special touch current measurement tests	No TNV Circuitry.	N/A
5.3.7	Internal (e.g., card cage) SELV circuit connectors and printed wiring board connectors that are accessible to the operator and that deliver power are overloaded	See table 5.3 in main test report	P
	During abnormal operating testing, if a circuit is interrupted by the opening of a component, the test is repeated twice (three tests total) using new components as necessary		P
6.4	Equipment intended for connection to telecommunication network outside plant cable is protected against overvoltage from power line crosses in accordance with 6.4 and Annex NAC	No TNV Circuitry.	N/A
Annex EE	Articulated accessibility probe (Fig EE.3) is used for assessing accessibility to document/media shredders instead of the Figure 2A test finger	No document/media shredders provide.	N/A
Annex M.2	Continuous ringing signals up to 16 mA only are permitted if the equipment is subjected to special installation and performance restrictions	No TNV circuit.	N/A
Annex NAD	Equipment connected to a telecommunication and cable distribution networks and supplied with an earphone intended to be held against, or in the ear comply with special acoustic pressure requirements	No TNV circuit.	N/A

Test results according to CB BULLETIN

Clause	Requirement - Test	Result - Remark	Verdict
1.1.2	GB 4943.1-2011 applies to equipment for use at altitudes not exceeding 5000m above sea level, primarily in regions with moderate or tropical climates. Amend the third dashed paragraph of 1.1.2 as: ——equipment intended to be used in vehicles, on board ships or aircraft, at altitudes greater than 5000m;	See main report.	P
1.4.5	After the third paragraph, add a paragraph: If the equipment is intended for direct connection to an AC mains supply, the tolerances on RATED VOLTAGE shall be taken as +10%,-10% unless a wider tolerance is declared by the manufacturer. The first dash paragraph "-the RATED VOLTAGE is 230V single -phase or 400V three-phase, in which case the tolerance shall be taken as +10% and -10%" of IEC 60950-1:2005 is deleted in GB 4943.1-2011	Considered.	P
1.4.12.1	Tma in clause 1.4.12.1 amended as: Tma: is the maximum ambient temperature permitted by the manufacturer's specification, or 35 °C, whichever is greater. Add note 1: For equipment not to be operated at tropical climatic conditions, Tma: is the maximum ambient temperature permitted by the manufacturer's specification, or 25 °C, whichever is greater. Add note 2: For equipment is to be operated at 2000m-5000m above sea leave, its temperature test conditions and temperature limits are under consideration.	Considered.	P
1.5. 2	Add a note behind the first break off section in Clause 1.5.2: A component used shall comply with related requirements corresponding altitude of 5000m.	See main report.	P
1.7	Add one paragraph before the last paragraph: The required marking and instruction should be given in normative Chinese unless otherwise specified.	Must be considered when marketed to China.	—

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 528

1.7.1	Based on the AC mains supply of China, the RATED VOLTAGE should be 220V (single phase) or 380V (three-phases) for single rated voltage, for RATED VOLTAGE RANGE, it should cover 220V or 380V (three-phases), for multiple RATED VOLTAGES, one of them should be 220V or 380V (three-phases) and set on 220V or 380V (three-phases) when manufactured. And the RATED FREQUENCY or RATED FREQUENCY RANGE should be 50Hz or include 50Hz.	Rated voltage include 220V single phase.	P
1.7.2.1	Add requirements of warning for equipment intended to be used at altitudes not exceeding 2000m or at non-tropical climate regions: For equipment intended to be used at altitude not exceeding 2000m, a warning label containing the following or a similar appropriate wording, or a symbol as in annex DD shall fixed to the equipment at readily visible place. "Only used at altitude not exceeding 2000m."  For equipment intended to be used in not-tropical climate regions, a warning label containing the following or a similar appropriate wording, or a symbol as in annex DD shall fixed to the equipment at readily visible place. "Only used in not-tropical climate regions."  If only the symbol used, the explanation of the symbol shall be contained in the instruction manual. The above statements shall be given in a language acceptable to the regions where the apparatus is intended to be used.	5000m and tropical requirements	N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 529

2.7.1	Amended the first paragraph as: Protection in PRIMARY CIRCUITS against overcurrent short-circuits and earth faults shall be provided as an integral part of the equipment except special provisions. And the protective device shall meet the requirement of Clause 5.3. Delete note of Clause 2.7.1.	Protective device is integrated in the equipment, see also Sub-clause 5.3.	P
2.9.2	First section of Clause 2.9.2 amended as two sections: Where required by 2.9.1, 2.10.8.3, 2.10.10 or 2.10.11, humidity conditioning is conducted for 120 h in a cabinet or room containing air with ambient temperature 40±2 ℃ and a relative humidity of (93±3) %. During this conditioning the component or subassembly is not energized. For equipment not to be operated at tropical climatic conditions, Where required by 2.9.1, 2.10.8.3, 2.10.10 or 2.10.11, humidity conditioning is conducted for 48 h in a cabinet or room containing air with a relative humidity of (93±3) %. The temperature of the air, at all places where samples can be located, is maintained within 2 ℃ of any convenient value between 20 ℃ and 30 ℃ such that condensation does not occur. Due to pretreatment of equipment operated at high altitude area is humidity conditioning withstand hot shock, specific requirements are to be considered. Add note: For equipment to be operated at 2000 m - 5000m above sea level, assessment and requirement of humidity conditioning for Insulation material properties are considered.	Must be considered when market to the country.	—

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 530

2.10.3.1	Amend the third paragraph of Clause 2.10.3.1 to be: These requirements apply for equipment to be operated up to 2000 m above sea level. For equipment to be operated at more than 2000 m above sea level and up to 5000m above sea level, the minimum CLEARANCE shall be multiplied by the factor 1.48 corresponding altitude of 5000m given in Table A.2 of IEC 60664-1. For equipment to be operated at more than 5000 m above sea level, the minimum CLEARANCE shall be multiplied by the factor given in Table A.2 of IEC 60664-1. Linear interpolation is permitted between the nearest two points in Table A.2. The calculated minimum CLEARANCE using this multiplication factor shall be rounded up to the next higher 0,1 mm increment.	See main test report.	P
2.10.3.3 & 2.10.3.4	Add "(applicable for altitude up to 2000m)" in header of Table 2K、2L and 2M.	Considered.	P
2.10.3.4	Add a new section above Table 2K and in Clause 2.10.3.4: Minimum CLEARANCES determined by above rules apply for equipment to be operated up to 2000m above sea level. For equipment to be operated at 2000 m - 5000m above sea level, the minimum CLEARANCE shall be multiplied by the factor 1.48 corresponding altitude of 5000m given in Table A.2 of GB/T16935.1（ IEC 60664-1）. For equipment to be operated at more than 5000 m above sea level, the minimum CLEARANCE shall be multiplied by the factor given in Table A.2 of GB/T16935.1.	See main test report.	P
3.2.1.1	Add a paragraph before the last paragraph: Plugs connected to AC mains supply shall comply with GB 1002 or GB 1003 or GB/T 11918 as applicable.	Must be check with market.	—
4.2.8	Clause 4.2.8 cathode ray tubes quoted Clause 18 of GB8898-2011. Delete note of Clause 4.2.8.	No such equipment.	N/A
Annex E	Last section of Annex E amended as: For comparison of winding temperatures determined by the resistance method of this annex with the temperature limits of Table 4B, 35 ℃ shall be added to the calculated temperature rise. And add note: for equipment not to be operated at tropical climatic conditions, 25 °C shall be added to the calculated temperature rise to compare with the temperature of Table 4B.	Thermocouple measurement method	N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 531

Annex G.6	Change the second section of Clause G.6 to be: For equipment to be operated at 2000 m - 5000m above sea level, the minimum CLEARANCE shall be multiplied by the factor 1.48 corresponding altitude of 5000m given in Table A.2 of GB/T16935.1. For equipment to be operated at more than 5000 m above sea level, the minimum CLEARANCE shall be multiplied by the factor given in Table A.2 of IEC 60664-1. Linear interpolation is permitted between the nearest two points in Table A.2. The calculated minimum CLEARANCE using this multiplication factor shall be rounded up to the next higher 0,1 mm increment.	See main test report.	P
Annex BB (informative)	Amended as : The differences between Chinese national standards GB 4943.1-2011 and GB 4943-2001.	Considered.	P
Annex DD (normative)	Added annex DD: Instructions for the new safety warning labels. DD.1 Altitude warning label  Meaning of the label: Evaluation for apparatus only based on altitude not exceeding 2000m, therefor it's the only operating condition applied for the equipment .There may be some potential safety hazard if the equipment is used at altitude above 2000m . DD.2 Climate warning label  Meaning of the label: Evaluation for apparatus only based on temperate climate condition, therefor it's the only operating condition applied for the equipment .There may be some potential safety hazard if the equipment is used in tropical climate region.	5000m and tropical requirement.	N/A
Annex EE (informative)	Added annex EE: Illustration relative to safety explanation in normative Chinese、Tibetan、Mongolian、Zhuang Language and Uighu.	Must be considered when market to the country.	—

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 532

Other amendments	In accordance with the relevant CTL decisions and the amendments of IEC 60950-1, the specific requirements or mistakes in IEC standard are corrected or editorially modified in this part, Including clause 1.7, 2.1.1.7, 2.9.2, Table 2H, Figure 2H, F.8, F.9, M.3 and Annex U.	Considered.	P
Quoting standards and reference documents	The principles of quoting and referring to other standards in Annex P and reference documents of IEC 60950-1 are as follows: If the date of the reference document is given, only that edition applies, excluding any subsequent corrigenda and amendments. However, parties to agreements based on this part are encouraged to investigate the possibility of applying the most recent editions of the reference documents. For undated references, the latest edition of the referenced document applies, including any corrigenda and amendments. For the usage of international standards in Chinese national standards and industry standards is various, in the aim of achieving easy operation and based on the requirements of GB/T 1.1 and GB/T 20000.2, when quoting an entire international standard in the normative quoting files and reference documents of Annex P of this part, the principles of quotation are as follows: - If there is no national standard or industry standard corresponding to the international standard, then the international standard is quoted; - If there is national standard or industry standard corresponding to the international standard, then either the national or industry standard is quoted; - If the date of the national standard or industry standard is not given, the latest edition of the standard applies; - The national standard or industry standard number, corresponding international standard number and the consistency level code should be identified in parentheses behind the listed national standard or industry standard. When quoting several chapters or clauses of the international standard, the principles of quotation are as follows: - If there is no national standard or industry standard corresponding to the international standard, then the international standard is quoted;	Considered.	P

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 533

	- If there is national standard or industry standard corresponding to the international standard, then either the national or industry standard is quoted. Meanwhile, in order to retain the relevant information on international standards, informative annex CC is increased, which gives the table about the comparison of the normative quoting files and reference documents in IEC 60950-1: 2005 and GB4943.1-2011.

	National Differences		
1.2.4.1	Add the following new notes. Note: Even if the equipment is designed as Class I, the equipment is regarded as CLASS 0I EQUIPMENT (see 1.2.4.3A) when 2-pin adaptor with earthing lead wire or cord set having 2-pin plug with earthing lead wire is provided or recommended.	Must be checked when marketing in country.	—
1.2.4.3A	Add the following new clause. 1.2.4.3A CLASS 0I EQUIPMENT Equipment having attachment plug without earthing blade, where protection against electric shock is achieved by: - using BASIC INSULATION, and - providing either of the following a) or b) in order to connect those conductive parts that might assume a HAZARDOUS VOLTAGES in the event of BASIC INSULATION fault to the PROTECTIVE EARTHING CONDUCTOR in the building wiring. a) Provision of 2-pin plug with earthing lead including the condition of that 2-pin adaptor with earthing lead wire is provided or recommended. b) Provision of an independent earthing terminal, when 2-core mains cord (without earthing conductor) is used. Note – CLASS 0I EQUIPMENT may have a part constructed with Double Insulation or Reinforced Insulation.	Must be checked when marketing in country.	—

IEC 60950_1F ATTACHMENT			
Clause	Requirement + Test	Result - Remark	Verdict
1.3.2	Add the following notes after the first paragraph: Note 1 Transportable or similar equipment that are relocated frequently for intended usage should not be designed as Class I or CLASS 0I EQUIPMENT unless it is intended to be installed by service personnel. Note 2 Considering wiring circumstance in Japan, equipment intended to be installed where the provision for earthing connection is unlikely should not be designed as Class I or CLASS 0I EQUIPMENT unless it is intended to be installed by service personnel.	Not transportable equipment	N/A
1.5.1	Replace the first paragraph with the follows: Where safety is involved, components shall comply either with the requirements of this standard, with the safety aspects of the relevant JIS component standard, or IEC component standards, or components shall have equivalent to or better properties than these. Replace Note 1 with the following: Note 1 Components complying with the interpretation of Ministerial Ordinance on stipulating technical requirements for the Electrical Appliance is regarded to have equivalent to or better performance. Note 2 JIS or an IEC component standard is considered relevant only if the component in question clearly falls within its scope. Add the following after the last paragraph: For an appliance connector that is able to fit with appliance inlet compatible with the standard sheet of IEC 60320-1 or JIS C 8283-1, the size of the connector shall comply with relevant standard sheet of IEC 60320-1 or JIS C 8283-1. A power supply cord set complying with JIS C 8286 is regarded to comply with this requirement. Note 3 A power supply cord set provided with appliance connector that is able to fit with appliance inlet compatible with the standard sheet of IEC 60320-1 or JIS C 8283-1 should comply with JIS C 8286.	The component fulfils the relevant IEC standard.	P

IEC 60950_1F ATTACHMENT			
Clause	Requirement + Test	Result - Remark	Verdict
2.1.1.1	Replace item b) of 2.1.1.1with the following. b) A test with the test finger, Figure 2A, which shall not contact parts described above when applied to openings in the ENCLOSURES after removal of parts that can be detached by an OPERATOR, including fuseholders, and with OPERATOR access doors and covers open. It is permitted to leave lamps in place for this test. Connectors that can be separated by an OPERATOR, other than those complying with JIS C 8303 or JIS C 8285 or IEC 60309 series or JIS C 8283 series or IEC 60320 series, shall also be tested during disconnection. But even if the connector does not comply with these standards, the one having equivalent to or better performance need not be tested during disconnection. Note 4 Connectors complying with Appendix 4 of the interpretation of Ministerial Ordinance on stipulating technical requirements for the Electrical Appliance is regarded to have equivalent to or better performance.		P
2.5	Replace “IEC 60730-1” with “JIS C 9730-1” (in item b)).		N/A
2.6.2	Delete the following line. • the symbol  ,IEC 60417-5018 (2011-07);	Class I equipment.	N/A
2.6.3.2	Add the following after the first paragraph. However where the single core conductor is used for protective earthing lead or earthing cord for CLASS 0I EQUIPMENT, either of the following condition shall be met. - Use of annealed copper wire with 1.6 mm diameter or corrosion-inhibiting metal wire having equivalent to or more strength and thickness. - Single core cord or single core cab tire cable with 1.25 mm2 or more cross-sectional area	No protective earthing lead or earthing used.	N/A
2.6.3.5	Add the following after the first paragraph. However this requirement does not apply to internal conductor of the cord set that is covered by the sheath of mains cord and is formed together with mains plug and appliance connector.		N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 540

IEC 60950_1F ATTACHMENT			
Clause	Requirement + Test	Result - Remark	Verdict
2.6.4.2	Replace the first paragraph with the following. Equipment required to have protective earthing shall have a main protective earthing terminal. For equipment with a DETACHABLE POWER SUPPLY CORD, the earthing terminal in the appliance inlet is regarded as the main protective earthing terminal. However, for CLASS 0I EQUIPMENT provided with the separate main protective earthing terminal other than appliance inlet, the separate main protective earthing terminal may be treated as mains protective earthing terminal.	Appliance inlet used.	N/A
2.6.5.4	Replace the first sentence with the following. Protective earthing connections of CLASS I EQUIPMENT shall make earlier and break later than the supply connections in each of the following: Add the following after last paragraph: Note For CLASS 0I EQUIPMENT,1.7.14A is applied instead of this requirement.	See main test report	P
2.6.5.8A	Add the following new clause after 2.6.5.8 2.6.5.8A Earthing of CLASS 0I EQUIPMENT Plugs with a lead wire for earthing shall not be used for equipment having a rated voltage exceeding 150V. For plugs with a lead wire for earthing, the lead wire shall not be earthed by a clip. CLASS 0I EQUIPMENT shall be provided with an earthing terminal or lead wire for earthing in the external location where easily visible.	Must be checked when marketing in country.	—
2.7.6	Replace “ISO 3864, No. 5036” with “6.2.4 of JIS S 0101”.		N/A

3.2.5.1	Add the following after Note 3: Note 4 In Japan, mains cords having equivalent to or better electro-mechanical and fire safety performance as above and complying with Appendix 1 of the interpretation of Ministerial Ordinance on stipulating technical requirements for the Electrical Appliance can be used. Replace the paragraph after Note 3 with the following. For equipment required to have protective earthing, a PROTECTIVE EARTHING CONDUCTOR shall be included in the MAINS SUPPLY cord except for CLASS 0I EQUIPMENT having separate protective earthing conductor from mains cord. Add the following after the second paragraph after Note 3: Note 5 For the cross-sectional area of mains cord described in Note 4, relevant Japanese wiring regulation can be applied.	Saudi Arabia power cord provided only. it must be checked when marketing this country.	N/A
3.2.5A	Add the following new clause after 3.2.5 3.2.5A AC mains plug Mains plug for PLUGGABLE EQUIPMENT TYPE A shall comply with JIS C 8282-1 or equivalent to or better performance. Power supply cord set complying with JIS C 8286 is regarded to meet the requirements. Mains plug with fuse link for PLUGGABLE EQUIPMENT TYPE A shall comply with JIS C 8282-2-1 or equivalent to or better performance. Note Mains plug complying with Appendix 4 of the interpretation of Ministerial Ordinance on stipulating technical requirements for the Electrical Appliance is regarded to have equivalent to or better performance.	Appliance inlet used	N/A
3.3.4 Table 3D	Add the following note to Table 3D: Note For cables other than those complying with JIS C 3662 series of standards or JIS C 3663 series of standards, the terminals shall be suitable for the size of the intended cables.		N/A
3.3.7	Add the following after the first sentence: This requirement is not applicable to the external earthing terminal of CLASS 0I EQUIPMENT.		N/A

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 543

IEC 60950_1F ATTACHMENT			
Clause	Requirement + Test	Result - Remark	Verdict
4.2.8	Add the following after the first paragraph: Note Intrinsically protected picture tube is required to comply with JIS C 6965 in clause 18 of JIS C 6065. No intrinsically protected picture tube which is out of scope of JIS C 6965 is required to test according to sub-clause 18.2 of JIS C 6065.		N/A
4.3.4	Add the following after the first sentence: This requirement also applies to those connections in CLASS 0I EQUIPMENT, where CLEARANCE or CREEPAGE DISTANCES over BASIC INSULATION would be reduced to less than the values specified in 2.10.		N/A
4.3.5	Replace the first dashed paragraph with the following. Within a manufacturer's unit or system, plugs and sockets likely to be used by the OPERATOR or by a SERVICE PERSON shall not be employed in a manner likely to create a hazard due to misconnection. In particular, connectors complying with IEC 60320/JIS C 8283 series of standards or JIS C 8303 or JIS C 8358 shall not be used for SELV CIRCUITS or TNV CIRCUITS. Keying, location or, in the case of connectors accessible only to a SERVICE PERSON, clear markings are permitted to meet the requirement.		N/A
4.3.6	Replace the 1st paragraph with the following DIRECT PLUG-IN EQUIPMENT shall not impose undue stress on the socket-outlet. The mains plug part shall comply with the standard for the relevant mains plug. (see 3.2.5A)		N/A
4.4.2	Replace the paragraph with the following: HOUSEHOLD AND HOME/OFFICE DOCUMENT/MEDIA SHREDDERS shall also comply with Annex JA.		N/A
4.5.3	Add the following note to footnote b) of Table 4B: NOTE In case no data for the material is available, Appendix 4, 1. (1). b. 3 of the Interpretation on the Ministerial Ordinance stipulating Technical Specifications for Electrical Appliances is regarded as maximum temperature limit of the material.		N/A

Clause	Requirement + Test	Result - Remark	Verdict
	necessary, by a test with the test finger, Figure JA.1. JA.3 Disconnection from the mains supply Document shredding machines shall incorporate an isolating switch complying with sub-clause 3.4.2 as the device disconnecting the power of hazardous moving parts. For this switch, two-position (single-use) switch or multi-position (multifunction) switch (e.g., slide switch) may be used. If two-position switch, the positions for “ON” and “OFF” shall be indicated in accordance with sub-clause 1.7.8. If multi-position switch, the position for “OFF” shall be indicated in accordance with sub-clause 1.7.8 and other positions shall be indicated with proper terms or symbols. Compliance is checked by inspection.		
	JA.4 Protection against hazardous moving parts Any warning shall not be used instead of the structure for preventing access to hazardous moving parts. Document shredding machines shall comply with the following requirements. Insert the test finger, Figure JA.1, into all openings in MECHANICAL ENCLOSURES without applying appreciable force. It shall not be possible to touch hazardous moving parts with the test finger. This consideration applies to all sides of MECHANICAL ENCLOSURES when the equipment is mounted as intended. Before testing with the test finger, remove the parts detachable without a tool. Insert the wedge-probe, Figure JA.2, into the document-slot. And, against all directions of openings, if straight-cutting type, a force of 45 N shall apply to the probe, and 90 N if cross-cutting type. In this case, the weight of the probe is to be factored into the overall applied force. Before testing with the wedge-probe, remove the parts detachable without a tool. It shall not be possible to touch any hazardous moving parts, including the shredding roller or the mechanical section for shedding, with the probe.		N/A

	National Differences		—
1.6	**Power interface**		—
1.6.1	**AC Power distribution systems** At the end of the clause, the following note shall be added: Note: In Israel, the clause is subject to the Electricity Law. 1954, Electricity Regulations (Earthings and protective means against electrification for voltages up to 1,000 V), 1991, with their updates.	Must be considered when marketing into Israel.	—
1.7	**Marking and instructions**		—
1.7.1	**Power rating and identification markings** At the beginning of the clause, subclause 1.7.1.201 shall be added as follows:		—
1.7.1.201	**Marking in the Hebrew language** The marking in the Hebrew language shall be in accordance with the Consumer Protection Order (Marking of goods), 1983. In addition to the marking required by clause 1.7.1, the following details shall be marked in the Hebrew language: 1.Name of the apparatus and its commercial designation; 2.Manufacturer's name and his address; if the apparatus is imported, also the importer's name and his address; 3.Manufacturer's registered trademark, if any; 4.Name of the model and serial number; 5.Country of manufacture. The details shall be marked on the apparatus or on its packaging, or on a label well attached to the apparatus or its packaging, by bonding or sewing, such that the label cannot be easily removed.	Must be considered when marketing into Israel.	—
1.7.2	**Safety instructions and marking**		—
1.7.2.1	**General** - The following shall be added at the end of the clause: All the instruction and all the warnings related to safety shall also be written also in the Hebrew language.	Must be considered when marketing into Israel.	—
-	At the end of clause 1, clause 1.201 shall be added as follows:		

1.201	**Power consumption in standby mode** The equipment shall comply with the requirements of the Energy Sources Regulations (Maximum electrical power in standby mode for domestic and office electrical appliances), 2011, with a permitted deviation of up to 10 %	Must be considered before marketed in Israel.	—
2	**Protection from hazards** At the end of the clause, clause 2.201 shall be added as follows:		—
2.201	**Prevention of electromagnetic interferences**		—
2.201.1	Emission of electromagnetic interferences shall be tested in accordance with Israeli Standard SI 961 Part 6.1 or in accordance with the Israeli Standard that is an adoption of the International Standard CISPR 32. Note: At the time of writing this Standard, the Israeli Standard that is an adoption of the International Standard CISPR 32 is in preparation. Until publication of the Israeli Standard. the International Standard CISPR 32 may be used for testing the emission of electromagnetic interference. If the apparatus contains transmitters, it shall be tested according to Israeli Standard SI 961 Part 48.1 and according to another relevant part of the SI 961 Part 48 series or from the EN 301 489 series, according to the type of transmitter in the apparatus.	Must be considered before marketed in Israel.	—
2.201.2	Immunity to emission of electromagnetic interferences shall be tested in accordance with Israeli Standard SI 961 Part 6.2.	Must be considered before marketed in Israel.	—
2.201.3	Emission of electromagnetic interferences to the public electricity network shall be tested in accordance with the Israeli Standards SI 961 Parts 12.3 and 12.5 or in accordance with the Israeli Standards SI 61000 Part 3.12 and SI 961 Part 12.11, according to the current consumption of the equipment.	Must be considered before marketed in Israel.	—
3	**Wiring, connections and supply**		—
3.2	**Connection to a mains supply**		—
3.2.1	**Means of connection**		—
3.2.1.1	**Connection to an a.c. mains supply** After the NOTE, the following note shall be added: Note: In Israel, the supply plug shall comply with the requirements in Israeli Standard SI 32 Part I.I.	Refer to Summary of Testing in main test report.	—

	Special national conditions (if any)		—
	ANNEX P **Normative references** In place of some of the International Standards cited in the Standard and noted in this annex, the following Israeli Standards shall apply:	Must be considered before marketed in Israel.	—

ECMA/TC38-TG3/2015/026
(Rev. 1 – 15 April 2015)

Annex B2 - Product environmental attributes
Computer Monitors

The declaration may be published only when all rows and/or fields marked with * are filled-in (n.a. for not applicable).
Additional information regarding each item may be found under P15.

Brand *	***Lenovo***	**Logo**
Company name *	***Lenovo***	
Contact information * **e-mail address**	***Lenovo Global Environmental Affairs*** ***Alvin L Carter*** **alcarter@lenovo.com**	
Internet site *	***https://www.lenovo.com/us/en/sustainability-resources/***	
Additional information		

The company declares (based on product specification or test results based obtained from sample testing), that the product conforms to the statements given in this declaration.	
Type of product *	***Monitor***
Commercial name *	***ThinkVision T24i-30&P24i-30&TIO Flex 24i***
Model number *	***63CF,63BE,12BM***
Issue date *	***2022/7/1***
Intended market *	☒ **Global** ☐ **Europe** ☐ **Asia, Pacific & Japan** ☐ **Americas** ☐ **Other**
Additional information	

This is an uncontrolled copy when in printed form. Please refer to the contact information for the latest version.

About Annex B2

Annex B2 reflects Product environmental attributes relevant for Computers and Computer Monitors. The following items from the ECMA-370 Main body are not shown in the template:
P4.1 – P4.3 Consumable materials
P9.1 TEC and Print speed
P10.2 - P10.3 Chemical emissions from printing products
P11.1 - P11.3 Consumable materials for printing products.

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 561

Model number *	*63CF,63BE,12BM*	**Logo**	Lenovo
Issue date *	*2022/7/1*		

Product environmental attributes - Legal requirements		**Requirement met**		
Item		Yes	No	n.a.
P1	**Hazardous substances and preparations**			
P1.1*	Products do comply with current European RoHS Directive. (See legal reference and NOTE B1)	☒	☐	
P1.2*	Products do not contain Asbestos (see legal reference). Comment: Legal reference has no maximum concentration value.	☒	☐	
P1.3*	Products do not contain Ozone Depleting Substances: Chlorofluorocarbons (CFC), hydrobromofluorocarbons (HBFC), hydrochlorofluorcarbons (HCFC), Halons, carbontetrachloride, 1,1,1-trichloroethane, methyl bromide (see legal reference). Comment: Legal reference has no maximum concentration values.	☒	☐	
P1.4*	Products do not contain more than; 0,005% polychlorinated biphenyl (PCB), 0,005% polychlorinated terphenyl (PCT) in preparations (see legal reference).	☒	☐	
P1.5*	Products do not contain more than 0,1% short chain chloroparaffins (SCCP) with 10-13 carbon atoms in the chain containing at least 48% per mass of chlorine in the SCCP (see legal reference).	☒	☐	
P1.6*	Parts with direct and prolonged skin contact do not release nickel in concentrations above 0,5 μg/cm^2/week (see legal reference). Comment: Max limit in legal reference when tested according to EN1811:2011-5.	☒	☐	☐
P1.7*	REACH Article 33 information about substances in articles is available at (add URL or mail contact): ***https://www.lenovo.com/us/en/Lenovo-REACH-SVHC-Disclosure***	☒	☐	☐
P2	**Batteries**			
P2.1*	If the product contains a battery or an accumulator, the battery/accumulator is labeled with the disposal symbol. Information on proper disposal is provided in user manual. (See legal reference)	☐	☐	☒
P2.2*	Batteries or accumulators do not contain more than 0,0005% of mercury or 0,002% of cadmium. (See legal reference)	☐	☐	☒
P2.3*	Batteries and accumulators are readily removable. (See legal reference)	☐	☐	☒
P3	**Conformity verification & Eco design (ErP)**			
P3.1*	The product is CE-marked to show conformance with applicable legal requirements (see legal reference). The Declaration of Conformity can be requested at (add link or e-mail address): ***https://www.lenovo.com/us/en/compliance/eu-doc for EU and*** ***https://www.lenovo.com/us/en/compliance/uk-doc for UK***	☒	☐	☐
P3.2*	The product complies with the Eco design requirements for energy-related products, (see legal reference).	☒	☐	☐
	Required information is; ☐ given in item P15 or added to this document, ☒ available at (add URL): ***https://www.lenovo.com/us/en/compliance/eco-declaration***	☒	☐	☐
P5	**Product packaging**			
P5.1*	Packaging and packaging components do not contain more than 0,01% lead, mercury, cadmium and hexavalent chromium by weight of these together.	☒	☐	
P5.2*	The packaging materials are marked with abbreviations and numbers indicating the nature of the material(s) used (see legal reference).	☒	☐	☐
P5.3*	The product packaging material is free from ozone depleting substances as specified in the Montreal Protocol (see legal reference). Comment: Legal reference has no maximum concentration values.	☒	☐	☐
P6	**Treatment information**			
P6.1*	Information for recyclers/treatment facilities is available (see legal reference).	☒	☐	☐

NOTE B1 Restriction applies to the homogeneous material, unless other specified and expressed in weight %. Stating "Yes" means that the product is compliant with the mandatory requirements.

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 562

Model number *	***63CF,63BE,12BM***	**Logo**	Lenovo
Issue date *	***2022/7/1***		

Product environmental attributes - Market requirements (See General NOTE GN below) **- Environmental conscious design**		**Requirement met**		
Item	*=mandatory to fill in. Additional information regarding each item may be found under P14.	Yes	No	n.a.
P7	**Design** **Disassembly, recycling**			
P7.1*	Parts that have to be treated separately are easily separable	☒	☐	☐
P7.2*	Plastic materials in covers/housing have no surface coating.	☒	☐	☐
P7.3*	Plastic parts > 100 g consist of one material or of easily separable materials.	☒	☐	☐
P7.4*	Plastic parts > 25 g have material codes according to ISO 11469 referring ISO 1043-4.	☒	☐	☐
P7.5	Plastic parts are free from metal inlays or have inlays that can be removed with commonly available tools.	☒	☐	☐
P7.6*	Labels are easily separable. (This requirement does not apply to safety/regulatory labels).	☒	☐	☐
	Product lifetime			
P7.7*	Upgrading can be done e.g. with processor, memory, cards or drives	☐	☐	☒
P7.8*	Upgrading can be done using commonly available tools	☐	☐	☒
P7.9	Spare parts are available after end of production for: ***5*** years			☐
P7.10	Service is available after end of production for: ***5*** years			☐
	Material and substance requirements			
P7.11*	Product cover/housing material type (e.g. plastics, metal, aluminum): Material type: ***ABS*** Material type: ***PC*** Material type:			
P7.12	Insulation materials of external electrical cables are PVC free.	☐	☒	☐
P7.13	Insulation materials of internal electrical cables are PVC free.	☐	☒	☐
P7.14	External plastic casing/cover parts > 25 g contain no more than 0,1% weight (1000 ppm) bromine and 0,1% weight (1000 ppm) chlorine attributable to brominated flame retardants, chlorinated flame retardants, and polyvinyl chloride or 0,3% weight (3000 ppm) bromine and 0,3% weight (3000 ppm) chlorine in parts containing more than 25% post-consumer recycled content.	☒	☐	☐
P7.15	Printed circuit boards, PCBs (without components) are low halogen: all ☒ PCBs > 25 g ☐ are low halogen as defined in IEC 61249-2-21. (See 1NOTE B2)	☐	☒	☐
P7.16	Flame retarded plastic parts > 25 g in covers / housings are marked according ISO 1043-4: Marking:	☐	☒	☐
P7.17	Alt. 1: Chemical specifications of flame retardants in printed circuit boards > 25 g (without components): ☐ TBBPA (additive), ☒ TBBPA (reactive) (See NOTE B3), ☐ Other:, CAS #:	☒	☐	☐
	Alt. 2: Chemical specifications of flame retardants in printed circuit boards (without components) > 25 g according ISO 1043-4:	☐	☐	☒
P7.18	Alt. 1: Flame retarded plastic parts > 25 g contain the following flame retardant substances/preparations in concentrations above 0,1%: 1. Chemical name: , CAS #: (See NOTE B4) 2. Chemical name: , CAS #: " 3. Chemical name: , CAS #: "	☐	☐	☒
	Alt. 2: Chemical specifications of flame retardants in plastic parts > 25 g according ISO 1043-4:	☐	☐	☒
P7.19	In plastic parts > 25 g, flame retardant substances/preparations above 0,1% are used which have been assigned the following Risk phrases; and Hazard statements: The source(s) for these classifications is/are found at (add URL(s)): , (See note B5)	☐	☐	☒
P7.20*	Postconsumer recycled plastic material content is used in the product (See Note B6): If YES; at least one of the two alternatives below shall be answered; a) Of total plastic parts' weight > 25 g, the postconsumer recycled plastic material content (calculated as a percentage of total plastic by weight) is ***81.61 %. (EPEAT calculation) / 85% (TCO calculation)*** or b) The weight of recycled material is ***705.55***g.	☒	☐	☐

GENERAL NOTE Standard references should direct to the latest version of a standard. If an older version of a standard is used, section P15 shall be used for explanation.

NOTE B2 IEC 61249-2-21 defines maximum limits of 900 ppm for each of the substances chlorine and bromine and a maximum limit of 1500ppm of these substances combined. The standard does not address fluorine, iodine and astatine which are included in the group of halogens.

NOTE B3 and B4 A Guidance document on Chemical substances is available; see http://www.ecma-international.org/publications/standards/Ecma-370.htm

NOTE B5 If a certain substance has been assigned a certain risk phrases / hazard statement in the referenced source, this does not necessarily mean the substance has been tested for all of the hazards referred to by a certain customer.

NOTE B6 Applies to a product containing plastic parts whose combined weight exceeds 100 g with the exception of printed circuit boards, cables, connectors and electronic components and bio-based plastic material.

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 563

A Lenovo declara ainda que os produtos acima citados:

- Teclado no padrão ABNT2 Português.
- Cpu, teclado, mouse e monitor possuem mesmo padrão de cor e são de fabricação Lenovo.
- Placa mãe fabricada para uso exclusivo
- BIOS com direitos copyright.
- Componentes do produto são novos (sem uso, reforma ou recondicionamento) e produtos pertencentes à Linha Corporativa.
- Os equipamentos serão entregues devidamente acondicionadas em embalagens individuais adequadas, que utilizam materiais recicláveis.
- Os produtos estão em linha de produção sem previsão de encerramento antes de 90 dias.
- Possuem BIOS desenvolvida pela Lenovo em Flash Memory onde somos responsáveis por atualizações e manutenções, em idioma inglês ou português. Implementada em memória Flash-ROM, com suporte plug-and-play, tipo flash EPROM e SMBIOS 2.4.
- Possui Memoria não volátil e reprogramável.
- Possuir recursos de controle de permissão através de senhas.

Docusign Envelope ID: 584A497D-0AF3-4A88-9365-C6BBBAB81E01

- Possibilita que a senha de acesso ao BIOS seja ativada e desativada via SETUP. Suporte a senha de inicialização, Power on, administrador e disco rígido.
- Logo do fabricante na inicialização sendo permitido sua customização, número de série do equipamento gravada na Bios, campo editável que permite inserir identificação customizada como inclusão de identificação e patrimônio, podendo ser consultada e atualizada por software de gerenciamento e via comandos DMI.
- Bios com capacidade de habilitar/desabilitar drivers de entrada e saída, individualmente portas USB, webcam, áudio e microfone.
- Atualização da BIOS por meio de interface gráfica através de utilitário, dentro do sistema operacional ou site do fabricante.
  Em atendimento as diretrizes da lei Nº 12 305/2010, que institui a Política Nacional de Resíduos Sólidos, o fabricante do equipamento será responsável pelo mecanismo de Logística Reversa.
- Suporte ao padrão de gerenciamento DMI 2.0 em conformidade com a especificação UEFI 2.8 e capturáveis pela aplicação de inventário SCCM.
- Suporte a ACPI 6.3 com controle automático de rotação do ventilador da CPU. Monitoramento das velocidades dos coolers, temperatura do processador e tensão utilizada pela fonte Possui sistema de dissipação de calor dimensionado suportando operar por 12 horas diárias.
- Software de Diagnóstico, embarcado no BIOS para diagnóstico de problemas que permite o teste do equipamento, com independência do Sistema Operacional, capaz de ser executado através da tecla função. Capaz de verificar, testar emitir relatório através de tela gráfica com o andamento do teste e informações sobre o fabricante, modelo do equipamento, processador memória, firmware, capacidade do disco.
- Conformidade com a NIST 800 147 nos padrões de criptografia com função integrada para apagar dados do disco rígido de forma segura não permitindo sua recuperação através de ferramentas.
  Em Conformidade NIST 800-88
- A BIOS está em conformidade com a normativa de segurança NIST 800-193 ou ISO/IEC 19678:2015, de maneira a usar métodos de criptografia robusta para verificar a integridade da BIOS antes de passar o controle de execução à mesma;
- Capacidade de desligamento do vídeo e do disco após tempo determinado pelo usuário e religamento por acionamento de teclado ou movimentação do mouse com função de economia de energia para monitor, placa mãe e disco.
- Permite o boot através de unidade de disco óptico, dispositivo USB ou pela rede.
- Permite a replicação da Bios pela rede ou por USB.
- Placa mãe fabricada pela Lenovo, com Lenovo serigrafado na placa, desenvolvida para o mercado corporativo.
  Placa mãe suporta Virtualização baseada em hardware.
- Possui Chip de segurança TPM 2.0 integrado, acompanhado do software capaz de implementar as principais funcionalidades do mesmo.
- Lenovo possui sistema de carregamento de imagens personalizadas, e serviço de gravação de logotipo a laser no gabinete.
- Placa de Rede com tecnologia WOL e PXE 2.1.
- Disco com suporte a tecnologia SMART, e tecnologia redutora de danos ao disco rígido, NCQ e AHCI.
- Placa mãe suporta os padrões de gerenciamento WMI.
- Acompanha cabo de alimentação e plug de acordo com a NBR 14136.
- Todas as fontes são bivolts (100 a 240 V)
- A garantia do monitor ofertado cobre ainda o reparo ou substituição do monitor no caso do aparecimento de no mínimo 3 pixels queimados.
- Suporte ao sistema operacional Linux Ubuntu.
  O Bios mostra as configurações de hardware, possuí modo gráfico interativo por mouse e teclado e possuí no próprio hardware cópia de segurança capaz de restauração automática, permitindo carregar em outro equipamento do mesmo modelo estando com senha ou não.
  O Bios possui gravação de Log de eventos acessíveis pelo BIOS, Sistema Operacional e Software de Gerenciamento.
- Bios reconhece automaticamente os discos rígidos instalados.
- Teclado (TECLA00) - possui proteção contra o derramamento de líquidos;

Docusign Envelope ID: 584A497D-0AF3-4A88-9365-C6BBBAB81E01

- Teclado do Notebook citado possui proteção contra o derramamento de líquidos. Acabamentos feito de materiais não cortantes. Permite que o equipamento seja aberto sem a perda de garantia.
- Possuem a capacidade de funcionalidade de segurança avançada de rastreamento pela internet que, em caso de furto ou extravio, permita recuperação e localização do equipamento.
- O compartilhamento randômico de memória RAM com a placa gráfica integrada pode chegar até 50% do total de memória RAM instalada, com o sistema operacional Windows Pro.
- Equipamentos com Microsoft Windows possuem chave de ativação gravada na Bios.
- O desktop possui função que permite ligar o equipamento através de uma combinação de teclas no teclado conectado através de porta USB.
- Conectores integrados à placa-mãe identificados no padrão de cores PC'99 System Design Guide.
- Bios possui capacidade de proteção da memória flash contra gravação.
- Possui função de teste do equipamento, com independência do sistema operacional instalado, capaz de ser executado a partir da UEFI, através do acionamento da tecla função (F1...F12). Este teste verifica, mostra o andamento e emite relatório de componentes, como processador, memória, disco rígico, etc.
- Equipamentos que possuem RJ-45, a interface de rede é compatível com os padrões Ethernet, Fast-Ethernet e Gigabit Ethernet, autosense, full-duplex e plug-and-play, configurável totalmente por software, com função wake-on-lan instalada e em funcionamento, PXE 2.1, TCP/IP/UDP Checksum Offload e RSS (Receive Side Scailling), operando em 10/100/1000 Mbps de forma automática.
- Garantia onsite com atendimento 9x5 (nove horas por cinco dias úteis).
- A substituição das peças estão inclusas durante o prazo de garantia.
- O atendimento pela Assistência Técnica (tempo de solução de um chamado técnico para a definitiva solução) será conforme o edital.
- A garantia não será afetada caso a Contratante venha a instalar placas de rede local, de fax-modem, interfaces específicas para acionamento de outros equipamentos, adicionar unidades de disco rígido, bem como se alterar a capacidade de memória RAM do equipamento, ressaltando que a garantia destes opcionais será total responsabilidade da Contratante.
- O Desktop SFF suporta o peso do monitor quando está na horizontal.
- Para o processo listado, os equipamentos possuem as seguintes fontes:
- -TIO24+M70Q: possuir eficiência igual ou superior a 89%, com 50% da carga de trabalho e que implemente PFC (Power Factor Correction);
- -P3 Tower: possuir eficiência igual ou superior a 92%, com 50% da carga de trabalho e que implemente PFC (Power Factor Correction);
- -E14 Intel G6: possuir eficiência igual ou superior a 85%, com 50% da carga de trabalho e que implemente PFC (Power Factor Correction);
- -P16v G2: possuir eficiência igual ou superior a 85%, com 50% da carga de trabalho e que implemente PFC (Power Factor Correction);

A Lenovo declara ainda que os produtos acima citados:

- Teclado no padrão ABNT2 Português.
- Cpu, teclado, mouse e monitor possuem mesmo padrão de cor e são de fabricação Lenovo.
- Placa mãe fabricada para uso exclusivo
- BIOS com direitos copyright.
- Componentes do produto são novos (sem uso, reforma ou recondicionamento) e produtos pertencentes à Linha Corporativa.
- Os equipamentos serão entregues devidamente acondicionadas em embalagens individuais adequadas, que utilizam materiais recicláveis.
- Os produtos estão em linha de produção sem previsão de encerramento antes de 90 dias.
- Possuem BIOS desenvolvida pela Lenovo em Flash Memory onde somos responsáveis por atualizações e manutenções, em idioma inglês ou português. Implementada em memória Flash-ROM, com suporte plug-and-play, tipo flash EPROM e SMBIOS 2.4.
- Possui Memoria não volátil e reprogramável.
- Possuir recursos de controle de permissão através de senhas.

Docusign Envelope ID: 584A497D-0AF3-4A88-9365-C6BBBAB81E01

- Possibilita que a senha de acesso ao BIOS seja ativada e desativada via SETUP. Suporte a senha de inicialização, Power on, administrador e disco rígido.
- Logo do fabricante na inicialização sendo permitido sua customização, número de série do equipamento gravada na Bios, campo editável que permite inserir identificação customizada como inclusão de identificação e patrimônio, podendo ser consultada e atualizada por software de gerenciamento e via comandos DMI.
- Bios com capacidade de habilitar/desabilitar drivers de entrada e saída, individualmente portas USB, webcam, áudio e microfone.
- Atualização da BIOS por meio de interface gráfica através de utilitário, dentro do sistema operacional ou site do fabricante.
  Em atendimento as diretrizes da lei Nº 12 305/2010, que institui a Política Nacional de Resíduos Sólidos, o fabricante do equipamento será responsável pelo mecanismo de Logística Reversa.
- Suporte ao padrão de gerenciamento DMI 2.0 em conformidade com a especificação UEFI 2.8 e capturáveis pela aplicação de inventário SCCM.
- Suporte a ACPI 6.3 com controle automático de rotação do ventilador da CPU. Monitoramento das velocidades dos coolers, temperatura do processador e tensão utilizada pela fonte Possui sistema de dissipação de calor dimensionado suportando operar por 12 horas diárias.
- Software de Diagnóstico, embarcado no BIOS para diagnóstico de problemas que permite o teste do equipamento, com independência do Sistema Operacional, capaz de ser executado através da tecla função. Capaz de verificar, testar emitir relatório através de tela gráfica com o andamento do teste e informações sobre o fabricante, modelo do equipamento, processador memória, firmware, capacidade do disco.
- Conformidade com a NIST 800 147 nos padrões de criptografia com função integrada para apagar dados do disco rígido de forma segura não permitindo sua recuperação através de ferramentas.
  Em Conformidade NIST 800-88
- A BIOS está em conformidade com a normativa de segurança NIST 800-193 ou ISO/IEC 19678:2015, de maneira a usar métodos de criptografia robusta para verificar a integridade da BIOS antes de passar o controle de execução à mesma;
- Capacidade de desligamento do vídeo e do disco após tempo determinado pelo usuário e religamento por acionamento de teclado ou movimentação do mouse com função de economia de energia para monitor, placa mãe e disco.
- Permite o boot através de unidade de disco óptico, dispositivo USB ou pela rede.
- Permite a replicação da Bios pela rede ou por USB.
- Placa mãe fabricada pela Lenovo, com Lenovo serigrafado na placa, desenvolvida para o mercado corporativo.
  Placa mãe suporta Virtualização baseada em hardware.
- Possui Chip de segurança TPM 2.0 integrado, acompanhado do software capaz de implementar as principais funcionalidades do mesmo.
- Lenovo possui sistema de carregamento de imagens personalizadas, e serviço de gravação de logotipo a laser no gabinete.
- Placa de Rede com tecnologia WOL e PXE 2.1.
- Disco com suporte a tecnologia SMART, e tecnologia redutora de danos ao disco rígido, NCQ e AHCI.
- Placa mãe suporta os padrões de gerenciamento WMI.
- Acompanha cabo de alimentação e plug de acordo com a NBR 14136.
- Todas as fontes são bivolts (100 a 240 V)
- A garantia do monitor ofertado cobre ainda o reparo ou substituição do monitor no caso do aparecimento de no mínimo 3 pixels queimados.
- Suporte ao sistema operacional Linux Ubuntu.
  O Bios mostra as configurações de hardware, possuí modo gráfico interativo por mouse e teclado e possuí no próprio hardware cópia de segurança capaz de restauração automática, permitindo carregar em outro equipamento do mesmo modelo estando com senha ou não.
  O Bios possui gravação de Log de eventos acessíveis pelo BIOS, Sistema Operacional e Software de Gerenciamento.
- Bios reconhece automaticamente os discos rígidos instalados.
- Teclado (TECLA00) - possui proteção contra o derramamento de líquidos;

Docusign Envelope ID: 584A497D-0AF3-4A88-9365-C6BBBAB81E01

- Teclado do Notebook citado possui proteção contra o derramamento de líquidos. Acabamentos feito de materiais não cortantes. Permite que o equipamento seja aberto sem a perda de garantia.
- Possuem a capacidade de funcionalidade de segurança avançada de rastreamento pela internet que, em caso de furto ou extravio, permita recuperação e localização do equipamento.

Members

The Responsible Business Alliance is the world's largest industry coalition dedicated to responsible business conduct in global supply chains.

Beginning with eight members in 2004, today the RBA core membership (not counting initiative-only members) is composed of more than 230 electronics, retail, auto and toy companies with combined annual revenue greater than $7.7 trillion, directly employing over 6 million people. In addition to RBA members, thousands of companies that are Tier 1 suppliers to those members are required to implement the RBA Code of Conduct. More than 3.5 million people from over 120 countries contribute to the manufacture of RBA members' products.

Learn about member benefits and requirements (join-us/)

The RBA has four membership categories: Full, Regular, Affiliate, and Supporter. View the requirements of each category here (join-us/). Full and Regular members are designated by an "F" or "R" following their company names below:

Cadastro Técnico Federal de Atividades Potencialmente Poluidoras e Utilizadoras de Recursos Ambientais – CTF/APP

Categoria	Detalhe
5 - Indústria de material Elétrico, Eletrônico e Comunicações	2 - Fabricação de material elétrico, eletrônico e equipamentos para telecomunicação e informática

Conforme dados disponíveis na presente data, a pessoa jurídica acima possui Certificado de Regularidade em conformidade com as obrigações cadastrais e de prestação de informações ambientais sobre as atividades desenvolvidas sob controle e fiscalização do Ibama, por meio do CTF/APP.

O certificado de regularidade emitido pelo CTF/APP não desobriga a pessoa inscrita de obter licenças, autorizações, permissões, concessões, alvarás e demais documentos exigíveis por instituições federais, estaduais, distritais ou municipais para o exercício de suas atividades.

O Certificado de Regularidade do CTF/APP não habilita o transporte e produtos e subprodutos florestais e faunísticos.

Cadastro Técnico Federal de Atividades e Instrumentos de Defesa Ambiental - CTF/AIDA

Código	Atividade
0005-40	Gerenciamento de resíduos perigosos - armazenamento de resíduos perigosos - Lei nº 12.305/2010
0005-10	Gerenciamento de resíduos perigosos - geração de resíduos perigosos - Lei nº 12.305/2010
0004-00	Gerenciamento de resíduos sólidos não perigosos - Lei nº 12.305/2010

Conforme dados disponíveis na presente data, a pessoa jurídica acima possui Certificado de Regularidade, em conformidade com as obrigações cadastrais do CTF/AIDA.

A inscrição no CTF/AIDA constitui declaração, pela pessoa jurídica, de observância dos padrões técnicos normativos estabelecidos pela Associação Brasileira de Normas Técnicas – ABNT, pelo Instituto Nacional de Metrologia, Qualidade e Tecnologia – INMETRO e pelo Conselho Nacional de Meio Ambiente - CONAMA.

O Certificado de Regularidade emitido pelo CTF/AIDA não desobriga a pessoa inscrita de obter licenças, autorizações, permissões, concessões, alvarás e demais documentos exigíveis por instituições federais, estaduais, distritais ou municipais para o exercício de suas atividades, especialmente os documentos de responsabilidade técnica, qualquer o tipo e conforme regulamentação do respectivo Conselho de Fiscalização Profissional, quando exigíveis.

O Certificado de Regularidade no CTF/AIDA não produz qualquer efeito quanto à qualificação e à habilitação técnica da pessoa jurídica inscrita.

Usar o Lenovo Vantage facilita a sua vida

Descrição

Seu PC Lenovo possui características únicas que você não encontrará em nenhum outro computador, e o Lenovo Vantage torna mais fácil para que você obtenha o máximo do seu dispositivo. Tudo dentro do Lenovo Vantage é feito sob medida para você: você encontrará informações úteis e recomendações com base no seu dispositivo e a maneira como você o utiliza. Com uma interface fácil de usar, você pode:

- Personalizar suas configurações
- Melhorar a segurança do WiFi,
- Atualizar drivers
- Executar o diagnóstico do dispositivo
- Identificar o número de série do sistema e o número de produto
- Solicitação de suporte e muito mais.

Conheça mais sobre o Lenovo Vantage assistindo vídeos tutoriais no Lenovo Suporte no YouTube (https://www.youtube.com/channel/UCAlvKsUHOASIzduN8Tuv3jA/videos)

- (video) Obtenha drivers recentes através do Lenovo Vantage (https://www.youtube.com/watch?v=JV69KDHrOsw&t=2s)
- Dicas Lenovo: ***www.lenovo.com/tips*** (https://www.lenovo.com/tips)

Nota:

- Lenovo Vantage foi criado especificamente para PCs com o Windows 10. Link para download: **https://www.microsoft.com/en-us/store/p/lenovo-companion/9wzdncrfj4mv** (https://www.microsoft.com/en-us/store/p/lenovo-companion/9wzdncrfj4mv)
- O Lenovo Vantage substitui o Lenovo Companion, Lenovo Settings e o Lenovo Account Portal.

- Windows 10

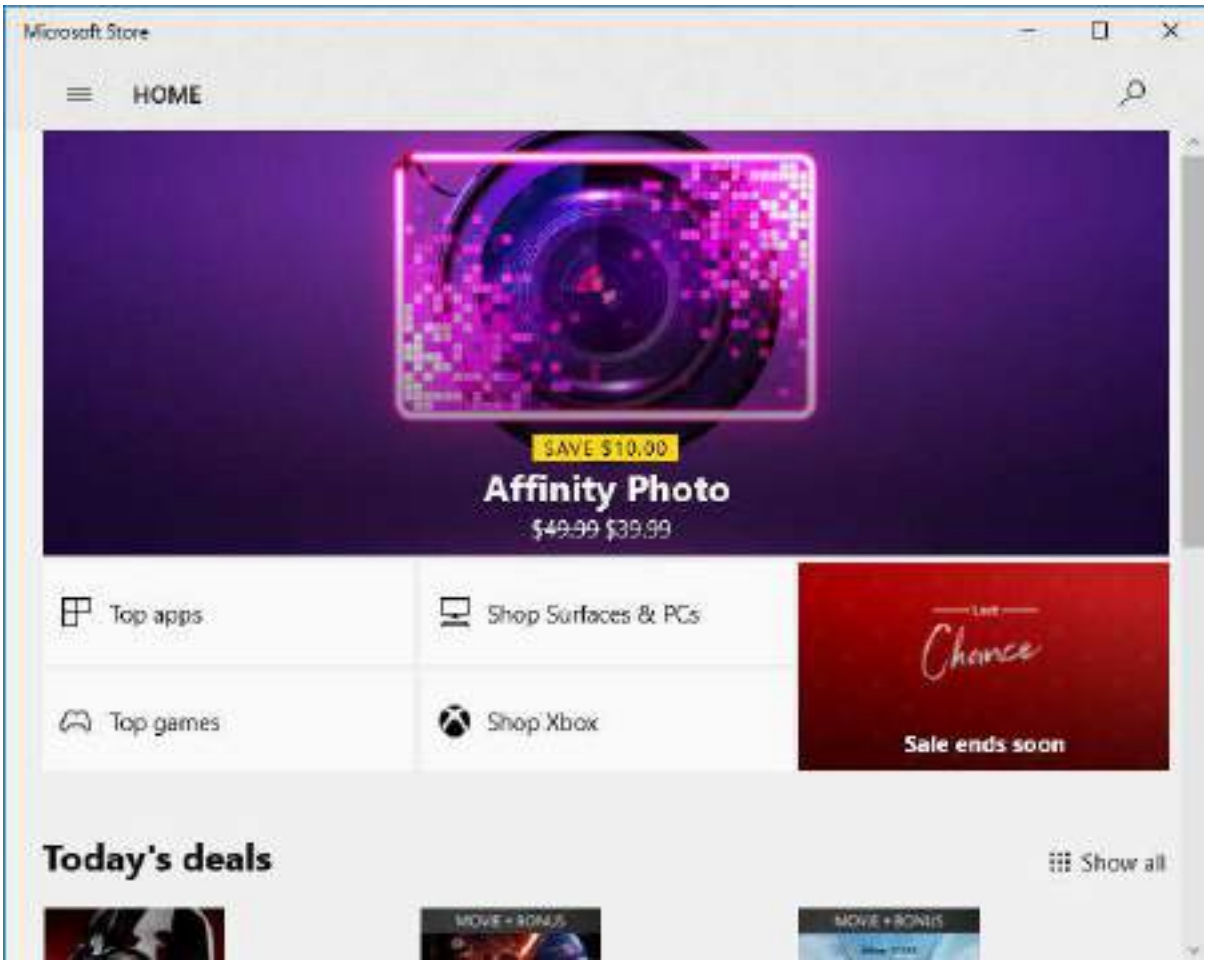
Solução

Lenovo Vantage (substituto do Lenovo Companion) é um app que mantém o seu dispositivo funcionando corretamente e o ajuda a fazer ainda mais com o seu dispositivo.

Principais características:

- Ajuste o seu PC Lenovo com configurações personalizadas:
  - Power: Ajuda a gerenciar e prolongar a vida da bateria do notebook
  - Áudio, Visual: Configurações da câmera, controle de brilho, configurações de microfone, configurações Dolby
  - Configurações inteligentes: Ajusta automaticamente o seu áudio e exibição com base em aplicativos que estão sendo usados.
  - Entrada: Touchpad, tecla de função (Fn), teclado luminoso, as configurações do mouse/caneta/toque
- Acesso para o Lenovo Migration Assistant - um aplicativo gratuito que transfere perfeitamente arquivos e configurações de um PC para outro
- Protege o seu PC e atualiza os drivers e softwares de sistemas importantes
- Avaliação da integridade do sistema e execução do diagnóstico no seu dispositivo
- Acesso ao guia do usuário do seu sistema e obtenção de suporte
- Descubra outras coisas divertidas e aplicativos úteis
- Veja os acessórios compatíveis com seu dispositivo
- Explore ofertas exclusivas em serviços e produtos da Lenovo
- Identifique o status da garantia
  - Data de início e data de término
  - Links para as opções de garantia e upgrades
- Obter dicas úteis e manter-se atualizado sobre as últimas notícias de tecnologia, com artigos da Lenovo

Como baixar o Lenovo Vantage

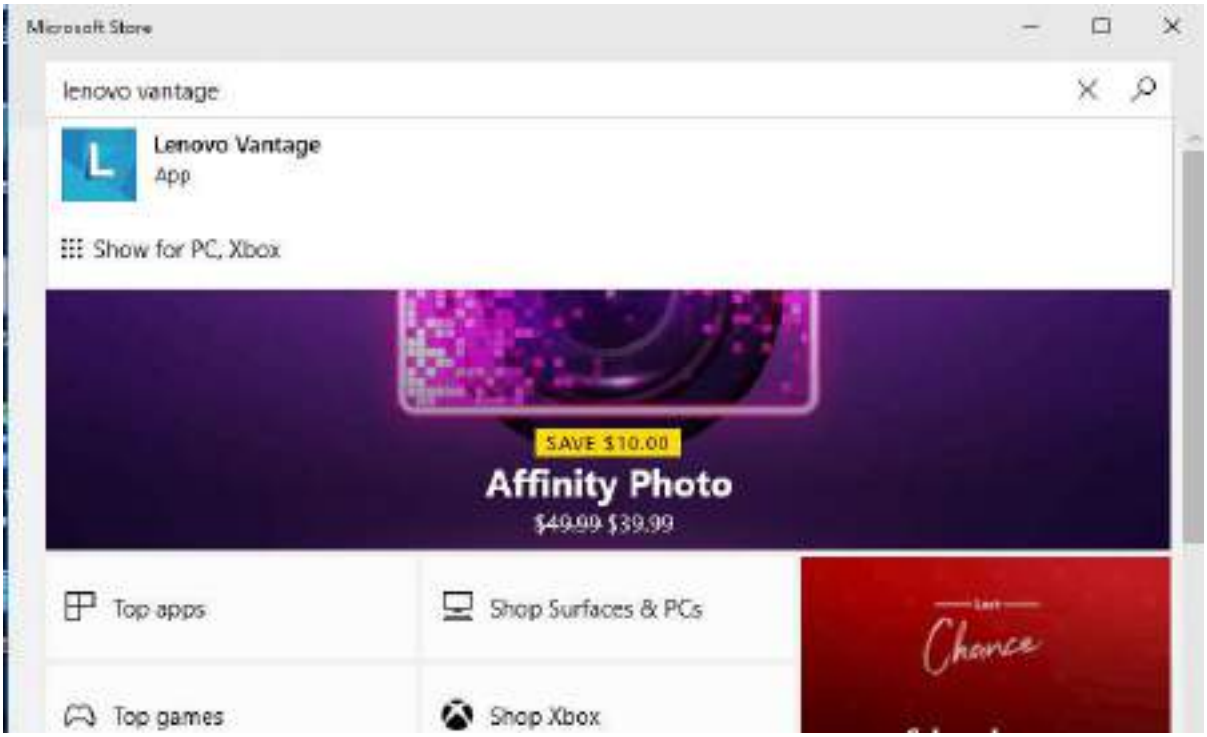


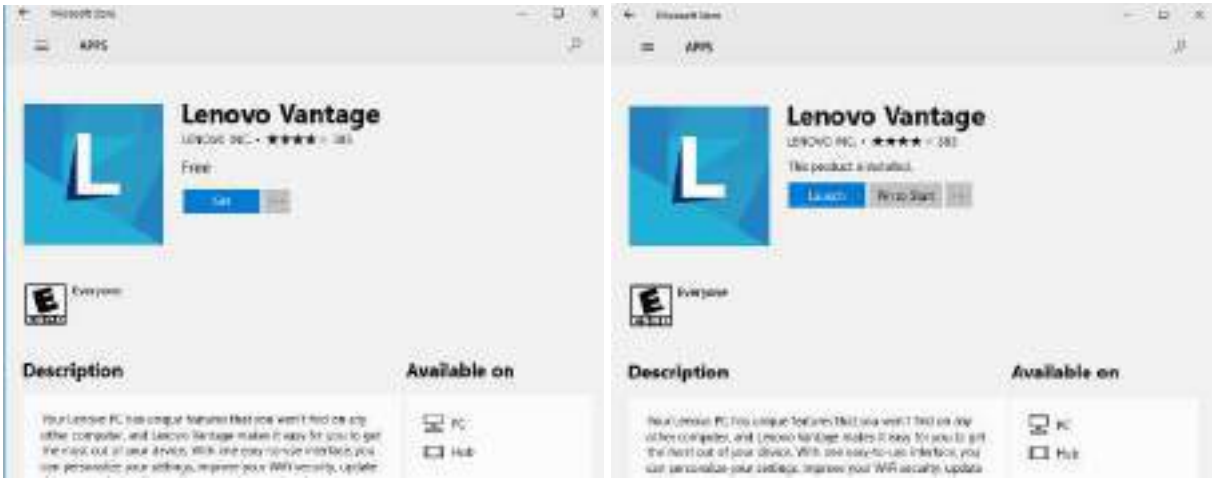
Consulte abaixo os passos para baixar e instalar o Lenovo Vantage.

1. Encontre a Microsoft Store no menu Iniciar

Back to top

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 612

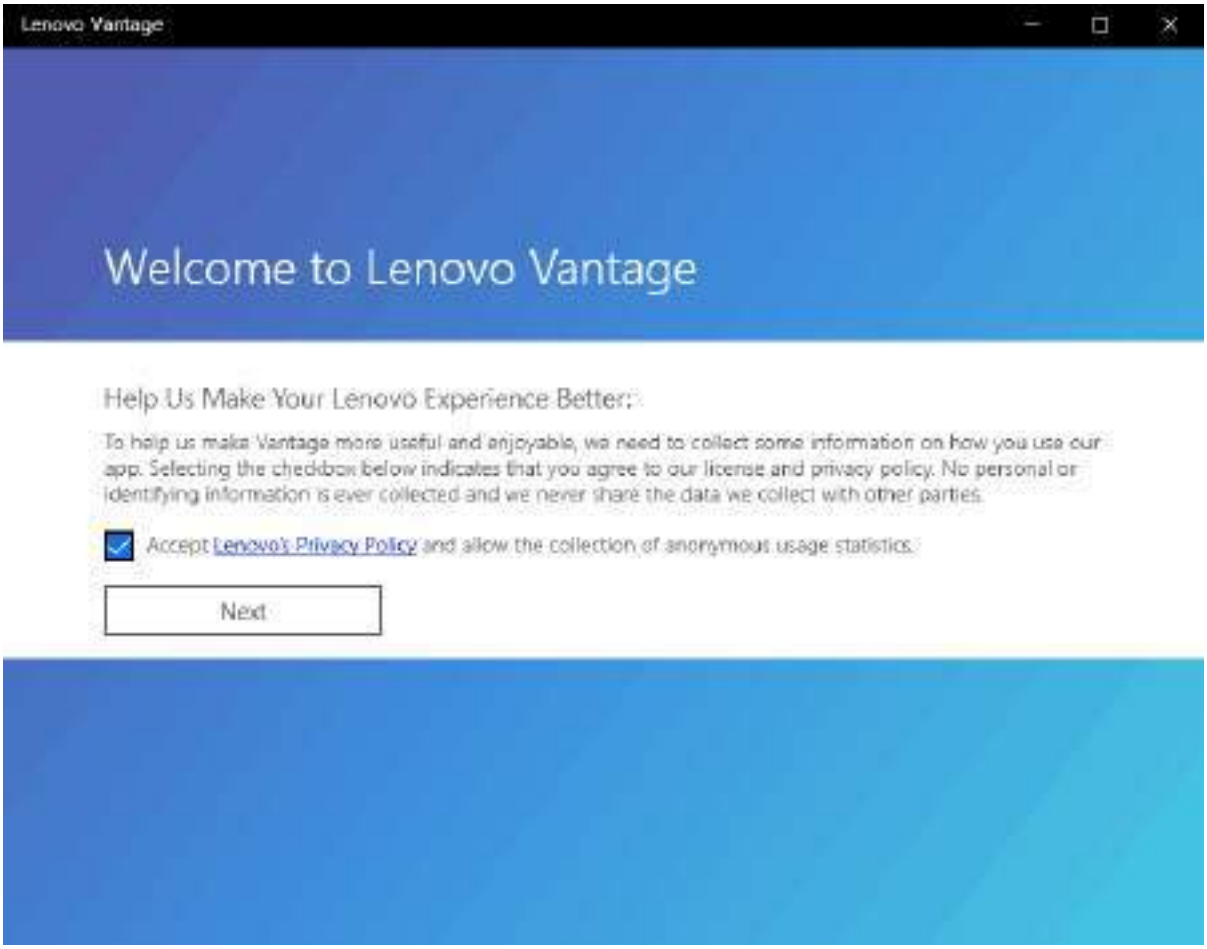




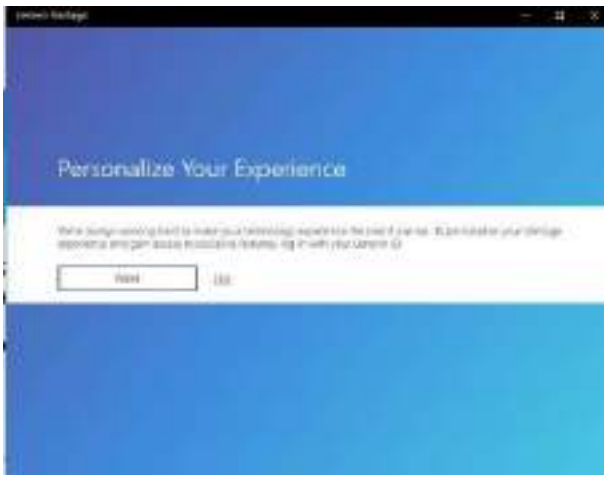
2. Toque "Lenovo Vantage" na barra de pesquisa no Microsoft Store

Back to top

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 613



3. Clique no ícone Lenovo Vantage para acessar a página de aplicativos. Então, clique em Obter para lançar e baixar o Lenovo Vantage.



4. Após baixar Lenovo Vantage, execute o arquivo. Em seguida, marque "aceitar a política de privacidade da Lenovo" para ir ao próximo passo.

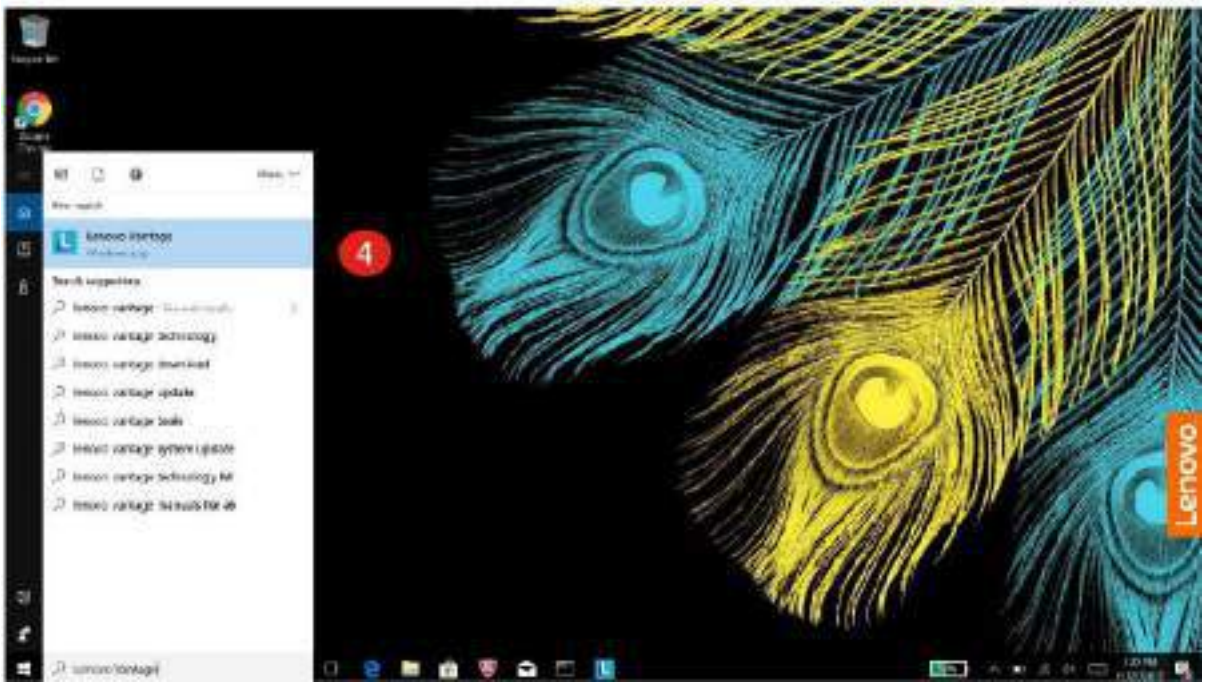
Back to top

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 614

5. Se você possui o Lenovo ID, pode entrar com ele. Se você não tiver, você pode pular esta etapa para acessar diretamente o Lenovo Vantage, e registrar mais tarde se quiser.

Como encontrar o Lenovo Vantage

Use um dos procedimentos a seguir para encontrar Lenovo Vantage no seu dispositivo:



1. Menu iniciar: Listados na lista de aplicativos instalados.
2. *Tiles (*quadradinhos*)* do Windows
3. Barra de tarefas

Back to top

Anexo PROPOSTA ITEM 1 - ER SOLUÇOES (1661785) SEI 2025.001317 / pg. 615

4. Barra de pesquisa do Windows

Caso o Lenovo Vantage não esteja instalado no seu dispositivo, você deve baixá-lo gratuitamente na Microsoft Store em **https://www.microsoft.com/en-us/store/p/lenovo-companion/9wzdncrfj4mv** (https://www.microsoft.com/en-us/store/p/lenovo-companion/9wzdncrfj4mv).

Base de Conhecimento & Guias

Download Lenovo Tools for Administrators

Este é um artigo traduzido automaticamente, por favor clique aqui para

As seguintes ferramentas são fornecidas para auxiliar os administradores de TI no gerenciamento e implantação de produtos Lenovo

- System Update (https://support.lenovo.com/us/en/solutions/ht037099#tvsu)
- Thin Installer (https://support.lenovo.com/us/en/solutions/ht037099#ti)
- Update Retriever (https://support.lenovo.com/us/en/solutions/ht037099#ur)
- Gerente de Dock (https://support.lenovo.com/us/en/solutions/ht037099#dm)

Guia de implantação System Update
Este guia se destina a administradores de TI ou responsáveis por implantar e usar o System Update do sistema de programas (Lenovo System Update , Update Retriever, Thin I suas organizações. Este guia fornece as informações necessárias para instalar e configurar esses aplicativos em um ou mais computadores.

- Guia de implantação System Update (https://download.lenovo.com/cdrt/docs/DG-SystemUpdateSuite.pdf) (inglês)

System Update

- System Update 5.07.0127 (https://download.lenovo.com/pccbbs/thinkvantage_en/system_update_5.07.0127.exe) (7,92 MB)
- Leiame da System Update (https://download.lenovo.com/pccbbs/thinkvantage_en/system_update_5.07.0127.txt) 5.07.0127 (18 KB)

O que mudou:

```
- (Novo)  1. Suporta novas atualizações de firmware baseadas em cápsulas 2. Atualize a biblioteca de CV para 3.1.20 - (Correção) 1. Não é possível
```

Lenovo System Update baixa atualizações de software, drivers e BIOS de um Lenovo diretamente da Internet sem exigir conhecimento específico do usuário de onde o pacote necessário para o sistema de destino. System Update pode determinar quais atualizações são necessárias e aplicá-las. System Update também pode ser direcionada a um repos Update Retriever.

Observação:

- System Update 5.07 é **SOMENTE** compatível com Microsoft Windows 10 e Windows 7; pode ser usado como está no Windows 8 / 8.1
- O Microsoft .NET Framework versão 4.5.2 (https://www.microsoft.com/en-us/download/details.aspx?id=42643) ou superior é necessário para que a System Update
- Antes de usar a System Update com o Windows 7, clique aqui (http://www.catalog.update.microsoft.com/search.aspx?q=kb4474419) para baixar e instalar a atualiza

lançada pela Microsoft para garantir que as System Update possam ser instaladas com êxito. Para obter mais informações sobre esta atualização de segurança da Micros https://support.microsoft.com/en-us/help/4472027/2019-sha-2-code-signing-support-requirement-for- windows -and-wsus (https://support.microsoft.com/en-us/help signing-support-requirement-for-windows-and-wsus) .

Ferramentas de administrador
O arquivo de modelo administrativo (ADM) define as configurações de política usadas por aplicativos nos computadores clientes. As políticas são configurações específicas qu do aplicativo. As configurações de política também definem se o usuário terá permissão para definir configurações específicas por meio do aplicativo. As configurações definid servidor são definidas como políticas. As configurações definidas por um usuário no computador cliente para um aplicativo são definidas como preferências. Conforme definid configurações de política têm precedência sobre as preferências.

- Baixe as System Update (511 KB) (https://download.lenovo.com/pccbbs/thinkvantage_en/zb59_tvsu_win7_win8_admin110.exe)

Thin Installer

- Thin Installer 1.3.0031 (https://download.lenovo.com/pccbbs/thinkvantage_en/lenovo_thininstaller_1.3.0031.exe) (6,7 MB)
- Leiame do Thin Installer (https://download.lenovo.com/pccbbs/thinkvantage_en/lenovo_thininstaller_1.3.0031.txt) 1.3.0031 (9 KB)

Anexo PROPOSTA ITEM 1 - ER SOLUÇÕES (1661785) SEI 2025.001317 / pg. 621

O que mudou:

```
1. Suporta novas atualizações de firmware baseadas em cápsulas. 2. Atualize a biblioteca de CV para 3.1.20. 3. Corrija alguns problemas.
```

Thin Installer é uma versão menor do System Update que não requer instalação - pode simplesmente ser copiado para o sistema de destino. Thin Installer procura os pacotes c que você cria. O repositório pode ser criado em seu disco rígido local, um compartilhamento de rede, um servidor web ou mídia externa, como um CD, DVD ou disco rígido US termina de instalar os pacotes aplicáveis, não existe nenhuma chave de registro relacionada ao Thin Installer - portanto, o usuário só precisa excluir a pasta que contém o Thin arquivos associados ao Thin Installer e ao repositório associado.

Observação:

- Thin Installer **SÓ** é compatível com Microsoft Windows 10 e Windows 7; pode ser usado como está no Windows 8 / 8.1
- O Microsoft .NET Framework versão 4.5.2 (https://www.microsoft.com/en-us/download/details.aspx?id=42643) ou superior é necessário para que o Thin Installer fu

Update Retriever

- Updateretriever_5.00.0085 (https://download.lenovo.com/pccbbs/thinkvantage_en/updateretriever_5.00.0085.exe) (5,6 MB)
- Updateretriever_5.00.0085 Leiame (https://download.lenovo.com/pccbbs/thinkvantage_en/updateretriever_5.00.0085.txt) (11 KB)

O que mudou:

```
1. Atualize a biblioteca CV para 3.1.18.
```

Update Retriever é um programa que permite a um administrador procurar e fazer download de atualizações do Lenovo para uma pasta de repositório em uma unidade local ou pasta do repositório fornece o armazenamento para pacotes de atualização. System Update ou o Thin Installer podem ser configurados para pesquisar pacotes de atualização r compartilhamento de rede em vez de pesquisar no site de suporte Lenovo Com o Update Retriever, é possível iniciar manualmente a pesquisa de pacotes de atualização ou age de novos pacotes de atualização em um intervalo de tempo especificado. Isso permite maior controle das atualizações disponíveis para dispositivos gerenciados.

Observação:

- O Microsoft .NET Framework versão 4.5.2 (https://www.microsoft.com/en-us/download/details.aspx?id=42643) ou superior é necessário para que o Update Retriev

Gerente de Dock

- Dock Manager 1.1.0.13 (https://download.lenovo.com/consumer/options/dockmanagersetup_1.1.0.13.exe)
- Leiame do Dock (https://download.lenovo.com/consumer/options/dock_manager_1.1.0.13.txt)

O que mudou:

```
[Atualizações importantes] - Adicione suporte para " ThinkPad Universal USB -C Dock " [Novas funções ou aprimoramentos] - Melhore os registros que
```

Lenovo Dock Manager é uma nova solução para melhorar a implementação em grande escala de atualizações de firmware para docks da Lenovo Esta solução é executada em s das versões atuais do firmware para docks Lenovo Quando um dock com firmware de nível inferior é conectado, ele é atualizado automaticamente pelo Dock Manager. Ele poc atualizações de firmware do Lenovo Support diretamente da Internet ou de um repositório local em sua rede que é criado e mantido usando o Update Retriever. O aplicativo ta docas no WMI para os administradores consultarem remotamente para fins de gerenciamento. Consulte o Guia do usuário para obter mais detalhes.

Recursos adicionais:

- Guia de usuario (https://download.lenovo.com/consumer/options/dockmanager user manual.pdf)
- Arquivo de modelo de política de grupo (https://download.lenovo.com/consumer/options/policy_setup.exe)

Observação:

- O Microsoft .NET Framework versão 4.5.2 (https://www.microsoft.com/en-us/download/details.aspx?id=42643) ou superior é necessário para que o Dock Manager

DECLARAÇÃO DE COMPOSIÇÃO ACIONÁRIA

POSITIVO TECNOLOGIA S.A. ("POSITIVO"), pessoa jurídica de direito privado, inscrita no CNPJ sob o nº 81.243.735/0009-03, estabelecida na Rua Ásia, s/n, Lote 05, Quadra N, Bairro Iguape, na Cidade de Ilhéus, Estado da Bahia, CEP 45.658-464, neste ato representada na forma de seu Estatuto Social/Procuração, por meio da sua representante legal abaixo assinada, em atendimento aos subitens 5.3 e 5.4 do Anexo II e item 3.7 do Edital, **DECLARA**, para os devidos fins de direito e há quem possa interessar:

I. Que por se tratar de sociedade anônima, a composição acionária da POSITIVO não é descrita em seu Estatuto Social, razão pela qual é emitida a presente declaração.

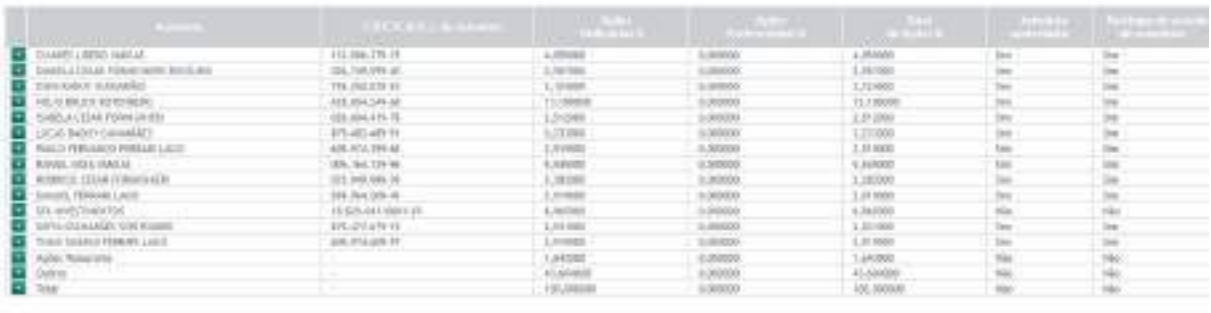
II. Destaca-se, que a POSITIVO é uma sociedade anônima de capital aberto com ações negociadas na B3 – Brasil, Bolsa, Balcão, e a totalidade do seu capital é representada por 141.800.000 ações ordinárias, distribuídas entre milhares de acionistas[1], com negociações na bolsa de valores e, consequentemente, com variação diária da titularidade de suas ações, o que impossibilita a apresentação de documento societário contendo a lista da totalidade de seus acionistas.

III. Neste sentido, visando dar integral atendimento à exigência de abertura da composição acionária, com base no que determina as normas regulamentadoras da CVM (Resolução CVM 80/22, art. 25, §3º, V[2]), abaixo é apresentada a abertura do quadro acionário da POSITIVO, contendo os acionistas detentores de mais de 5% do capital social da Companhia.

IV. Importante esclarecer que as informações abaixo reportadas tratam-se de dados públicos, que periodicamente são divulgadas pela POSITIVO diretamente no sistema da CVM - Comissão de Valores Mobiliários, também disponíveis para consulta por meio do link https://sistemas.cvm.gov.br/[3] ou, ainda, em seu website de Relação com os Investidores, por meio do link https://ri.positivotecnologia.com.br/informacoes-ao-mercado/formulario-de-referencia/.

---

[1] Visando dar maior clareza sobre a dimensão da composição acionária da Positivo, na data de 29/12/2023 a Positivo possuía mais de 47.000 acionistas e em data de 29/05/2024 possuía mais de 43.000 acionistas.



[2] Art. 25. O formulário de referência é o documento eletrônico cujo conteúdo reflete o Anexo C. (...)
§ 3º O emissor registrado na categoria A deve atualizar os campos correspondentes do formulário de referência, em até 7 (sete) dias úteis contados da ocorrência de qualquer dos seguintes fatos: (...)
V – alteração dos acionistas controladores, diretos ou indiretos, ou variações em suas posições acionárias que os levem a ultrapassar, para cima ou para baixo, os patamares de 5% (cinco por cento), 10% (dez por cento), 15% (quinze por cento), e assim sucessivamente, de uma mesma espécie ou classe de ações do emissor;
VI – quando qualquer pessoa natural ou jurídica, ou grupo de pessoas representando um mesmo interesse, direta ou indiretamente, ultrapassar, para cima ou para baixo, os patamares de 5% (cinco por cento), 10% (dez por cento), 15% (quinze por cento), e assim sucessivamente, de uma mesma espécie ou classe de ações do emissor, desde que o emissor tenha ciência de tal alteração;

[3] Ao clicar no link acima, seguir os seguintes passos: **1.** Clicar em Companhia. **2.** Clicar em Consulta de Documentos de Companhia. **3.** Digitar o nome Positivo no campo de pesquisa e clicar em Continuar. **4**. Clicar no número do CNPJ da Positivo. **5.** Expandir o "+Exibir Filtros de Pesquisa". **6.** No campo "Data de Entrega", selecionar "No período" e determinar um período mínimo de 12 meses. **7.** No campo "Categoria", selecionar a opção FRE – Formulário de Referência. **8.** Clicar em "Consultar". **9.** Selecionar a versão mais recente do documento pela Data de Entrega e na coluna "Ações", clicar no ícone com lupa para "Visualizar Documento". **10.** Ao abrir uma nova janela contendo o FRE - Formulário de Referência, selecionar na caixa de opções com lista suspensão o capítulo "6. Controle e grupo Econômico" e o subitem "6.1/2 Posição Acionária".

*O quadro acima trata-se de print do FRE – Formulário de Referência, disponível para consulta no sistema da CVM

V. As informações acima são extraídas do Formulário de Referência (FRE), cujo encaminhamento periódico e eventual, previsto no artigo 22, inciso II, da Resolução CVM nº 80/22, reúne todas as informações referentes ao emissor de valores mobiliários admitidos à negociação em mercados regulamentados de valores mobiliários.

Ante todo o exposto, tem a presente declaração o intuito de esclarecer a identificar os principais beneficiários finais da participação, indireta, no capital social da POSITIVO, baseando-se em registros atualizados e públicos nesta data. Aproveitamos a oportunidade para reiterar nossos votos de estima e consideração, bem como nos colocamos à inteira disposição para eventuais dúvidas e esclarecimentos necessários.

DECLARAÇÃO

A empresa **POSITIVO TECNOLOGIA S.A (Filial)**, pessoa jurídica de direito privado, estabelecida na Rua Ásia, s/n – Lote 05 – Quadra N – Bairro Iguape, na Cidade de Ilhéus, Estado da Bahia – CEP 45.658-464, inscrita sob o CNPJ n.º 81.243.735/0009-03, declara como fabricante dos equipamentos ofertados para o pregão em referência que:

- Os produtos ofertados serão industrializados, novos e entregues acondicionados adequadamente em suas embalagens originais lacradas, acompanhados de guias e manuais de utilização e de cabos e conectores, além de licenças dos softwares necessários à sua perfeita instalação e funcionamento;
- A licença do software dedicado terá cobertura equivalente ao período de garantia do equipamento (60 meses) e estará plenamente operacional a partir da aceitação definitiva do equipamento pela CONTRATANTE;
- Os equipamentos pertencem à linha corporativa, não sendo equipamentos destinados ao uso da linha doméstica;
- A fonte de alimentação modelo PI-ADAP090-A(02) possui eficiência superior a 85% com 50% da carga de trabalho e implementa PFC (Power Factor Correction) ativo;
- A fonte de alimentação modelo PI-ADAP090-A(02) é totalmente compatível e homologada para utilização no equipamento POSITIVO MASTER N8450.
- Os equipamentos adquiridos incluem solução de segurança e rastreamento remoto, garantindo proteção contra acessos não autorizados, controle administrativo centralizado e mitigação de riscos relacionados à perda, furto ou roubo. A solução é fornecida com licenciamento válido para o período de 60 (sessenta) meses, com uma licença individual para cada equipamento adquirido, sem necessidade de aquisição de licenças adicionais além das atribuídas ao uso de cada dispositivo.

- A solução conta com as seguintes funcionalidades obrigatórias:

    - **Gerenciamento Centralizado na Nuvem**: A solução opera totalmente na nuvem, permitindo o gerenciamento remoto e centralizado de todos os equipamentos licenciados, sem necessidade de infraestrutura local dedicada para controle e administração.
    - **Rastreamento e Geolocalização**: Possibilita o rastreamento dos equipamentos em tempo real, utilizando geolocalização via rede, garantindo a identificação da última localização conhecida dos dispositivos cadastrados.
    - **Bloqueio e Proteção contra Acessos Não Autorizados**: Permite o bloqueio remoto do equipamento em caso de perda, furto ou uso indevido, garantindo que os dados armazenados fiquem inacessíveis a terceiros até a recuperação ou redefinição do dispositivo.
    - **Proteção contra Adulteração**: Inclui mecanismo de proteção contra tentativas de remoção ou desativação da solução, mesmo em casos de substituição do disco rígido ou reinstalação do sistema operacional, assegurando a persistência do software de segurança.

Docusign Envelope ID: 54F15E46-B8A6-4035-8A8D-0ECBBBB97FE8

- **Monitoramento de Hardware e Atividade**: Permite o monitoramento do status do hardware e da atividade do equipamento, gerando logs e relatórios sobre tentativas de acesso, movimentação e uso não autorizado.
- **Recuperação do Dispositivo**: A solução oferece mecanismos que auxiliem na recuperação do equipamento em caso de extravio ou furto, incluindo mensagens na tela para identificação do proprietário e envio de alertas automáticos para administradores da solução.

- **Outros Requisitos Técnicos e de Compatibilidade**

  - O software é compatível com Windows 11 Pro, garantindo suporte integral às funcionalidades do sistema operacional sem restrições.
  - A implementação da solução permite integração com ferramentas institucionais de gerenciamento de ativos, caso necessário, garantindo compatibilidade com os sistemas já utilizados pela **CONTRATANTE**.
  - O fornecedor garante atualizações contínuas e suporte técnico durante os 60 (sessenta) meses de vigência da licença, sem custos adicionais para a **CONTRATANTE**.

DECLARAÇÃO

Retorno de Equipamentos: A Positivo Tecnologia oferece serviço de coleta dos equipamentos, ao final da vida útil, através de solicitação e em condições a serem negociadas. Para utilização deste serviço e orçamento basta o cliente entrar em contato com a Central de Relacionamento Positivo pelo 0800-644-6591.

Prazo de Fornecimento de Peças de Reposição: A Positivo Tecnologia garante a disponibilidade de peças, sob orçamento, de equipamentos dentro do período de até 5 (cinco) anos após a fabricação do mesmo. Para obter maiores informações sobre a aquisição de peças de reposição para equipamentos fora da garantia, basta o cliente entrar em contato com a Central de Relacionamento Positivo pelo 0800-644-6591. A peça disponibilizada terá funcionamento equivalente ou superior ao da peça original. O prazo de fornecimento das peças será conforme disponibilidade.

Serviço de Manutenção Adicional: A Positivo Tecnologia disponibiliza o Serviço de Manutenção por até 36 (trinta e seis) meses adicionais após o vencimento da garantia contratada, mediante orçamento. Para a utilização deste serviço, o cliente deverá formalizar o interesse no ato da compra do equipamento.

TECNOLOGIA

ESPECIFICAÇÕES TÉCNICAS

Item : 3
Marca : Positivo
Modelo : Positivo Master N8450
Fabricante : Positivo Tecnologia S.A.
Quantidade : 300 (Trezentas) unidades.

Os equipamentos serão fornecidos nas especificações/configurações abaixo:

1. PLACA PRINCIPAL (PLACA MÃE)
1. A placa mãe é construída pelo próprio fabricante do microcomputador sendo produzida sob a especificação do mesmo, não sendo placas de livre comercialização no mercado, nem em regime de OEM;
2. Possui 2 (dois) slots para memória RAM, “do tipo DDR-5 SODIMM”, permitindo a instalação de até 40 (quarenta) Gigabytes. Possui 2 slots com 1 módulo de memória cada, como configuração superior, em substituição aos módulos soldados na placa principal;
3. Suporta tecnologia Dual Channel de utilização de memória RAM;
4. Possui 1 (um) Socket M.2 para SSD SATA ou NVMe;
5. Possui 1 (um) Socket M.2 Para Cartões Wi-Fi/Bluetooth;
6. Possui recursos DASH 1.1 (Desktop and mobile Architecture for System Hardware) e vPro;
7. É compatível com Energy Star 7.0/7.1;
8. Possui capacidade de desligamento do vídeo e do disco rígido após tempo determinado pelo usuário, religamento por acionamento de teclado ou mouse, bem como função de economia de energia para monitor, placa mãe e unidades de armazenamento internas;
9. Possui chip TPM (Trusted Platform Module), versão 2.0, soldado à placa principal, e destinado ao armazenamento de senhas, certificados digitais e chaves criptográficas em conformidade com as especificações do Trusted Computing Group;
10. Possui suporte a virtualização por hardware;
11. Possui suporte a implementação de extensões de virtualização de I/O por hardware;
13. Possui suporte a aceleração de segurança AES no hardware;
14. Possui suporte à tecnologia de acesso remoto out-of-band embutida no hardware;
15. Possui controle da velocidade de rotação do cooler do processador de forma automática, de acordo com a variação de temperatura da CPU;
16. Suporta boot por pendrive ou disco conectado a uma porta USB 3.2;
17. Suporta a inicialização de sistema operacional pela interface de rede cabeada, através de PXE boot e http/https boot.

2. BIOS
1. O BIOS é desenvolvido pelo mesmo fabricante do equipamento;
2. O fabricante do equipamento, é totalmente responsável pelo BIOS fornecido juntamente com a placa mãe e pela atualização do mesmo, promovendo as alterações que se façam necessárias e corrigindo problemas ou danos causados ao equipamento em razão desse BIOS ou de procedimentos de atualização deste, (que poderão ser acompanhados pela empresa caso haja necessidade), durante o período de garantia do equipamento;
3. BIOS em português ou inglês, desenvolvido em conformidade com a especificação UEFI 2.9 (http://www.uefi.org) e capturáveis pela aplicação de inventário SCCM (System Center Configuration Manager);
4. O fabricante comprova a compatibilidade com o padrão UEFI através do site http:// www.uefi.org/members, na categoria membros;
5. É do tipo flash EPROM, atualizável por software, compatível com o padrão plug-and-play;
6. É lançado a partir de 2016 e entregue na versão mais atual disponibilizada pelo fabricante;
7. Tem suporte a ACPI;
8. É desenvolvido de acordo com o padrão de segurança NIST 800-147, para garantir a integridade do BIOS;

Docusign Envelope ID: 73049949-2E23-4A55-A930-1D7BA15A95AA

9. Possui recursos de controle de permissão através de senhas, sendo uma para inicializar o computador e outra para acesso e alterações das configurações do BIOS;
10. Possui software embarcado no BIOS com funções de diagnóstico de problemas, e gerenciamento com as seguintes características:
    1. Permite o teste do equipamento, com independência do sistema operacional instalado, o software de diagnóstico é capaz de ser executado (inicializado) a partir da UEFI (Unified /Extensible Firmware Interface) ou do Firmware do equipamento através do acionamento de tecla função (F11);
    2. O software de diagnóstico é capaz de informar, através de tela gráfica: O fabricante e modelo do equipamento, processador, memória RAM, firmware, e capacidade do disco rígido;
11. Possui ferramenta que possibilita realizar a formatação definitiva dos dispositivos de armazenamento conectados ao equipamento, desenvolvida em acordo com o padrão de segurança NIST 800-88r1. Esta ferramenta é nativa do BIOS, é oficialmente homologada pelo fabricante do equipamento;
12. Possui opção para exportar/importar configurações;
13. Oferece a possibilidade de, se demandado, vir com logo de inicialização do equipamento customizada de fábrica, com uma imagem previamente fornecida pela CONTRATANTE;
14. Possui campo não editável com o número de série do equipamento gravado em memória não volátil e campo editável que permite inserir identificação customizada (identidade patrimonial com pelo menos 10 caracteres). Serão aceitos BIOS com reprogramação via software desde que estes estejam devidamente licenciados para o equipamento e disponibilizados para download no web site de suporte do fabricante;
15. Permite o gerenciamento remoto do microcomputador mesmo desligado, desde que energizado pela rede elétrica e conectado localmente à rede de dados, permitindo ligar e desligar o microcomputador remotamente, com controle de acesso, e com possibilidade de definir horários programados;
    1. Permite acesso remoto através da rede ao POST (procedimento de inicialização) e BIOS para leitura e gravação, mesmo com o equipamento desligado;
    2. Permite acesso remoto ao sistema operacional e processo de inicialização do microcomputador através de interface gráfica, com controle remoto do mouse e teclado (KVM remoto), independente do suporte de aplicações locais ou estado do sistema operacional;
    3. Possui a capacidade de inventário remoto de Hardware mesmo com o equipamento desligado.

3. PROCESSADOR
1. Possui, 2 (dois) núcleos, e 14 (quatorze) threads de processamento com frequência de operação interna básica de, 1.6 GHz;
2. Em caso de processadores com arquitetura de computação heterogênea (big.LITTLE), só serão contabilizados os cores voltados para performance, na contagem mínima de núcleos e ciclos de clock base (MHz);
3. Memória cache total de 12MB;
4. O processador ofertado será o Intel Core Ultra 5, "de 1ª geração";
5. O processador é da última geração disponível utilizada pelo fabricante do equipamento, com desempenho de 17.467 (dezessete mil quatrocentos e sessenta e sete) pontos, considerando o uso pleno de todos os núcleos e sem a aplicação de configurações específicas para aumento ou modificação de desempenho, como "overclock", "undervoltage", "overvoltage" ou quaisquer outras que não estejam em conformidade com os padrões definidos pelo fabricante;
    1. O desempenho é comprovado por intermédio de resultados de BenchMark, disponíveis em: http://www.cpubenchmark.net/cpu_list.php.
    2. Será admitida uma margem de tolerância de 2% (dois por cento) do desempenho mínimo exigido.
6. Possui tecnologia de controle dinâmico de frequência do processador para núcleos individuais e ou múltiplos núcleos, podendo atingir até 4.4 GHz;
7. Possui controlador com suporte à memória RAM do tipo DDR5-5600 MT/s;
8. Possui tecnologia de fabricação de 7nm (sete nanômetros);
9. TDP (Thermal Design Power) mínimo de 12W, e máximo de 57W, declarado pelo fabricante;
10. Possui instruções do padrão AVX 2.0;
11. Possui instruções do padrão SSE4.1/4.2;

Docusign Envelope ID: 73049949-2E23-4A55-A930-1D7BA15A95AA

12. Possui instruções que implementem extensões de virtualização de hardware;
13. Possui instruções AES-NI embutidas;
14. O proponente declara em sua proposta comercial o modelo do processador ofertado: Intel Core Ultra 5 135U.

4. MEMÓRIA RAM
1. Possui 16 (dezesseis) GB de memória RAM instalados, com capacidade de expansão de 64 (sessenta e quatro) GB;
2. É do tipo DDR-5 SODIMM e possui 5600 MT/s de velocidade de comunicação com o barramento principal;
3. A implementação do total de memória RAM utiliza 2 (dois) módulos de 8 (oito) GB, utilizando tecnologia dual channel;
    1. Ambos os módulos são do tipo SODIMM, e removíveis como configuração superior a soldada;
4. Os módulos removíveis serão instalados durante o processo de manufatura do computador, e homologados como parte do equipamento, inclusive estando cobertos pela garantia e suporte como descrito no Termo de Referência.

5. UNIDADE DE ARMAZENAMENTO
1. Possui 1 (uma) unidade padrão tipo Solid State Drive (SSD) interna instalada do tipo M.2, na capacidade de 256 GB e velocidade mínima de gravação de 1.200MB/s;
2. Utiliza interface tipo M.2 PCIe 4.0, com o protocolo NVMe;
3. É instalada durante o processo de manufatura do computador, e homologado como parte do equipamento, inclusive estando coberto pela garantia e suporte como descrito no Termo de Referência.

6. CONECTIVIDADE
1. Possui 4 (quatro) portas USB;
    1. Do total de portas, 2 (duas) são do tipo USB 3.2 tipo A;
    2. 2 (duas) são do tipo USB 3.2 Tipo C;
2. Possui 1 (uma) porta de vídeo adicional, suportando a utilização de 1 (um) monitor auxiliar simultânea e independentemente da tela integrada;
3. O tipo da porta auxiliar de vídeo supracitada é HDMI 2.1.

7. INTERFACES DE REDE
1. Possui 1 (uma) interface de rede RJ45 compatível com os padrões 10, 100 e 1000 Mbps, autosense, full-duplex e plug-and-play, configurável totalmente por software e com função Wake On Lan instalada e em funcionamento;
2. A controladora ethernet, é do tipo "onboard", e suporta recurso WOL (Wake On LAN);
3. Possui 1 (uma) interface de rede sem fios no padrão Wi-Fi 6E (802.11 B/G/N/AX), com velocidade de até 2.4Gbps, Tecnologia MU-MIMO, banda dupla em 2.4Ghz e 5Ghz, e suporte a Bluetooth 5.3;
4. As controladoras Wi-Fi e Bluetooth, estarão em um único cartão M.2, conectado em slot específico na placa mãe, que é instalado durante o processo de manufatura do computador, e homologado como parte do equipamento, inclusive estando coberto pela garantia e suporte como descrito no Termo de Referência;
5. A interface Wireless ofertada possui, na data da entrega da proposta, homologação junto à ANATEL com certificado disponível publicamente no endereço eletrônico desta agência, conforme a Resolução n.º 242 de 30 de novembro de 2000.

8. CONTROLADORA DE VÍDEO
1. Possui controlador 3D/2D com suporte a DirectX 12.2;
2. Suporta Pixel Shader 3.0;
3. Suporta OpenGL 4.6;
4. Suporta HDCP ou HDR;
5. Suporta a resolução de 1920 X 1080 @ 60 Hz;
6. Possui tecnologia de controle dinâmico de frequência, podendo atingir 1.9GHz;
7. Suporta o uso de 3 (três) monitores simultânea e independentemente.

Docusign Envelope ID: 73049949-2E23-4A55-A930-1D7BA15A95AA

9. CONTROLADORA DE SOM E MULTIMÍDIA
1. O equipamento possui uma controladora de som integrada, do tipo "onboard";
2. Possui uma interface de som com 1 (um) conector combinado para fone de ouvido e microfone, de 3,5 mm;
3. Possui 2 alto-falantes internos, com 2 Watt RMS de potência cada, compatíveis com a controladora de som;
4. Incorpora microfones, com cancelamento de ruído, voltados para captar o som do usuário em frente ao computador.

10. TECLADO
1. É integrado e retroiluminado no idioma padrão, português (Brasil), ABNT-II;
2. Possui teclas multimídia, com aumentar e diminuir volume, além do mute;
    1. Utiliza-se de teclas de função (F1...F12), para tais ações.

11. DISPOSITIVOS APONTADORES
1. Possui um touchpad integrado, com dois botões, e área útil superior a 4 (quatro) pol²;
    1. Admite-se que os botões sejam integrados, como cliques diretos na parte inferior do touchpad;
2. Suporta gestos de rolagem;
3. Acompanha um mouse adicional, da mesma cor e do mesmo fabricante do equipamento ofertado;
    1. É óptico, com conexão USB, com 3 (três) botões e sistema de rolagem de página, com formato ergonômico e com design ambidestro, possui resolução por hardware de 1.000 dpi.

12. TELA INTEGRADA
1. É de tecnologia IPS (In-Plane Switching);
2. Tamanho de 14 polegadas widescreen;
3. Suporta 16 milhões de cores;
4. Resolução de 1920x1200@60Hz;
5. Ângulo de visão de 85° horizontal e vertical;
6. Possui brilho de 300 cd/m².

13. WEBCAM
1. O equipamento possui uma webcam integrada, de 2 megapixels, com resolução de vídeo FHD, não sendo solução externa;
2. Possui mecanismo de bloqueio por tampa, como solução de privacidade, também integrada ao equipamento.

14. FORMATO DE MANUFATURA E FONTE DE ALIMENTAÇÃO
1. O equipamento é produzido no formato laptop.
2. O peso total do equipamento sem a fonte, não excede os 1.6 Kg (um quilo e seiscentos gramas);
3. A dobradiça do equipamento, é construída em metal, e com articulação de 180º;
4. O material do gabinete é de estrutura livre de BFR e outros materiais tóxicos e/ou antiecológicos;
5. Possui botão de liga/desliga e luz de indicação de computador ligado (power-on) em local visível e acessível do computador, quando ele estiver aberto;
6. Possui leitor biométrico integrado, em área acessível, quando o notebook estiver aberto;
7. Oferece a possibilidade de, se demandado, aplicar logo oficial da CONTRATANTE, com área de impressão mínima de 3,00 x 2,72 cm, através de sistema de gravação direta como aplicação em laser, não sendo admitido o uso de adesivagem, serigrafias ou adaptações semelhantes. A gravação deverá ser feita apenas na parte inferior do laptop, visando medidas de segurança;
8. O computador possui fenda de encaixe padrão "Kensington" para utilização de cabo de aço do mesmo tipo;
9. É fornecido com fonte de carregamento/alimentação do mesmo fabricante e compatível com o equipamento, com potência suficiente para suportar todos os dispositivos internos em suas configurações máximas permitidas, além de possibilitar o pleno carregamento da bateria do equipamento;

Docusign Envelope ID: 73049949-2E23-4A55-A930-1D7BA15A95AA

10. A fonte de alimentação possui eficiência superior a 85%, com 50% da carga de trabalho e que implementa PFC (Power Factor Correction);
11. A fonte possui tensão de entrada 110 e 220 Volts de forma automática;
12. A fonte fornece uma alimentação de 90W para o equipamento;
13. Os plugues de conexão à rede elétrica seguem o padrão NBR 14136:2002.

15. BATERIA
1. É integrada ao corpo do equipamento, (não destacável);
2. Potência de 57Wh;
3. Possui 3 (três) células de carregamento;
    1. É capaz de manter o equipamento funcionando ininterruptamente por no mínimo 11 (onze) horas, conforme o padrão de teste do aplicativo Mobile Mark 2018.

16. SISTEMA OPERACIONAL E SOFTWARES COMPLEMENTARES
1. Acompanha o equipamento licença OEM do sistema operacional Microsoft Windows 11 Professional de 64 bits, no idioma Português Brasil;
2. O equipamento será entregue com o Windows 11 Professional 64 bits, instalado;
3. Cada equipamento inclui uma licença específica de software dedicado para:
- Controle: Funções de bloqueio e desbloqueio remoto.
- Inventário: Gestão detalhada de hardware e software do equipamento.
- Rastreabilidade: Recursos de geolocalização integrados.
4. O software de controle e monitoramento possui a funcionalidade de persistência, garantindo a preservação do cliente do software e de suas funcionalidades, mesmo após a perda total de dados ou formatação do disco rígido, utilizando tecnologia de residência em firmware;
5. A interface de controle e monitoramento dos equipamentos é baseada em nuvem, sem a necessidade de licenças adicionais além daquelas atribuídas a cada equipamento;
6. A licença do software dedicado tem cobertura equivalente ao período de garantia do equipamento, de 60 (sessenta) meses, e estará plenamente operacional a partir da aceitação definitiva do equipamento pela CONTRATANTE;
7. Os equipamentos poderão ser entregues com imagem de instalação do sistema operacional e softwares customizada e previamente fornecida pela CONTRATANTE, conforme especificado no Termo de Referência.

17. COMPATIBILIDADE
1. É apresentado o certificado de compatibilidade dos equipamentos com o sistema operacional Windows 11 x64 obtido junto à Microsoft. Consta no Microsoft Hardware Compatibility List (HCL) para o sistema operacional exigido e ofertado.
    1. A comprovação da compatibilidade é efetuada pela apresentação do documento Hardware Compatibility Test Report emitido especificamente para o modelo no sistema operacional ofertado, sendo indicação no site da Microsoft;
2. O equipamento possui certificado de homologação comprovando a compatibilidade do mesmo com, pelo menos, uma distribuição de Linux. A comprovação da compatibilidade é efetuada pela apresentação de documento emitido especificamente para o modelo ofertado;
3. O equipamento, na configuração ofertada, possui certificado de conformidade contra incidentes elétricos e de combustão dos materiais (IEC62368-1) e de imunidade eletromagnética (IEC 61000), comprovado através de certificado nos moldes da portaria 304/2023 vigente do INMETRO.

18. OUTROS REQUISITOS
1. Todas as partes do computador têm coloração neutra em gradações de preto, mantendo o padrão e cor;
2. Acompanha maleta, para transporte com segurança, de tamanho suficiente para acondicionar o equipamento e seus acessórios (fonte de alimentação e cabos), confeccionada em material resistente e impermeável;
3. Equipamento será novo, partes e peças, de primeiro uso, que serão acondicionados em embalagem individual adequada, garantindo a máxima proteção durante o transporte e a armazenagem;

Docusign Envelope ID: 73049949-2E23-4A55-A930-1D7BA15A95AA

POSITIVO
TECNOLOGIA

4. Informa marca e modelo dos componentes utilizados na solução e apresenta prospecto com as características técnicas do equipamento e da placa mãe, processador, memórias, interfaces de rede, fonte de alimentação e unidade de armazenamento, incluindo especificação de marca, modelo, e outros elementos que de forma inequívoca identificam e constatam as configurações, possíveis expansões e upgrades, comprovando-os através de certificados, manuais técnicos, folders e demais literaturas técnicas editadas pelos fabricantes;
5. Todos os equipamentos serão entregues idênticos, ou seja, todos os componentes externos e internos terão os mesmos modelo e marca;
6. O equipamento proposto estará em linha de produção na data da proposta, com todas as funcionalidades exigidas neste Termo plenamente disponíveis durante toda a vigência do contrato;
7. Não sendo produtos descontinuados por seus fabricantes, não consta em listas de end-of-sale, end-of-support ou end-of-life do fabricante, ou seja, não tem previsão de descontinuidade de fornecimento, suporte ou vida;
8. O equipamento em pleno funcionamento atende à norma NBR 10152, quanto à emissão de ruído ambiente em escritórios de atividades diversas, conforme laudo técnico gerado por entidade especializada, que acompanha a proposta;
9. Tem compatibilidade eletromagnética e de radiofrequência IEC 61000 comprovado através de certificado emitido por órgão credenciado pelo INMETRO;
10. Tem compatibilidade com o padrão DMI 2.0 (Desktop Management Interface) da DMTF (Desktop Management Task Force), o fabricante do equipamento é membro do consórcio DMTF listado na categoria BOARD;
11. Tem compatibilidade com a norma TPM Specification Version 2.0 especificadas pelo TCG (Trusted Computing Group), o fabricante é membro de uma das categorias listadas no site http://www.trustedcomputinggroup.org/about_tcg/tcg_members;
12. Tem compatibilidade com EPEAT na nova categoria Bronze, comprovada através de indicação que o equipamento consta no site www.epeat.net na nova categoria Bronze, que mostrem que o equipamento é aderente ao padrão de eficiência energética EPEAT.
13. Não contêm substâncias perigosas como mercúrio (Hg), chumbo (Pb), cromo hexavalente (Cr(VI)), cádmio (Cd), bifenil polibromados (PBBs),éteres difenil-polibromados (PBDEs) em concentração acima da recomendada na diretiva RoHS (Restriction of Certain Hazardous Substances);
14. Os equipamentos pertencem à linha corporativa, não sendo equipamentos destinados ao uso da linha doméstica.
    1. A comprovação é apresentada junto com a proposta;
15. Não sendo equipamentos que contenham lacres de violação de garantia por abertura, que inviabilizem a inspeção dos componentes a qualquer momento;
16. Garantia de 60 (sessenta) meses on-site, prestado pelo fabricante. Para as baterias, a garantia é de 36 (trinta e seis) meses. Nos meses que restarem para completar o prazo total de garantia, a FORNECEDORA disporá de bateria para venda em caso de eventual necessidade, e a realizar o suporte e assistências técnicas sem ônus para a CONTRATANTE.

POSITIVO MASTER *N8450*

ALTA PERFORMANCE E DURABILIDADE + TECNOLOGIA Intel® vPro®

Com a linha de notebooks Positivo Master N8450 sua empresa terá o máximo em performance, produtividade, segurança e gerenciamento remoto com os processadores Intel® Core™ Ultra e Windows 11 Pro. Alta durabilidade e resistência para sua empresa focar apenas no negócio, sem preocupações extras. Proteja o seu investimento com um notebook com as tecnologias mais modernas e recentes, eficiência e a qualidade comprovadas pelas principais certificações exigidas para o ambiente corporativo.

INTELIGÊNCIA ARTIFICIAL

A Positivo oferece recurso de IA para acelerar a sua produtividade. O Positivo Master N8450 possui uma nova arquitetura de PC híbrida com CPU, GPU e NPU*. **NPU é um processador projetado para otimizar cargas de trabalho específicas de Inteligência Artificial.**

MICROSOFT COPILOT

Com tecla de atalho para o Copilot. O aplicativo Copilot no Windows é um assistente que integra a IA nas suas atividades, ajuda você a obter respostas e inspiração em suas tarefas, apoia a criatividade e ajuda você a se concentrar.

DESEMPENHO EXCEPCIONAL

- Conta com Processadores Intel® Core™ Ultra
- Gerenciamento remoto Intel® vPro®
- Memória DDR5 e duas portas Thunderbolt 4™
- Opção de Armazenamento com SSD PCIe NVMe Gen 4
- Opção de bateria estendida com maior autonomia
- Opções com a tecnologia mais recente de WiFi – WiFi 6E e 7

DURABILIDADE DE ALTO NÍVEL

Estrutura de metal robusto e teclado resistente ao derramamento de líquido com dreno para escoamento. Projetado para ser extremamente resistente e submetido aos mais variados testes, incluindo rígidas normas militares para computadores.

O MÁXIMO EM SEGURANÇA

Leitor de impressão digital tipo Touch* e Chip TPM* (Trusted Platform Module) integrado para autenticação e criptografia de informações que requerem mais segurança.

DESIGN FEITO PARA O DIA A DIA

Com apenas 17.9 mm de espessura e pesando a partir de 1,41 kg, é fácil carregar o notebook para qualquer lugar

TECLADO RETRO ILUMINADO

Teclado resistente a líquidos e retro iluminado com LED* para melhor digitação em ambientes escuros

E mais: Dobradiças metálicas e resistentes com **abertura em até 180°** para utilização mais confortável do notebook e compartilhamento da tela; **Windows Hello** no Windows e em aplicativos compatíveis com segurança de nível empresarial; Conecte todos os seus dispositivos com as **4 portas USB disponíveis**, sendo duas delas **Thunderbolt 4;** Autonomia da bateria** de **até 11 hrs** obtido pelo MobileMark 25.

* Itens opcionais. Consulte os modelos com disponibilidade. ** Autonomia real da bateria pode variar conforme a configuração do produto, softwares, configurações de gerenciamento de energia, brilho da tela e utilização do notebook. Configuração: Processador Intel Core Ultra 5 135U, 8 GB de RAM, tela FHD+ brilho da tela 50%, bateria 57Wh, Windows 11 no modo de energia equilibrado.

Proposta de Preço ITEM 3 - POSITIVO (PE0000250/2024) - SEI 2020.0.001.2317.1 pg. 6/48

POSITIVO MASTER *N8450*

Processadores	• Intel® Core™ Ultra 5 / 7 (Série 1) Série U e H • Intel® Core™ Ultra 5 / 7 (Série 2) Série U e H TDP de 15W para processadores Série U | TDP de 28W para processadores Série H
NPU	Integrado ao processador, Intel® AI Boost *Somente em modelos de processadores selecionados*
Sistema Operacional	• Windows 11 Pro (64 bits) • Windows 11 Home (64 bits) • Linux • Shell EFI *Outras opções sob consulta*
Tela	• LCD 14", 16:10, anti-reflexiva, Resolução Full HD+ (WUXGA) 1920 x 1200, LED, IPS, brilho 300 nits, contraste 800:1. • LCD 14", 16:10, anti-reflexiva, Resolução Full HD+ (WUXGA) 1920 x 1200, LED, IPS, brilho 350 nits, contraste 1500:1, com filtro de privacidade eletrônico integrado. Ângulo de abertura do LCD de 180°
Placa-mãe / Chipset	Positivo POS-SIPWOAA | SoC (System on Chip), funcionalidades integradas junto ao processador Suporta Tecnologia de Virtualização Intel® para E/S (VT-d)
Gerenciamento de Sistema	• Intel® vPro® Enterprise Suporta a tecnologia Intel® vPro® para gerenciamento remoto por meio da plataforma Intel® Active Management Technology
BIOS/UEFI	• BIOS desenvolvida pela Positivo seguindo a UEFI versão 2.9 • Memória flash ROM de 32MB de acordo com SMBIOS V.3.6 e com função "Plug & Play" • Idiomas: Português ou Inglês • Conformidade com as diretrizes do NIST SP800-147 e SP800-193 para proteção contra ataques maliciosos • Permite customização do logo de inicialização (BMP ou JPG) • Senhas de administrador/usuário para controle de acesso ao BIOS, alteração da configuração e inicialização do equipamento • Senha para proteção da unidade de armazenamento • Capacidade de habilitar/desabilitar as portas USBs, Webcam, LAN, SSD, WiFi, Bluetooth, Leitor de Cartão e Touchpad • Capacidade de boot através de: Unidades de Armazenamento, Adaptador de Rede (WoL/PXE) e interfaces USB • Suporte a ACPI versão 6.5 com funções de economia de energia e controle automático de temperatura • Registro de número de série e patrimônio com até 20 caracteres, podendo ser lido remotamente via comandos SMBIOS • Função Desktop Management Interface e Common Information Model (CIM) • Suporta atualização remota por meio de software de gerenciamento • Suporte às tecnologias PXE 2.1, S.M.A.R.T., AHCI e NVMe • Compatível com a plataforma SCCM da Microsoft
Memória RAM	2x slots SO-DIMM DDR5 com suporte para até 64 GB e 4800/5600 MT/s. Com suporte ao modo dual-channel
Armazenamento	• SSD de até 1 TB, PCIe Gen 4.0 x4, NVMe, M.2 2280 • SSD de até 1 TB, PCIe Gen 3.0 x4, NVMe, M.2 2280 • SSD de até 1 TB, SATA III, M.2 2280
Leitor de Cartões	Leitor de cartões MicroSD 4.0 (SD / SDHC / SDXC)
Câmera	• FHD 1080p • Infravermelho (IR) FHD 1080p | Suporte ao Windows Hello Cortina de privacidade integrada
Áudio	Áudio de alta definição (HD Áudio), Realtek ALC233 Dois microfones digitais integrados 2x alto-falantes em configuração estéreo com amplificador (total de 4W) Sistema de cancelamento de ruído dos microfones
Conectividade	**LAN** • Intel I219-LM 10/100/1000 Mbps, padrão Gigabit Ethernet (autosense) • Intel I226-LM 2.5 Gbps (autosense) - Conformidade com os padrões IEEE 802.3, 802.3u e 802.3ab - Suporta Wake-on-LAN (WoL), SNMP, PXE, CSMA/CD e iAMT - Compatível com os padrões DASH 1.1, DASH 1.2 e WS-MAN[5] - Conformidade com os padrões IEEE 802.1q, 802.1p, 802.2, 802.1x, 802.3x - Eficiência de Energia IEEE 802.3az - Auto-negociação IEEE 802.3u, Full-Duplex, configurável totalmente por software, compatível com TCP/IP v.4/v.6 **WLAN + Bluetooth** • Intel® Wi-Fi 7 BE200 (802.11be) 2x2 + Bluetooth 5.4[1] • Intel® Wi-Fi 6E AX211 (802.11ax) 2x2 + Bluetooth 5.3[1]

POSITIVO MASTER *N8450*

Portas de Conexão	• 2x USB-C Thunderbolt™ 4 (Alimentação de dispositivos, Power Delivery 3.1, Dados, DisplayPort 2.1 e carregamento da bateria) • 1x USB 3.2 Gen 2 (com função Always On) • 1x USB 3.2 Gen 1 • 1x HDMI 2.1 • 1x RJ-45 • 1x DC-IN • 1x Áudio combo (entrada + saída de áudio) • 1x Leitor de cartão Smart Card (opcional)
Slots	1x PCIe Gen 4.0 x4, M.2 2280, para SSD 1x PCIe Gen 4.0 x4 / SATA, M.2 2280, para SSD 1x PCIe, M.2 2230, para WiFi
Gráficos	• Intel® Graphics integrado ao processador, com memória alocada dinamicamente. Suporte a Microsoft® DirectX® 12.1 e OpenGL 4.6. • Intel® Arc™ Graphics integrado aos processador, com memória alocada dinamicamente. Suporte a Microsoft® DirectX® 12.2 e OpenGL 4.6. *- Varia de acordo com o modelo do processador.* *- Intel Arc Graphics está disponível em modelos de processadores selecionados da série H, com no mínimo 16 GB de memória RAM e sistema configurado em dual-channel.*
Teclado	• Com retroiluminação • Sem retroiluminação - Padrão ABNT2, 84 teclas com sinalizador visual da tecla CapsLock ativa - Resistência a derramamento de líquidos com dreno para escoamento - Teclas impressas do tipo permanente - Teclas de Função (Fn + tecla de função): Função mudo, aumenta/diminui volume. Ativa/desativa microfone. Liga/desliga e alterna a intensidade da iluminação do teclado retroiluminado (opcional). Aumenta/diminui o brilho da tela. Ativa/desativa touchpad. Alterna entre tela do notebook e tela externa. Ativa/desativa modo avião (WiFi e bluetooth). Função Suspender.
Touchpad	Touchpad com botões integrados, suporte a toques múltiplos, gestos e função de rolagem Resistência a derramamento de líquidos
Segurança	• Leitor de impressões digitais integrado tipo Touch compatível com Windows Hello (opcional). • Sensor de intrusão integrado para detecção da abertura do notebook. • Leitor de cartão Smart Card em conformidade com a norma ISO-7816 (opcional). • Solução TPM 2.0 integrado no SoC. | Chip de criptografia TPM 2.0 discreto certificado pelo TCG e FIPS 140-2 (opcional). • Abertura para trava tipo Kensington. • Limpeza segura dos dados do SSD via BIOS em conformidade com as diretrizes do NIST SP800-88r1. • Suporte a soluções de segurança Absolute². • Suporta Intel® Boot Guard que ajuda a proteger o BOOT contra vírus e ataques de softwares maliciosos.
Chassi	Tampas externas de alumínio | Dobradiças metálicas | Base antiderrapante
LEDs indicadores	Indicador de ligado/hibernação, atividade da unidade de armazenamento, WiFi, indicador de bateria em nível baixo e status de carregamento, Caps Lock, câmera e atividade de rede na porta LAN
Diagnóstico (opcional)	• Solução para recuperação de BIOS corrompido através de hardware local, unidade local ou de unidade externa USB. Possui função de verificação de inicialização que permite recuperação automática. • Ferramenta de diagnóstico pré-boot de hardware abrangendo testes dos seguintes componentes: CPU, Memória, Unidades de armazenamento, Teclado, Mouse, Vídeo, Bateria, Interface de rede, portas USBs e componentes da Placa Mãe. • Sistema de diagnóstico de hardware através de LED e alerta sonoro.
Softwares Positivo (opcional)	• Software de gerenciamento para gestão de TI • Software para atualizações de drivers e BIOS • Software para gerenciamento e controle do TPM • Software para criptografia de dados • Software de backup • Software para consulta de vigência da garantia
Fonte de alimentação	• 65W, USB-C • 65W, DC-IN • Outras opções sob consulta Eficiência nível VI, 100~240V (+/-10%) / 50~60Hz automática, 3 pinos – Com suporte a fast charging (carregamento de 80% da capacidade da bateria em até 1 hora com o notebook desligado)
Bateria	• 45 Wh (3 células, 3948mAh, 11.4V) • 57 Wh (3 células, 4936mAh, 11.55V) Bateria de Polímero de Lítio-Ion interna removível, 3 células, com suporte a fast charging (carregamento de 80% da capacidade da bateria em até 1 hora com o notebook desligado)
Cor	Cinza

Dimensões (L x P x A)	• 318 x 224,9 x 17.9 mm (modelos com tela comum) • 318 x 224,9 x 19.3 mm (modelos com tela com filtro de privacidade integrado)
Peso Líquido[3]	• 1,41 Kg (modelos com bateria de 45Wh) • 1,43 Kg (modelos com bateria de 57Wh)
Documentos e Acessórios (opcional)	• Adaptador CA • Cabo de alimentação NBR 14136/02 – 2P+T • Adaptador de tomada padrão antigo para NBR 14136/02 • Guia Rápido e/ou Manual do Usuário • Discos/Mídias de Recuperação • Trava/Kit de Segurança • Mouse/MiniMouse Ótico • Mousepad • Maleta/Mochila para transporte • Docking Station / HUB USB • Adaptadores de vídeo HDMI/USB-C para DVI/HDMI/DP/VGA • Fone de Ouvido / Headset
Certificações/ Compatibilidades[4]	**Compatibilidade de hardware:** Microsoft® Windows 11® (x64) **Segurança, Compatibilidade Eletromagnética e Eficiência Energética:** Portaria INMETRO 304/2023 **Compatibilidade eletromagnética:** IEC 61000, CISPR22 e CISPR24 **Segurança do usuário:** IEC 60950/IEC 62368 **Ruído acústico:** De acordo com NBR 10152 (ISO 7779 e ISO 9296) **Equipamento ecológico:** RoHS **Certificado DMI:** DMI 2.0

Todas as informações fornecidas estão sujeitas a alterações a qualquer momento, sem aviso prévio. A Intel pode alterar o ciclo de vida da fabricação, as especificações e as descrições dos produtos a qualquer momento, sem aviso prévio. As informações aqui contidas são fornecidas "no estado em que se encontram" e a Intel não atribui qualquer declaração ou garantias relacionadas à precisão das informações, nem sobre os recursos dos produtos, disponibilidade, funcionalidade ou compatibilidade dos produtos listados. Para obter mais informações sobre os produtos ou sistemas, entre em contato com o fornecedor do sistema.

Intel classifications are for general, educational and planning purposes only and consist of Export Control Classification Numbers (ECCN) and Harmonized Tariff Schedule (HTS) numbers. Any use made of Intel classifications are without recourse to Intel and shall not be construed as a representation or warranty regarding the proper ECCN or HTS. Your company as an importer and/or exporter is responsible for determining the correct classification of your transaction.

Consulte a Ficha técnica para obter definições formais de propriedades e recursos de produtos.

‡ Este recurso pode não estar disponível em todos os sistemas de computação. Verifique com o fornecedor do sistema para determinar se seu sistema oferece este recurso ou consulte as especificações de seu sistema (motherboard, processador, chipset, alimentação, HDD, controle gráfico, memória, BIOS, drivers, monitor de máquina virtual [VMM], software de plataforma e/ou sistema operacional) para saber sobre a compatibilidade do recurso. A funcionalidade, o desempenho e outros benefícios deste recurso podem variar, dependendo das configurações do sistema.

Os números dos processadores Intel não são indicação de desempenho. Os números dos processadores diferenciam recursos dentro de cada família de processador, e não entre famílias diferentes de processadores. Consulte https://www.intel.com.br/content/www/br/pt/processors/processor-numbers.html para obter mais detalhes.

SKUs "anunciados" ainda não estão disponíveis. Favor consultar a data de lançamento para a disponibilidade no mercado.

Proposta de Preço ITEM 3 - POSITIVO TECNOLOGIA (1661786) SEI 2025.001317 / pg. 650

Os gráficos Intel® Arc™ estão disponíveis apenas em sistemas selecionados equipados com processadores Intel® Core™ Ultra série V com design térmico do sistema qualificado ou sistemas selecionados equipados com o processador Intel® Core™ Ultra série H, com pelo menos 16 GB de memória do sistema em uma configuração de canal duplo. É necessária a habilitação do OEM. Outras configurações de sistema com processador Intel® Core™ Ultra apresentam gráficos Intel®. Verifique com o OEM ou varejista os detalhes da configuração do sistema.

Apenas gráficos Intel® Iris® Xe: para usar a marca Intel® Iris® Xe, o sistema deve ser preenchido com memória de 128 bits (canal duplo). Caso contrário, use a marca Intel® UHD.

Consulte https://www.intel.com.br/content/www/br/pt/architecture-and-technology/hyper-threading/hyper-threading-technology.html?wapkw=hyper+threading para obter mais informações, incluindo detalhes sobre quais processadores são compatíveis com a Tecnologia Hyper-Threading Intel®.

Alguns produtos suportam as novas instruções AES com uma atualização da Configuração do processador, em particular, i7-2630QM/i7-2635QM, i7-2670QM/i7-2675QM, i5-2430M/i5-2435M, i5-2410M/i5-2415M. Favor entrar em contato com o OEM para o BIOS que inclui a mais recente atualização da Configuração do processador.

CPU Benchmarks

CPU Benchmarks

Over 1,000,000 CPUs Benchmarked

Intel Core Ultra 5 135U

Benchmarks for the Intel Core Ultra 5 135U can be found below. Release dates, price and performance comparisons are also listed when available. This is made using thousands of PerformanceTest benchmark results and is updated daily.

- The first graph shows the relative performance of the CPU compared to the 10 other common (single) CPUs in terms of PassMark CPU Mark.
- The 2nd graph shows the value for money, in terms of the CPUMark per dollar.
- The pricing history data shows the price for a single Processor. For multiple Processors, multiply the price shown by the number of CPUs.

Is the Intel Core Ultra 5 135U Good for Gaming?

This is relatively new CPU that contains 12 Cores and 14 Threads. The Intel Core Ultra 5 135U also has reasonable threaded performance that will serve well in games. Paired with a good videocard, *is this CPU Good for Gaming?* Yes, this would be a suitable CPU for gaming. [More ...]

Intel Core Ultra 5 135U	Average CPU Mark
Description: Intel Graphics	Multithread Rating **17488**
Class: Laptop / **Socket:** FCBGA2049	Single Thread Rating **3356**
Total Cores: 12 Cores, 14 Threads	Samples: 519*

Industrial

CL4 Series

M.2 2230/2242/2280 | NVMe™ PCIe® SSD

KEY BENEFITS

- High Performance NVMe PCIe
- Low latency
- Slim form factor
- LDPC technology

APPLICATIONS

- Office Workloads
- SQL Logging
- PC Caching
- Boot

PCIE GEN 4 ADVANTAGE

Meet the perfect solid-state drive solution for boot and caching needs. The CL4 SSD series boasts the latest PCIe Gen 4 x4 interface that delivers 2x faster data transfers rates than the Gen 3 version, up to 16GT/s. CL4 delivers superior speed with random read/write performance of up to 450,000/400,000 IOPS.

SMALL BUT POWERFUL

With its small M.2 form factor, CL4 takes up less space and can easily fit into today's ultra-thin notebooks. Built to store your data efficiently and securely, CL4 supports NVMe protocol providing better performance than SATA SSD to reduce latency, increase IOPs and lower power consumption.

THE FIRMWARE ADVANTAGE

Our teams work closely with industry-leading chip manufacturers to develop solutions specific to your needs. With customized proprietary firmware, CL4 will provide superior performance at consistent speeds for years to come.

ENHANCE ENDURANCE WITH LDPC

Take advantage of the latest improvement in error correction with LDPC. LDPC has greater correction power than conventional BCH, so the life of the drive will last longer.

QUALITY YOU CAN TRUST

Designed and manufactured in-house, we have dedicated teams and on-site testing capabilities for component and compatibility verification. This process ensures the quality each SSD and ability to operate successfully in a wide range of complex hardware and operating system environments.

1.0 DDR5 SMALL OUTLINE DIMM ORDERING INFORMATION

[Table 1] Ordering Information

Part Number	Density	Organization	Component Composition	Number of Rank	Height
ZMS5WMC3C1J0B46SPG	8GB	1Gx64	1Gx16(ZDRPAH6Y16XCWM1N9T) * 4	1	30mm
ZMS5WMC8C2J0B46SPG	16GB	2Gx64	2Gx8(ZDRPAH2Y08XCWM8N9T) * 8	1	30mm
ZMS5WMC8C4J0B46SPG	32GB	4Gx64	2Gx8(ZDRPAH2Y08XCWM8N9T) * 16	2	30mm

2.0 KEY FEATURES

[Table 2] Speed Bin

Speed	DDR5-4400	DDR5-4800	DDR5-5200	DDR5-5600	Unit
	36-36-36	40-39-39	42-42-42	46-45-45	
tCK(min)	0.454	0.416	0.384	0.357	ns
CAS Latency	36	40	42	46	nCK
tRCD(min)	16.000	16.000	16.000	16.000	ns
tRP(min)	16.000	16.000	16.000	16.000	ns
tRAS(min)	32.000	32.000	32.000	32.000	ns
tRC(min)	48.000	48.000	48.000	48.000	ns

- JEDEC standard compliant.
- VDD = VDDQ = 1.1V (1.067V(- 3%) ~ 1.166V(+6%)).
- VPP = 1.8V (1.746 (-3%) ~ 1.908 (+6%).
- 2000MHz fCK for 4000Mb/sec/pin, 2200MHz fCK for 4400Mb/sec/pin, 2400MHz fCK for 4800Mb/sec/pin. 2600MHz fCK for 5200Mb/sec/pin 2800MHz fCK for 5600Mb/sec/pin.
- 32 Banks (8 Bank Groups).
- Programmable CAS Latency (posted CAS): 22,26,28,30,32,36,40,42,46,50
- Programmable CAS Write Latency (CWL) = CL-2.
- 16-bit prefetch.
- Burst Length: 16 by default. 8 with tCCD=8, which does not allow gapless READ or WRITE, where BC8 and BL32 refer to CA5 BL*=L.
- Bi-directional Differential Data-Strobe.
- Internal ZQ calibration via Multi-Purpose Command (MPC) - ZQcal start and ZQcal Latch.
- On Die Termination (ODT) via Mode Register setting : RTT_PARK, RTT_WR, RTT_NOM_WR, RTT_NOM_RD.
- Average Refresh period 3.9us at lower than TCASE 85°C, 1.95us at 85°C < TCASE < 95 °C.
- Connectivity Test Mode (TEN) is supported.
- Asynchronous Reset.

3.0 ADDRESS CONFIGURATION

[Table 3] Address Information

Configuration		2Gb x8	1Gb x16
Bank Address	BG Address	BG0~BG2	BG0~BG1
	Bank Address in a BG	BA0~BA1	BA0~BA1
	# BG / # Banks per BG / # Banks	8 / 4 / 32	4 / 4 / 16
Row ddress		R0~R15	R0~R15
Column Address		C0~C9	C0~C9
Page size		1KB	2KB

[Table 5] PIN Description

Pin Name	Description
CA0_A – CA12_A, CA0_B – CA12_B	SDRAM Command/Address bus
CS0_A_n – CS1_A_n, CS0_B_n – CS1_B_n	SDRAM Chip Select
DQ0_A – DQ31_A, DQ0_B – DQ31_B	DIMM memory data bus
CB0_A – CB3_A, CB0_B – CB3_B	DIMM ECC check bits
DQS0_A_t – DQS4_A_t, DQS0_B_t – DQS4_B_t	SDRAM data strobes (positive line of differential pair)
DQS0_A_c – DQS4_A_c, DQS0_B_c – DQS4_B_c	SDRAM data strobes (negative line of differential pair)
DM0_A_n – DM3_A_n, DM0_B_n – DM3_B_n	SDRAM data masks
CK0_A_t, CK1_A_t, CK0_B_t, CK1_B_t	SDRAM clocks (positive line of differential pair)
CK0_A_c, CK1_A_c, CK0_B_c, CK1_B_c	SDRAM clocks (negative line of differential pair)

Pin Name	Description
HSCL	SidebandBus clock
HSDA	SidebandBus data
HSA	SidebandBus address
ALERT_n	SDRAM ALERT_n
RESET_n	Set DRAMs to a Known State
VIN_BULK	5V power input supply to the PMIC for analog circuits
VSS	Power supply return (ground)
PWR_GOOD	Power good indicator
PWR_EN	PMIC Enable
RFU	Reserved for future use

NOTE :
1) DDR5 SO-DIMM has 2 channels (channel-A and channel-B) of signal bus.
The signals with suffix: _A (e.g. DQ0_A) are for channel-A, and the signals with suffix: _B (e.g. DQ0_B) are for channel-B

Proposta de Preço ITEM 3 - Memória Tecnologia (1562786) SEI 2025.001317 / pg. 668

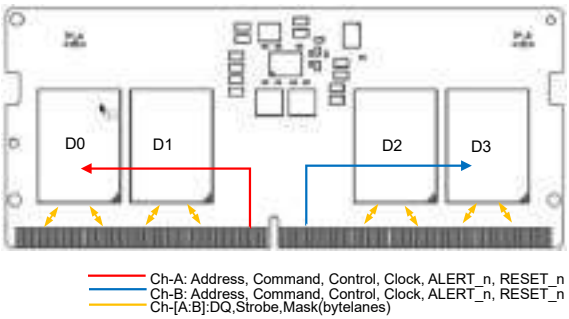
5.0 INPUT/OUTPUT FUNCTIONAL DESCRIPTION

[Table 6] Input/Output Function Description



Symbol	Type	I/O Level	Function
CK0_A_t, CK0_A_c, CK1_A_t, CK1_A_c, CK0_B_t, CK0_B_c, CK1_B_t, CK1_B_c	Input	VDD	Clock: CK_t and CK_c are differential clock inputs. All address and control input signals are sampled on the crossing of the positive edge of CK_t and negative edge of CK_c.
CA0_A - CA12_A, CA0_B –CA12_B	Input	VDD	Command/Address Inputs: CA signals provide the command and address inputs according to the Command Truth Table. Note: Since some commands are multi cycle, the pins may not be interchanged between devices on the same bus.
CS0_A_n – CS1_A_n, CS0_B_n – CS1_B_n	Input	VDD	Chip Select: All commands are masked when CS_n is registered HIGH. CS_n provides for external Rank selection on systems with multiple Ranks.
DQ0_A – DQ31_A, DQ0_B – DQ31_B	Input/Output	VDDQ	Data Input/Output: Bi-directional data bus. If CRC is enabled via Mode register then CRC code is added at the end of Data Burst.
CB0_A – CB3_A, CB0_B – CB3_B	Input/Output	VDDQ	DIMM ECC check bits.
DQS0_A_t – DQS4_A_t, DQS0_A_c – DQS4_A_c, DQS0_B_t – DQS4_B_t, DQS0_B_c – DQS4_B_c	Input/Output	VDDQ	Data Strobe: output with read data, input with write data. Edge-aligned with read data, centered in write data. DDR5 SDRAM supports differential data strobe only and does not support single-ended.
DM0_A_n – DM3_A_n, DM0_B_n – DM3_B_n	Input	VDDQ	Input Data Mask: DM_n is an input mask signal for write data. Input data is masked when DM_n is sampled LOW coincident with that input data during a Write access. DM_n is sampled on both edges of DQS. For x8 device, the function of DM_n is enabled by MR5:OP[5]=1.
ALERT_n	Input/Output	VDD	Alert: If there is error in CRC, then Alert_n goes LOW for the period time interval and goes back HIGH. During Connectivity Test mode, this pin works as input. Using this signal or not is dependent on system. In case of not connected as Signal, ALERT_n Pin must be bounded to VDDQ on board.
RESET_n	Input	VDD	Active Low Asynchronous Reset: Reset is active when RESET_n is LOW, and inactive when RESET_n is HIGH. RESET_n must be HIGH during normal operation. RESET_n is a CMOS rail to rail signal with DC high and low at 80% and 20% of VDDQ,
HSCL	Input	1.0V	Host SidebandBus bus clock, supplied by the master.
HSDA	Input/Output	1.0V	Host SidebandBus data, connected from the master to hubs or host bus client devices.
HSA	Input	2.1V max	Host SidebandBus bus device ID address pin; input to a hub or other client device to distinguish between identical devices in the I3C Basic address range.
RFU			Reserved for Future Use. No on DIMM electrical connection is present.
PWR_GOOD	Input/Output	Open Drain	Power good indicator. Open Drain output. The PMIC floats this pin high when VIN_Bulk input supply as well as all enabled output buck regulators and all LDO regulator tolerance threshold is maintained as configured in appropriate register. The PMIC drives this pin low when VIN_Bulk input goes below the threshold or when any of the enabled switch output regulators exceed the threshold configured in the appropriate register or any LDO output regulator exceeds the threshold tolerance. Input: The PMIC disables its output regulators when this pin is low. The LDO outputs shall remain on.
PWR_EN	Input	3.3V	PMIC Enable. When this pin is high, the PMIC turns on the regulator. When this pin is low, the PMIC turns off the regulator. This signal is connected to PMIC's VR_EN pin.
VIN_BULK	Supply	5V	5 V power input supply to the PMIC for analog circuits.
VSS	Supply		Ground.

7.0 AC & DC OPERATING CONDITIONS

7.1 DIMM Voltage Requirements

The DIMM input voltage requirements and the SDRAM voltage requirements are not identical. The DIMM voltage requirements must meet the PMIC input voltage requirements. The PMIC output voltage requirements must meet the SDRAM voltage requirements. There must be some allowance for a small voltage drop across the DIMM for both supply voltages and PMIC output voltages. Table 15 defines the requirements from the Host at the DIMM socket and at the post-PMIC SDRAM pin. Some modules have lower current requirements. Each specific module configuration must meet the PMIC 50x0, SDRAM, DDR5RCDxx and DDR5DBxx voltage requirements for its worst case supply currents

[Table 15] DDR5 SODIMM DC Operating Voltage [1,2,3]

Symbol	Parameter	Voltage Rating (Volts)			Maximum Expected Current (Amps)	Power State
		Minimum	Typical	Maximum		
VIN_BULK	Host Supply Voltage	4.25	5.0	5.5	2A	Operational
SWA, SWB	PMIC Output Supply Voltage	-	1.1	-	6	Operational
SWA+SWB	PMIC Output Supply Voltage	-	1.1	-	12	Operational
SWC	PMIC Output Supply Voltage	-	1.8	-	2	Operational
1.8V LDO	PMIC Output Supply Voltage	-	1.8	-	0.025	Operational
1.0V LDO	PMIC Output Supply Voltage	-	1.0	-	0.020	Operational

NOTE:
1) During first power on, the input voltage supply must reach minimum 4.25 V for PMIC to detect valid input supply. 2) The ramp up rate between 300 mV and 4.0 V.
3) The ramp down rate between 4.0 V and 300 mV.
4) The area under the curve above VIN_Bulk = TBD V. VIN_Bulk_AC spec must also be satisfied.
5) The minimum input current requirement is to deliver the maximum output current on VOUT_1.8V and VOUT_1.0V LDO plus the current
6) VIN_Bulk = 5.0 V. Measured at room temperature. All circuitry including output regulators and LDOs are off. VR_EN signal is static
7) VIN_Bulk = 5.0 V. Measured at room temperature. All output regulators and LDOs are on with 0 A output load. VR_EN signal is static 8) 20 MHz bandwidth limited measurement for all voltages in the table
9) Voltages are measured at the DIMM gold fingers and at PMIC output pins
10) The SDRAM specification must be met and take precedence over this document
11) Maximum current establishes the platform maximum current regulation point. It provides a data point for DIMM developers to set power plane impedances 12) Typical voltage is platform dependent. This is a suggested value only

7.2 Recommended Operating Temperature Ranges

[Table 16] Recommended Operating Temperature Ranges

Parameter/Condition	Device Rating	Symbol	Min	Normal	Extended
Commercial Temperature	CT	TOPER-CT	0°C	85°C	95°C
Industrial Temperature	IT	TOPER-IT	-40°C	85°C	95°C

NOTE:
1) The operating temperature is the case surface temperature on the center-top side of the DDR5 device. For measurements conditions, refer to JESD51-2 2) Normal is the maximum limit when device is operating in the Normal Temperature Mode
3) Extended is the maximum limit when device is operating in the Extended Temperature Mode
4) Support for the Industrial Temperature device is TBD

8.0 AC & DC INPUT MEASUREMENT LEVELS

8.1 CA Rx Voltage and Timings

The following draft assumes internal CA VREF. If the VREF is external, the specs will be modified accordingly.

The command and address (CA) including CS input receiver compliance mask for voltage and timing is shown in the figure below. All CA signals apply the same compliance mask and CS signal applies its own compliance mask independently. All signals applied to the compliance mask operate in single data rate mode.

The CA input receiver mask for voltage and timing is shown in the figure below is applied across all CA pins. The receiver mask (Rx Mask) defines the area that the input signal must not encroach in order for the DRAM input receiver to be expected to be able to successfully capture a valid input signal; it is not the valid data-eye.

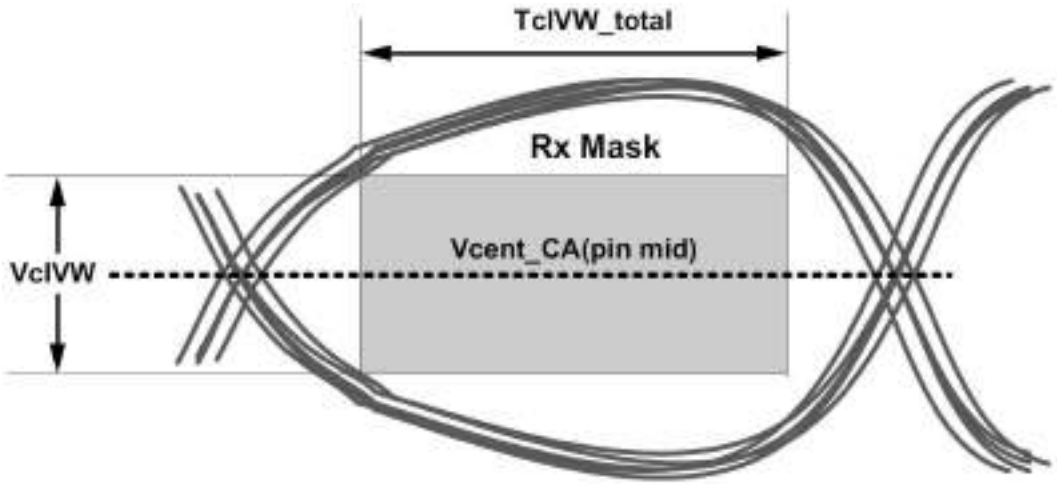

Figure 12. CA Receiver (Rx) mask

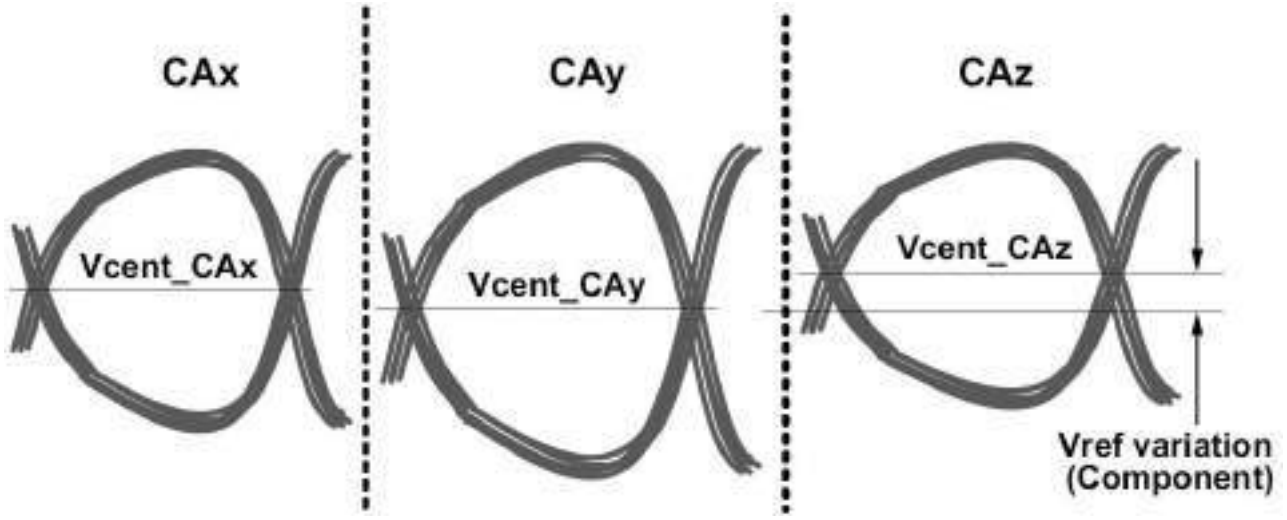

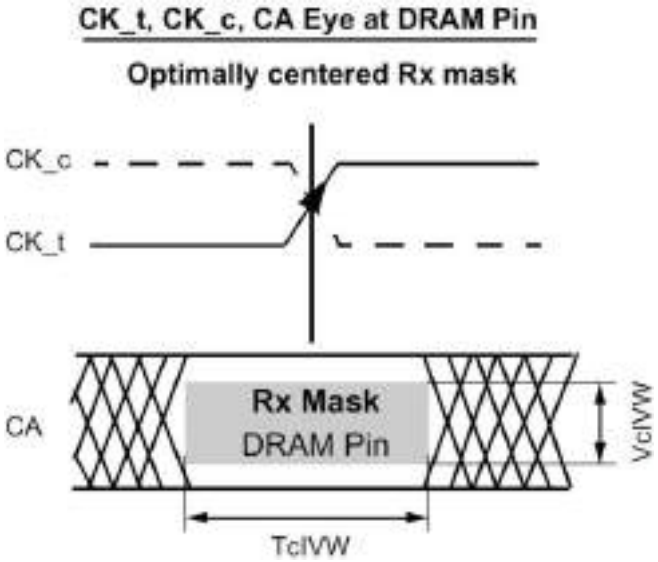

Figure 13. Across pin V_{REF}CA voltage variation

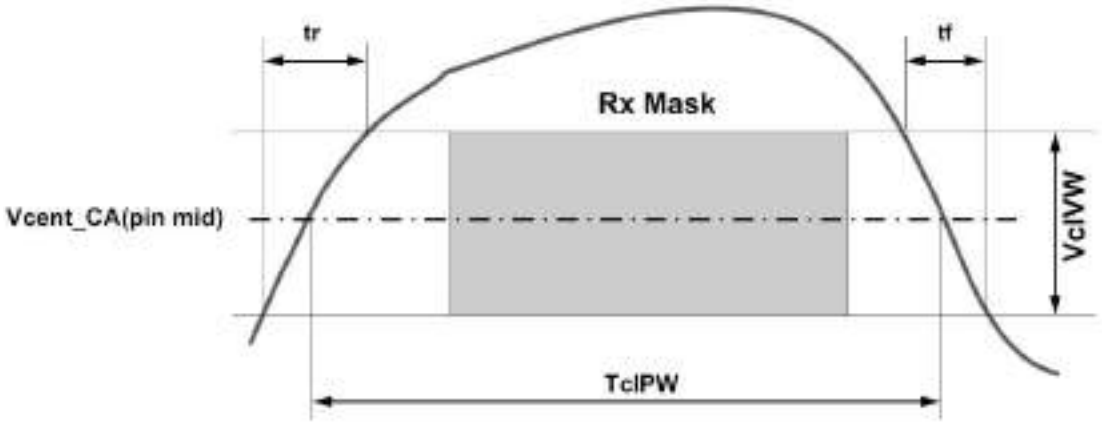
Proposta de Preço ITEM 3 - Teatro Municipal de Ourém (1568178) SEI 2025.001317 / pg. 683
Identificação interna do documento: H2SE6K90B9-TDFBBC1



Vcent_CA(pin mid) is defined as the midpoint between the largest Vcent_CA voltage level and the smallest Vcent_CA voltage level across all CA and CS pins for a given DRAM component. Each CA Vcent level is defined by the center, i.e. widest opening, of the cumulative data input eye as depicted in Figure 14. This clarifies that any DRAM component level variation must be accounted for within the DRAM CA Rx mask. The component level VREF will be set by the system to account for Ron and ODT settings.

TcIVW is not necessarily center aligned on CK_t/CK_c crossing at the DRAM pin, but is assumed to be center aligned at the DRAM Latch.

Figure 14. CA Timings at the DRAM Pins

All of the timing terms in Figure 14 are measured from the CK_t/CK_c to the center (midpoint) of the TcIVW window taken at the VcIVW_total voltage levels centered around Vcent_CA (pin mid).

NOTE :
1) SRIN_cIVW=VcIVW_Total/(tr or tf), signal must be monotonic within tr and tf range

Figure 15. CA TcIPW and SRIN_cIVW definition (for each input pulse)

8.2 Input Clock Jitter Specification

8.2.1 Overview

The clock is being driven to the DRAM either by the RCD for SODIMM modules. (Figure 17)

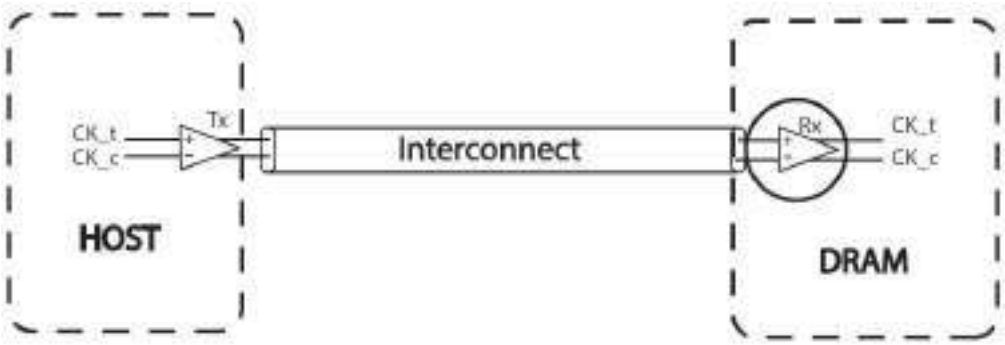

Figure 17. HOST driving clock signals to the DRAM

8.2.2 Specification for DRAM Input Clock Jitter

The Random Jitter (Rj) specified is a random jitter meeting a Gaussian distribution. The Deterministic Jitter (Dj) specified is bounded. Input clock violating the min/max jitter values may result in malfunction of the DDR5 SDRAM device.

[Table 18] DRAM Input Clock Jitter Specifications

[BUJ=Bounded Uncorrelated Jitter; DCD=Duty Cycle Distortion; Dj=Deterministic Jitter; Rj=Random Jitter; Tj=Total jitter; pp=Peak-to-Peak]

Parameter	Symbol	DDR5-4400		DDR5-4800		DDR5-5200		DDR5-5600		Unit	Notes
		Min	Max	Min	Max	Min	Max	Min	Max

Dj pp value of N-UI Jitter, N=4,5,6,...,30	tCK_NUI_Dj_NoBUJ, where N=4,5,6,...,30	-	-	-	-	-	-	-	-	UI	3,10,11,12
Tj value of N-UI Jitter, N=4,5,6,...,30	tCK_NUI_Tj_NoBUJ, where N=4,5,6,...,30	-	-	-	-	-	-	-	-	UI	3,10,11,12

Proposta de Preço ITEM 3 - Memória Tecnologia (1562786) SEI 2025.001317 / pg. 686
Identificação interna do documento: I2SE6K90B9-TDFBBC1

NOTE:

1) f0 = Data Rate/2, example: if data rate is 4800MT/s, then f0=2400
2) Rise and fall time slopes (V / nsec) are measured between +100 mV and -100 mV of the differential output of reference clock
3) On-die noise similar to that occurring with all the transmitter and receiver lanes toggling need to be stimulated. When there is no socket in transmitter measurement setup, in many cases, the contribution of the cross-talk is not significant or can be estimated within tolerable error even with all the transmitter lanes sending patterns. When a socket is present, such as DUT being DRAM component, the contribution of the cross-talk could be significant. To minimize the impact of crosstalk on the measurement results, a small group of selected lanes in the vicinity of the lane under test may be turned off (sending DC), while the remaining Tx lanes send patterns to the corresponding Rx receivers so as to excite realistic on-die noise profile from device switching. Note that there may be cases when one of Dj and Rj specs is met and another violated in which case the signaling analysis should be run to determine link feasibility
4) Duty Cycle Error defined as absolute difference between average value of all UI with that of average of odd UI, which in magnitude would equal absolute difference between average of all UI and average of all even UI
5) Rj RMS value of 1-UI jitter without BUJ, but on-die system-like noise present. This extraction is to be done after software correction of DCD
6) Dj pp value of 1-UI jitter(after software assisted DCC).Without BUJ,but on-die system like noise present.Dj indicates Djdd of dual-Dirac fitting,after software correction of DCD
7) Rj RMS value of N-UI jitter without BUJ, but on-die system like noise present. Evaluated for 1 < N < 4. This extraction is to be done after software correction of DCD
8) Dj pp value of N-UI jitter without BUJ, but on-die system like noise present. Evaluated for 1 < N < 4. Dj indicates Djdd of dual-Dirac fitting, after software correction of DCD
9) Rj RMS value of N-UI jitter without BUJ, but on-die system like noise present. Evaluated for 3 < N < 31. This extraction is to be done after software correction of DCD
10) Dj pp value of N-UI jitter without BUJ, but on-die system like noise present. Evaluated for 3 < N < 31. Dj indicates Djdd of dual-Dirac fitting, after software correction of DCD 11) The validation methodology for these parameters will be covered in future ballots
12) If the clock meets total jitter Tj at BER of $1E^{-16}$, then meeting the individual Rj and Dj components of the spec can be considered optional. Tj is defined as Dj + 16.2*Rj for BER of $1E^{-16}$

8.4 Differential Input Clock Voltage Sensitivity

The differential input clock voltage sensitivity test provides the methodology for testing the receiver's sensitivity to clock by varying input voltage in the absence of Inter-Symbol Interference (ISI), jitter (Rj, Dj, DCD) and crosstalk noise. This specifies the Rx voltage sensitivity requirement. The system input swing to the DRAM must be larger than the DRAM Rx at the specified BER

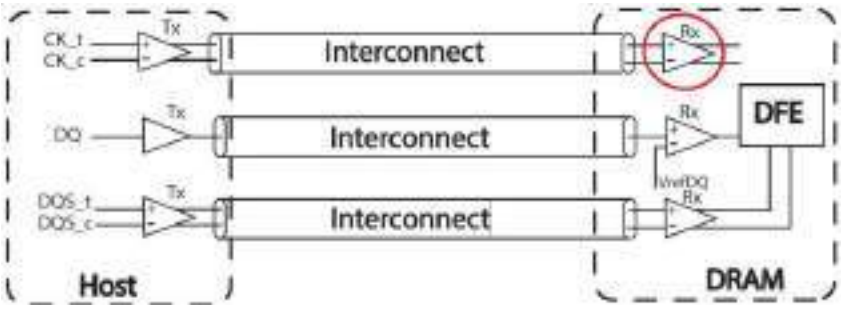

Figure 19. Example of DDR5 Memory Interconnect

8.4.1 Differential Input Clock Voltage Sensitivity Parameter

Differential input clock (CK_t, CK_c) VRx_CK is defined and measured as shown below. The clock receiver must pass the minimum BER requirements for DDR5.

[Table 20] Differential Input Clock Voltage Sensitivity Parameter

Parameter	Symbol	DDR5-4400		DDR5-4800		DDR5-5200		DDR5-5600		Unit	Note
		min	max	min	max	min	max	min	max		
Input Clock Voltage Sensitivity (differential pp)	VRx_CK	-	180	-	160	-	140	-	120	mV	1,2

NOTE:
1) Refer to the minimum BER requirements for DDR5
2) The validation methodology for this parameter is TBD

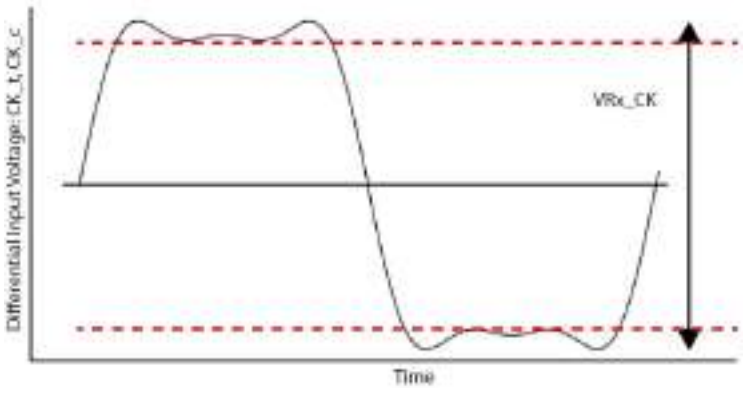

Figure 20. VRx_CK

8.4.2 Differential Input Voltage Levels for Clock

[Table 21] Differential Clock (CK_t, CK_c) Input Levels

From	Parameter	DDR5 4400 ~ 5600	Note
VIHdiffCK	Differential input high measurement level (CK_t, CK_c)	0.75 x Vdiffpk-pk	1,2
VILdiffCK	Differential input low measurement level (CK_t, CK_c)	0.25 x Vdiffpk-pk	1,2

NOTE:
1) Vdiffpk-pk defined in Figure 21
2) Vdiffpk-pk is the mean high voltage minus the mean low voltage over TBD samples
3) All parameters are defined over the entire clock common mode range

8.4.3 Differential Input Slew Rate Definition for Clock (CK_t, CK_c)

Input slew rate for differential signals (CK_t, CK_c) are defined and measured as shown below.

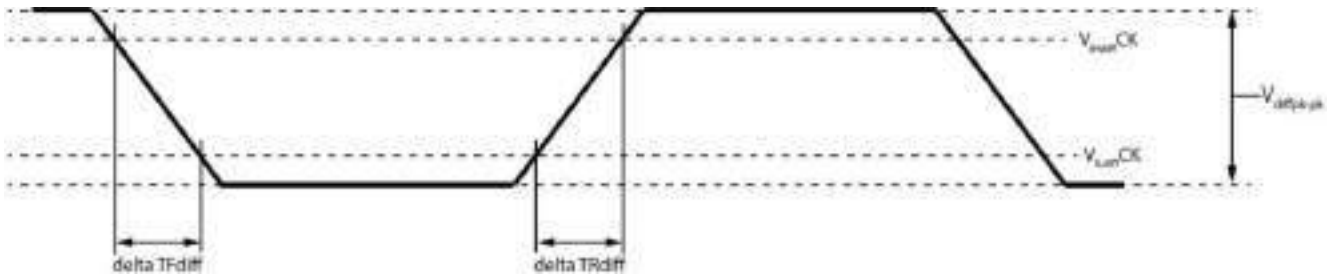

Figure 21. Differential Input Slew Rate Definition for CK_t, CK_c

[Table 22] Differential Input Slew Rate Definition for CK_t, CK_c

Parameter	Measured		Defined by	Notes
	From	To		
Differential Input slew rate for rising edge (CK_t - CK_c)	$VIL_{diff}CK$	$VIH_{diff}CK$	($VIH_{diff}CK$ - $VIL_{diff}CK$) /deltaTRdiff	
Differential Input slew rate for falling edge (CK_t - CK_c)	$VIH_{diff}CK$	$VIL_{diff}CK$	($VIH_{diff}CK$ - $VIL_{diff}CK$) /deltaTFdiff	

[Table 23] Differential Input Slew Rate for CK_t, CK_c

8.5 Rx DQS Jitter Sensitivity

The receiver DQS jitter sensitivity test provides the methodology for testing the receiver's strobe sensitivity to an applied duty cycle distortion (DCD) and/ or random jitter (Rj) at the forwarded strobe input without adding jitter, noise and ISI to the data. The receiver must pass the appropriate BER rate when no cross-talk nor ISI is applied, and must pass through the combination of applied DCD and Rj.

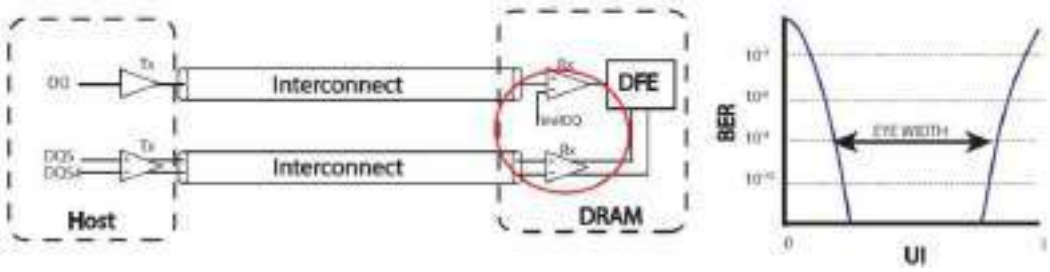

Figure 22. SDRAM's Rx Forwarded Strobes for Jitter Sensitivity Testing

8.5.1 Rx DQS Jitter Sensitivity Specification

The following table provides Rx DQS Jitter Sensitivity Specification for the DDR5 DRAM receivers when operating at various possible transfer rates. These parameters are tested on the CTC2 card with neither additive gain nor Rx Equalization set.

[Table 24] Rx DQS Jitter Sensitivity Specification

[BER = Bit Error Rate; DCD = Duty Cycle Distortion; Rj =Random Jitter]

Parameter	Symbol	DDR5-4400		DDR5-4800		DDR5-5200		DDR5-5600		Unit	Notes
		min	max	min	max	min	max	min	max		
DQ Timing Width	tRx_DQ_tMargin	0.825	-	0.825	-	0.825	-	0.825	-	UI	1,2,3,8,9,10
Degradation of timing width compared to tRx_DQ_tMargin, with DCD injection in DQS	tRx_DQ_tMargin_DQS_DCD	-	0.06	-	0.06	-	0.06	-	0.06	UI	1,4,8,9,10
Degradation of timing width compared to tRx_DQ_tMargin, with Rj injection in DQS	tRx_DQ_tMargin_DQS_Rj	-	0.09	-	0.09	-	0.09	-	0.09	UI	1,5,8,9,10
Degradation of timing width compared to tRx_DQ_tMargin, with both DCD and Rj injection in DQS	tRx_DQ_tMargin_DQS_DCD_Rj	-	0.15	-	0.15	-	0.15	-	0.15	UI	1,2,6,8,9,10
Delay of any data lane relative to the DQS_t DQS_c crossing	tRx_DQS2DQ	114	738	114	729	114	721	114	714	ps	1,7,8,9,10
Delay of any data lane relative to any other data lane	tRX_DQ2DQ	-	50	-	50	-	50	-	50	ps	1,7,8,9,10 11,12

NOTE :

1) Validation methodology will be defined in future JEDEC ballots. 2UI is defined as 1tCK for this parameter.
2) Each of ?tRx_DQ_tMargin_DQS_DCD, ?tRx_DQ_tMargin_DQS_Rj, and ?tRx_DQ_tMargin_DQS _DCD_Rj can be relaxed by up to 5% if tRx_DQ_tMargin exceeds the spec by 5% or more.
3) DQ Timing Width - timing width for any data lane using repetitive patterns (check note 4 for the pattern) measured at BER=E-9.
4) Magnitude of degradation of timing width for any data lane using repetitive no ISI patterns with DCD injection in forwarded strobe DQS compared to tRx_DQ_tMargin, measured at BER=E-9. The magnitude of DCD is specified under Test Conditions for Rx DQS Jitter Sensitivity Testing. Test using clock-like pattern of repeating 3 "1s" and 3 "0s".

Proposta de Preço ITEM 3 - Memória Tecnologia (1662786) SEI 2025.001317 / pg. 691
Identificação interna do documento: I2SE6K90B9-TDFBBC1

5) Magnitude of degradation of timing width for any data lane using repetitive no ISI patterns with only Rj injection in forwarded strobe DQS measured at BER=E-9, compared to tRx_tMargin. The magnitude of Rj is specified under Test Conditions for Rx DQS Jitter Sensitivity Testing
6) Magnitude of degradation of timing width for any data lane using repetitive no ISI patterns with DCD and Rj injection in forwarded strobe DQS measured at BER=E-9, compared to tRx_tMargin. The magnitudes of DCD and Rj are specified under Test Conditions for Rx DQS Jitter Sensitivity Testing.
7) Delay of any data lane relative to the strobe lane, as measured at the end of Tx+Channel. This parameter is a collective sum of effects of data clock mismatches in Tx and on the medium connecting Tx and Rx.
8) All measurements at BER=E-9.
9) This test should be done after the DQS and DQ Voltage Sensitivity tests are completed and passing.
10) The user has the freedom to set the voltage swing and slew rates for strobe and DQ signals as long as they meet the specification. The DQS and DQ input voltage swing and/or slew rate can be adjusted, without exceeding the specifications, for this test.
11) DQ to DQ offset is skew between DQs within a nibble (x4) or a byte (x8, x16) at the DDR5 SDRAM balls.
12) This parameter is relative to the per-pin trained DQS2DQ value, and only appliesafterper-pin DQS2DQ training is complete.

8.5.2 Test Conditions for Rx DQS Jitter Sensitivity Tests

Table 25 lists the amount of Duty Cycle Distortion (DCD) and/or Random Jitter (Rj) that must be applied to the forwarded strobe when measuring the Rx DQS Jitter Sensitivity parameters specified in Table 24.

[Table 25] Test Conditions for Rx DQS Jitter Sensitivity Testing

Parameter	Symbol	DDR5-4400		DDR5-4800		DDR5-5200		DDR5-5600		Unit	Notes
		Min	Max	Min	Max	Min	Max	Min	Max		
Applied DCD to the DQS	tRx_DQS_DCD	-	0.045	-	0.045	-	0.045	-	0.045	UI	1,2,3,6,7,10

Applied DCD and Rj RMS to the DQS	tRx_DQS_DCD_Rj	-	0.045UI DCD + 0.0075UI Rj RMS	-	0.045UI DCD + 0.0075UI Rj RMS	-	0.045UI DCD + 0.0075UI Rj RMS	-	0.045UI DCD + 0.0075UI Rj RMS	UI	1,2,5,6,7,9,10

NOTE:
1) While imposing this spec, the strobe lane is stressed, but the data input is kept large amplitude and no jitter or ISI injection. The specified voltages are at the Rx input pin.
The DQS and DQ input voltage swing and/or slew rate can be adjusted, without exceeding the specifications, for this test.
2) The jitter response of the forwarded strobe channel will depend on the input voltage, primarily due to bandwidth limitations of the clock receiver. For this revision, no separate specification of jitter as a function of input amplitude is specified, instead the response characterization done at the specified clock amplitude only. The specified voltages are at the Rx input pin
3) Various DCD values should be tested, complying within the maximum limits
4) Various Rj values should be tested, complying within the maximum limits
5) Various combinations of DCD and Rj should be tested, complying within the maximum limits. The maximum timing margin degradation as a result of these injected jitter is specified in a separate table
6) Although DDR5 has bursty traffic, current available BERTs that can be used for this test do not support burst traffic patterns. A continuous strobe and continuous DQ are used for this parameter. The clock like pattern repeating 3 “1s” and 3 “0s” is used for this test.
7) Duty Cycle Distortion (in UI DCD) as applied to the input forwarded DQS from BERT (UI)
8) RMS value of Rj (specified as Edge jitter) applied to the input forwarded DQS from BERT (values of the edge jitter RMS values specified as % of UI)
9) Duty cycle distortion (specified as UI DCD) and rms values of Rj (specified as edge jitter) applied to the input forwarded DQS from BERT (values of the edge jitter RMS values specified as % of UI)
10) The user has the freedom to set the voltage swing and slew rates for strobe and DQ signals as long as they meet the specification.
The DQS and DQ input voltage swing and/or slew rate can be adjusted, without exceeding the specifications, for this test.

8.6 Rx DQS Voltage Sensitivity

8.6.1 Overview

The receiver DQS (strobe) input voltage sensitivity test provides the methodology for testing the receiver's sensitivity to varying input voltage in the absence of Inter-Symbol Interference (ISI), jitter (Rj, Dj, DCD) and crosstalk noise.

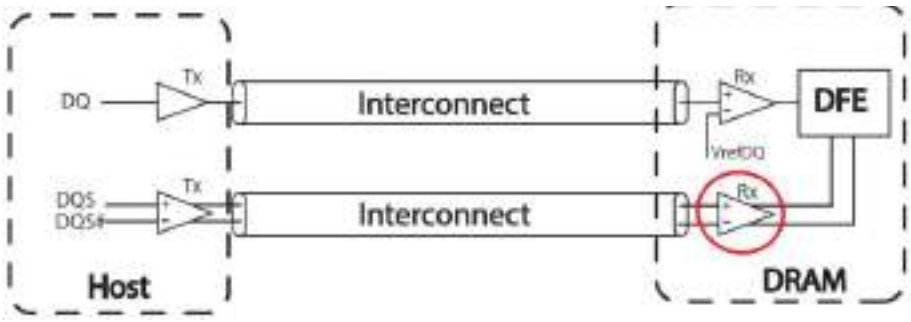

Figure 23. Example of DDR5 Memory Interconnect

8.6.2 Receiver DQS Voltage Sensitivity Parameter

Input differential (DQS_t, DQS_c) VRx_DQS is defined and measured as shown below. The receiver must pass the minimum BER requirements for DDR5. These parameters are tested on the CTC2 card with neither additive gain nor Rx Equalization set.

[Table 26] Rx DQS Input Voltage Sensitivity Parameter

Parameter	Symbol	DDR5-4400		DDR5-4800		DDR5-5200		DDR5-5600		Unit	Notes
		Min	Max	Min	Max	Min	Max	Min	Max		
DQS Rx Input Voltage Sensitivity (differential pp)	VRx_DQS	-	100	-	100	-	90	-	90	mV	1,2,3

NOTE:

1) Refer to the minimum BER requirements for DDR5
2) The validation methodology for this parameter is TBD
3) Test using clock like pattern of repeating 3 "1s" and 3 "0s"

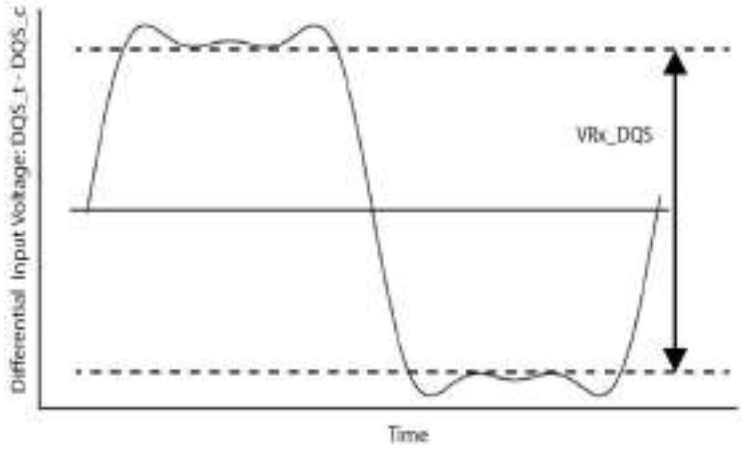

Figure 24. VRx_DQS

8.8 Rx DQ Voltage Sensitivity

8.8.1 Overview

The receiver data input voltage sensitivity test provides the methodology for testing the receiver's sensitivity to varying input voltage in the absence of Inter-Symbol Interference (ISI), jitter (Rj, Dj, DCD) and crosstalk noise.

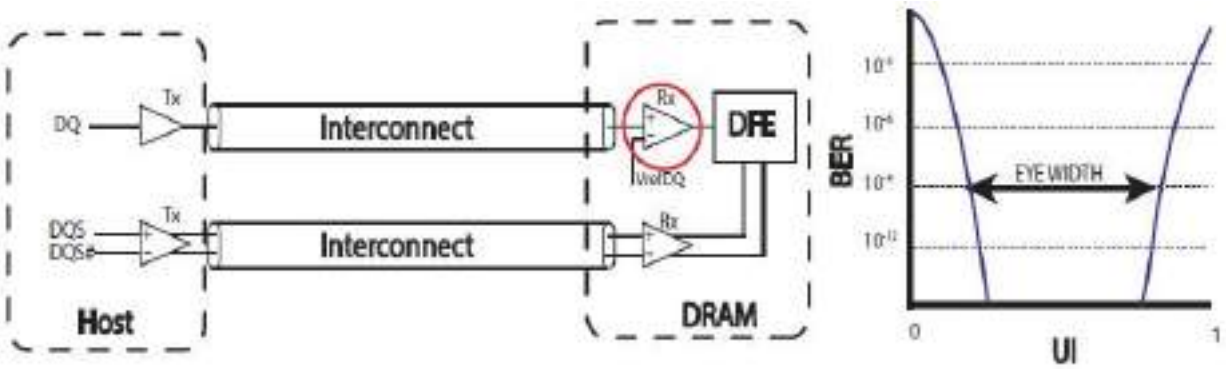

Figure 15. Example of DDR5 Memory Interconnect

8.8.2 Receiver DQ Input Voltage Sensitivity Parameters

Input single-ended VRx_DQ is defined and measured as shown below. The receiver must pass the minimum BER requirements for DDR5. These parameters are tested on the CTC2 card with neither additive gain nor Rx Equalization set.

[Table 20] Rx DQ Input Voltage Sensitivity Parameters

Parameter	Symbol	DDR5-4400		DDR5-4800		DDR5-5200		DDR5-5600		Unit	Notes
		Min	Max	Min	Max	Min	Max	Min	Max		
Minimum DQ Rx input voltage sensitivity applied around Vref	VRx_DQ	-	65	-	65	-	60	-	60	mV	1,2,3

NOTE :
1) Refer to the minimum BER requirements for DDR5
2) The validation methodology for this parameter is TBD
3) Recommend testing using clock like pattern such as repeating 3 "1s" and 3 "0s"

NOTE :
1) Only applies when both DQS_t and DQS_c are transitioning.

8.9 Rx Stressed Eye

The stressed eye tests provide the methodology for creating the appropriate stress for the DRAM's receiver with the combination of ISI (both loss and reflective), jitter (Rj, Dj, DCD), and crosstalk noise. The receiver must pass the appropriate BER rate when the equivalent stressed eye is applied through the combination of ISI, jitter and crosstalk

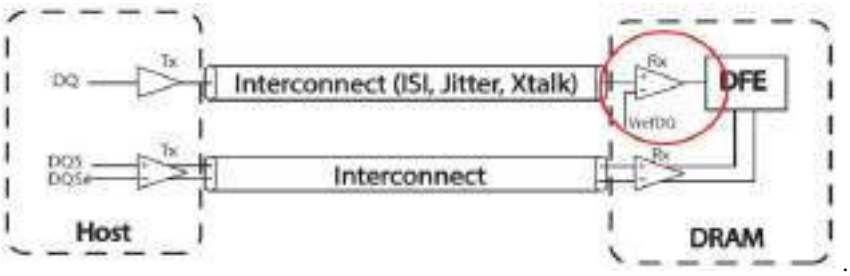

Figure 18. Example of Rx Stressed Test Setup in the Presence of ISI, Jitter and Crosstalk

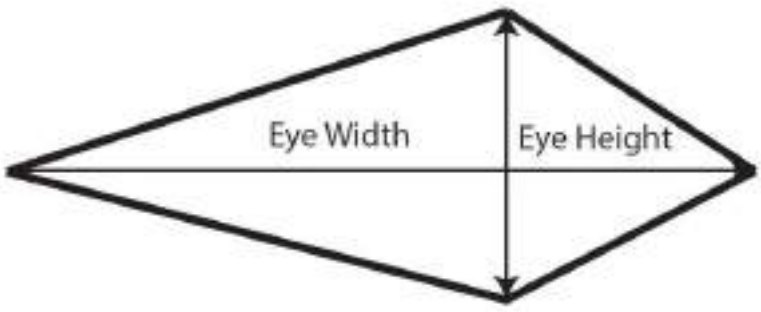

Figure 19. Example of Rx Stressed Eye Height and Eye Width

8.9.1 Parameters for DDR5 Rx Stressed Eye Tests

[Table 24] Test Conditions for Rx Stressed Eye Tests

[BER=Bit Error Rate; DCD=Duty Cycle Distortion; Rj=Random Jitter; Sj=Sinusoidal Jitter; p-p =peak to peak]

Parameter	Symbol	DDR5-4400		DDR5-4800		DDR5-5200		DDR5-5600		Unit	Notes
		Min	Max	Min	Max	Min	Max	Min	Max		
Eye height of stressed eye for Golden Reference Channel 1	RxEH_Stressed_Eye_Golden_Ref_Channel_1	-	75	-	70	-	65	-	60	mV	1,2,3,4,5,6,7,8,9
Eye width of stressed eye Golden Reference Channel 1	RxEW_Stressed_Eye_Golden_Ref_Channel_1	-	0.25	-	0.25	-	0.235	-	0.235	UI	1,2,3,4,5,6,7,8,9
Vswing stress to meet above data eye	Vswing_Stressed_Eye_Golden_Ref_Channel_1	-	600	-	600	-	600	-	600	mV	1,2
Injected sinusoidal jitter at 200 MHz to meet above data eye	Sj_Stressed_Eye_Golden_Ref_Channel_1	0	0.45	0	0.45	0	0.45	0	0.45	UI p-p	1,2
Injected Random wide band (10 MHz-1 GHz) Jitter to meet above data eye	Rj_Stressed_Eye_Golden_Ref_Channel_1	0	0.04	0	0.04	0	0.04	0	0.04	UI RMS	1,2
Injected voltage noise as PRBS23, or Injected voltage noise at 2.1 GHz	Vnoise_Stressed_Eye_Golden_Ref_Channel_1	0	125	0	125	0	125	0	125	mV p-p	1,2
Golden Reference Channel 1 Characteristics as measured at TBD	Golden_Ref_Channel_1_Characteristics									dB	3

NOTE :

1) Must meet minimum BER of $1E^{-16}$ or better requirement with the stressed eye at the slice of the receiver (after equalization is applied in the summer). The eye shape is verified by measuring to BER E^{-9} and extrapolating to BER E^{-16}.
2) These parameters are applied on the defined golden reference channel with parameters TBD.
1) DFE Tap 1-4 Bias settings that give the best eye margin are used and referring to Table 132, Min/Max Ranges for the DFE Tap Coefficients. DFE tap range limits apply: sum of absolute values of Tap-2, Tap-3, and Tap-4 shall be less than 60mV (|Tap-2| + |Tap-3| + |Tap-4| < 60mV) after the tap multiflier is applied.
2) Evaluated with no DC supply voltage drift.
3) Evaluated with no temperature drift.
4) Supply voltage noise limited according to DC bandwidth spec, see DC Operating Conditions
5) The stressed eye is to be assumed to have a diamond shape
6) The VREFDQ, DFE Gain Bias Step, and DFE Taps 1,2,3,4 Bias Step can be adjusted as needed, without exceeding the specifications, for this test, including the limits placed in Note 3.
7) The stressed eye is defined as centered on the DQS_t/DQS_c crossing during the calibration. Measurement includes an optimal set of DQS_t/DQS_c location, VrefDQ, and DFE solution to give the best eye margin.
10) The Rx stressed eye spec applies at 2933MT/s and faster data rates.
11) EH/EW are measured at the slicer of the receiver

8.10 Connectivity Test Mode - Input level and Timing Requirement

During CT Mode, input levels are defined below.
TEN pin: CMOS rail-to-rail with AC high and low at 80% and 20% of VDDQ
CS_n: CMOS rail-to-rail with AC high and low at 80% and 20% of VDDQ.
Test Input pins: CMOS rail-to-rail with AC high and low at 80% and 20% of VDDQ.
RESET_n: CMOS rail-to-rail with AC high and low at 80% and 20% of VDDQ.

Prior to the assertion of the TEN pin, all voltage supplies must be valid and stable.

Upon the assertion of the TEN pin, the CK_t and CK_c signals will be ignored and the DDR5 memory device will enter into the CT mode after time tCT_Enable. In the CT mode, no refresh activities in the memory arrays, initiated either externally (i.e., auto-refresh) or internally (i.e., self-refresh), will be maintained.

The TEN pin may be asserted after the DRAM has completed power-on, after RESET_n has de-asserted, the wait time after the RESET_n de-assertion has elapsed, and prior to starting clocks (CK_t, CK_c).

The TEN pin may be de-asserted at any time in the CT mode. Upon exiting the CT mode, the states of the DDR5 memory device are unknown and the integrity of the original content of the memory array is not guaranteed; therefore, the reset initialization sequence is required.

All output signals at the test output pins will be stable within tCT_valid after the test inputs have been applied to the test input pins with TEN input and CS_n input maintained High and Low respectively.

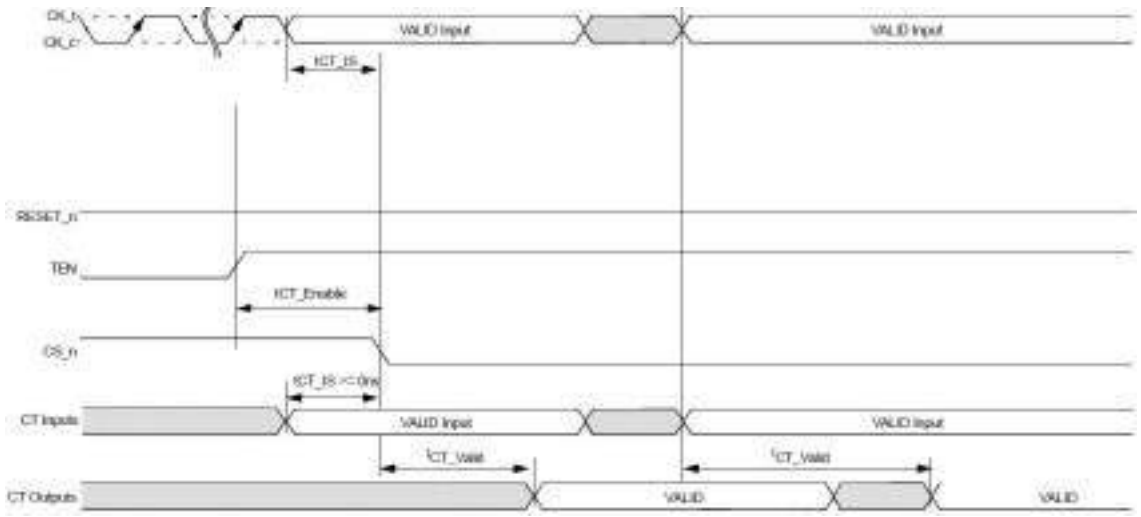

Figure 20. Timing Diagram for Connectivity Test (CT) Mode

[Table 25] AC parameters for Connectivity Test (CT) Mode

8.10.1 Connectivity Test (CT) Mode Input Levels

Following input parameters will be applied for DDR5 SDRAM Input Signals during Connectivity Test Mode.

[Table 26] CMOS rail to rail Input Levels for TEN, CS_n and Test inputs

Parameter	Symbol	Min	Max	Unit	Notes
TEN AC Input High Voltage	VIH(AC)_TEN	0.8 * VDDQ	VDDQ	V	1
TEN DC Input High Voltage	VIH(DC)_TEN	0.7 * VDDQ	VDDQ	V	
TEN DC Input Low Voltage	VIL(DC)_TEN	VSS	0.3 * VDDQ	V	
TEN AC Input Low Voltage	VIL(AC)_TEN	VSS	0.2 * VDDQ	V	2
TEN Input signal Falling time	TF_input_TEN	-	10	ns	
TEN Input signal Rising time	TR_input_TEN	-	10	ns	

NOTE :
1) Overshoot might occur. It should be limited by the Absolute Maximum DC Ratings.
2) Undershoot might occur. It should be limited by Absolute Maximum DC Ratings.

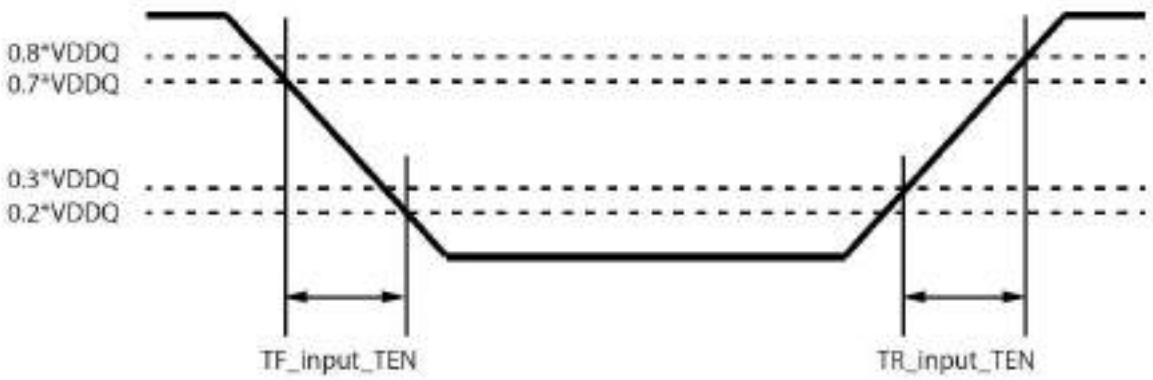

Figure 21. TEN Input Slew Rate Definition

8.10.2 CMOS rail to rail Input Levels for RESET_n

[Table 27] CMOS rail to rail Input Levels for RESET_n

Parameter	Symbol	Min	Max	Unit	NOTE
AC Input High Voltage	VIH(AC)_RESET	0.8*VDDQ	VDDQ	V	5
DC Input High Voltage	VIH(DC)_RESET	0.7*VDDQ	VDDQ	V	2
DC Input Low Voltage	VIL(DC)_RESET	VSS	0.3*VDDQ	V	1
AC Input Low Voltage	VIL(AC)_RESET	VSS	0.2*VDDQ	V	6
Rising time	TR_RESET	-	1.0	us	
RESET pulse width	tPW_RESET	1.0	-	us	3,4

NOTE :
1) After RESET_n is registered LOW, RESET_n level shall be maintained below VIL(DC)_RESET during tPW_RESET, otherwise, SDRAM may not be reset.
2) Once RESET_n is registered HIGH, RESET_n level must be maintained above VIH(DC)_RESET, otherwise, SDRAM operation will not be guaranteed until it is reset asserting RESET_n signal LOW.
3) RESET is destructive to data contents.

9.0 AC&DC OUTPUT MEASUREMENT LEVELS and TIMING

9.1 Output Driver DC Electrical Characteristics for DQS and DQ

The DDR5 driver supports two different Ron values. These Ron values are referred as strong(low Ron) and weak mode(high Ron). A functional representation of the output buffer is shown in the figure below.

Output driver impedance RON is defined as follows:

The individual pull-up and pull-down resistors (RON_{Pu} and RON_{Pd}) are defined as follows:

$$RON_{Pu} = \frac{VDDQ - Vout}{|I\ out|}$$ under the condition that RONPd is off

$$RON_{Pd} = \frac{Vout}{|I\ out|}$$ under the condition that RONPu is off

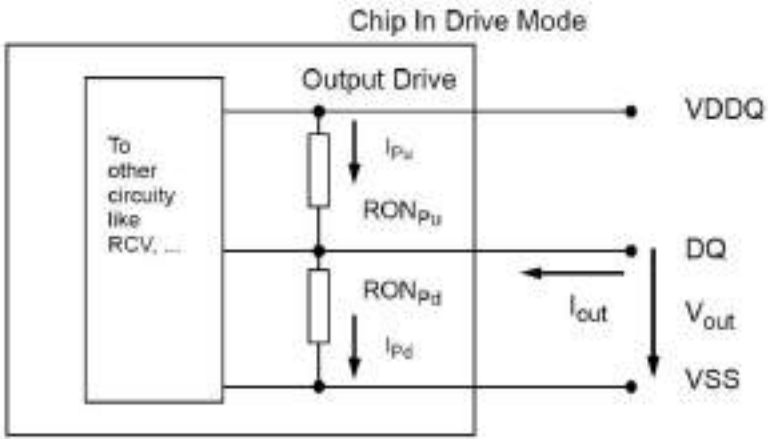

Figure 34. Output Driver Impedance Ron

$$MMPudd = \frac{RONPuMax - RONPuMin}{RONNOM} * 100$$

$$MMPddd = \frac{RONPdMax - RONPdMin}{RONNOM} * 100$$

9.3 Loopback Output Timing

Loopback strobe LBDQS to Loopback data LBDQ relationship is illustrated inFigure 36.

- tLBQSH describes the single-ended LBDQS strobe high pulse width
- tLBQSL describes the single-ended LBDQS strobe low pulse width
- tLBDQSQ describes the latest valid transition of LBDQ measured at both rising and falling edges of LBDQS
- tLBQH describes the earliest invalid transition of LBDQ measured at both rising and falling edges of LBDQS
- tLBDVW describes the data valid window per device per UI and is derived from (tLBQH-tLBDQSQ) of each UI on a given DRAM

[Table 38] Loopback Output Timing Parameters

Speed		DDR5-4400		DDR5-4800		DDR5-5200		DDR5-5600		Units	Notes
Parameter	Symbol	MIN	MAX	MIN	MAX	MIN	MAX	MIN	MAX		
Loopback LBDQS Output Low Time	tLBQSL	0.7	-	0.7	-	0.7	-	0.7	-	tCK	1

	V_{OHdc} = 0.95* VDDQ	0.4	1.25	$R_{ZQ}/7$	

9.3.2 Output Driver Characteristic of Connectivity Test (CT) Mode

Following Output driver impedance RON will be applied to the Test Output Pin during Connectivity Test (CT) Mode.
The individual pull-up and pull-down resistors (RONPu_CT and RONPd_CT) are defined as follows:

$$RON_{Pu_CT} = \frac{V_{DDQ}-V_{OUT}}{|\ Iout\ |}$$

$$RON_{Pd_CT} = \frac{V_{OUT}}{|\ Iout\ |}$$

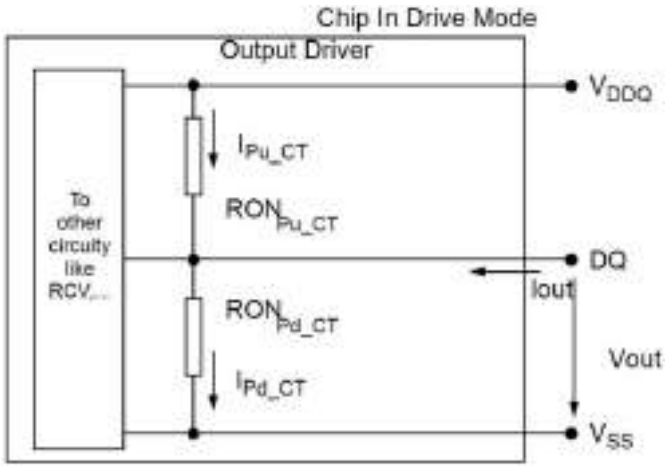

Figure 38. Output Driver

RONNOM_CT	Resistor	Vout	Max	Units	NOTE
34Ω	RONPd_CT	VOBdc = 0.2 x VDDQ	1.9	$R_{ZQ}/7$	1,2
		VOLdc = 0.5 x VDDQ	2.0	$R_{ZQ}/7$	1,2
		VOMdc = 0.8 x VDDQ	2.2	$R_{ZQ}/7$	1,2
		VOHdc = 0.95 x VDDQ	2.5	$R_{ZQ}/7$	1,2
	RONPu_CT	VOBdc = 0.2 x VDDQ	1.9	$R_{ZQ}/7$	1,2
		VOLdc = 0.5 x VDDQ	2.0	$R_{ZQ}/7$	1,2
		VOMdc = 0.8 x VDDQ	2.2	$R_{ZQ}/7$	1,2
		VOHdc = 0.95 x VDDQ	2.5	$R_{ZQ}/7$	1,2

NOTE:
1) Connectivity test mode uses un-calibrated drivers, showing the full range over PVT. No mismatch between pull up and pull down is defined 2) Uncalibrated drive strength tolerance is specified at +/- 30%

9.4 Single-ended Output Levels - VOL/VOH

[Table 39] Single-ended Output levels

Symbol	Parameter	DDR5-4400 to 5600	Units	Notes
V_{OH}	Output high measurement level (for output SR)	0.75 x V_{pk-pk}	V	1
V_{OL}	Output low measurement level (for output SR)	0.25 x V_{pk-pk}	V	1

NOTE:

1) V_{pk-pk} is the mean high voltage minus the mean low voltage over 8UI samples

9.5 Single-Ended Output Levels - VOL/VOH for Loopback Signals

[Table 40] Single-ended Output levels for Loopback Signals

Symbol	Parameter	DDR5-4400 to 5600	Units	Notes
V_{OH}	Output high measurement level (for output SR)	0.75 x V_{pk-pk}	V	1
V_{OL}	Output low measurement level (for output SR)	0.25 x V_{pk-pk}	V	1

NOTE:
1) V_{pk-pk} is the mean high voltage minus the mean low voltage over 8UI samples

9.6 Single-ended Output Slew Rate

With the reference load for timing measurements, output slew rate for falling and rising edges is defined and measured between V_{OL} and V_{OH} for single ended signals as shown in Table 41 and Figure 39.

[Table 41] Single-ended output slew rate definition

Description	Measured		Defined by
	From	To	
Single ended output slew rate for rising edge	V_{OL}	V_{OH}	[V_{OH}-V_{OL}] / delta TRse
Single ended output slew rate for falling edge	V_{OH}	V_{OL}	[V_{OH}-V_{OL}] / delta TFse

NOTE:
1) Output slew rate is verified by design and characterization, and may not be subject to production test

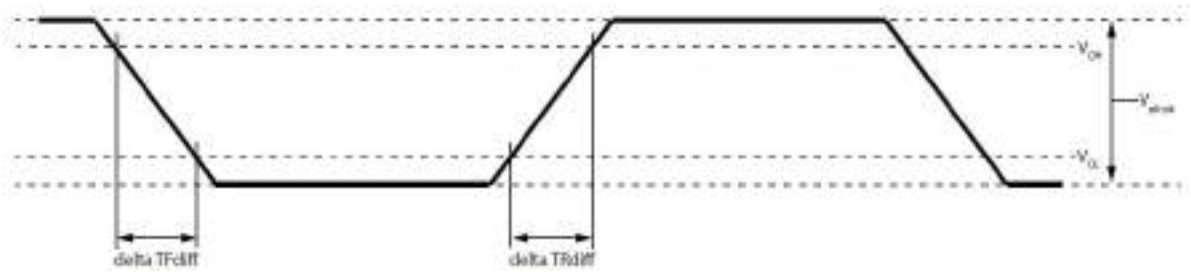

Figure 39. Single-ended Output Slew Rate Definition

[Table 42] Single-ended Output Slew Rate

Speed		DDR5-4400		DDR5-4800		DDR5-5200		DDR5-5600		Units	Notes
Parameter	Symbol	MIN	MAX	MIN	MAX	MIN	MAX	MIN	MAX		
Single ended output slew rate	SRQse	8	24	8	24	12	24	12	24	V/ns

9.7 Differential Output Levels

[Table 43] Differential Output levels

Symbol	Parameter	DDR5-4400 to 5600	Units	Notes
V_{OHdiff}	Differential output high measurement level (for output SR)	0.75 x $V_{diffpk-pk}$	V	1
V_{OLdiff}	Differential output low measurement level (for output SR)	0.25 x $V_{diffpk-pk}$	V	1

NOTE:

1) $V_{diffpk-pk}$is the mean high voltage minus the mean low voltage over 8UI samples

9.8 Differential Output Slew Rate

With the reference load for timing measurements, output slew rate for falling and rising edges is defined and measured between V_{OLdiff} and V_{OHdiff} for differential signals as shown in Table 44 and Figure 40.

[Table 44] Differential output slew rate definition

Description	Measured		Defined by
	From	To	
Differential output slew rate for rising edge	V_{OLdiff}	V_{OHdiff}	[V_{OHdiff}-V_{OLdiff}] / delta TRdiff
Differential output slew rate for falling edge	V_{OHdiff}	V_{OLdiff}	[V_{OHdiff}-V_{OLdiff}] / delta TFdiff

NOTE:

1) Output slew rate is verified by design and characterization, and may not be subject to production test

NOTE:

1) On-die noise similar to that occurring with all the transmitter and receiver lanes toggling need to be stimulated. When there is no socket in transmitter measurement setup, in many cases, the contribution of the cross-talk is not significant or can be estimated within tolerable error even with all thetransmitter lanes sending patterns. When a socket is present, such as DUT being DRAM component, the contribution of the cross-talk could be significant. To minimize the impact of crosstalk on the measurement results, a small group of selected lanes in the vicinity of the lane under test may be turned off (sending DC), while the remaining TX lanes send patterns to the corresponding RX receivers so as to excite realistic on-die noise profile from device switching. Note that there may be cases when one of Dj and Rj specs is met and another violated in which case the signaling analysis should be run to determine link feasibility
2) On-die noise similar to that occurring with all the transmitter and receiver lanes toggling need to be stimulated. When there is no socket in transmitter measurement setup, in many cases the contribution of BUJ is not significant or can be estimated within tolerable error even with all the transmitter

Identificação interna do documento: I2SE6K90B9-TDFBBC1

lanes sending patterns. When a socket is present, such as DUT being DRAM component, the contribution of the cross-talk could be significant. To minimize the impact of crosstalk on the measurement results, a small group of selected lanes in the vicinity of the lane under test may be turned off (sending DC), while the remaining TX lanes send patterns to the corresponding RX receivers, so as to excite realistic on-die noise profile from device switching. Note that there may be cases when one of Dj and Rj specs is met and another violated in which case the signaling analysis should be run to determine link feasibility

3) The validation methodology for these parameters will be covered in future ballots
4) Rj RMS value of 1-UI jitter. Without BUJ, but on-die system like noise present. This extraction is to be done after software correction of DCD
5) See Chapter 12 for details on the minimum BER requirements
6) See Chapter 12 for details on UI, NUI and Jitter definitions
7) Duty Cycle of the DQ pins must be adjusted as close to 50% as possible using the Global and Per Pin Duty Cycle Adjuster feature prior to running the Tx DQ Jitter test
8) The Mode Registers for the Duty Cycle Adjuster are MR43 and MR44, and the Mode Registers for the Per Pin DCA of DQS are MR103 - MR110
9) Spread Spectrum Clocking (SSC) must be disabled while running the Tx DQ Jitter test
10) These parameters are tested using the continuous clock pattern which are sent out from the dram device without the need for sending out continuous MRR commands. The MR25 OP[3] is set to “1” to enable this feature
11) Tested on the CTC2 card only
12) The max value of tTx_DQS_Rj_1UI_NoBUJ and tTx_DQS_Rj_NUI_NoBUJ can be 6mUI RMS

9.10 Tx DQ Jitter

9.10.1 Overview

The Random Jitter (Rj) specified is a random jitter meeting a Gaussian distribution. The Deterministic Jitter (Dj) specified is bounded. The DDR5 device output jitter must not exceed maximum values specified in Table 47.

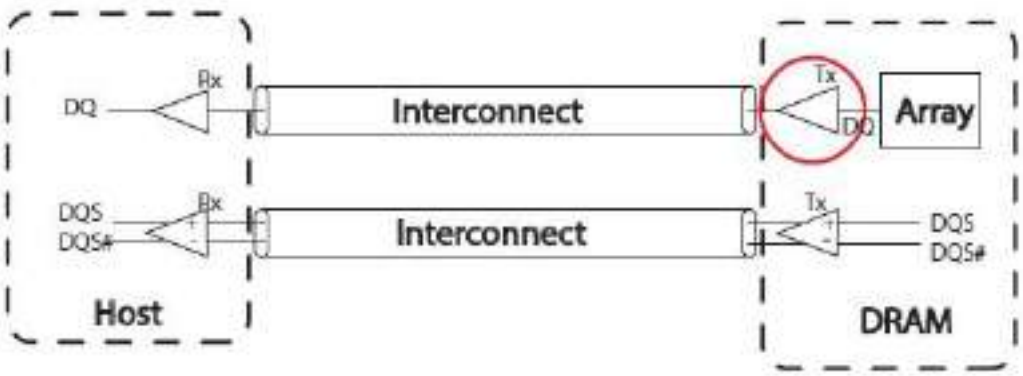

Figure 42. Tx DQ Jitter

9.11 Tx DQ Stressed Eye

Tx DQ stressed eye height and eye width must meet minimum specification values at BER=E^{-9} and confidence level 99.5%. Tx DQ Stressed Eye shows the DQS to DQ skew for both Eye Width and Eye Height. In order to support different Host Receiver (Rx) designs, it is the responsibility of the Host to insure the advanced DQS edges are adjusted accordingly via the Read DQS Offset Timing mode register settings (MR40 OP[3:0]).

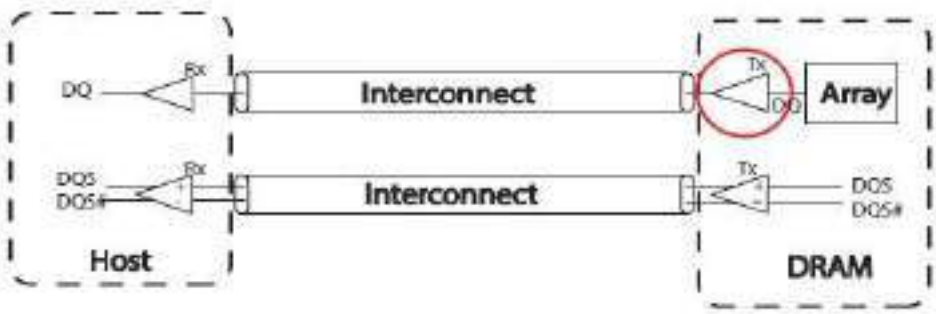

Figure 43. Example of DDR5 Memory Interconnect

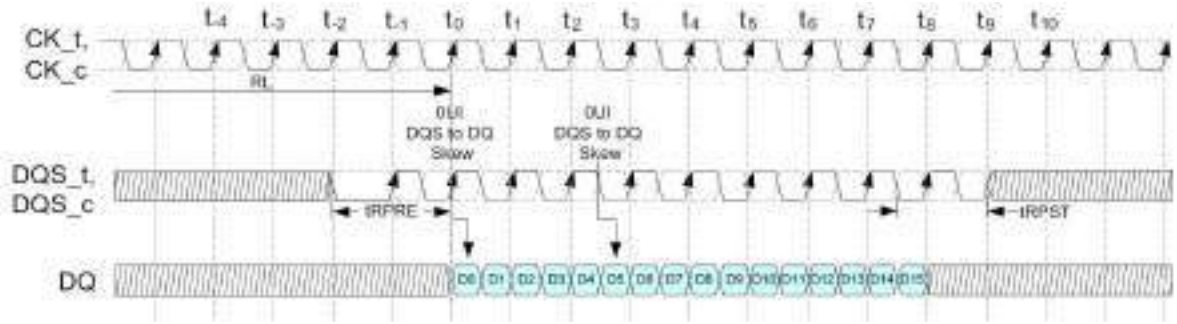

Figure 44. Read burst example for pin DQx depicting bit 0 and 5 relative to the DQS edge for 0 UI skew

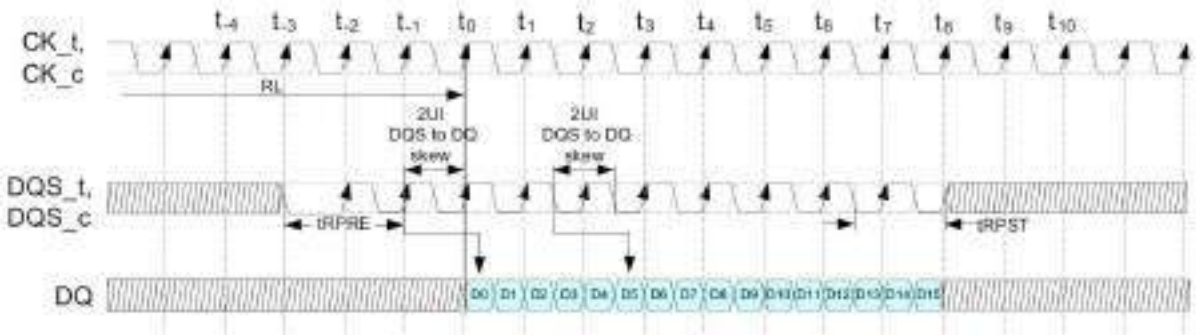

Figure 45. Read burst example for pin DQx depicting bit 0 and 5 relative to the DQS edge for 2 UI skew with Read DQS Offset Timing set to 1 Clock (2UI)

9.11.1 Tx DQ Stressed Eye Parameters

[Table 48] Tx DQ Stressed Eye Parameters

[EH=Eye Height, EW=Eye Width; BER=Bit Error Rate, SES=Stressed Eye Skew]

Parameter	Symbol	DDR5-4400		DDR5-4800		DDR5-5200		DDR5-5600		Unit	Notes
		Min	Max	Min	Max	Min	Max	Min	Max		
Eye Width specified at the transmitter with a skew between DQ and DQS of 1UI	TxEW_DQ_SES_1UI	0.72	-	0.72	-	0.74	-	0.74	-	UI	1,2,3,4,6,7, 8,9,10
Eye Width specified at the transmitter with a skew between DQ and DQS of 2UI	TxEW_DQ_SES_2UI	0.72	-	0.72	-	0.74	-	0.74	-	UI	1,2,3,4,6,7, 8,9,10
Eye Width specified at the transmitter with a skew between DQ and DQS of 3UI	TxEW_DQ_SES_3UI	0.72	-	0.72	-	0.74	-	0.74	-	UI	1,2,3,4,6,7, 8,9,10
Eye Width specified at the transmitter with a skew between DQ and DQS of 4UI	TxEW_DQ_SES_4UI	-	-	-	-	0.74	-	0.74	-	UI	1,2,3,4,6,7, 8,9,10

NOTE:

1) Minimum BER E-9 and Confidence Level of 99.5% per pin
2) Refer to the minimum Bit Error Rate (BER) requirements for DDR5
3) The validation methodology for these parameters is TBD
4) Mismatch is defined as DQS to DQ mismatch, in UI increments
5) The number of UI's accumulated will depend on the speed of the link. For higher speeds, higher UI accumulation may be specified. For lower speeds, N=4,5 UI may not be applicable
6) Duty Cycle of the DQ pins must be adjusted as close to 50% as possible using the Global and Per Pin Duty Cycle Adjuster feature prior to running this test
7) The Mode Registers for the Duty Cycle Adjuster are MR43 and MR44. Also the Mode Registers for the Per Pin DCA of DQS are MR103-MR110, the Mode Registers for the Per Pin DCA of DQLx are MR(133+8x) and MR(134+8x), where 0≤x≤7, and the Mode Registers for the Per Pin DCA of DQUy are MR(197+8y) and MR(198+8y), where 0≤y≤7.
8) Spread Spectrum Clocking (SSC) must be disabled while running this test
9) These parameters are tested using the continuous PRBS8 LFSR training pattern which are sent out on all DQ lanes off the dram device without the need for sending out continuous MRR commands. The MR25 OP[3] is set to "1" to enable this feature.
10) Tested on the CTC2 card only
11) Matched DQS to DQ would require the DQs to be adjusted by 0.5UI to place it in the center of the DQ eye. 1UI mismatch would require the DQS to be adjusted 1.5UI. Generally, for XUI mismatch the DQ must be adjusted XUI + 0.5UI to be placed in the center of the eye

NOTE:

1) Minimum timing parameters are defined according to the rules in the Rounding Definitions and Algorithms section.
2) The translation of all timing parameters from ns values to nCK values shall follow the Rounding Algorithm. The translation of tAA to CL shall follow the explicit combinations listed in the Speed Bin Tables.
3) The CL setting and CWL setting result in tCK(avg).MIN and tCK(avg).MAX requirements. When selecting tCK(avg), requirements from the CL setting as well as requirements from the CWL setting shall be fulfilled.
4) 'Reserved' settings are not allowed. The user shall program a different value.
5. This column shows the intended native speed bin timings to be replaced and supported when down clocking. This column does not necessarily show the actual minimum speed bin timings allowed and supported when down clocking because the timings could be faster according to the Rounding Algorithm, depending on the specific speed bin and down clock frequency combination.
6) DDR5-3200 AC timings apply if the DRAM operates slower than the 2933 MT/s data rate. This is not limited to only the Speed Bin Table timings.
7) Parameters apply from tCK(avg)min to tCK(avg)max.
8) tRC(min) shall always be greater than or equal to tRAS(min) + tRP(min), and when using the appropriate rounding algorithms, nRC(min) shall always be greater than or equal to nRAS(min) + nRP(min).
9) tCK(avg).max of 1.010 ns (1980 MT/s data rate) is defined to allow for 1% SSC down-spreading at a data rate of 2000 MT/s according to JESD404-1.
10) Each speed bin lists the timing requirements that need to be supported in order for a given DRAM to be JEDEC standard. The JEDEC standard does not require support for all speed bins within a given speed. The JEDEC standard requires meeting the parameters for a least one of the listed speed bins.
11) Any speed bin also supports functional operation at slower frequencies as shown in the table which are not subject to Production Tests but are verified by Design/Character -ization.
12) The CL Algorithm can be used to mathematically determine the valid CAS Latencies listed in the Speed Bin Tables. The CL Algorithm calculates supported CAS Latencies by rounding the operating frequency up to the next faster native speed bin (i.e., 3200 MT/s, 3600 MT/s...). Using the resulting tCK(AVG)min, and the bin target timings, the CL Algorithm then uses the Rounding Algorithm to calculate the valid CAS Latency. Because the DDR5 SDRAM specification only supports even CAS Latencies, odd CAS Latencies are rounded up to the next even CAS Latency. The 1980-2100 MT/s data rate always uses CL22. If tAA(corrected) or tRCDtRP(corrected) are violated, the CL Algorithm uses a slower combination of tAA(target) and tRCDtRP(target) to return slower valid CAS Latencies. The DDR5 SDRAM can support up to four valid CAS Latencies, CL(AN), CL(B), CL(BN), and CL(C), for a given frequency. tAA(corrected) and tRCDtRP(corrected) are calculated by reducing tAA(min), tRCD(min), and tRP(min) by the Rounding Algorithm correction factor. The proper setting of CL shall be determined by the memory controller, either by using the Speed Bin Tables, or by using the CL Algorithm, or by some other means. Refer to the Rounding Definitions and Algorithm section for more information.

11.0 IDD,IDDQ,IPPSPECIFICATION PARAMETERS AND TEST CONDITIONS

11.1 IDD, IPP and IDDQ Measurement Conditions

In this chapter, IDD, IPP and IDDQ measurement conditions such as test load and patterns are defined. Figure 46 shows the setup and test load for IDD, IPP and IDDQ measurements.

- IDD currents (such as IDD0, IDDQ0, IPP0, IDD0F, IDDQ0F, IPP0F, IDD2N, IDDQ2N, IPP2N, IDD2NT, IDDQ2NT, IPP2NT, IDD2P, IDDQ2P, IPP2P, IDD3N, IDDQ3N, IPP3N, IDD3P, IDDQ3P, IPP3P, IDD4R, IDDQ4R, IPP4R, IDD4RC, IDD4W, IDDQ4W, IPP4W, IDD4WC, IDD5F, IDDQ5F, IPP5F, IDD5B, IDDQ5B, IPP5B, IDD5C, IDDQ5C, IPP5C, IDD6N, IDDQ6N, IPP6N, IDD6E, IDDQ6E, IPP6E, IDD7, IDDQ7, IPP7, and IDD8, IDDQ8, IPP8) are measured as time-averaged currents with all VDD balls of the DDR5 SDRAM under test tied together. Any IDDQ or IPP current is not included in IDD currents.
- IDDQ currents are measured as time-averaged currents with all VDDQ balls of the DDR5 SDRAM under test tied together. Any IDD or IPP current is not included in IDDQ currents.
- IPP currents are measured as time-averaged currents with all VPP balls of the DDR5 SDRAM under test tied together. Any IDD or IDDQ current is not included in IPP currents.

Attention: IDDQ values cannot be directly used to calculate IO power of the DDR5 SDRAM. They can be used to support correlation of simulated IO power to actual IO power as outlined in Figure 47.

For IDD, IPP and IDDQ measurements, the following definitions apply:

- “0” and “LOW” is defined as VIN <= VILAC(max).
- “1” and “HIGH” is defined as VIN >= VIHAC(min).
- “MID-LEVEL” is defined as inputs are VREF = 0.75 * VDDQ.
- Detailed IDD, IPP and IDDQ Measurement-Loop Patterns are described in Table 51 through Table 60.
- IDD Measurements are done after properly initializing and training the DDR5 SDRAM. This includes but is not limited to setting

RON = RZQ/7 (34 Ohm in MR5);
RTT_NOM = RZQ/6 (40 Ohm in MR35);
RTT_WR = RZQ/2 (120 Ohm in MR34), only during IDD4 & IDD7 measurements, RTT_OFF for all other IDD measurements
RTT_PARK = Disable in MR33 and MR34;
Qoff = 0B (Output Buffer enabled) in MR5;
TDQS_t disabled in MR5;
CRC disabled in MR50;
DM disabled in MR5;
1N mode enabled and set CS assertion duration (MR2:OP[4]) as 1B in MR2, unless otherwise specified in the IDD, IDDQ and IPP patterns’ conditions definitions;

- Attention: The IDD, IPP and IDDQ Measurement-Loop Patterns need to be executed at least one time before actual IDD, IDDQ or IPP measurement is started.
- TCASE defined as 0 - 95°C, unless stated in the specific condition definition table below.
- For all IDD, IDDQ and IPP measurement loop timing parameters, refer to the timing parameters defined in the spec to calculate the nCK required.

[Table 53] Basic IDD, IDDQ and IPP Measurement Conditions

Symbol	Description
IDD0	Operating One Bank Active-Precharge Current External clock: On; tCK, nRC, nRAS, nRP, nRRD: refer to Chapter 13.3 Timing Parameters by Speed Grade; BL: 16[1]; CS_n: High between ACT and PRE; CA Inputs: partially toggling according to Table 54. Data IO: VDDQ; DM_n: stable at 1; Bank Activity: Cycling with one bank active at a time: 0,0,1,1,2,2,... (see Table 54); Output Buffer and RTT: Enabled in Mode Registers[2]; Pattern Details: see Table 54
IDD0Q	Operating One Bank Active-Precharge IDDQ Current Same condition with IDD0, however measuring IDDQ current instead of IDD current
IPP0	Operating One Bank Active-Precharge IPP Current Same condition with IDD0, however measuring IPP current instead of IDD current
IDD0F	Operating Four Bank Active-Precharge Current External clock: On; tCK, nRC, nRAS, nRP, nRRD: refer to Chapter 13.3 Timing Parameters by Speed Grade; BL: 16[1]; CS_n: High between ACT and PRE; CA Inputs: partially toggling according to Table 55; Data IO: VDDQ; DM_n: stable at 1; Bank Activity: Cycling with four bank active at a time: (see Table 55); Output Buffer and RTT: Enabled in Mode Registers[2]; Pattern Details: see Table 55
IDD0QF	Operating Four Bank Active-Precharge IDDQ Current Same condition with IDD0F, however measuring IDDQ current instead of IDD current
IPP0F	Operating Four Bank Active-Precharge IPP Current Same condition with IDD0F, however measuring IPP current instead of IDD current
IDD2N	Precharge Standby Current External clock: On; tCK: refer to Chapter 13.3 Timing Parameters by Speed Grade; CS_n: stable at 1; CA Inputs: partially toggling according to Table 56; Data IO: VDDQ; DM_n: stable at 1; Bank Activity: all banks closed; Output Buffer and RTT: Enabled in Mode Registers[2]; Pattern Details: see Table 56
IDD2Q2N	Precharge Standby IDDQ Current Same condition with IDD2N, however measuring IDDQ current instead of IDD current
IPP2N	Precharge Standby IPP Current Same condition with IDD2N, however measuring IPP current instead of IDD current
IDD2NT	Precharge Standby Non-Target Command Current External clock: On; tCK: refer to Chapter 13.3 Timing Parameters by Speed Grade; BL: 16[1]; CS_n: High between WRITE commands; CS_n, CA Inputs: partially toggling according to Table 57; Data IO: VDDQ; DM_n: stable at 1; Bank Activity: all banks closed; Output Buffer and RTT: Enabled in Mode Registers[2]; Pattern Details: see Table 57
IDDQ2NT (Optional)	Precharge Standby Non-Target Command IDDQ Current Same condition with IDD2NT, however measuring IDDQ current instead of IDD current

[Table 53] Basic IDD, IDDQ and IPP Measurement Conditions

Symbol	Description
IPP2NT (Optional)	Precharge Standby Non-Target Command IPP Current Same condition with IDD2NT, however measuring IPP current instead of IDD current
IDD2P	Precharge Power-Down Device in Precharge Power-Down, External clock: On; tCK: refer to Chapter 13.3 Timing Parameters by Speed Grade; CS_n: stable at 1 after Power Down Entry command; CA Inputs: stable at 1; CA11=H during the PDE command; Data IO: VDDQ; DM_n: stable at 1; Bank Activity: all banks closed; Output Buffer and RTT: Enabled in Mode Registers[2];
IDDQ2P	Precharge Power-Down Same condition with IDD2P, however measuring IDDQ current instead of IDD current
IPP2P	Precharge Power-Down Same condition with IDD2P, however measuring IPP current instead of IDD current
IDD3N	Active Standby Current E xternal clock: On; tCK: refer to Chapter 13.3 Timing Parameters by Speed Grade; CS_n: stable at 1; CA Inputs: partially toggling according to Table 56; Data IO: VDDQ; DM_n: stable at 1; Bank Activity: all banks open; Output Buffer and RTT: Enabled in Mode Registers[2]; Pattern Details: see Table 56
IDDQ3N	Active Standby IDDQ Current Same condition with IDD3N, however measuring IDDQ current instead of IDD current
IPP3N	Active Standby IPP Current Same condition with IDD3N, however measuring IPP current instead of IDD current
IDD3P	Active Power-Down Current Device in Active Power-Down, External clock: On; tCK: refer to Chapter 13.3 Timing Parameters by Speed Grade; CS_n: stable at 1 after Power Down Entry command; CA Inputs: stable at 1; CA11=H during the PDE command; Data IO: VDDQ; DM_n: stable at 1; Bank Activity: all banks open; Output Buffer and RTT: Enabled in Mode Registers[2];
IDDQ3P	Active Power-Down IDDQ Current Same condition with IDD3P, however measuring IDDQ current instead of IDD current
IPP3P	Active Power-Down IPP Current Same condition with IDD3P, however measuring IPP current instead of IDD current
IDD4R	Operating Burst Read Current External clock: On; tCK, nCCD_S, CL: refer to Chapter 13.3 Timing Parameters by Speed Grade; BL: 16[1]; CS_n: High between RD; CA Inputs: partially toggling according to Table 56; Data IO: seamless read data burst with different data between one burst and the next one according to Table 58; DM_n: stable at 1; Bank Activity: all banks open, RD commands cycling through banks: 0,0,1,1,2,2,... (see Table 58); Output Buffer and RTT: Enabled in Mode Registers[2]; Pattern Details: see Table 58
IDD4RC	Operating Burst Read Current with Read CRC Read CRC enabled[4]. Other conditions: see IDD4R
IDDQ4R	Operating Burst Read IDDQ Current Same definition like for IDD4R, however measuring IDDQ current instead of IDD current
IPP4R	Operating Burst Read IPP Current Same condition with IDD4R, however measuring IPP current instead of IDD current
IDD4W	Operating Burst Write Current External clock: On; tCK, nCCD_S_WR, CL: refer to Chapter 13.3 Timing Parameters by Speed Grade; BL: 16[1]; CS_n: High between WR; CA Inputs: partially toggling according to Table 59; Data IO: seamless write data burst with different data between one burst and the next one according to Table 59; DM_n: stable at 1; Bank Activity: all banks open, WR commands cycling through banks: 0,0,1,1,2,2,... (see Table 59); Output Buffer and RTT: Enabled in Mode Registers[2]; Pattern Details: see Table 59
IDD4WC	Operating Burst Write Current with Write CRC Write CRC enabled[3], Other conditions: see IDD4W
IDDQ4W	Operating Burst Write IDDQ Current Same condition with IDD4W, however measuring IDDQ current instead of IDD current
IPP4W	Operating Burst Write IPP Current Same condition with IDD4W, however measuring IPP current instead of IDD current

Symbol	Description
IDD5B	Burst Refresh Current (Normal Refresh Mode) External clock: On; tCK, nRFC1: refer to Chapter 13.3 Timing Parameters by Speed Grade; BL: 16[1]; CS_n: High between REF; CA Inputs: partially toggling according to Table 60; Data IO: VDDQ; DM_n: stable at 1; Bank Activity: REF command every nRFC1 (see Table 60); Output Buffer and RTT: Enabled in Mode Registers[2]; Pattern Details: see Table 60
IDDQ5B	Burst Refresh IDDQ Current (Normal Refresh Mode) Same condition with IDD5B, however measuring IDDQ current instead of IDD current
IPP5B	Burst Refresh IPP Current (Normal Refresh Mode) Same condition with IDD5B, however measuring IPP current instead of IDD current

[Table 53] Basic IDD, IDDQ and IPP Measurement Conditions

Symbol	Description
IDD5F	Burst Refresh Current (Fine Granularity Refresh Mode) tRFC=tRFC2, Other conditions: see IDD5B
IDDQ5F	Burst Refresh IDDQ Current (Fine Granularity Refresh Mode) Same condition with IDD5F, however measuring IDDQ current instead of IDD current
IPP5F	Burst Refresh IPP Current (Fine Granularity Refresh Mode) Same condition with IDD5F, however measuring IPP current instead of IDD current
IDD5C	Burst Refresh Current (Same Bank Refresh Mode) External clock: On; tCK, nRFCsb: refer to Chapter 13.3 Timing Parameters by Speed Grade; BL: 16[1]; CS_n: High between REF; CA Inputs: partially toggling according to Table 61; Data IO: VDDQ; DM_n: stable at 1; Bank Activity: REF command every nRFCsb (see Table 61); Output Buffer and RTT: Enabled in Mode Registers[2]; Pattern Details: see Table 61
IDDQ5C	Burst Refresh IDDQPP Current (Same Bank Refresh Mode) Same condition with IDD5C, however measuring IDDQ current instead of IDD current
IPP5C	Burst Refresh IPP Current (Same Bank Refresh Mode) Same condition with IDD5C, however measuring IPP current instead of IDD current
IDD6N	Self Refresh Current: Normal Temperature Range TCASE: 0 - 85°C; External clock: Off; CK_t and CK_c: HIGH; tCK, nCPDED: refer to Chapter 13.3 Timing Parameters by Speed Grade; BL: 16[1]; CS_n#: low; CA, Data IO: High; DM_n: stable at 1; Bank Activity: Self-Refresh operation; Output Buffer and RTT: Disabled by the DRAM upon entry into Self- Refresh
IDDQ6N	Self Refresh IDDQ Current: Normal Temperature Range Same condition with IDD6N, however measuring IDDQ current instead of IDD current
IPP6N	Self Refresh IPP Current: Normal Temperature Range Same condition with IDD6N, however measuring IPP current instead of IDD current
IDD6E	Self Refresh Current: Extended Temperature Range) TCASE: 85 - 95°C; Extended4; External clock: Off; CK_t and CK_c: HIGH; tCK, nCPDED: refer to Chapter 13.3 Timing Parameters by Speed Grade; BL: 16[1]; CS_n: low; CA, Data IO: High; DM_n:stable at 1; Bank Activity: Self-Refresh operation; Output Buffer and RTT: Disabled by the DRAM upon entry into Self-Refresh
IDDQ6E	Self Refresh IDDQ Current: Extended Temperature Range Same condition with IDD6E, however measuring IDDQ current instead of IDD current
IPP6E	Self Refresh IPP Current: Extended Temperature Range Same condition with IDD6E, however measuring IPP current instead of IDD current

Proposta de Preço ITEM 3 - Memória Tecnologia (1562786) SEI 2025.001317 / pg. 726

11.2 IDD0, IDDQ0, IPP0 Pattern

Executes Active and PreCharge commands with tightest timing possible while exercising all Bank and Bank Group addresses. Note 2 applies to the entire table.

[Table 54] IDD0, IDDQ0, IPP0

Sub-Loop	Sequence	Command	CS_n	C/A [13:0]	Row Address [17:0]	BA [1:0]	BG [2:0]	CID [2:0]	Special Instructions
0	0	ACT	L H	-	0x00000	0x0	0x00	0x0	
	1	DES	H	Toggling[1]					Repeat sequence to satisfy tRAS(min), truncate if required
	2	PREpb	L	-		0x0	0x00	0x0	
	3	DES	H	Toggling[1]					Repeat sequence to satisfy tPR(min), truncate if required
	4	ACT	L H	-	0x03FFF	0x0	0x00	0x0	
	5	DES	H	Toggling[1]					Repeat sequence to satisfy tRAS(min), truncate if required
	6	PREpb	L	-		0x0	0x00	0x0	
	7	DES	H	Toggling[1]					Repeat sequence to satisfy tPR(min), truncate if required
1	8-15	Repeat sub-loop 0, use BG[2:0]=0x1 instead							
2	16-23	Repeat sub-loop 0, use BG[2:0]=0x2 instead							
3	24-31	Repeat sub-loop 0, use BG[2:0]=0x3 instead							
4	32-39	Repeat sub-loop 0, use BG[2:0]=0x4 instead							skip for x16
5	40-47	Repeat sub-loop 0, use BG[2:0]=0x5 instead							skip for x16
6	48-55	Repeat sub-loop 0, use BG[2:0]=0x6 instead							skip for x16
7	56-63	Repeat sub-loop 0, use BG[2:0]=0x7 instead							skip for x16
8-15	64-127	Repeat sub loops 0-7, use BA[1:0]=0x1 instead							
16-23	128-191	Repeat sub loops 0-7, use BA[1:0]=0x2 instead							
24-31	192-255	Repeat sub loops 0-7, use BA[1:0]=0x3 instead							
...	...	Repeat sub loops 0-31 for each 3DS logical rank, if applicable							CID[2:0]=0x1-0x7

NOTE :
1) Utilize DESELECTs between commands while toggling all C/A bits per the 4-cycle sequence defined in the IDD2N, IDD3N pattern

Proposta de Preço ITEM 3 - Item 1 - 1 - 1 (1568786) SEI 2025.001317 / pg. 727

11.3 IDDOF, IDDQOF, IPPOF Pattern

Executes a rolling four bank group Active and PreCharge commands per tRC time while exercising all Bank, Bank, Group and CID addresses. Note 2 applies to the entire table.

[Table 55] IDDOF, IDDQOF, IPPOF

Sub-Loop	Sequence	Command	CS_n	C/A [13:0]	Row Address [17:0]	BA [1:0]	BG [2:0]	CID [2:0]	Special Instructions
0	0	ACT	L H		0x00000	0x0	0x00	0x0	
	1	DES	H	Toggling[1]					Repeat to satisfy tRRD(min) (6 DES to meet 8nCK)
	2	ACT	L H		0x00000	0x0	0x01	0x0	
	3	DES	H	Toggling[1]					Repeat to satisfy tRRD(min) (6 DES to meet 8nCK)
	4	ACT	L H		0x00000	0x0	0x02	0x0	
	5	DES	H	Toggling[1]					Repeat to satisfy tRRD(min) (6 DES to meet 8nCK)
	6	ACT	L H		0x00000	0x0	0x03	0x0	
	7	DES	H	Toggling[1]					Repeat to satisfy tRAS(min) from Sequence 0
	8	PREpb	L			0x0	0x00	0x0	
	9	DES	H	Toggling[1]					Repeat for tRRD(min) (7 DES to meet 8nCK) This allows for next PRE to meet tRAS(min)
	10	PREpb	L			0x0	0x01	0x0	
	11	DES	H	Toggling[1]					Repeat for tRRD(min) (7 DES to meet 8nCK) This allows for next PRE to meet tRAS(min)
	12	PREpb	L			0x0	0x02	0x0	
	13	DES	H	Toggling[1]					Repeat for tRRD(min) (7 DES to meet 8nCK) This allows for next PRE to meet tRAS(min)
	14	PREpb	L			0x0	0x03	0x0	
	15	DES	H	Toggling[1]					Repeat for tRRD(min) (7 DES to meet 8nCK) This allows for next PRE to meet tRAS(min)
	16	DES	H	Toggling[1]					Repeat for tRC(min) from Sequence 0 first ACTIVATE. This will be zero DESELECTS for speed 4000Mbps and slower.
1	17-33	Repeat sub-loop 0, use Row Address = 0x03FFF for the ACT instead							
2-3	34-67	Repeat sub-loop 0-1, use BG[2:0]=0x4,0x5,0x6,0x7 instead of 0x0,0x1,0x2,0x3							skip for x16
4-7	68-101	Repeat sub-loops 0-3, use BA[1:0]=0x1 instead							
8-11	102-135	Repeat sub-loops 0-3, use BA[1:0]=0x2 instead							
12-15	136-169	Repeat sub-loops 0-3, use BA[1:0]=0x3 instead							
...	...	Repeat sub loops 0-15 for each 3DS logical rank, if applicable							CID[2:0]=0x1-0x7

NOTE:

1) Utilize DESELECTs between commands while toggling C/A bits per the 4-cycle sequence defined in the IDD2N, IDD3N pattern.

Proposta de Preço ITEM 3 - Memória Tecnologia (1562786) SEI 2025.001317 / pg. 728
Identificação interna do documento: I2SE6K90B9-TDFBBC1

11.4 IDD2N, IDD3N Pattern

Executes DESELECT commands while exercising all command/address pins in a predefined pattern. All notes apply to entire table. **[Table 56] IDD2N, IDDQ2N, IPP2N, IDD3N, IDDQ3N, IPP3N**

Sequence	Command	CS	C/A [13:0]
0	DES	H	0x0000
1	DES	H	0x3FFF
2	DES	H	0x3FFF
3	DES	H	0x3FFF

NOTE:
1) Data is pulled to VDDQ
2) DQS_t and DQS_c are pulled to VDDQ
3) Command / Address ODT is disabled
4) Repeat sequence 0 through 3
5) All banks of all logical ranks mimic the same test condition

11.5 IDD2NT, IDDQ2NT, IPP2NT Pattern

Executes Non-Target WRITE commands simulating Rank to Rank timing while exercising all C/A bits. Notes 3-6 apply to entire table.

[Table 57] IDD2NT, IDDQ2NT, IPP2NT

Sequence	Command	CS_n	C/A [13:0]	Special Instructions
0	WRITE	L	0x002D	All valid C/A inputs to VSS
		L	0x0000	
1	DES	H	Toggling[2]	Repeat sequence to meet 1*tCCD_S(min), truncate if required
2	WRITE	L	0x3FED	All valid C/A inputs to VDDQ
		L	0x3FFF	
3	DES	H	Toggling[2]	Repeat sequence to meet 1*tCCD(min), truncate if required

NOTE:
1) WRITE with CS_n=L on both cycles indicated a non-target WRITE
2) Utilize DESELECTs between commands while toggling C/A bits per the 4-cycle sequence defined in the IDD2N, IDD3N pattern
3) Time between Non-Target WRITEs reflect tCCD_S (min) for one rank
4) DQ signals are VDDQ
5) DQS_t, DQS_c are VDDQ
6) Repeat 0 through 3

Identificação interna do documento: H2SE6K90B9-TDFBBQ1
Proposta de Preço ITEM 3 - Memória Secundária (1568786) - SEI 2025.001317 / pg. 729

11.6 IDD4R, IDDQ4R, IPP4R Pattern

Executes READ commands with tightest timing possible while exercising all Bank, Bank Group and CID addresses. Notes 2-9 apply to entire table **[Table 58] IDD4R, IDDQ4R, IPP4R**

Sub-Loop	Sequence	Command	CS_n	C/A [13:0]	Column Address [10:0]	BA [1:0]	BG [2:0]	CID [3:0]	Data Burst (BL=16)	Special Instructions
0	0	READ	L H	-	0x000	0x00	0x0	0x0	Pattern A	All "Valid" inputs = VDDQ
	1	DES	H	Toggling[1]	-					Repeat sequence to satisfy tCCD_S(min), truncate if required
1	2	READ	L H	-	0x3F0	0x00	0x1	0x0	Pattern B	All "Valid" inputs = VDDQ
	3	DES	H	Toggling[1]	-					Repeat sequence to satisfy tCCD_S(min), truncate if required
2	4-5	Repeat sub-loop 0, use BG[2:0]=0x2 instead								
3	6-7	Repeat sub-loop 1, use BG[2:0]=0x3 instead								
4	8-9	Repeat sub-loop 0, use BG[2:0]=0x4 instead								skip for x16
5	10-11	Repeat sub-loop 1, use BG[2:0]=0x5 instead								skip for x16
6	12-13	Repeat sub-loop 0, use BG[2:0]=0x6 instead								skip for x16
7	14-15	Repeat sub-loop 1, use BG[2:0]=0x7 instead								skip for x16
8	16	READ	L H	-	0x3F0	0x00	0x0	0x0	Pattern B	All "Valid" inputs = VDDQ
	17	DES	H	Toggling[1]						Repeat sequence to satisfy tCCD_S(min), truncate if required
9	18	READ	L H	-	0x000	0x00	0x1	0x0	Pattern A	All "Valid" inputs = VDDQ
	19	DES	H	Toggling[1]						Repeat sequence to satisfy tCCD_S(min), truncate if required
10	20-21	Repeat sub-loop 8, use BG[2:0]=0x2 instead								
11	22-23	Repeat sub-loop 9, use BG[2:0]=0x3 instead								
12	24-25	Repeat sub-loop 8, use BG[2:0]=0x4 instead								skip for x16
13	26-27	Repeat sub-loop 9, use BG[2:0]=0x5 instead								skip for x16
14	28-29	Repeat sub-loop 8, use BG[2:0]=0x6 instead								skip for x16
15	30-31	Repeat sub-loop 9, use BG[2:0]=0x7 instead								skip for x16
16-31	32-33	Repeat sub-loops 0-15, use BA[1:0]=0x1 instead								
32-47	34-35	Repeat sub-loops 0-15, use BA[1:0]=0x2 instead								
48-63	36-37	Repeat sub-loops 0-15, use BA[1:0]=0x3 instead								
...	...	Repeat sub-loops 0-63 for each 3DS logical rank, if applicable								CID[2:0]=0x1-0x7

NOTE:

1) Utilize DESELECTs between commands while toggling all C/A bits 100% each cycle (0x3FFF, 0x0000, 0x3FFF, 0x0000...) per the 4-cycle sequence defined in the IDD2N,
IDD3N pattern
2) READs performed with Auto Precharge = H, Burst Chop = H

Proposta de Preço ITEM 3 - Identificação interna do documento: H2SE6K90B9-TDFBBC1 SEI 2025.001317 / pg. 730

3) Row address is set to 0x0000
4) Data reflects burst length of 16
5) Data Pattern A for x4: 0x0, 0xF, 0xF, 0x0, 0x0, 0xF, 0x0, 0xF, 0xF, 0x0, 0x0, 0xF, 0x0, 0xF, 0x0, 0xF
6) Data Pattern B for x4: 0xF, 0x0, 0x0, 0xF, 0xF, 0x0, 0xF, 0x0, 0x0, 0xF, 0xF, 0x0, 0xF, 0x0, 0xF, 0x0
7) Data Pattern for x8 each beat will reflect two like nibbles (Data Pattern A = 0x00, 0xFF, 0xFF...)
8) Data Pattern for x16 each beat will reflect two like bytes (Data Pattern A = 0x0000, 0xFFFF, 0xFFFF...)
9) Where C/A column is not populated, refer to command truth table, column address, BA, BG, and CID for the C/A state

11.7 IDD4W, IDDQ4W, IPP4W Pattern

Executes WRITE commands with tightest timing possible while exercising all Bank, Bank Group and CDI CID addresses. Notes 2-6 apply to entire table.

[Table 59] IDD4W, IDDQ4W, IPP4W

Sub-Loop	Sequence	Command	CS_n	C/A [13:0]	Column Address [10:0]	BA [1:0]	BG [2:0]	CID [3:0]	Data Burst (BL=16)	Special Instructions
0	0	WRITE	L H	-	0x000	0x00	0x0	0x0	Pattern A	All “Valid” inputs = VDDQ
	1	DES	H	Toggling[1]	-					Repeat sequence to satisfy tCCD_S(min), truncate if required
1	2	WRITE	L H	-	0x3F0	0x00	0x1	0x0	Pattern B	All “Valid” inputs = VDDQ
	3	DES	H	Toggling[1]	-					Repeat sequence to satisfy tCCD_S(min), truncate if required
2	4-5	Repeat sub-loop 0, use BG[2:0]=0x2 instead								
3	6-7	Repeat sub-loop 1, use BG[2:0]=0x3 instead								
4	8-9	Repeat sub-loop 0, use BG[2:0]=0x4 instead								skip for x16
5	10-11	Repeat sub-loop 1, use BG[2:0]=0x5 i nstead								skip for x16
6	12-13	Repeat sub-loop 0, use BG[2:0]=0x6 instead								skip for x16
7	14-15	Repeat sub-loop 1, use BG[2:0]=0x7 instead								skip for x16
8	16	WRITE	L H	-	0x3F0	0x00	0x0	0x0	Pattern B	All “Valid” inputs = VDDQ
	17	DES	H	Toggling[1]	-					Repeat sequence to satisfy tCCD_S(min), truncate if required
9	18	WRITE	L H	-	0x000	0x00	0x1	0x0	Pattern A	All “Valid” inputs = VDDQ
	19	DES	H	Toggling[1]	-					Repeat sequence to satisfy tCCD_S(min), truncate if required
10	20-21	Repeat sub-loop 8, use BG[2:0]=0x2 instead								
11	22-23	Repeat sub-loop 9, use BG[2:0]=0x3 instead								
12	24-25	Repeat sub-loop 8, use BG[2:0]=0x4 instead								skip for x16
13	26-27	Repeat sub-loop 9, use BG[2:0]=0x5 instead								skip for x16
14	28-29	Repeat sub-loop 8, use BG[2:0]=0x6 instead								skip for x16
15	30-31	Repeat sub-loop 9, use BG[2:0]=0x7 instead								skip for x16
16-31	32-33	Repeat sub-loops 0-15, use BA[1:0]=0x1 instead								

Proposta de Preço ITEM 3 - Teatro de Tecnologia (1668786) SEI 2025.001317 / pg. 731
Identificação interna do documento: H2SE6K90B9-TDFBBC1

Sub-Loop	Sequence	Command	CS_n	C/A [13:0]	Column Address [10:0]	BA [1:0]	BG [2:0]	CID [3:0]	Data Burst (BL=16)	Special Instructions
32-47	34-35	Repeat sub-loops 0-15, use BA[1:0]=0x2 instead								
48-63	36-37	Repeat sub-loops 0-15, use BA[1:0]=0x3 instead								
...	...	Repeat sub-loops 0-63 for each 3DS logical rank, if applicable								CID[2:0]=0x1-0x7

NOTE:
1) Utilize DESELECTs between commands per the 4-cycle sequence defined in the IDD2N, IDD3N pattern
2) WRITEs performed with Auto Precharge = H, Burst Chop = TBD
3) Row address is set to 0x0000
4) Data reflects burst length of 16
5) Refer to IDD4R measurement loop table for data pattern definition
6) Where C/A column is not populated, refer to command truth table, column address, BA, BG, and CID for the C/A state

11.8 IDD5B, IDDQ5B, IPP5B, IDD5F, IDDQ5F, IPP5F Pattern

Executes Refresh (all Banks) command at minimum tRFC. Notes 3-6 apply to entire table.

[Table 60] IDD5B, IDD5B, IDDQ5B, IPP5B, IDD5F, IDDQ5F, IPP5F

Sub-Loop	Command	CS	C/A [13:0]	CA8	CID[2:0]	Special Instructions
0	REFab	L	-	H	0x0	All “valid” inputs = VDDQ
1	DES	H	Toggling[1]	-	-	Repeat sequence to satisfy tRFC(min), truncate if required
2	REFab	L	-	H	0x0	All “valid” inputs = VDDQ
3	DES	H	Toggling[1]	-	-	Repeat sequence to satisfy tRFC(min), truncate if required
...	Repeat sequence 0-3 for each 3DS logical rank, if applicable					CID[2:0]=0x1-0x7

NOTE:
1) Utilize DESELECTs between commands per the 4-cycle sequence defined in the IDD2N, IDD3N pattern
2) For IDD5B, use tRFC1(min). For IDD5F, use tRFC2(min)
3) DQ signals are VDDQ
4) All banks of all “non-target” logical ranks are Idd2N condition
5) Where C/A[13:0] column is not populated, refer to command truth table, CA8, and CID columns for the C/A state 6) Must set CA8=H on REFab commands to indicate 1X refresh rate on devices that support RIR

11.9 IDD5C, IDDQ5C and IPP5C Patterns

Executes Refresh (Same Bank) command at minimum tRFCsb. Notes 2-5 apply to entire table.

[Table 61] IDD5C, IDDQ5C, IPP5C

Sub-Loop	Command	CS	C/A [13:0]	CA8	BA[1:0]	CID[2:0]	Special Instructions
0	REFsb	L	-	H	0x0	0x0	
1	DES	H	Toggling[1]	-			Repeat sequence to satisfy tRFCsb(min), truncate if required
2	REFsb	L	-	H	0x1	0x0	
3	DES	H	Toggling[1]	-		-	Repeat sequence to satisfy tRFCsb(min), truncate if required
4	REFsb	L	-	H	0x2	0x0	

Proposta de Preço ITEM 3 - Anexo IV - TECNOLOGIA (1562786) SEI 2025.001317 / pg. 732
Identificação interna do documento: H2SE6K90B9-TDFBBC1

Sub-Loop	Command	CS	C/A [13:0]	CA8	BA[1:0]	CID[2:0]	Special Instructions
5	DES	H	Toggling[1]	-		-	Repeat sequence to satisfy tRFCsb(min), truncate if required
6	REFsb	L	-	H	0x3	0x0	
7	DES	H	Toggling[1]	-			Repeat sequence to satisfy tRFCsb(min), truncate if required
...	Repeat sequence 0-7 for each 3DS logical rank, if applicable						CID[2:0]=0x1-0x7

NOTE:
1) Utilize DESELECTs between commands per the 4-cycle sequence defined in the IDD2N, IDD3N pattern 2) DQ signals are VDDQ
3) All banks of all “non-target” logical ranks are Idd2N condition
4) Where C/A[13:0] column is not populated, refer to command truth table, CA8, and CID columns for the C/A state
5) All banks of all “non-target” logical ranks are Idd2N condition

11.10 IDD6N, IDDQ6N, IPP6N, IDD6E, IDDQ6E, IPP6E, IDD6R, IDDQ6R, IPP6R Pattern

All notes apply to entire table.

[Table 62] IDD6N, IDDQ6N, IPP6N, IDD6E, IDDQ6E, IPP6E, IDD6R, IDDQ6R, IPP6R

Sub-Loop	Command	Clock	CS	C/A[13:0]	Special Instructions
0	SRE	Valid	L	0x3BF7	Clocks must be valid tCKLCS(min) time
1	DES	Valid	H	0x3FFF	Repeat sequence to satisfy tCPDED(min), truncate if required
2	All C/A=H	Valid	L	0x3FFF	
3	All C/A=H	CK_t = CK_c = H	L	0x3FFF	Repeat sequence indefinitely

NOTE:
1) Data is pulled to VDDQ
2) DQS_t and DQS_c are pulled to VDDQ
3) ODT disabled in Mode Registers

Proposta de Preço ITEM 3 - Memória Eletrônica (1568786) SEI 2025.001317 / pg. 733

CZQ	Input capacitance of ZQ	-	5	-	5	pF	1,2,11
CSTRAP	Input capacitance of MIR, CAI, CA_ODT pins	-	10	-	10	pF	1,2,10

NOTE :

1) This parameter is not subject to production test. This parameter is measured by using vendor specific measurement methodology.
2) This parameter applies to monolithic devices only; stacked/dual-die devices are not covered here.
3) Absolute value CIO(CK_t)-CIO(CK_c).
4) Absolute value of CIO(DQS_t)-CIO(DQS_c).
5) CI applies to CS_n and CA[13:0].
6) CDI_CS_n = CI(CS_n)-0.5*(CI(CK_t)+CI(CK_c)). 7) CDI_CA = CI(CA[13:0])-0.5*(CI(CK_t)+CI(CK_c)).
8) CDIO = CIO(DQ,DM)-Avg(CIO(DQ,DM)).
9) TEN pin may be DRAM internally pulled low through a weak pull-down resistor to VSS. In this case CTEN might not be valid and system shall verify TEN signal with Vendor specific information.
10) MIR, CAI, and CA_ODT are strap pins used to configure module or point to point use cases depending on power, signal integrity, and termination requirements. No active AC signaling requirements defined for these pins.
11) Maximum external load capacitance on ZQ pin: 25pF. The ZQ functionality / accuracy with the max capacitive load is characterized.
12) CI Options are incorporated VcIVW in table 9 in Section 8.2.

14.0 tREFI and tRFC Parameters

The maximum average refresh interval (tREFI) requirement for the DDR5 SDRAM depends on the refresh mode setting (Normal or FGR), and the device's case temperature (Tcase). When the refresh mode is set to Normal Refresh mode, REFab commands are issued (tRFC1), and Tcase<=85°C, the maximum average refresh interval (tREFI1) is tREFI. When the refresh mode is set to FGR mode, REFab commands are issued (tRFC2) and Tcase<=85°C, the maximum average refresh interval (tREFI2) is tREFI/2. This same tREFI/2 interval value is also appropriate if the refresh mode is set to Normal Refresh mode and REFab commands are issued (tRFC1) but 85°C<Tcase<=95°C. Finally, if the refresh mode is set to FGR mode, REFab commands are issued (tRFC2), and 85°C<Tcase<=95°C, the maximum average refresh interval (tREFI2) is tREFI/4.

The DDR5 SDRAM includes an optional method for the host to indicate when Refresh commands are being issued at the 2x (tREFI2) refresh interval rate. The 2x Refresh Interval Rate indicator (MR4:OP[3]) alerts the DRAM if the host supports the refresh interval rate indication as part of the REF command using CA8. If enabled (MR4:OP[3]=1), the host will issue 1x REF commands with CA8=H (Tcase<=85°C), and the host will issue 2x REF commands with CA8=L (Tcase any allowable temperature). MR4:OP[3] is a Status Read/Write "SR/W" MR bit which shows DDR5 SDRAM support of this optional feature.
Reading MR4:OP[3] will return a "1" if the 2x Refresh Interval Rate indicator is supported. A "0" will be returned if not supported.
tREFI is based on the 8,192 refresh commands that need to be issued within the baseline tREF=32ms refresh period on the DDR5 SDRAM.

[Table 66] tREFI parameters for REFab and REFsb Commands

Command	Refresh Mode	Symbol & Range		Expression	Value	Unit	Notes
REFab	Normal	tREFI1	0°C <= TCASE <= 85°C	tREFI	3.9	us	
			85°C < TCASE <= 95°C	tREFI/2	1.95	us	
REFab	Fine Granularity	tREFI2	0°C <= TCASE <= 85°C	tREFI/2	1.95	us	
			85°C < TCASE <= 95°C	tREFI/4	0.975	us	
REFsb	Fine Granularity	tREFIsb	0°C <= TCASE <= 85°C	tREFI/(2*n)	1.95/n	us	1
			85°C < TCASE <= 95°C	tREFI/(4*n)	0.975/n	us	1

NOTE :
1) *n* is the number of banks in a bank group (e.g. 8G: n=2; 16G: n=4).

[Table 67] tRFC parameters by device density

Refresh Mode	Symbol	16Gb	Unit	Notes
Normal Refresh (REFab)	tRFC1(min)	295	ns

Read to Precharge command delay	tRTP	Max(12nCK, 7.5ns)	-	Max(12nCK, 7.5ns)	-	Max(12nCK, 7.5ns)		Max(12nCK, 7.5ns)	-	nCK,ns	
Precharge to Precharge command delay	tPPD	2	-	2	-	2		2	-	nCK	7
Write recovery time	tWR	30	-	30	-	30		30	-	ns	

NOTE:

1) tCK(avg)min listed for reference only, refer to the Speed Bins and Operations section which lists all valid tCK(avg) values.
2) tCCD_WTRA(min) shall always be greater than or equal to CWL + WBL/2 + tWR(min) - tRTP(min), and when using the appropri- ate rounding algorithms, nCCD_WTRA(min) shall always be greater than or equal to CWL + WBL/2 + nWR(min) - nRTP(min).
3) RBL: Read burst length associated with Read command.
RBL = 32 (36 w/ RCRC on) for fixed BL32 and BL32 in BL32 OTF mode RBL = 16 (18 w/ RCRC on) for fixed BL16 and BL16 in BL32 OTF mode RBL = 16 (18 w/ RCRC on) for BL16 in BC8 OTF mode and BC8 in BC8 OTF mode.
4) WBL: Write burst length associated with Write command

Proposta de Preço ITEM 3 - Identificação interna do documento: I2SE6K90B9-TDFBBC1 SEI 2025.001317 / pg. 740

WBL = 32 (36 w/ WCRC on) for fixed BL32 and BL32 in BL32 OTF mode.
WBL = 16 (18 w/ WCRC on) for BL16 in BC8 OTF mode and BC8 in BC8 OTF mode.
5) The following is considered for tRTW equation.
1tCK needs to be added due to tDQS2CK.
Read DQS offset timing can pull in the tRTW timing 1tCK needs to be added when 1.5tCK
postamble. 6) CWL=CL-2
7) This parameter only specifies minimum values (there is no maximum value). The maximum value cells have been merged in the table to improve legibility.

15.2 DDR5 Function Matrix

DDR5 SDRAM has several features supported by ORG and also by Speed. The following Table is the summary of the features.

[Table 69] Function Matrix (By ORG. V:Supported, Blank:Not supported)

Functions	x8	x16	NOTE

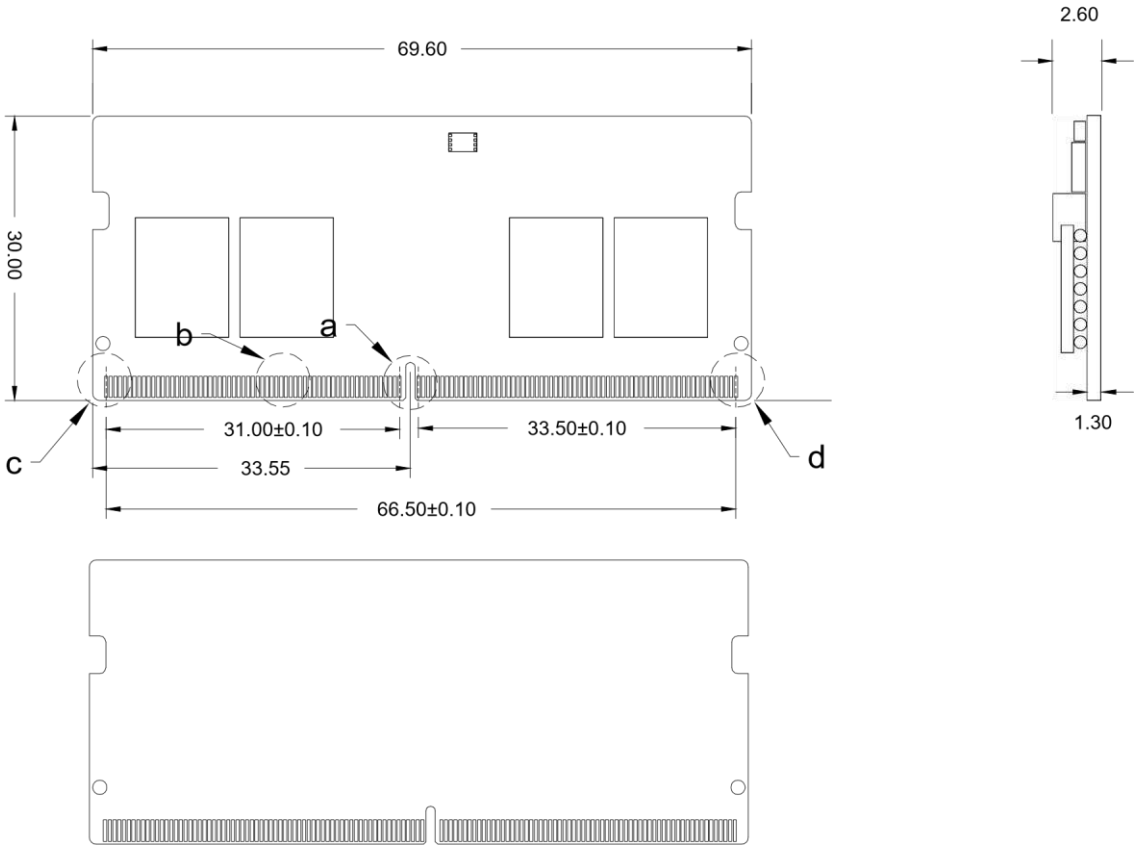
16.0 DDR5 MODULE RANK AND CHANNEL TIMINGS

16.1 Module Rank and Channel Limitations for DDR5 DIMMs

To achieve efficient module power supply design for JEDEC-standard DDR5 DIMMs, minimum timings as well as limitations in the number of DRAMs are provided for Refresh, and Write operations occurring on a single module. As well, since these modules are organized as two independent 36-bit or 40-bit channels (32 bits for non-ECC DIMMs), additional restrictions apply in order to limit localized power delivery noise on the module. To provide best performance, the different channels may initiate commands on the same cycle provided the rank to rank timings are met, the maximum number of DRAMs in a given activity is not exceeded, and the applicable component timings shown elsewhere in this specification are met. The timing and operational relationships for DDR5 DIMMs are shown in Table 68 below.

[Table 70] DDR5 Module Rank and Channel Timings for DDR5 DIMMs

DIMM Configuration	Maximum number of DRAM die in simultaneous or overlapping activity			
	Refresh (All-Bank Refresh)		Write, Write-Pattern	
	Die per Physical Rank	Die per DIMM	Die per Channel	Die per DIMM
SR x16	No restriction			
DR x16	No restriction		2	4
SR x8	No restriction			
DR x8	No restriction		5	10
SR x4	No restriction			
DR x4	No restriction		10	20
Notes	1, 2, 3, 4, 7, 8, 9		1, 5, 6, 7, 9	



NOTE:
1) Any combination of commands with up to the maximum of die per channel and per DIMM, per condition is allowed 2) Refresh commands to different channels do not require stagger
3) tRFC_dlr must be met for refresh commands to different logical ranks within a package rank on the same channel
4) Any DRAM is considered to be in Refresh mode until tRFC time has been met
5) tCCD parameters must be met for Write and Write-Pattern commands to different logical ranks or physical ranks within the same channel; no overlapping write data bus activity is allowed on two physical or logical ranks within the same channel
6) Write and Write-Pattern commands to different channels do not require stagger
7) Each rank consists of one group of DRAMs making up a 36 or 40 bit channel (32 bits for non-ECC DIMMs)
8) These restrictions only apply to explicit all-banks refresh commands (REFab) and not to self-refresh entry or exit
9) Restrictions apply to DIMMs built with JEDEC PMICXXXX, but may not apply to DIMMs built with higher current capacity PMICs

Essenciais

Coleção de produtos	Intel® Wi-Fi série 6E (Gig+)
Codinome	Produtos com denominação anterior Garfield Peak
Status	Launched
Data de introdução	Q3'21
Peso (em gramas)	2.83
Faixa de temperatura operacional	0 °C to 50 °C
Temperatura máxima de operação	50 °C
Temperatura mínima de operação	0 °C
Sistemas operacionais suportados	Windows 11, 64-bit*, Windows 10, 64-bit*, Linux*, Chrome OS*
Antena	2x2

Informações complementares

Descrição resumida do produto	Veja agora

Especificações de rede

Streams TX/RX	2x2
Bandas	2.4, 5, 6 GHz (160MHz)
Velocidade máxima	2.4 Gbps
Wi-Fi CERTIFICADO*	Wi-Fi 6E (802.11ax)
Conformidade	FIPS, FISMA
Bluetooth integrado	Sim
Versão do Bluetooth	5.3

Especificações de encapsulamento

Proposta de Preço ITEM 3 - POSITIVO TECNOLOGIA (1661786) SEI 2025.001317 / pg. 747

Fator de forma da placa	M.2 2230, M.2 1216
Tamanho do pacote	22mm x 30mm x 2.4mm, 12mm x 16mm x 1.65mm
Tipo de interface de sistema	M.2: CNVio2

Tecnologias avançadas

MU-MIMO	Sim
Acesso múltiplo por divisão de frequência ortogonal (OFDMA — Orthogonal Frequency-Division Multiple Access)	Sim
Compatível com a Tecnologia Intel® vPro™	Sim

POSITIVO ADAPTADOR CA PI-ADAP090-A(02)

Imagem meramente ilustrativa

MINI PC / NOTEBOOK / 90W

Modelo	PI-ADAP090-A(02)
Aplicação	Mini PC / Mini Pro / Notebook
Potência	90W
Tensão de entrada	Bivolt, 100-240V (+/- 10%), seleção automática
Frequência de entrada	50-60Hz (+/- 10%)
Tensão nominal de saída	19V
Corrente de saída	4,74A
PFC Ativo	Sim
Cabo de alimentação	3 pinos, NBR 14136
Tamanho do pino	DC-in
Cor	Preto
Dimensões (CxLxA)	127 x 50,4 x 30,4 mm

© 2025 Positivo Tecnologia - Apresentação oficial de produto dirigida ao mercado. Sujeito a alterações sem prévio aviso. REV. 02

POSITIVO MOUSE SM-6620

Versátil com resposta rápida e precisa, funciona sobre qualquer superfície

Ótico (LED) / 1.000 dpi / Ambidestro

Modelo	SM-6620
Tipo	Ótico (LED)
Interface	USB 2.0 Tipo A
Botões	3 botões incluindo botão de rolagem (wheel) Entrada P2 3.5 mm para acionadores externos (opcional)
Resolução	1.000 dpi
Força Operacional	Botões (esquerda/direita): 75+25 gf Botão whell: 180+50 gf
Configuração	Ambidestro com pegada Palm
Recursos	Plug and Play
Comprimento do cabo	1,8m
Dimensões	Largura de 65mm Comprimento de 117mm Altura de 36mm
Peso	90g
Cor	Preto
Compatibilidade	Windows XP, Vista, 7, 8/8.1, 10, 11 e Linux
Segurança	FCC, CE
Norma	Compatível com normativa RoHS
Fabricante	Positivo Tecnologia S/A

© 2021 Positivo Tecnologia -Apresentação oficial de produto dirigida ao mercado. Alterado em Junho de 2023. Sujeito a alterações sem prévio aviso. Rev. 12

POSITIVO MALETA TSS898

Maleta/Pasta Slim para Notebooks de até 15,6”

Produzida com um mix de materiais resistentes mantendo a leveza e a praticidade

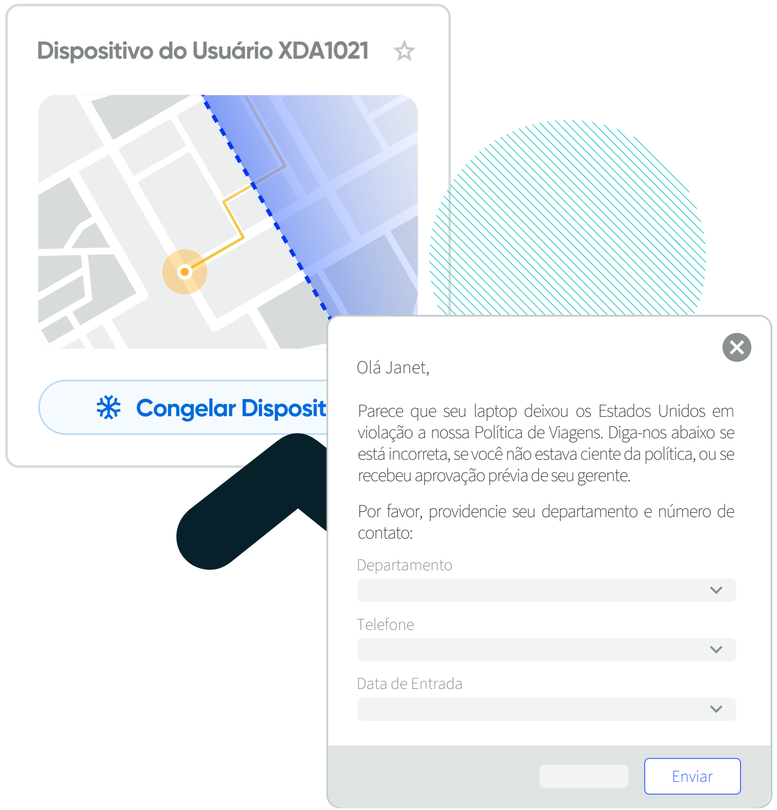
Descrição	Maleta/Pasta Slim para notebook, em poliester, com alça de ombro removível
Peso	0,450 kg
Medidas (LxAxP)	5,3 x 33 x 40 cm (aproximadamente)
Características	Compartimento acolchoado com zíper duplo e divisor de documentos Bolso frontal com zíper que armazena telefone, carregador e outros acessórios Alça de ombro ajustável e removível Alça traseira para acoplar malas de mão (Alça Carona) Alça de mão Design leve e slim Compatível com notebooks de até 15,6“ Material impermeável
Cor	Preto
Fabricante	Positivo Tecnologia S/A

© 2023 Positivo Tecnologia – Atualizado em Agosto de 2024. Sujeito a alterações sem prévio aviso. REV. 03

FOLHA DE DADOS

Absolute Control

Mantenha o controle de todos os seus dispositivos endpoint sempre, mesmo que sejam fora de sua rede corporativa.



A visibilidade dos dispositivos endpoint é importante. Entretanto, é ainda mais crucial salvaguardar seus dispositivos, aplicações e dados com base no que você aprendeu etando a verdade através de seus dispositivos endpoint. O controle de dispositivos endpoint é, portanto, o próximo passo lógico em sua estratégia de gerenciamento e segurança de dispositivos. Isto é especialmente verdade porque a maioria dos ataques começa nos dispositivos endpoint usados por indivíduos, não no firewall ou servidores. Os atacantes normalmente ganham controle desses pontos de entrada na rede através de técnicas como phishing; a partir daí, eles podem se mover lateralmente para obter acesso a seus servidores. De lá, eles podem se mover lateralmente para obter acesso a seus servidores.

É, portanto, crucial manter sempre o controle sobre todos os dispositivos endpoint para que os riscos possam ser remediados antes que se tornem incidentes.

absolute.com

ABSOLUTE®

Aproveite o Poder da Plataforma Absolute

É aí que a Absolute Control™ ajuda, pois combina todas as capacidades do **Absolute Visibility™** (por exemplo, relatórios sobre inventário de hardware/software, uso de dispositivos e aplicativos da Web, postura de segurança de dispositivos, status de aplicativos críticos, descoberta de dados de dispositivos endpoint e geolocalização) com funções críticas de controle, tais como limpeza remota de arquivos e apagamento de dados, congelamento de dispositivos sob demanda quando em risco, envio de mensagens ao usuário final, bem como cercos de proteção e alertas.

Você pode controlar todo seu conjunto de dispositivos a partir do console Absolute® baseado em nuvem ou através do aplicativo Absolute Mobile, que são parte da **Plataforma Absolute**. Aproveitando a conexão sempre ativa proporcionada pela tecnologia Absolute Persistence®, integrada em mais de 600 milhões de dispositivos dos principais fabricantes de sistemas, você pode manter o controle de todos os seus dispositivos endpoint. Toda vez que um usuário tenta alterá-lo ou removê-lo, a Absolute se reinstala, garantindo uma conexão segura e sempre ativa entre a Plataforma Absoluta e o dispositivo endpoint.

Su Salva-vidas para proteger os dispositivos em risco

A Absolute Control fornece a salva-vidas para proteger dispositivos e dados em risco, mesmo que estejam fora de sua rede corporativa.

- Defina os cercos de proteção. Defina cercos de proteção e temporizadores para acionar automaticamente as ações sempre que um dispositivo sair de uma zona "segura" ou ficar offline, bem como para detectar movimento não autorizado do dispositivo.
- Excluir seletivamente os arquivos do dispositivo. Limpar remotamente arquivos específicos de dispositivos em risco, executar ações de fim de vida útil e agilizar a desativação de dispositivos remotos.
- Limpeza de dados do dispositivo. Limpar remotamente dados de dispositivos endpoint de risco e executar remediação de mídia no fim da vida útil apagando remotamente o disco rígido de um dispositivo e gerando certificados de conformidade.
- Congelamento remoto de dispositivos em risco. Congelar dispositivos em risco sob demanda ou conforme um cronograma e evitar a propagação de uma infecção por ransomware ou preservar provas para fins de litígio.
- Enviar mensagens seguras aos usuários. Informar os usuários de forma oportuna e coordenada, exibindo mensagens importantes na tela de seus dispositivos e solicitar feedback.
- Proteção Remota de Firmware*. Ativar o controle de firmware de supervisão à distância e em escala, e minimizar o risco de ataques de firmware.

*Somente dispositivos Lenovo

Procurando Mais Ferramentas?

Enquanto a Absolute Control lhe oferece uma salva-vidas para proteger dispositivos e dados em risco, o portfólio de produtos Absolute Secure Endpoint lhe oferece opções adicionais de nível de serviço que podem atender a outras necessidades comerciais. Consulte Absolute Visibility e Absolute ResilienceTM para determinar qual nível de serviço é o mais adequado para você.

Absolute Visibility

Fonte de verdade para dispositivo e aplicação de dispositivos e aplicações.

O que está incluso?

- ✓ Status do dispositivo
- ✓ Postura de segurança
- ✓ Status da aplicação
- ✓ Utilização do dispositivo
- ✓ Geolocalização
- ✓ Uso de Aplicativos da Web
- ✓ Endpoint Data Discovery

Absolute Control

Salva-vidas para proteger os dispositivos e dados em risco.

Todas as características do Visibility, mais:

- ✓ Cercos de proteção
- ✓ Congelamento do dispositivo
- ✓ Limpeza de arquivos
- ✓ Limpeza do dispositivo
- ✓ Mensagens do usuário final
- ✓ Proteção Remota de Firmware

COMPLEMENTOS DE ABSOLUTE CONTROL

- ✓ Absolute Insights for Endpoints
  Capacite seus administradores com informações sobre dispositivos e tendências de segurança para toda a sua frota.
- ✓ Serviço de Recuperação de Dispositivos Perdidos da Absolute
  Uma equipe de especialistas em recuperação absoluta rastreia, localiza e protege os dispositivos e até mesmo entra em contato com os usuários para recuperá-los.
- ✓ Absolute Ransomware Response para Control
  Aumente suas capacidades de controle para obter uma vantagem na preparação e recuperação do ransomware em todo o seu conjunto de dispositivos.

PACOTES DE PRODUTOS RELACIONADOS

- ✓ Absolute Control para Chromebooks
  Recursos projetados especificamente para usuários de Chromebooks.

MAIS POTÊNCIA

Absolute Resilience

Oferece uma auto-reparação de aplicação e uma resposta confiante ao risco.

Todas as características do Control, mais:

- ✓ Aplicação Resilience
- ✓ Biblioteca de Scripts de Remediação
- ✓ Investigações e recuperação de dispositivos perdidos/roubados

/ABSOLUTE®

Com a confiança de mais de 18.000 clientes, a Absolute Software é o único fornecedor de soluções de segurança inteligentes e auto-reparáveis. Integrado em mais de 600 milhões de dispositivos, a Absolute é a única plataforma que oferece uma conexão digital sempre ativa que aplica de forma inteligente e dinâmica a visibilidade, controle e capacidade de auto-reparacão aos dispositivos endpoint, aplicações e conexões de rede, ajudando os clientes a fortalecer a resiliência cibernética diante da crescente ameaça de ransomware e ataques maliciosos.

DECLARATION

Absolute Software Corporation, registered with the Tax ID under number 98-1186081, located at 980 Howe Street, Suite 1400, Vancouver, British Columbia V6Z 0C8, declares for all due purposes that the Control and Monitoring Software meets the following technical specifications:

- *Control: Remote locking and unlocking functions.*
- *Inventory: Detailed management of equipment hardware and software.*
- *Traceability: Integrated geolocation capabilities.*

The control and monitoring software has persistence functionality designed to allow the client to preserve the software and its functionalities, even after total data loss or hard drive formatting, using firmware residency technology.

The equipment control and monitoring interface is cloud-based, without the need for additional licenses beyond those assigned to each piece of equipment;

The dedicated software license will be made available upon payment to the authorized reseller by the CONTRACTING PARTY.

Signed by:
964F101EA6B24A3...

POSITIVO DIAG 2.0 – FICHA TÉCNICA

DESCRIÇÃO: O **Positivo Diag 2.0** é uma ferramenta de diagnóstico abrangente integrada diretamente ao firmware UEFI (Unified Extensible Firmware Interface) dos dispositivos. Projetado para oferecer diagnósticos rápidos e confiáveis, sendo executado diretamente a partir da Flash ROM da BIOS, sem depender de sistemas operacionais, drives ou dispositivos de armazenamento externos.

FUNCIONALIDADES PRINCIPAIS: O software permite a análise completa do hardware, garantindo diagnósticos independentes do estado dos dispositivos de armazenamento do computador. Sua interface gráfica intuitiva possibilita a realização de testes básicos e avançados de forma acessível. Fornece informações detalhadas sobre a configuração do sistema, tais como: Fabricante e modelo do equipamento; Data e versão da BIOS (firmware) do equipamento; Marca, modelo e clock de funcionamento (em GHz) do processador, capacidade de memória RAM e sua velocidade; Modelo, capacidade, versão do firmware e número de série dos dispositivos de armazenamento do sistema (se houver); Nome, tipo e informações adicionais de dispositivos USB conectados; Informações de dispositivos PCI conectados.

REQUISITOS DO SISTEMA:

- Suporte a UEFI (Unified Extensible Firmware Interface).
- Processadores baseados na arquitetura x86 ou x64.
- Teclado e/ou mouse funcional.
- Tela compatível com saída gráfica padrão.

MÉTODOS DE INICIALIZAÇÃO:

- Pela tecla de atalho F11 durante o POST (momento de inicialização da máquina).
- Diretamente no Setup da BIOS, dentro da aba “Salvar & Sair”.

COMPONENTES DOS TESTES E RESUMO:

- **Informações do Sistema:** Verifica e exibe informações como: Nome, modelo, número de série, fabricante, versão e data da BIOS e especificações dos componentes de hardware.
- **Teste de Sistema:** Realiza um teste geral em todos os componentes. Dispensando apenas os testes que necessitam da interação com o usuário, são eles: Teclado, mouse e USB.
- **Processador (CPU):** Verifica a integridade e desempenho da CPU, incluindo autoteste interno (BIST), estresse dos núcleos, monitoramento de temperatura, testes de criptografia e cálculos matemáticos.
- **Memória RAM:** Avalia a estabilidade e integridade da memória RAM por meio de operações de estresse multicore, verificações de endereçamento e operações relacionadas a padrões de dados.
- **Dispositivos de Armazenamento:** Realiza verificações nos dispositivos de armazenamento conectados, incluindo teste de superfície não destrutivo e testes de S.M.A.R.T (SATA, NVMe e eMMC).
- **Dispositivos PCI:** Verifica os dispositivos PCI conectados ao sistema, validando informações e funcionalidade, detectando possíveis problemas de comunicação e compatibilidade.
- **Conectores USB:** Testa e exibe informações dos conectores USB disponíveis, verificando se os dispositivos foram reconhecidos corretamente (o procedimento requer a interação do usuário).
- **Capacidade de Exibição Gráfica (Vídeo):** Avalia a capacidade de exibição gráfica do sistema, identificando diferentes resoluções e qualidade visual. É solicitado ao usuário inspecionar a tela e relatar qualquer irregularidade visual.
- **Conexão de Rede (Ethernet):** Valida a conexão de rede cabeada do equipamento.
- **Dispositivos de Conectividade Sem Fio:** Verifica a presença e especificações dos dispositivos de conectividade sem fio no sistema (Placa Wi-Fi e dispositivos Bluetooth).
- **Teclado:** Verifica o funcionamento do teclado, solicitando ao usuário que pressione todas as teclas presentes no dispositivo.
- **Mouse:** Verifica o funcionamento dos botões e a capacidade de movimento do mouse solicitando a interação com o usuário.
- **Áudio:** Avalia a presença e funcionamento de controladores, codecs de áudio e drivers de saída de som, como alto-falantes internos ou externos. É solicitado ao usuário uma confirmação da percepção do sinal sonoro apresentado.
- **Bateria (exclusivo para notebooks):** Analisa as especificações e o estado atual da bateria.
- **Térmico:** verifica as temperaturas dos componentes principais do sistema, como a CPU.
- **Sistema de Refrigeração:** Avalia o desempenho das ventoinhas do sistema.
- **Fonte de Alimentação (exclusivo para desktops):** Verifica o funcionamento da fonte de alimentação, garantindo que ela esteja fornecendo energia de forma estável.
- **TPM:** Exibe as principais informações do dispositivo, verifica o status das hierarquias e realiza um autoteste.
- **Boot do SO:** Verifica o boot path do sistema operacional, avalia a integridade do bootloader e suas dependências.

VISÃO GERAL DO SOFTWARE:

ERROS COMUNS E SOLUÇÕES:

Consulte a **Tabela de Códigos de Erros** disponível no Manual do Usuário, a tabela possui códigos de erro do programa, acompanhados de suas respectivas descrições. Caso um erro ocorra, consulte o código correspondente para entender sua causa e possíveis ações corretivas.

Windows Compatible Products List

Welcome to the Windows Compatible Products List! Windows Hardware Compatibility means that a manufacturer has rigorously tested their hardware and met all of Microsoft's compatibility requirements. Use the search below to find Compatible products and download a Verification Report for any OS.

For Server products, we recommend you use the Windows Server Catalog as it is designed to give you more detailed and Server specific information.

Proposta de Preço ITEM 3 - POSITIVO TECNOLOGIA (1661786) SEI 2025.001317 / pg. 772

Microsoft

Hardware certification report **Approved**

Private product ID:	**13907734486947735**
Shared product ID:	**401966739**
Submission ID:	**1152921505698355209**
Submission date:	**10/1/2024**
Completion date:	**10/1/2024**
Company:	**Positivo Tecnologia SA**
Product name:	**Positivo Master N8450**
Category:	**System**
Product type:	**Laptop**
Qualification level:	**Certified for Microsoft Windows 11 Client family version 24H2, x64**
Marketing name:	**Positivo Master N8450**

Microsoft Certified

Marca concedida
O uso da marca de Certificação da T&A Brasil é limitado às condições estabelecidas no contrato. A validade deste Certificado está atrelada à realização das avaliações de manutenção e tratamento de possíveis não conformidades de acordo com as orientações da T&A Brasil previstas no RAC específico. Para verificação da condição atualizada de regularidade deste Certificado de Conformidade deve ser consultado o banco de dados de produtos e serviços certificados do Inmetro. Este certificado é de uso exclusivo do Cliente da T&A Brasil e é fornecido de acordo com o contrato de certificação entre T&A Brasil e seu cliente. A responsabilidade da T&A Brasil está limitada aos termos e condições do contrato. A T&A Brasil não assume qualquer responsabilidade, salvo por parte do cliente, de acordo com o contrato, por perda, despesa ou dano causado pela utilização deste Certificado e/ou da marca. Apenas o cliente está autorizado a permitir a cópia ou distribuição deste Certificado. Para mais informações, contate: e-mail: tea@teabrasil.com.br ou Telefone: +55 11 3509-3507 – Avenida Industrial, 780 – 12º Andar – Sala 1208 e 1209 – Jardim Park Business – Santo André – CEP 09080-510 – Bairro Campestre.

RESUMO

Com o objetivo de se avaliar o nível de exposição de um operador, na posição sentada, ao ruído emitido por um computador tipo notebook, modelo MASTER N8450, produzido pela POSITIVO, foram realizadas medições com um sonômetro. As medições foram realizadas com o computador em modo repouso (*idle*) e em modo de sobrecarga (*stressed*). Os procedimentos foram baseados no código ECMA-74 19th *Edition/December* 2021 – *Measurement of Airborne Noise emitted by Information Technology and Telecommunications Equipment.*

PALAVRAS-CHAVE

- Positivo Tecnologia;
- Emissão Sonora;
- ECMA-74.

Dados proprietários e confidenciais.
Cópias apenas integrais e com autorização do Lactec.

Proposta de Preço ITEM 3 - POSITIVO TECNOLOGIA (1661786) SEI 2025.001317 / pg. 790

1. OBJETIVO

Apresentar os resultados do ensaio de medição de nível de pressão sonora sobre o operador, na posição sentada, emitido pelo computador tipo notebook modelo MASTER N8450, produzido pela POSITIVO, bem como a descrição simplificada do método utilizado, equipamentos e condições gerais do ambiente no qual foi conduzido o ensaio.

2. DESCRIÇÃO DO ITEM AVALIADO

O equipamento submetido ao ensaio foi um computador tipo notebook, modelo MASTER N8450, produzido pela Positivo Tecnologia. Os ensaios foram conduzidos no dia 09/10/2024. Os componentes (configuração) do notebook são apresentados na Tabela 1.

Tabela 1 - Componentes do notebook

Processador	Intel Ultra 7 155H
RAM Instalada	DDR5
Tipo de sistema	x64
GPU instalada	Intel UHD Graphics

3. CONDIÇÕES AMBIENTAIS E CARACTERÍSTICAS DA SALA DE ENSAIO

Os ensaios foram conduzidos em um ambiente à temperatura de 15°C, umidade relativa de 94% e pressão de 1020 hPa.

O ambiente utilizado foi uma sala com paredes e porta isoladas acusticamente para atenuar ruídos externos.

4. REFERÊNCIAS

a) *ECMA-74 19th Edition/December 2021 – Measurement of Airborne Noise emitted by Information Technology and Telecommunications Equipment*
b) ABNT NBR 10152 – Acústica – Níveis de Pressão Sonora em ambientes internos a edificações
c) PAL Acoustics – *Sound Pressure Level Test Report* KH1_13_0050 – 2013-4-3
d) CPqD – DOT-04436.RE.01-A – Ensaios e medição de pressão sonora no operador sentado – 25/07-2018
e) ISO 7779:2010 (Third Edition) - Acoustics – *Measurement of airborne noise emitted by information technology and telecommunications equipment*
f) ISO 9296:1988(E) – *Acoustics – Declared noise emission values of computer and business equipment*

Dados proprietários e confidenciais.
Cópias apenas integrais e com autorização do Lactec.
Proposta de Preço ITEM 3 - POSITIVO TECNOLOGIA (1661786) SEI 2025.001317 / pg. 791

5. ESQUEMA DE MONTAGEM

O notebook foi montado sobre uma mesa de teste, com a distância frontal da borda da mesa de 0,05 m e posicionado equidistante das bordas laterais. O ângulo de abertura da tela do notebook foi ajustado para permanecer em um plano normal à direção do eixo do microfone.

O microfone (decibelímetro) foi posicionado centralizado, em frente ao computador, a uma distância de 0,25 metros de sua aresta frontal, a uma altura de 1,20 m em relação ao chão, e inclinado 30° em relação ao plano horizontal (apontando para o computador).

6. INSTRUMENTO UTILIZADO E CONFIGURAÇÃO

As medições foram realizadas com um decibelímetro/sonômetro (analisador) da marca Brüel & Kjær, modelo (type) 2231, número de série 1791477, equipado com um microfone da marca G.R.A.S. modelo 40 AE, com número de série 43652. O certificado de calibração do equipamento é o Nº CBR 2300336, emitido em 17/05/2023, pela Spectris do Brasil.

O analisador foi configurado para realizar a medição de nível de pressão sonora equivalente, Leq, com um tempo de integração de 30 segundos, ponderação no tempo do tipo Fast e ponderação em frequência do tipo A.

Foram medidos os níveis equivalentes do ruído de fundo (ambiente sem o computador ligado), do computador ligado em condição de repouso (*idle*) e em condição de sobrecarga operacional (*stressed*). Para gerar a condição de sobrecarga, foi utilizado o software *BurnIn V10.2*, configurado para gerar uma condição de 100% de uso da CPU, da memória RAM, do disco rígido e do processador gráfico, como mostrado na Figura 1.

Figura 1 - Modo de sobrecarga operacional - BurnIn

Dados proprietários e confidenciais.
Cópias apenas integrais e com autorização do Lactec.

7. RESULTADOS

Os resultados obtidos no ensaio são apresentados na Tabela 2, a seguir:

Tabela 2 - Resultados das medições.

	Nível de pressão sonora equivalente - L_{Aeq} (dB)	**L_{Aeq} corrigido* (dB)**	**Média Aritmética L_{Aeq} corrigido (dB)**
Ruído de fundo	22,0	-	20,8
	19,5	-	
MASTER N8450 - *idle*	19,9	18,6	18,4
	19,4	18,1	
MASTER N8450 - *stress*	47,2	-	47,3
	47,3	-	

*Correção aplicável quando a diferença entre os níveis do ruído de fundo e o emitido pelo equipamento é inferior a 6 dB. De acordo com a norma ISO 11201, o fator de correção, neste caso, é de 1,3 dB.

8. COMENTÁRIOS

Os resultados se referem exclusivamente ao modelo testado, e nas condições de ensaio relatadas, e são para fins de planejamento, verificação de níveis de emissão ou para auxiliar na definição de valores declarados. Não devem ser confundidos com os valores declarados de emissão da fonte sonora.

Dados proprietários e confidenciais.
Cópias apenas integrais e com autorização do Lactec.

Product Summary:

Product Type:	Notebook
Registered In:	Brazil
Manufacturer:	Positivo Tecnologia S.A.
EPEAT Tier:	Bronze
Registration Date:	2024-10-23
Product Status:	Active

All unique product identifiers existing for this product may not be listed here. If the unique product identifier you are looking for is not listed, please contact EPEAT at EPEAT@GEC.org.

EXPORT PRODUCT SUMMARY

EPEAT Tier Score Detail

For a product to be listed on the EPEAT Registry, it must, at a minimum, meet the applicable “required” criteria. Click here to see a list of the required criteria for this product category.

Proposta de Preço ITEM 3 - POSITIVO TECNOLOGIA (1661786) SEI 2025.001317 / pg. 804

This product has met the necessary required criteria.

Along with required criteria, products can also meet optional criteria and score optional points. It is not required for a product to achieve any optional points.

Products that meet all required criteria and achieve **less than 50%** of the optional points are rated at
EPEAT Bronze

Products that meet all required criteria and achieve **50 - 74%** of the optional points are rated at
EPEAT Silver

Products that meet all required criteria and achieve **75 - 100%** of the optional points are rated at
EPEAT Gold

The optional criteria for this product category and optional points achieved by this product are listed below.

Optional Criteria	Scores
+ 4.1 Substance Management	0 / 16
+ 4.2 Materials Selection	0 / 3
+ 4.4 Product longevity/life-cycle extension	0 / 4
+ 4.5 Energy Conservation	0 / 3

Proposta de Preço ITEM 3 - POSITIVO TECNOLOGIA (1661786) SEI 2025.001317 / pg. 805

+ 4.7 Packaging	0 / 2
+ 4.8 Life cycle assessment and carbon footprint	0 / 6
+ 4.9 Corporate Environmental Performance	0 / 9
+ 4.10 Corporate social responsibility	0 / 6
TOTAL OPTIONAL CRITERIA SCORE:	**0 / 49**

Please note that it is not required for a product to achieve any optional points.

Some optional criteria may not be applicable to a product. Optional criteria that are not applicable (N/A) to the product are not included in the Total Optional Criteria Score, and are not reflected above.

For any questions, comments, or feedback regarding the EPEAT Registry, please contact us.

COMPUTERS & DISPLAYS

Computers & Displays Product Category Required Criteria

All EPEAT Computers & Displays Products must meet, at a minimum, the following required criteria.

(4.1.1)	Product carbon footprint disclosure and assurance
(4.1.1.1)	Conformance with European Union ROHS Directive substance restrictions
(4.1.2)	Corporate GHG Inventory
(4.1.3.1)	Elimination of intentionally added mercury in light sources
(4.1.5.1)	Reduction of bromine and chlorine content in plastic parts >25 grams
(4.1.7.1)	Compliance with provisions of EU Battery Directive
(4.2.1)	Manufacturer GHG reduction target aligned with climate science
(4.2.1.1)	Minimum post-consumer recycled plastic, ITE-derived post-consumer recycled plastic or bio-based plastic content
(4.3.1)	Communication of energy management requirements for key component facilities
(4.3.1.1)	Identification of materials and components requiring selective treatment
(4.3.2.1)	Plastic parts compatible with recycling
(4.3.2.2)	Plastic parts separable for recycling
(4.4.1)	Manufacturer use of renewable electricity
(4.4.1.1)	Service support
(4.4.2.1)	Removal of external enclosure
(4.4.2.3)	Spare parts
(4.4.2.4)	Battery replacement and information
(4.5.1.1)	Conformance to current ENERGY STAR program requirements
(4.5.1.2)	Lowest Power Mode limit
(4.6.1)	Conformance with applicable ENERGY STAR® product eligibility criteria
(4.6.1.1)	Provision of product take-back services
(4.6.2)	External power supply energy efficiency
(4.6.2.1)	Provision of a removable rechargeable battery take-back program
(4.6.3)	Battery charger system energy efficiency
(4.6.3.1)	End-of-life processing
(4.7.1.1)	Elimination of intentionally added heavy metals in packaging
(4.7.1.2)	Elimination of elemental chlorine as a bleaching agent in packaging material

(4.1.2)	Corporate GHG Inventory
(4.1.3.1)	Elimination of intentionally added mercury in light sources
(4.1.5.1)	Reduction of bromine and chlorine content in plastic parts >25 grams
(4.1.7.1)	Compliance with provisions of EU Battery Directive
(4.2.1)	Manufacturer GHG reduction target aligned with climate science
(4.2.1.1)	Minimum post-consumer recycled plastic, ITE-derived post-consumer recycled plastic or bio-based plastic content
(4.3.1)	Communication of energy management requirements for key component facilities
(4.3.1.1)	Identification of materials and components requiring selective treatment
(4.3.2.1)	Plastic parts compatible with recycling
(4.3.2.2)	Plastic parts separable for recycling
(4.4.1)	Manufacturer use of renewable electricity
(4.4.1.1)	Service support
(4.4.2.1)	Removal of external enclosure
(4.4.2.3)	Spare parts
(4.4.2.4)	Battery replacement and information
(4.5.1.1)	Conformance to current ENERGY STAR program requirements
(4.5.1.2)	Lowest Power Mode limit
(4.6.1)	Conformance with applicable ENERGY STAR® product eligibility criteria
(4.6.1.1)	Provision of product take-back services
(4.6.2)	External power supply energy efficiency
(4.6.2.1)	Provision of a removable rechargeable battery take-back program
(4.6.3)	Battery charger system energy efficiency
(4.6.3.1)	End-of-life processing
(4.7.1.1)	Elimination of intentionally added heavy metals in packaging
(4.7.1.2)	Elimination of elemental chlorine as a bleaching agent in packaging material

Este documento homologa, nos termos da regulamentação de telecomunicações vigente, o Certificado de Conformidade nº ICC 05.049/2023.1, emitido pelo **ICC Instituto de Certificações e Conformidades Ltda**. Esta homologação é expedida em nome do solicitante aqui identificado e é válida somente para o produto a seguir discriminado, cuja utilização deve observar as condições estabelecidas na regulamentação de telecomunicações.

Tipo - Categoria:
Transceptor de Radiação Restrita - II

Modelo - Nome Comercial (s):
AX211NGW

Características técnicas básicas:

Faixa de Frequências Tx (MHz)	Designação de Emissões	Tecnologias	Potência Máxima de Saída (W)	Tipo de Modulação
2.400,0 a 2.483,5	931KF7D	SALTO EM FREQÜÊNCIA	0,0103	GFSK
2.400,0 a 2.483,5	1M44G7D	SALTO EM FREQÜÊNCIA	0,0088	¶/4DQPSK e 8DPSK
2.400,0 a 2.483,5	683KF7D	SEQÜÊNCIA DIRETA	0,0069	GFSK
2.400,0 a 2.483,5	1M14F7D	SEQÜÊNCIA DIRETA	0,0069	GFSK
2.400,0 a 2.483,5	10M3X9D	SEQÜÊNCIA DIRETA	0,25	DBPSK, DQPSK e CCK
2.400,0 a 2.483,5	16M9X9D	OFDM	0,504	BPSK, QPSK, 16 QAM, 64 QAM
2.400,0 a 2.483,5	17M7X9D	OFDM	0,514	BPSK, QPSK, 16 QAM, 64 QAM
2.400,0 a 2.483,5	36M5X9D	OFDM	0,498	BPSK, QPSK, 16 QAM, 64 QAM
2.400,0 a 2.483,5	19M1X9D	OFDMA	0,424	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
2.400,0 a 2.483,5	38M1X9D	OFDMA	0,499	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.725,0 a 5.850,0	15M7X9D	OFDM	0,135	BPSK, QPSK, 16 QAM, 64 QAM
5.725,0 a 5.850,0	18M9X9D	OFDM	0,283	BPSK, QPSK, 16 QAM, 64 QAM
5.725,0 a 5.850,0	37M4X9D	OFDM	0,249	BPSK, QPSK, 16 QAM, 64 QAM
5.725,0 a 5.850,0	18M9X9D	OFDM	0,283	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.725,0 a 5.850,0	37M4X9D	OFDM	0,249	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.725,0 a 5.850,0	78M0X9D	OFDM	0,194	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.725,0 a 5.850,0	19M1X9D	OFDMA	0,134	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.725,0 a 5.850,0	38M1X9D	OFDMA	0,143	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.150,0 a 5.350,0	-	OFDM	0,093	BPSK, QPSK, 16 QAM, 64 QAM
5.150,0 a 5.350,0	-	OFDM	0,097	BPSK, QPSK, 16 QAM, 64 QAM
5.150,0 a 5.350,0	-	OFDM	0,087	BPSK, QPSK, 16 QAM, 64 QAM
5.150,0 a 5.350,0	-	OFDM	0,097	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.150,0 a 5.350,0	-	OFDM	0,087	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.150,0 a 5.350,0	-	OFDM	0,056	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.150,0 a 5.350,0	-	OFDM	0,028	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.150,0 a 5.350,0	-	OFDMA	0,045	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.150,0 a 5.350,0	-	OFDMA	0,052	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.150,0 a 5.350,0	-	OFDMA	0,035	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.150,0 a 5.350,0	-	OFDMA	0,032	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.470,0 a 5.725,0	-	OFDM	0,36	BPSK, QPSK, 16 QAM, 64 QAM
5.470,0 a 5.725,0	BPSK, QPSK, 16 QAM, 64 QAM	OFDM	0,333	BPSK, QPSK, 16 QAM, 64 QAM
5.470,0 a 5.725,0	-	OFDM	0,314	BPSK, QPSK, 16 QAM, 64 QAM
5.470,0 a 5.725,0	-	OFDM	0,333	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.470,0 a 5.725,0	-	OFDM	0,314	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.470,0 a 5.725,0	-	OFDM	0,21	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.470,0 a 5.725,0	-	OFDM	0,111	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.470,0 a 5.725,0	-	OFDMA	0,087	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.470,0 a 5.725,0	-	OFDMA	0,068	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.470,0 a 5.725,0	-	OFDMA	0,084	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.470,0 a 5.725,0	-	OFDMA	0,094	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM

Faixa de Frequências Tx (MHz)	Designação de Emissões	Tecnologias	Potência Máxima de Saída (W)	Tipo de Modulação
5.925,0 a 7.125,0	-	OFDM	0,017	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.925,0 a 7.125,0	-	OFDM	0,02	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.925,0 a 7.125,0	-	OFDM	0,044	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.925,0 a 7.125,0	-	OFDM	0,02	BPSK, QPSK, 16 QAM, 64 QAM
5.925,0 a 7.125,0	-	OFDM	0,044	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.925,0 a 7.125,0	-	OFDM	0,098	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM
5.925,0 a 7.125,0	-	OFDM	0,181	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.925,0 a 7.125,0	-	OFDMA	0,023	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.925,0 a 7.125,0	-	OFDMA	0,043	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.925,0 a 7.125,0	-	OFDMA	0,085	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM
5.925,0 a 7.125,0	-	OFDMA	0,226	BPSK, QPSK, 16 QAM, 64 QAM, 256 QAM, 1024QAM

Ensaio de SAR não aplicável: Produto não acabado, cuja integração em outro equipamento requer nova avaliação.

Observações

Na instalação do produto devem ser observadas as condições de uso conforme estabelecido no Regulamento sobre Equipamentos de Radiocomunicação de Radiação Restrita.

Este certificado substitui o de mesmo número emitido em 24/06/2023

Constitui obrigação do fabricante do produto no Brasil providenciar a identificação do produto homologado, nos termos da regulamentação de telecomunicações, em todas as unidades comercializadas, antes de sua efetiva distribuição ao mercado, assim como observar e manter as características técnicas que fundamentaram a certificação original.

As informações constantes deste certificado de homologação podem ser confirmadas no SCH - Sistema de Gestão de Certificação e Homologação, disponível no portal da Anatel. (www.anatel.gov.br).

Secundino da Costa Lemos

OFÍCIO Nº 234.2025.CPL.1661731.2025.001317

Manaus, *na data da assinatura.*

Ao Senhor

CARLOS ALEXANDRE DOS SANTOS NOGUEIRA

Chefe do Setor de Infraestrutura e Telecomunicação

Assunto: Análise de Propostas de Preços referente ao **PREGÃO ELETRÔNICO N.º 94.010/2025-CPL/MP/PGJ SRP**.

Senhor Chefe,

Cumprimentando-o com o presente, informamos que tramita nesta Comissão Permanente de Licitação o Processo SEI n.º 2025.001317, referente ao **PREGÃO ELETRÔNICO N.º 94010/2025-CPL/MP/PGJ SRP,** cujo objeto é o *registro de preços para eventual fornecimento de equipamentos de informática, quais sejam,* ***estações de trabalho e computadores portáteis****, com garantia e assistência técnica on-site por, no mínimo, 60 (sessenta) meses*.

Isto posto, encaminhamos os autos em epígrafe a esse **Setor de Infraestrutura e Telecomunicação - SIET,** para **análise e manifestação** quanto às proposta de preço abaixo elencadas:

1. E.R. SOLUCOES INFORMATICA LTDA., CNPJ (MF) n.º 05.778.325/0005-47, para o Item 1 (doc. 1661785); e

2. Positivo Tecnologia S/A (Filial), CNPJ (MF) n.º 81.243.735/0009-03, para o Item 3 (doc. 1661786).

Atenciosamente,

Maurício Araújo Medeiros

Pregoeiro - PORTARIA 606/2025/SUBADM

Documento assinado eletronicamente por **Maurício Araújo Medeiros**, **Membro da Comissão Permanente de Licitação - CPL**, em 01/07/2025, às 14:58, conforme art. 1º, III, "b", da Lei 11.419/2006.

A autenticidade do documento pode ser conferida no link http://sei.mpam.mp.br/sei/controlador_externo.php?acao=documento_conferir&id_orgao_acesso_externo=0 informando o código verificador **1661731** e o código CRC **427D7503**.

MINISTÉRIO PÚBLICO DO ESTADO DO AMAZONAS
Avenida Coronel Teixeira, 7995 - CEP 69000-000 - Manaus - AM - www.mpam.mp.br

PARECER Nº 15.2025.SIET.1661793.2025.001317

PROCESSO DE COMPRA:
2025.001317
Pregão Eletrônico n.º 94010/2025-CPL/MP/PGJ SRP
Termo de Referência Nº 2.2025.DTIC.1525128.2025.001317

OBJETO:
Registro de preços para eventual fornecimento de equipamentos de informática, quais sejam, estações de trabalho e computadores portáteis, com gara
por, no mínimo, 60 (sessenta) meses, com fito na renovação do parque computacional, substituindo aqueles equipamentos fora de garantia ou obsolet
dos órgãos integrantes do Ministério Público do Estado do Amazonas, Procuradoria-Geral de Justiça, por um período de 12 meses.

1. **Relatório**

Trata-se de pedido de compatibilização da proposta da empresa **ER SOLUÇÕES INFORMÁTICA LTDA.** melhor classificada para o **ITEM 1: MICROCOMPUTADOR TIPO 1 - "ALL IN ONE" COM MONITOR AUXILIAR**, na fase de disputas do Pregão Eletrônico n.º 94010/2025-CPL/MP/PGJ, documentos 1661785 e 1661819, recebido no dia 1/7/2025.

2. **Da Análise**

2.1 Produto ofertado

Item	Descrição	Quantidade	Produto Ofertado
1	**ITEM 1: MICROCOMPUTADOR TIPO 1 - "ALL IN ONE" COM MONITOR AUXILIAR** **Marca/Modelo de Referência:** Monitor Lenovo ThinkVision T24i30.	1.000	**Microcomputador tipo All in One:** Lenovo Tiny-In-One 23,8' Gen 5 12NAGAR1US + Lenovo ThinkCentre M70q Gen 5 Tiny (Configurado para atender ao edital) + **Monitor auxiliar:** Lenovo ThinkVision T24i-30 IPS - PN 63CFMAR1BR

2.2 Análise comparativa

DESCRIÇÃO	PARECER	OBSERVAÇÕES
SUBITEM 1.1: MICROCOMPUTADOR TIPO "ALL IN ONE"		
1. PLACA PRINCIPAL (PLACA MÃE)		
1. A placa mãe deve ser construída pelo próprio fabricante do microcomputador ou produzida sob a especificação do mesmo, não sendo aceito placas de livre comercialização no mercado, nem em regime de OEM;		
2. Deverá possuir chipset produzido pelo mesmo fabricante do processador, e indicado para a linha corporativa/profissional;		
3. Deve possuir, no mínimo, 2 (dois) slots para memória RAM, “do tipo DDR-5 SODIMM, ou superior”, permitindo a instalação de até 64 (sessenta e quatro) Gigabytes;		
4. Deve suportar tecnologia Dual Channel de utilização de memória RAM;		
5. Deve possuir 2 (dois) Sockets M.2 para SSD SATA ou NVMe;		
6. Deve possuir 1 (um) Socket M.2 Para Cartões Wi-Fi/Bluetooth;		
7. Deve possuir recursos DASH 1.0 (Desktop and mobile Architecture for System Hardware), ou tecnologia minimamente equivalente;		
8. Deve ser compatível com Energy Star 7.0/7.1, ou tecnologias superiores;		

DESCRIÇÃO	PARECER	OBSERVAÇÕES
9. Deve possuir capacidade de desligamento do vídeo e do disco rígido após tempo determinado pelo usuário, religamento por acionamento de teclado ou mouse, bem como função de economia de energia para monitor, placa-mãe e unidades de armazenamento internas;		
10. Deve possuir chip TPM (*Trusted Platform Module*), versão 2.0, ou superior, soldado à placa principal, e destinado ao armazenamento de senhas, certificados digitais e chaves criptográficas em conformidade com as especificações do *Trusted Computing Group*;		
11. Deve possuir sistema de detecção de intrusão de chassis, com respectivo acionador instalado no gabinete que permita a detecção de abertura ainda que o equipamento esteja desligado da fonte de energia, devendo gerar log na memória flash da BIOS com todos os eventos de intrusão;		
12. Deve possuir suporte a virtualização por hardware;		
13. Deve possuir suporte a implementação de extensões de virtualização de I/O por hardware;		
14. Deve possuir suporte a aceleração de segurança AES no hardware;		
15. Deve possuir suporte à tecnologia de acesso remoto *out-of-band* embutida no hardware;		
16. Deve possuir controle da velocidade de rotação do cooler do processador de forma automática, de acordo com a variação de temperatura da CPU;		
17. Deve suportar boot por pendrive ou disco conectado a uma porta USB 3.1;		
18. Deve suportar a inicialização de sistema operacional pela interface de rede cabeada, através de PXE boot e http/https boot.		
2. BIOS		
1. O BIOS deve ser desenvolvido pelo mesmo fabricante do equipamento ou customizado por ele;		
2. O fabricante do equipamento, deverá ser totalmente responsável pelo BIOS fornecido juntamente com a placa mãe e pela atualização do mesmo, devendo promover as alterações que se façam necessárias e corrigir problemas ou danos causados ao equipamento em razão desse BIOS ou de procedimentos de atualização deste, (que poderão ser acompanhados pela empresa caso haja necessidade), durante o período de garantia do equipamento;		
3. BIOS em português ou inglês, desenvolvido em conformidade com a especificação UEFI 2.5 ou superior (http://www.uefi.org) e capturáveis pela aplicação de inventário SCCM (System Center Configuration Manager);		
4. O fabricante deverá comprovar a compatibilidade com o padrão UEFI através do site http://www.uefi.org/members, na categoria membros;		
5. Deve ser do tipo flash EPROM, atualizável por software, compatível com o padrão plug-and-play;		
6. Deve ser lançado a partir de 2016 e entregue na versão mais atual disponibilizada pelo fabricante;		

DESCRIÇÃO	PARECER	OBSERVAÇÕES
7. Deve ter suporte a ACPI, ou tecnologia superior;		
8. Deve ser desenvolvido de acordo com o padrão de segurança NIST 800-147 ou ISO/IEC 19678:2015, para garantir a integridade do BIOS;		
9. Deve possuir recursos de controle de permissão através de senhas, sendo uma para inicializar o computador e outra para acesso e alterações das configurações do BIOS;		
10. Deve possuir software embarcado no BIOS com funções de diagnóstico de problemas, e gerenciamento com as seguintes características:		
1. Permitir o teste do equipamento, com independência do sistema operacional instalado, o software de diagnóstico deve ser capaz de ser executado (inicializado) a partir da UEFI (Unified /Extensible Firmware Interface) ou do Firmware do equipamento através do acionamento de tecla função (F1...F12);		
2. O software de diagnóstico deverá ser capaz de informar, através de tela gráfica: O fabricante e modelo do equipamento, processador, memória RAM, firmware, e capacidade do disco rígido;		
11. Deve possuir ferramenta que possibilite realizar a formatação definitiva dos dispositivos de armazenamento conectados ao equipamento, desenvolvida em acordo com o padrão de segurança NIST 800-88 ou ISO/IEC 27040:2015. Caso esta ferramenta não seja nativa do BIOS, deverá ser oficialmente homologada pelo fabricante do equipamento;		
12. Deve possuir opção para exportar/importar configurações. No caso de ferramenta externa fornecida para atender esse item, a mesma deve ser disponibilizada no web site de suporte do fabricante, em conjunto com outras ferramentas relacionadas e homologadas para o modelo do equipamento;		
13. Deve oferecer a possibilidade de, se demandado, vir com logo de inicialização do equipamento customizada de fábrica, com uma imagem previamente fornecida pela **CONTRATANTE**;		
14. Deve possuir campo não editável com o número de série do equipamento gravado em memória não volátil e campo editável que permita inserir identificação customizada (identidade patrimonial com pelo menos 10 caracteres). Serão aceitos BIOS com reprogramação via software desde que estes estejam devidamente licenciados para o equipamento e disponibilizados para download no web site de suporte do fabricante;		
15. Deverá permitir o gerenciamento remoto do microcomputador mesmo desligado, desde que energizado pela rede elétrica e conectado localmente à rede de dados, permitindo ligar e desligar o microcomputador remotamente, com controle de acesso, e com possibilidade de definir horários programados;		
1. Deve permitir acesso remoto através da rede ao POST (procedimento de inicialização) e BIOS para leitura e gravação, mesmo com o equipamento desligado;		
2. Deverá permitir acesso remoto ao sistema operacional e processo de inicialização do microcomputador através de interface gráfica, com controle remoto do mouse e teclado (KVM remoto), independente do suporte de aplicações locais ou estado do sistema operacional;		
3. Possuir a capacidade de inventário remoto de Hardware mesmo com o equipamento desligado.		
3. PROCESSADOR		

DESCRIÇÃO	PARECER	OBSERVAÇÕES
1. O processador ofertado, deverá possuir minimamente 6 (seis) núcleos e 12 (doze) threads de processamento, podendo atingir frequência de operação interna de até 4.8 GHz em modo turbo, no mínimo;		
2. Em caso de processadores com arquitetura de computação heterogênea (big.LITTLE), só serão contabilizados os cores voltados para performance, na contagem mínima de núcleos, threads e ciclos de clock base (MHz);		
3. Memória cache total de, no mínimo, 22MB;		
4. O processador ofertado deverá ser Intel Core i5, "de 13ª geração", ou AMD Ryzen 5 PRO, "serie 8000", admitindo-se famílias ou gerações mais novas;		
5. O processador deverá pertencer à última geração disponível utilizada pelo fabricante do equipamento, **com desempenho mínimo de 21.900 (vinte e um mil e novecentos) pontos**, considerando o uso pleno de todos os núcleos e sem a aplicação de configurações específicas para aumento ou modificação de desempenho, como "overclock", "undervoltage", "overvoltage" ou quaisquer outras que não estejam em conformidade com os padrões definidos pelo fabricante; 1. O desempenho será comprovado por intermédio de resultados de BenchMark, disponíveis em http://www.cpubenchmark.net/cpu_list.php; 2. Será admitida uma margem de tolerância de 2% (dois por cento) do desempenho mínimo exigido.		
6. Deve possuir tecnologia de controle dinâmico de frequência do processador para núcleos individuais e ou múltiplos núcleos;		
7. Deve possuir controlador com suporte à memória RAM do tipoDDR5-4800 MT/s, ou superior;		
8. Deverá possuir tecnologia de fabricação de 10 nm (dez nanômetros) ou inferior;		
9. TDP(Thermal Design Power) típico de 35W, e máximo de 95W, declarado pelo fabricante;		
10. Deve possuir instruções do padrão AVX 2.0, ou superior;		
11. Deve possuir instruções do padrão SSE4.1/4.2, ou superior;		
12. Deve possuir instruções que implementem extensões de virtualização de hardware;		
13. Deve possuir instruções AES-NI embutidas;		
14. O proponente deverá declarar em sua proposta comercial o modelo do processador ofertado.		
4. MEMÓRIA RAM		
1. Deverá possuir, no mínimo, 16 (dezesseis) Gb de memória RAM instalados, com capacidade de expansão mínima de 64 (sessenta e quatro) Gb;		
2. Deverá ser do tipo DDR-5 SODIMM ou superior e possuir, no mínimo, 4.800 MT/s de velocidade de comunicação com o barramento principal;		
3. A implementação do total de memória RAM deve utilizar 2 (dois) módulos, em modo dual channel;		

DESCRIÇÃO	PARECER	OBSERVAÇÕES
4. A memória ofertada, deverá possuir as melhores especificações possíveis dentre as disponíveis para o equipamento proposto;		
5. Os módulos devem ser instalados durante o processo de manufatura do computador, e homologados como parte do equipamento, inclusive estando cobertos pela garantia e suporte como descrito no Termo de Referência.		
5. UNIDADE DE ARMAZENAMENTO		
1. Deve possuir, no mínimo, 1 (uma) unidade padrão tipo *Solid State Drive* (SSD) interna instalada do tipo M.2, na capacidade mínima de 256 GB e velocidade mínima de gravação de 1.200MB/s;		
2. Deve utilizar interface tipo M.2 PCIe 4.0, com o protocolo NVMe, ou superior;		
3. Deve ser instalada durante o processo de manufatura do computador, e homologado como parte do equipamento, inclusive estando coberto pela garantia e suporte como descrito no Termo de Referência.		
6. CONECTIVIDADE		
1. Deverá possuir no mínimo 4 (quatro) portas USB 3.2;		
2. Possuir 1 (uma) porta USB 3.2 Tipo C;		
3. Possuir, no mínimo, um total de 2 (duas) portas de vídeo adicionais, suportando a utilização de até 2 (dois) monitores auxiliares simultânea e independentemente do monitor principal;		
1. Os tipos das portas auxiliares de vídeo supracitadas devem ser, no mínimo, 1 (um) HDMI 1.4 e 01 (uma) DisplayPort 1.2. Em caso de versões miniaturizadas destas, adaptadores revertendo para elas devem ser fornecidos sem custo adicional.		
7. INTERFACES DE REDE		
1. Deve possuir, no mínimo, 1 (uma) interface de rede RJ45 compatível com os padrões 10, 100 e 1000 Mbps, *autosense*, *full-duplex* e *plug-and-play*, configurável totalmente por *software* e com função Wake On Lan instalada e em funcionamento;		
2. A controladora ethernet, deverá ser do tipo "*onboard*", e suportar recurso WOL (Wake On LAN);		
3. Deve possuir, no mínimo, 1 (uma) interface de rede sem fios no padrão Wi-Fi 6 (802.11 B/G/N/AX), com velocidade de até 1.73Gbps, Tecnologia MU-MIMO, banda dupla em 2.4Ghz e 5Ghz, e suporte a Bluetooth 5.3 ou superior;		
4. As controladoras Wi-Fi e Bluetooth, deverão estar em um único cartão M.2, conectado em slot específico na placa mãe, que deve ser instalado durante o processo de manufatura do computador, e homologado como parte do equipamento, inclusive estando coberto pela garantia e suporte como descrito no Termo de Referência;		
5. As interfaces Wireless ofertadas devem possuir, na data da entrega da proposta, homologação junto à ANATEL com certificado disponível publicamente no endereço eletrônico desta agência, conforme a Resolução n.º 242 de 30 de novembro de 2000.		
8. CONTROLADORA DE VÍDEO		

DESCRIÇÃO	PARECER	OBSERVAÇÕES
1. Deve possuir controladora 3D/2D com suporte a DirectX 12, ou superior;	□	
2. Deve suportar Pixel Shader 3.0, ou superior;	□	
3. Deve suportar OpenGL 4.5, ou superior;	□	
4. Deve suportar a resolução mínima de 1920 X 1080 @ 60 Hz;	□	
5. Deve possuir tecnologia de controle dinâmico de frequência, podendo atingir, no mínimo, 1.5GHz;	□	
6. Frequência base de 350 MHz, no mínimo;	□	
7. Deve suportar, no mínimo, o uso de 3 (três) monitores simultânea e independentemente.	□	
9. CONTROLADORA DE SOM E MULTIMÍDIA		
1. O equipamento deve possuir uma controladora de som integrada, do tipo "*onboard*";	□	
2. Deve possuir, no mínimo, uma interface de som com 1 (um) conector combinado para fone de ouvido e microfone, de 3,5 mm;	□	
3. Deve possuir, no mínimo, 2 alto-falantes internos, com 2 Watts RMS de potência, compatíveis com a controladora de som;	□	
4. Deve incorporar microfone, com cancelamento de ruído, voltados para captar o som do usuário em frente ao computador.	□	
10. TECLADO		
1. A marca do teclado deverá ser igual à do fabricante do equipamento ofertado;	□	
2. Deve ser USB no idioma padrão, português (Brasil), ABNT-II;	□	
3. Deve possuir teclas multimídia, com no mínimo, aumentar e diminuir volume, além do mute;	□	
4. Admite-se a utilização de teclas de função (F1...F12), para tais ações;	□	
5. Deve possuir teclado numérico integrado;	□	
6. Deve possuir, no mínimo, LEDs indicadores de estado das teclas capslock e numlock;	□	
7. Deve possuir ajuste de inclinação;	□	
8. Deve ser em gradações das cores preto ou prata;	□	
9. Não será aceito teclado com cabo retrátil;	□	
10. Não será aceito teclado wireless/bluetooth (sem fio).	□	
11. MOUSE		
1. Deve ser óptico, com conexão USB, com 3 (três) botões e sistema de rolagem de página, com formato ergonômico e com design ambidestro, devendo possuir resolução mínima por hardware de 1.000 dpi;	□	

DESCRIÇÃO	PARECER	OBSERVAÇÕES
2. Deve ser da mesma marca do fabricante do equipamento ofertado;		
3. Deve ser em gradações das cores preto ou prata;		
4. Deve acompanhar mousepad ergonômico com apoio em gel para o pulso, do mesmo fabricante do equipamento.		
5. O mouse ou teclado ofertados, deve possuir um leitor biométrico, certificado para trabalhar com a autenticação do Microsoft Windows Hello.		
12. MONITOR/TELA INTEGRADA		
1. Deve ser de tecnologia IPS (In-Plane Switching) ou VA (Vertical Alignment);		
2. Tamanho de 23,5 polegadas widescreen, ou superior;		
3. Deve suportar, no mínimo, 16 milhões de cores;		
4. Resolução mínima de 1920x1080@60Hz;		
5. Ângulo de visão mínimo de 170° horizontal e vertical;		
6. Deve possuir brilho mínimo de 250 cd/m² e contraste de 1000:1;		
7. Deve possuir controle digital de brilho e contraste, no mínimo;		
8. Deve possuir, no mínimo, ajuste de altura e inclinação;		
9. O equipamento deve possuir uma webcam integrada, de 1.5 megapixels, FHD (1080P), no mínimo, não sendo aceita solução externa.		
13. FORMATO DE MANUFATURA E FONTE DE ALIMENTAÇÃO		
1. O computador deve ser produzido no formato All in One.		
2. Serão aceitos monitores com projetos específicos para acoplamento de desktops do tipo mini/micro com volume máximo de 1.2l, onde ambos (monitor + computador) devem ser do mesmo fabricante;		
1. Neste tipo de solução, a conexão do desktop à tela/monitor deverá ser feita através de conector específico (docking) ou via um cabo único 3-1 (energia, USB e DisplayPort) a ser conectado em uma porta específica upstream. Devendo, portanto, ligar e desligar o equipamento através de botão presente na frente do monitor, não sendo necessário o acesso do usuário a parte de trás do equipamento, mantendo um uso de apenas um ponto de energia elétrica.		
2. Caso a licitante opte pela proposta de solução modular, deverão ser respeitadas todas as demais exigências, como no tocante a quantidade de portas, conectores, capacidade de expansão, e demais especificações;		
3. Não será aceito o uso de suportes ou adaptadores externos, para acoplamento do equipamento ao monitor.		
3. Em ambos os casos, “All in One ou Conjunto Modular”, o sistema deverá possuir ajuste de altura e inclinação;		
4. No caso de sistema modular, à exemplo do formato All in One, todo o conjunto deve ser mantido por uma única fonte de energia;		

DESCRIÇÃO	PARECER	OBSERVAÇÕES
5. O material do gabinete deve ser de estrutura livre de BFR e outros materiais tóxicos e/ou antiecológicos;		
6. O gabinete deve possuir acabamento interno composto de superfícies não cortantes;		
7. Deve possuir botão de liga/desliga e luz de indicação de computador ligado (power-on) em local visível e acessível do gabinete;		
8. Deve oferecer a possibilidade de, se demandado, aplicar logo oficial da **CONTRATANTE**, com área de impressão mínima de 3,00 x 2,72 cm, através de sistema de gravação direta como aplicação em laser, não sendo admitido o uso de adesivagem, serigrafias ou adaptações semelhantes. A gravação deverá ser feita apenas no gabinete do computador ou na parte traseira do monitor AIO, visando medidas de segurança;		
9. O gabinete deverá possuir fenda de encaixe padrão "Kensington" ou "Noble Wedge" para utilização de cabo de aço do mesmo tipo;		
10. No caso de conjunto modular, a unidade computacional deve possuir mecanismo de acoplagem e travamento no corpo ou na base do monitor principal, impossibilitando a remoção não autorizada da mesma;		
11. Deve ser fornecido com fonte de alimentação do mesmo fabricante e compatível com o equipamento, com potência suficiente para suportar todos os dispositivos internos em suas configurações máximas permitidas (Monitor principal, placa mãe, interfaces, unidades de armazenamento, memória RAM e demais componentes e periféricos);		
12. A fonte de alimentação deve possuir eficiência igual ou superior a 85%, com 50% da carga de trabalho e que implemente PFC (Power Factor Correction);		
13. A fonte deve possuir tensão de entrada 110 e 220 Volts de forma automática;		
14. Os cabos de conexão à rede elétrica devem seguir o padrão NBR 14136:2002;		
15. Admite-se o fornecimento de fonte externa para o atendimento deste item, desde que corresponda a todos os requisitos.		
14. SISTEMA OPERACIONAL E SOFTWARES COMPLEMENTARES		
1. Deve acompanhar o equipamento licença OEM do sistema operacional Microsoft Windows 11 Professional de 64 bits, ou versão mais recente, no idioma Português Brasil;		
2. O equipamento deve ser entregue com o Windows 11 Professional 64 bits, ou versão mais recente instalado;		
3. Cada equipamento deve incluir uma licença específica de software dedicado para:		
• Controle: Funções de bloqueio e desbloqueio remoto.		
• Inventário: Gestão detalhada de hardware e software do equipamento.		

DESCRIÇÃO	PARECER	OBSERVAÇÕES
• Rastreabilidade: Recursos de geolocalização integrados.		
4. O software de controle e monitoramento deve possuir a funcionalidade de persistência, garantindo a preservação do cliente do software e de suas funcionalidades, mesmo após a perda total de dados ou formatação do disco rígido, utilizando tecnologia de residência em firmware;		
5. A interface de controle e monitoramento dos equipamentos deve ser baseada em nuvem, sem a necessidade de licenças adicionais além daquelas atribuídas a cada equipamento;		
6. A licença do software dedicado deve ter cobertura mínima equivalente ao período de garantia do equipamento, de 60 (sessenta) meses, e deve estar plenamente operacional a partir da aceitação definitiva do equipamento pela CONTRATANTE;		
7. Os equipamentos poderão ser entregues com imagem de instalação do sistema operacional e softwares customizada e previamente fornecida pela **CONTRATANTE**, conforme especificado no Termo de Referência.		
15. COMPATIBILIDADE		
1. Deve ser apresentado o certificado de compatibilidade dos equipamentos com o sistema operacional Windows 11 x64 obtido junto à Microsoft. Deverá constar no Microsoft Hardware Compatibility List (HCL) para o sistema operacional exigido e ofertado. 1. A comprovação da compatibilidade será efetuada pela apresentação do documento *Hardware Compatibility Test Report* emitido especificamente para o modelo no sistema operacional ofertado, ou pela indicação no site da Microsoft;		
2. O equipamento deverá possuir certificado de homologação comprovando a compatibilidade do mesmo com, pelo menos, uma distribuição de Linux. A comprovação da compatibilidade será efetuada pela apresentação de documento emitido especificamente para o modelo ofertado;		
3. O equipamento, na configuração ofertada, deve possuir certificado de conformidade contra incidentes elétricos e de combustão dos materiais (IEC/EN 60950) e de imunidade eletromagnética (IEC/EN 61000), comprovado através de certificados ou do relatório de avaliação de conformidade nos moldes da portaria 170/2012 vigente do INMETRO, ou similar Internacional.		
16. OUTROS REQUISITOS		
1. Todas as partes do equipamento (gabinete, base, teclado e mouse) devem ter coloração neutra em gradações de preto ou prata, mantendo o padrão e cor;		
2. O equipamento deverá ser novo, partes e peças, de primeiro uso, que deverão ser acondicionados em embalagem individual adequada, garantindo a máxima proteção durante o transporte e a armazenagem;		
3. Informar marca e modelo dos componentes utilizados na solução e apresentar prospecto com as características técnicas do equipamento e da placa mãe, processador, memórias, interfaces de rede, fonte de alimentação, unidade de armazenamento, mouse e teclado, incluindo especificação de marca, modelo, e outros elementos que de forma inequívoca identifiquem e constatem as configurações, possíveis expansões e upgrades, comprovando-os através de certificados, manuais técnicos, folders e demais literaturas técnicas editadas pelos fabricantes;		

DESCRIÇÃO	PARECER	OBSERVAÇÕES
4. Todos os equipamentos deverão ser entregues idênticos, ou seja, todos os componentes externos e internos deverão ter os mesmos modelo e marca;		
5. O equipamento proposto deverá estar em linha de produção na data da proposta, com todas as funcionalidades exigidas neste Termo plenamente disponíveis durante toda a vigência do contrato;		
6. Não serão aceitos produtos descontinuados por seus fabricantes, não devendo constar em listas de end-of-sale, end-of-support ou end-of-life do fabricante, ou seja, não poderão ter previsão de descontinuidade de fornecimento, suporte ou vida;		
7. O equipamento em pleno funcionamento deve atender à norma NBR 10152, quanto à emissão de ruído ambiente em escritórios de atividades diversas, conforme laudo técnico gerado por entidade especializada, que deverá acompanhar a proposta;		
8. Deverá ter compatibilidade eletromagnética e de radiofrequência IEC 61000 comprovado através de certificado ou relatório de avaliação de conformidade emitido por órgão credenciado pelo INMETRO ou internacional equivalente;		
9. Deverá ter compatibilidade com o padrão DMI 2.0 (Desktop Management Interface) ou mais recente da DMTF (Desktop Management Task Force), comprovado através de documentação expedida pelo fabricante do equipamento ou comprovação de que o fabricante do equipamento é membro do consórcio DMTF listado em uma das categorias BOARD ou LEADERSHIP;		
10. Deverá ter compatibilidade com a norma TPM Specification Version 2.0 especificadas pelo TCG (Trsted Computing Group), devendo o fabricante ser membro de uma das categorias listadas no site http://www.trustedcomputinggroup.org/about_tcg/tcg_members;		
11. Deverá ter compatibilidade com EPEAT na nova categoria Bronze, comprovada através de atestados ou certidões que mostrem que o equipamento é aderente ao padrão de eficiência energética EPEAT, emitido por instituto credenciado junto ao INMETRO ou equivalente internacional. 1. Será admitida como comprovação também, a indicação que o equipamento consta no site www.epeat.net na nova categoria Bronze;		
12. Não deverão conter substâncias perigosas como mercúrio (Hg), chumbo (Pb), cromo hexavalente (Cr(VI)), cádmio (Cd), bifenil polibromados (PBBs), éteres difenil-polibromados (PBDEs) em concentração acima da recomendada na diretiva RoHS (Restriction of Certain Hazardous Substances);		
13. Os equipamentos deverão pertencer à linha corporativa, não sendo aceitos equipamentos destinados ao uso da linha doméstica. 1. A comprovação deverá ser apresentada junto com a proposta;		
14. Não serão aceitos equipamentos que contenham lacres de violação de garantia por abertura, que inviabilizem a inspeção dos componentes a qualquer momento;		
15. **Garantia de 60 (sessenta) meses on-site**, para todos os itens que compõe a solução, prestado pelo fabricante ou pela assistência técnica autorizada do mesmo.		
SUBITEM 1.2: “MONITOR AUXILIAR 23,5 POL WIDESCREEN”		
1. TELA		
1. Deve ser de tecnologia IPS (In-Plane Switching) ou VA (Vertical Alignment);		

DESCRIÇÃO	PARECER	OBSERVAÇÕES
2. Tamanho de 23,5 polegadas widescreen, no mínimo;		
3. Resolução mínima de 1920x1080 a 60Hz, 16 milhões de cores;		
4. Deve possuir brilho mínimo de 250 cd/m² e contraste de 1000:1;		
5. Ângulo de visão mínimo de 170° horizontal e vertical;		
6. Deve possuir controle digital de brilho, contraste e posicionamentos vertical e horizontal;		
7. Deve apresentar ajustes mínimos de altura de 15 cm e funcionalidade de rotação Pivot de 90°.		
2. INTERFACES		
1. Possuir ao menos 2 (duas) portas de entrada de vídeo;		
2. Não importando os tipos de portas de entrada, deve acompanhar cabos que permitam conectar o monitor a equipamentos com portas de tipo HDMI 1.4 e DisplayPort; 1. Serão aceitos adaptadores, em adicional aos cabos originais, para contemplar a possibilidade de conexão às portas solicitadas no item acima.		
1. O equipamento deve possuir interface de montagem no padrão VESA 100 x 100mm;		
2. O acessório deve possibilitar minimamente os seguintes movimentos do monitor: 1. Rotação de 90º; 2. Elevação de 10cm; 3. Panorâmica de 90º; 4. Inclinação de -5º a 20º;		
4. OUTROS REQUISITOS		
1. Cor deve ser predominantemente a mesma da cor ofertada no item 1 "**MICROCOMPUTADOR All in One modular**";		
2. Possuir certificação de segurança UL ou IEC 60950;		
3. Possuir certificação de economia de energia EPA Energy Star, TCO 5.0 ou similar;		
4. Deve aceitar tensões de 110 e 220 Volts de forma automática;		
5. Deve acompanhar cabo de alimentação original do fabricante com conector de tomada elétrica no padrão brasileiro (NBR 14136:2002);		
6. O equipamento deverá vir acondicionado em embalagem individual adequada, garantindo a máxima proteção durante o transporte e a armazenagem;		
7. Os equipamentos não deverão conter substâncias perigosas como mercúrio (Hg), chumbo (Pb), cromo hexavalente (Cr(VI)), cádmio (Cd), bifenil polibromados (PBBs), éteres difenil-polibromados (PBDEs) em concentração acima da recomendada na diretiva RoHS - Restriction of Certain Hazardous Substances;		

3. Conclusão

O conjunto proposto é compatível com as especificações do Edital. Assim, equipe técnica **OPINA** pela aceitabilidade do produto ofertado.

É o parecer.

Manaus, 2 de julho de 2025.

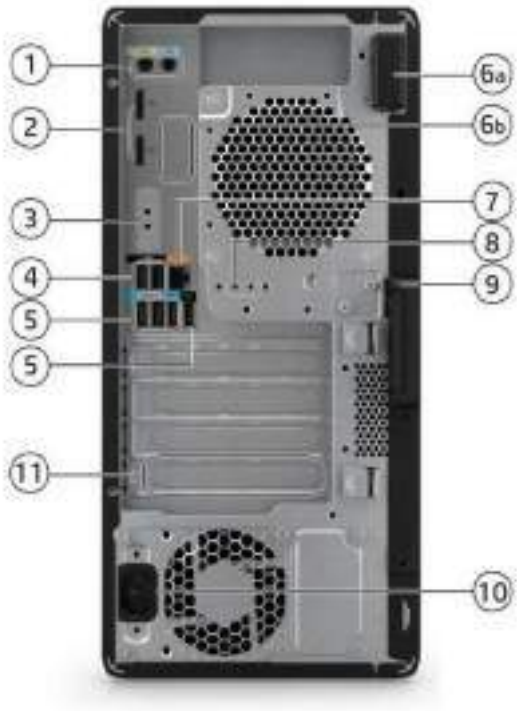
Overview

HP Z2 G9 Tower Workstation Desktop PC



front

1. HDD Activity LED
2. Power button
3. Universal audio jack (with CTIA & OMTP headset support)
4. (2) USB-A 10Gbps ports (1 charge port supports up to 5V/2.1A)
5. (2) USB-A 10Gbps rate ports
6. (1) USB-C® 20Gbps port (optional, charge supports up to 5V/3A)
7. SD card reader 4.0 (optional)
8. Slim ODD bay
9. External 5.25" bay

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 830

Overview

rear

1. (1) Audio Line-in jack
   (1) Audio Line-out jack
2. (2) DisplayPort 1.4 ports
3. Flex I/O module: choose one from the following:
   (1) DisplayPort 1.4, (1) HDMI 2.0b, (1) VGA, (1) Dual USB-A 5Gbps port, (1) USB-C® 10Gbps port (Power Delivery 15W, Alt Mode DisplayPort), (1) 2nd 1 GbE LAN, (1) Thunderbolt 3 with USB-C® / USB4 40Gbps * (cabled to PCIe AIC**) (1) 1Gbps Fiber LC NIC
4. (2) Hi-Speed USB-A 480Mbps port
5. (2) USB-A 10Gbps ports
   (1) USB-A 5Gbps port
   (1) Hi-Speed USB-A 480Mbps port
6. (1) WLAN Antenna (optional)
   a. Internal
   b. External
7. (1) 1Gb LAN
8. 2nd serial port (optional)
9. Hood lock (optional)
10. Power connector

*Maximum speed requires DisplayPort™ and PCIe aggregation.
**Thunderbolt support only in PCI-E slot4.
NOTE: Onboard Display support DP1.4/HBR2. Flex I/O module Display support DP1.4/HBR3. Resolution all support up to 5120x3200 24bpp @60Hz.

Form Factor Tower

Operating Systems Preinstalled:

- Windows 11 Pro - HP recommends Windows 11 Pro[2]
- Windows 11 Home - HP recommends Windows 11 Pro[2]
- Linux®-ready[5]
- Ubuntu®[4,5]

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 831

- Intel 12th generation processors will support and preinstall Ubuntu 20.02 and 20.04.
- Intel 13th generation processors support and preinstall Ubuntu 22.04 LTS

Web-supported only:

- Windows 10 Enterprise 64[2]

Supported Version:

- HP tested Windows 10, versions 20H2, 21H1, 21H2 and 22H2 on this platform. For testing information on newer versions of Windows 10, please see: https://support.hp.com/document/c05195282.
- Red Hat® Enterprise Linux® Workstation 8[6]
- SUSE Linux® Enterprise Desktop 15[6]
- Ubuntu®[4,5]
  - Intel 12th generation processors will support and preinstall Ubuntu 20.02 and 20.04.
  - Intel 13th generation processors support and preinstall Ubuntu 22.04 LTS

[2] Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows is automatically updated and enabled. High speed internet and Microsoft account required. ISP fees may apply and additional requirements may apply over time for updates. See http://www.windows.com.
[4] Not all features are available in all editions or versions of Ubuntu. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS to take full advantage of Ubuntu functionality. Ubuntu may be automatically updated. ISP fees may apply and additional requirements may apply over time for updates.
[5]A certified preloaded version of Ubuntu® 20.04 LTS is available from HP for this platform. Not all features are available in all editions or versions of Ubuntu. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS to take full advantage of Ubuntu functionality. Ubuntu may be automatically updated. ISP fees may apply, and additional requirements may apply over time for upgrades.
[6]For detailed OS/hardware support information for Linux, see:
http://www.hp.com/support/linux_hardware_matrix

NOTE: Your product does not support Windows 8 or Windows 7. In accordance with Microsoft's support policy, HP does not support the Windows® 8 or Windows 7 operating system on products configured with Intel® and AMD® 7th generation and forward processors or provide any Windows® 8 or Windows 7 drivers on http://www.support.hp.com. A full list of HP products and the Windows 10 versions tested is available on the HP support website. https://support.hp.com/us-en/document/c05195282

Processors Overview[1,3,4,5]

Intel 14th Generation Processors:

Intel® Core™ i5-14400 with Intel UHD Graphics (1.8 GHz E-core base frequency, 2.5 GHz P-core base frequency, up to 3.5 GHz E-core Max Turbo frequency, up to 4.7 GHz P-core Max Turbo frequency, 20 MB L3 cache, 6 P-cores and 4 E-cores, 16 threads)

Intel® Core™ i5-14500 with Intel UHD Graphics (1.9 GHz E-core base frequency, 2.6 GHz P-core base frequency, up to 3.7 GHz E-core Max Turbo frequency, up to 5.0 GHz P-core Max Turbo frequency, 24 MB L3 cache, 6 P-cores and 8 E-cores, 20 threads)

Intel® Core™ i5-14600 with Intel UHD Graphics (2.0 GHz E-core base frequency, 2.7 GHz P-core base frequency, up to 3.9 GHz E-core Max Turbo frequency, up to 5.2 GHz P-core Max Turbo frequency, 24 MB L3 cache, 6 P-cores and 8 E-cores, 20 threads)

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 832

Overview

Intel® Core™ i5-14600K with Intel UHD Graphics (2.6 GHz E-core base frequency, 3.5 GHz P-core base frequency, up to 4.2 GHz E-Core Max Turbo frequency, up to 5.3 GHz P-core Max Turbo frequency, 24 MB L3 cache, 6 P-cores and 8 E-cores, 20 threads)

Intel® Core™ i7-14700 with Intel UHD Graphics (1.5 GHz E-core base frequency, 2.1 GHz P-core base frequency, up to 4.2 GHz E-core Max Turbo frequency, up to 5.3 GHz P-core Max Turbo frequency, 33 MB L3 cache, 8 P-cores and 12 E-cores, 28 threads)

Intel® Core™ i7-14700K (3.4GHz P-Core base frequency, 2.5GHz E-Core base frequency, up to 4.3GHz E-Core Max Turbo frequency, up to 5.5 GHz P-core Max Turbo frequency, 33MB L3 cache, 8 P-cores and 12 E-cores, 28 threads)

Intel® Core™ i9-14900 (2GHz P-Core base frequency, 1.5GHz E-Core base frequency, up to 4.3GHz E-Core Max Turbo frequency, up to 5.4 GHz P-core Max Turbo frequency, 36MB L3 cache, 8 P-cores and 16 E-cores, 32 threads)

Intel® Core™ i9-14900K (3.2GHz P-Core base frequency, 2.4GHz E-Core base frequency, up to 4.4GHz E-Core Max Turbo frequency, up to 5.6 GHz P-core Max Turbo frequency, 36MB L3 cache, 8 P-cores and 16 E-cores, 32 threads)

Intel 13th Generation Processors:

Intel® Core™ i5-13400 (1.8 GHz E-core base frequency, 2.5 GHz P-core base frequency, up to 3.3 GHz E-core Max Turbo frequency, up to 4.6 GHz P-core Max Turbo frequency, 20 MB L3 cache, 6 P-cores and 4 E-cores, 16 threads)

Intel® Core™ i5-13500 (1.8 GHz E-core base frequency, 2.5 GHz P-core base frequency, up to 3.5 GHz E-core Max Turbo frequency, up to 4.8 GHz P-core Max Turbo frequency, 24 MB L3 cache, 6 P-cores and 8 E-cores, 20 threads)

Intel® Core™ i5-13600 (2.0 GHz E-core base frequency, 2.7 GHz P-core base frequency, up to 3.7 GHz E-core Max Turbo frequency, up to 5.0 GHz P-core Max Turbo frequency, 24 MB L3 cache, 6 P-cores and 8 E-cores, 20 threads)

Intel® Core™ i5-13600K (2.6 GHz E-core base frequency, 3.5 GHz P-core base frequency, up to 3.9 GHz E-core Max Turbo frequency, up to 5.1 GHz P-core Max Turbo frequency, 24 MB L3 cache, 6 P-cores and 8 E-cores, 20 threads)

Intel® Core™ i7-13700 (1.5 GHz E-core base frequency, 2.1 GHz P-core base frequency, up to 4.1 GHz E-core Max Turbo frequency, up to 5.1 GHz P-core Max Turbo frequency, 30 MB L3 cache, 8 P-cores and 8 E-cores, 24 threads)

Intel® Core™ i7-13700K (2.5 GHz E-core base frequency, 3.4 GHz P-core base frequency, up to 4.2 GHz E-core Max Turbo frequency, up to 5.3 GHz P-core Max Turbo frequency, 30 MB L3 cache, 8 P-cores and 8 E-cores, 24 threads)

Intel® Core™ i9-13900 (1.5 GHz E-core base frequency, 2.0 GHz P-core base frequency, up to 4.2 GHz E-core Max Turbo frequency, up to 5.2 GHz P-core Max Turbo frequency, 36 MB L3 cache, 8 P-cores and 16 E-cores, 32 threads)

Intel® Core™ i9-13900K (2.2 GHz E-core base frequency, 3.0 GHz P-core base frequency, up to 4.3 GHz E-core Max Turbo frequency, up to 5.4 GHz P-core Max Turbo frequency, 36 MB L3 cache, 8 P-cores and 16 E-cores, 32 threads)

Intel 12th Generation Processors:

Intel® Core™ i9-12900 with Intel® UHD Graphics (1.8 GHz E-core base frequency, 2.4 GHz P-core base frequency, up to 3.8 GHz E-core Max Turbo frequency, up to 5.0 GHz P-core Max Turbo frequency, up to 5.1 GHz with Intel® Turbo Boost Technology, 30 MB L3 cache, 8 P-cores and 8 E-cores, 24 threads)

Intel® Core™ i7-12700 with Intel® UHD Graphics (1.6 GHz E-core base frequency, 2.1 GHz P-core base frequency, up to 3.6 GHz E-core Max Turbo frequency, up to 4.8 GHz P-core Max Turbo frequency, up to 4.9 GHz with Intel® Turbo Boost Technology, 25 MB L3 cache, 8 P-cores and 4 E-cores, 20 threads)

Intel® Core™ i5-12500 with Intel® UHD Graphics (3.0 GHz P-core base frequency, up to 4.6 GHz P-core Max Turbo frequency, 18 MB L3 cache, 6 P-cores, 12 threads)

Intel® Core™ i3-12100 with Intel® UHD Graphics (3.3 GHz P-core base frequency, up to 4.3 GHz P-core Max Turbo frequency, 12 MB L3 cache, 4 P-cores, 8 threads)

[1] Multicore is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a measurement of higher performance.

[3] Intel Turbo Boost performance varies depending on hardware, software and overall system configuration. See http://www.intel.com/technology/turboboost for more information.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 833

Overview

[4] Intel vPro® requires Windows 10 Pro 64 bit or higher, a vPro supported processor, vPro enabled chipset, vPro enabled wired LAN and/or Wi-Fi 6E WLAN and TPM 2.0. Some functionality requires additional 3rd party software in order to run. Features of vPro® Essentials and Enterprise vary. See http://intel.com/vpro

[5] Memory will run at 4400 speed (MT/s) in 2DPC within 1DIMM population; memory will run at 4000 speed (MT/s) in 2DPC within 2DIMM of 1 Rank population and memory will run at 3600 speed (MT/s) in 2DPC within 2DIMM of 2 Rank population

Color	Black
Convertibility	No
Expansion Slots (see system board section for more details)	Slot 1: PCIe Gen5 x16 Slot 2: PCIe Gen3 x1 - with x4 open end Connector Slot 3: PCIe Gen3 x4 - with x16 Connector Slot 4: PCIe Gen3 x4 with open end connector
Expansion Bays (see storage section for more details)	(2) Internal 3.5" bays (1) External 5.25" bay (1) Internal 2.5" bay (for SSD only) (1) Dedicated 9.5mm slim optical disk drive bay
Front I/O	(2) USB-A 10Gbps ports (1 charge port supports up to 5V/2.1A), (2) USB-A 10Gbps ports, (1) USB-C 20Gbps eport (charge supports up to 5V/3A, optional), (1) SD card reader (optional), (1) universal audio jack
Internal I/O [5]	(1) Hi-Speed USB 480Mbps header for SD card reader (1) serial port available with header (1) serial and PS/2 available with header
Rear I/O	(2) DisplayPort 1.4 ports, (1) Audio Line out, (1) Audio Line in, (1) 1GbE LAN, (3) Hi-Speed USB 480Mbps ports, (2) USB-A 10Gbps ports, (1) USB-A 5Gbps port, (1) serial (optional), (1) Flex I/O port (VGA, HDMI 2.0b, DisplayPort 1.4, USB-C® 10Gbps port (Power Delivery 15W, Alt Mode Display Port), (1) Dual USB-A 5Gbps port, (1) 2nd 1GbE LAN, (1) Thunderbolt 3 with USB4 USB-C® 40Gbps (cabled to PCIe AIC)*, (1) 1Gbps Fiber LC NIC
Optional I/O	Flex IO* – choose one of the following options: (1) DisplayPort™ 1.4 port, (1) HDMI 2.0b, (1) VGA,(1) 2nd 1GbE LAN, (1) 1Gbps Fiber LC NIC, (1) Dual USB-A 5Gbpsport ,(1) USB -C® 10Gbps port (15W USB Power Delivery, Alt Mode DisplayPort™), (1) Thunderbolt™ 3 with USB4 USB-C® 40Gbps port (cabled to PCIe® AIC**); Front – (1) USB-C® 20Gbps port (charging), (1) SD card reader; Front – choose one of the following options: (1) USB-C ® 20Gbps (charging), (1) SD 4.0 card reader Rear –(1) serial; *About Thunderbolt compatibility, please refer to the FAQ of Thunderbolt community. https://www.thunderbolttechnology.net/tech/faq **Flex IO port and PCIe slot 4 will be occupied when Thunderbolt is installed.
Interfaces Supported	SD card reader (optional)
On-board RAID Support	SATA and NVME RAID 0 Striped Array SATA RAID and NVME RAID 1 Mirror Array

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 834

Overview

Chassis Dimensions (H x W x D)	H: 14" [356mm] W: 6.7" [169mm] D: 15.2" [385mm]
Packaged Dimensions	H: 20.39" (518mm) W: 11.61" (295mm) D: 19.29" (490mm)
Rack Dimensions	4U
Weight	Exact weights depend upon configuration (System weight only). Starting at 6.2kg (13.7lbs.)
Temperature	Operating: 5° to 35° C (40° to 95° F) Above 1524 m (5,000 feet) altitude, the maximum operating temperature is reduced by 1° C (1.8° F) for every 305 m (1,000 feet) increase in elevation Non-operating: -40° to 60° C (-40° to 140° F) Maximum rate of change: 10°C/hr
Humidity	Operating: 8% to 85% RH, non- condensing, 35° C maximum wet bulb Non-operating: 8% to 90% relative humidity, non-condensing, 35° C maximum wet bulb
Maximum Altitude (non-pressurized)[6]	Operating (with Rotational Hard Drives): 3,048 m (10,000 feet) Operating (with only Solid-State Drives): 5,000 m (16,404 feet) Non-operating: 12,192 m (40,000 feet) Maximum operating temperature is reduced as altitude increases. See Temperature for details.
Power Supply	700W wide-ranging, active Power Factor Correction, 92% Efficiency with two 6+2 graphics power connectors. 500W wide-ranging, active Power Factor Correction, 90% Efficiency. 450W wide-ranging, active Power Factor Correction, 90% Efficiency. 350W wide-ranging, active Power Factor Correction, 92% Efficiency. **NOTE:** The Power Supply Efficiency Report for the 700W 92% Efficiency, 500W 90% Efficiency, 450W 90% Efficiency and 350W 92% Efficiency Power Supply may be found at the following links: 700W PSU: https://www.plugloadsolutions.com/80PlusPowerSuppliesDetail.aspx?id=0&type=2 500W PSU: LiteOn 500W PSU Efficiency Report Delta 500W PSU Efficiency Report 450W PSU: https://www.plugloadsolutions.com/80PlusPowerSuppliesDetail.aspx?id=0&type=2 350W PSU: AcBel 350W PSU (SFF) Efficiency Report AcBel 350W PSU (Custom) Efficiency Report Delta 350W PSU Efficiency Report
Backup Devices	For a complete listing of compatible DAT tape drives, LTO tape drives and RDX Removable Disk Backup System offerings, please visit http://www.hp.com/go/connect
Chipset	Intel® W680 chipset
Memory	4 DIMM slots supporting up to 192GB non-ECC or up to 128 GB ECC, DDR5 unbuffered DIMM memory. Max memory speed will run at 4400 MT/s based on system configuration. See Supported Components / Memory Section for details.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 835

Supported Components

SATA Hard Drives		Factory Configured	Option Kit	Option Kit Part Number
	1TB SATA 7200 rpm 6Gb/s 3.5" HDD (Enterprise Class)	Y	Y	W0R10AA
	2TB SATA 7200 rpm 6Gb/s 3.5" HDD (Enterprise Class)	Y	Y	2Z274AA
	4TB SATA 7200 rpm 6Gb/s 3.5" HDD (Enterprise Class)	Y	Y	K4T76AA
	8TB SATA 7200 rpm 6Gb/s 3.5" HDD (Enterprise Class)	Y	Y	2Z273AA
	12TB SATA 7200 rpm 6Gb/s 3.5" HDD (Enterprise Class)	Y	Y	5S461AA

NOTE: For internal bay install, HDD option kits require separate purchase of 6Z9U6AA HP Z2 Tower HDD Cable Kit. For external bay install, HDD options kits require separate purchase of 6Z9U6AA HP Z2 Tower HDD Cable Kit & NQ099AA HP Optical Bay HDD Mounting Bracket.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 837

Supported Components

AMD Radeon™ RX 6700 XT 12GB*	Y	Y	4C203AA	1

NOTE: Z2 G9 Tower with 700W PSU can support up to a 250W professional graphics card from HP, either factory-configured or added via after-market option, and can support up to 320W total graphics power when graphics is factory-configured.
Note 1: When dual graphics is configured the 450W and 500W base units will require the AMO HP Z2 TWR Dual Front Fan Kit part number 4N007AA; One storage device configuration for higher than 75W graphics cards (T1000 and up)
* Requires 700W chassis.

Memory

	Factory Configured	Option Kit	Option Kit Part Number	Support Notes
HP 8GB (1x8GB) DDR5-4800 nECC UDIMM	Y	Y	4M9X9AA	
HP 16GB (1x16GB) DDR5-4800 nECC UDIMM	Y	Y	4M9Y0AA	
HP 16GB (1x16GB) DDR5-4800 ECC UDIMM	Y	Y	4M9Y1AA	1
HP 32GB (1x32GB) DDR5-4800 nECC UDIMM	Y	Y	4M9Y2AA	
HP 32GB (1x32GB) DDR5-4800 ECC UDIMM	Y	Y	4M9Y3AA	1
HP 48GB (1x48GB) DDR5-5600 UDIMM NECC	Y	Y	8F070AA	

NOTE 1: ECC memory is supported
GENERAL NOTE: Two channels of DDR5 memory are supported. To realize full performance at least one DIMM must be inserted into each channel.
Though the memory modules can run up to 4800MHz, the current platform will support maximum memory speed of 4400MHz.

The system speed will be determined by a number of key factors:

Module Configuration	Description of configuration	Max Memory Speed (Actual Memory speed is dependent on CPU)
Single DIMM per channel	Configurations that contain only one or two DIMM modules with DIMMs only in the black slots	4400MHz
Two single ranked DIMMs in a channel	Configurations with 3 or 4 single ranked DIMMs (8GB and 16GB) installed in a system. Memory speed may also vary depending on vendor module mix.	4000MHz
Two dual ranked DIMMs in a channel	Configurations with 3 or 4 dual ranked DIMMs (32GB) installed in a system	3600MHz

When more than one memory slot is populated, symmetric configurations are required for 2 DIMMs per channel. Mix of different part numbers or mix of single and dual ranks within a channel is not allowed.

Optical and Removable Storage

	Factory Configured	Option Kit	Option Kit Part Number
HP DX175 Removable HDD Frame/Carrier	N	Y	1ZX71AA
HP DX175 Removable HDD Spare Carrier	N	Y	1ZX72AA

[3] Intel BE200 with external antenna support Wi-Fi 6E/7
*Intel I350-T4 4-port GbE NIC is an After Market Option only.
**Wi-Fi 6E (802.11ax) requires a Wi-Fi 6E router, sold separately, to function in the 6GHz band. Availability of public wireless access points limited. Wi-Fi 6E is backwards compatible with prior 802.11 specs. And available in countries where Wi-Fi 6E is supported.
***Intel AX211 and BE200 must be configured at time of purchase. Not available as an After Market Option.
****Wi-Fi 7 (802.11BE) functionality requires Windows 11 24H2, select Intel® 14th processor, and a Wi-Fi 7 router, sold separately. Wi-Fi 7 is backwards compatible with prior 802.11 specs. Available in countries where Wi-Fi 7 is supported.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 839

Supported Components

NOTES:
The integrated network connection is required to support Intel® vPro® Technology.

If AMT is provisioned, then network teaming with the integrated LAN port is not possible.

“Gigabit” Ethernet indicates compliance with IEEE standard 802.3ab for Gigabit Ethernet, and does not connote actual operating speed of 1 Gb/sec. For high-speed transmission, connection to a Gigabit Ethernet server and network infrastructure is required.

Supported Components

Term you may either (a) purchase a renewal license for the HP Wolf Pro Security Edition from HP.com, HP Sales or an HP Channel Partner, or (b) continue using the standard versions of HP Sure Click and HP Sure Sense at no additional cost with no future software updates or HP Support. Notwithstanding the foregoing, the license shall expire no later than one year after the fixed term of the subject license ends.

Operating Systems

Windows 11 Pro – HP recommends Windows 11 Pro[2]

Windows 11 Home – HP recommends Windows 11 Pro[2]

Linux®-ready[5]

Ubuntu®[4,5]

- Intel 12th generation processors will support and preinstall Ubuntu 20.02 and 20.04.
- Intel 13th generation processors support and preinstall Ubuntu 22.04 LTS

[2] Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows is automatically updated and enabled. High speed internet and Microsoft account required. ISP fees may apply and additional requirements may apply over time for updates. See http://www.windows.com.

[4] Not all features are available in all editions or versions of Ubuntu. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS to take full advantage of Ubuntu functionality. Ubuntu may be automatically updated. ISP fees may apply and additional requirements may apply over time for updates.

[5]For detailed Linux® OS/hardware support information, see: http://www.hp.com/support/linux_hardware_matrix

NOTE: Your product does not support Windows 8 or Windows 7. In accordance with Microsoft's support policy, HP does not support the Windows® 8 or Windows 7 operating system on products configured with Intel® and AMD® 7th generation and forward processors or provide any Windows® 8 or Windows 7 drivers on http://www.support.hp.com. A full list of HP products and the Windows 10 versions tested is available on the HP support website. https://support.hp.com/us-en/document/c05195282

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 843

HP BIOS

Additional HP BIOS Features:

- Power-On password – Helps prevent an unauthorized user from powering on the system.
- Administrator password – Also known as the BIOS Setup password, this helps prevent unauthorized changes to the system configuration. If the administrator password is not known, the BIOS cannot be updated and changes cannot be made to BIOS settings using BIOS Setup or under the OS.
- S4/S5 Maximum Power Savings setting supports EU Lot6 requirement and allows the computer to power down below 0.5W in S4/S5 (when turned off). When S4/S5 Maximum Power Savings feature is enabled below features are turned off:
  - -Power to expansion connectors / slots
  - -Most Wake events other than power buttons and WOL(Wake on LAN supported by embedded Lan controller under S4/S5 Maximum Power Saving Enabled)
  - -USB charging ports

HP Sure Start Gen7 Start

- BIOS Integrity checking – Sure Start protection ensures that only trusted BIOS code is executed and not rootkits, viruses and malware. Verification is done upon boot up, shutdown and while the system is on.
- Sure Start is set by default to automatically repair the BIOS if corrupted or compromised but is policy driven for better manageability. Start is set by default to automatically repair the BIOS if corrupted or compromised but is policy driven for better manageability.
- Protecting beyond BIOS – Integrity checking and repair is extended to other data that should be protected such as network configuration parameters, platform specific information (i.e. system IDs), secure boot credentials, and other code the system needs to boot.
- Audit enabled – System Audit via Sure Start Event Logs capture data such as incident, repair date and time for troubleshooting and investigating

NOTE: HP Sure Start Gen7 is available on HP Workstation products equipped with Intel® 12th generation processors.

HP Performance Control Modes

HP Z Desktop Workstations offers Performance Control Modes in the F10 BIOS menu. Z2 G9 offers Quiet Mode, Performance Mode and High-Performance Mode. HP recommends using High Performance Mode unless you have concerns about acoustics in an open office environment. Customers can get up to 41% performance improvements using High Performance Mode over Performance Mode*. High Performance Mode is configured as default from the factory.

How to Set HP Performance Control Modes in HP F10 BIOS Menu

In the F10 BIOS Menu, the setting titled “Performance Control” is adjustable to High Performance Mode, Performance Mode or Quiet Mode. These modes are choice points for performance and acoustic trade-offs based on user needs or recommended balanced conditions in performance and noise optimization.

At startup, push the F10 key while system is booting to get to the BIOS Menu.
Go to → Advanced -> System Options ->scroll down and choose “Performance Control”

Set the Performance Mode you desire and then go back to Main->Save Changes and Exit -> Yes
The machine will restart in the mode you’ve chosen.

How to change Performance Modes in HP Performance Advisor software?

Select BIOS Settings -> Advanced -> System Options -> Performance Controls

The machine will restart in the mode you’ve chosen.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 844

You can change these modes anytime you prefer to prioritize acoustics (Quiet Mode), want a balance between performance and acoustics (Performance Mode) or prefer to prioritize performance (High Performance Mode).

For more information on performance control modes, please see the white paper called, HP Performance Control Modes for Z Desktop Workstations.

*Compared to Performance Mode. Performance improvement based on Z2 Tower G9 with 64GB of memory, 1TB NVMe, Windows 11 22H2 OS, RTX A4000, i7-14700 CPU using Blender OpenData CPU Render and Arnold 2023 CPU multi-core benchmarking.

HP Client Security Manager Gen 7[4]
Hood Sensor Optional Kit

[1] HP Performance Advisor Software - –P Performance Advisor is ready to help you get the most out of your HP Workstation from day one—and every day after. Learn more or download at: http://hp.com/PerformanceAdvisor

[2] HP Driver Packs not preinstalled, however available for download at http://www.hp.com/go/clientmanagement.

[3] HP Manageability Integration Kit can be downloaded from http://www8.hp.com/us/en/ads/clientmanagement/overview.html

[4] HP Client Security Manager Gen7 requires Windows and is available on the select HP PCs.

[6] HP Password Manager requires Internet Explorer or Chrome or FireFox. Some websites and applications may not be supported. User may need to enable or allow the add-on / extension in the internet browser.

[7] Microsoft Defender Opt in and internet connection required for updates.

[8] HP Sure Start Gen 7 is available on select HP PCs and workstations. See product specifications for availability.

[9] HP Sure Run Gen5 is available on select Windows 11 based HP Pro, Elite and Workstation PCs with select Intel® or AMD processors

[10] HP Sure Recover Gen4 is available on select HP PCs and requires Windows 10 and an open network connection. You must back up important files, data, photos, videos, etc. before using HP Sure Recover to avoid loss of data. Network based recovery using Wi-Fi is only available on PCs with Intel Wi-Fi Module

[11] HP Sure Click requires Windows 10 Pro or higher or Enterprise. See https://bit.ly/2PrLT6A_SureClick for complete details.
[12] HP Sure Sense requires Windows 11 Pro or Enterprise and supports Microsoft Internet Explorer, Google Chrome™, and Chromium™. Supported attachments include Microsoft Office (Word, Excel, PowerPoint) and PDF files in read only mode, when Microsoft Office or Adobe Acrobat are installed.
[13] HP BIOSphere Gen6 features may vary depending on the platform and configurations.
[14] HP Support Assistant requires Windows and Internet access.
[16] Secure Erase - –or the methods outlined in the National Institute of Standards and Technology Special Publication 800-88 “C“ear” ”anitation method. HP Secure Erase does not support platforms with Intel® Optane.
[17] HP Sure Admin requires Windows 11, HP BIOS, HP Manageability Integration Kit from http://www.hp.com/go/clientmanagement and HP Sure Admin Local Access Authenticator smartphone app from the Android or Apple store.
[18] HP Wolf Pro Security Edition is available preloaded on select SKUs, and, depending on the HP product purchased, includes a license with a term length communicated to you at purchase and in your order confirmation email. The HP Wolf Pro Security Edition software is licensed under the license terms of the HP Wolf Security Software - End-User license Agreement (EULA) that can be found at: https://support.hp.com/us-en/document/ish_3875769-3873014-16 as that EULA is modified by the following: 7. Term. Unless otherwise terminated earlier pursuant to the terms contained in this EULA, the license for the HP Wolf Pro Security Edition is effective upon 4 months after the date the HP Product was shipped by HP and will continue for the term communicated to you at purchase and in your order confirmation email (“Initial Term”). At the end of the Initial Term you may either (a) purchase a renewal license for the HP Wolf Pro Security Edition from HP.com, HP Sales or an HP Channel Partner, or (b) continue using the standard versions of HP Sure Click and HP Sure Sense at no additional cost with no future software updates or HP Support. Notwithstanding the foregoing, the license shall expire no later than one year after the fixed term of the subject license ends.
[22] HP Wolf Security for Business requires Windows 10 or higher, includes various HP security features and is available on HP Pro, Elite, RPOS and Workstation products. See product details for included security features

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 846

System Technical Specifications

System Board

System Board Form Factor	Customized PCB 36.056 x 25.130 mm (14.197 x 9.894 inch)
Processor Socket	Single LGA-1700
CPU Bus Speed	DMI Gen4
Chipset	Intel® PCH W680
Super I/O Controller	Nuvoton SIO21
Memory Expansion Slots	4 DDR5 memory slots
Memory Type Supported	DDR5, UDIMM (Unbuffered), ECC& non-ECC
Memory Modes	Non-Interleaved for single channel. Interleaved when both channels are populated.
Memory Speed Supported	3600MT/s to 4400MT/s DDR5, dependent on memory configuration[1]

[1]Though the memory modules can run up to 4800MHz, the current platform will only be able to support the maximum memory speed of 4400MHz.

The system speed will be determined by a number of key factors:

Module Configuration	Description of configuration	Max Memory Speed (Actual Memory speed is dependent on CPU)
Single DIMM per channel	Configurations that contain only one or two DIMM modules with DIMMs only in the black slots	4400MHz
Two single ranked DIMMs in a channel	Configurations with 3 or 4 single ranked DIMMs (8GB and 16GB) installed in a system	4000MHz
Two dual ranked DIMMs in a channel	Configurations with 3 or 4 dual ranked DIMMs (32GB) installed in a system	3600MHz

Memory Protection	ECC available on data
Maximum Memory	192GB
Memory Configuration (Supported)	8GB, 16GB, 32GB and 48GB non-ECC, 16GB and 32GB ECC unbuffered DIMMs are supported. ECC and non-ECC memory DIMMs cannot be mixed in the same system
PCI Express Connectors	(1) PCI Express Gen5 slot x16 mechanical/ x16 electrical (full height, full length) (1) PCI Express Gen3 slot x4 mechanical/ x1 electrical (full height, full length, open-ended) (1) PCI Express Gen3 slot x16 mechanical/ x4 electrical (full height, full length) (1) PCI Express Gen3 slot x4 mechanical/ x4 electrical (full height, full length, open-ended) (1) M.2 2280 Storage (PCIe Gen4 x4) (1) M.2 2280 Storage (PCIe Gen4 x4) (1) M.2 2280 Storage (PCIe Gen4 x4) (1) M.2 2230 WLAN (PCIe Gen3 x1+ Intel CNVi)

NOTE: The PCIe Gen5 x16 slot has validated and passed PCI-SIG electrical compliance test ONLY. HP does not guarantee and support any PCIe Gen5 cards available -in the open market. May or may not see performance reduced when device MRRS (Maximum Read Request Size) is 512Bytes and above. To reach highest Gen5 PCIe performance, Use the top bin DRAM module (e.g. 4400) to minimize the impact.

Supported Interfaces	**SATA**	Integrated (4) Serial ATA interfaces (6Gb/s SATA). RAID 0 and 1 supported. Factory integrated RAID for Microsoft Windows only.
	Integrated Graphics	Intel® UHD Graphics 730 (on Core i5-12400/i3-12300/i3-12100) processors); Intel® UHD Graphics 770 (on 13th and 14th gen Core i5/i7/i9 processors);

[1] Multicore is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a measurement of higher performance.

[3] Intel Turbo Boost performance varies depending on hardware, software and overall system configuration. See http://www.intel.com/technology/turboboost for more information.

[4] Intel vPro® requires Windows 10 Pro 64 bit or higher, a vPro supported processor, vPro enabled chipset, vPro enabled wired LAN and/or Wi-Fi 6E WLAN and TPM 2.0. Some functionality requires additional 3rd Party software in order to run. Features of vPro® Essentials and Enterprise vary. See http://intel.com/vpro

[5] Memory will run at 4400 speed (MT/s) in 2DPC within 1DIMM population; memory will run at 4000 speed (MT/s) in 2DPC within 2DIMM of 1 Rank population and memory will run at 3600 speed (MT/s) in 2DPC within 2DIMM of 2 Rank population

Declared Noise Emissions		**Sound Power** (LWAd, bels)	**Deskside Sound Pressure** (LpAm, decibels)
	Idle	3.58	18.2
	Hard drive Operating (Drive Random Seek)	3.78	20
	Hard drive Operating (Active mode)	4.05	20.9

Environmental Requirements	**Temperature**	Operating: 5° to 35° C (40° to 95° F) Non-operating: -40° to 60° C (-40° to 140° F) Maximum rate of change: 10°C/hr
	Humidity	Operating: 8% to 85% RH, non- condensing, 35° C maximum wet bulb Non-operating: 8% to 90% relative humidity, non-condensing, 35° C maximum wet bulb
	Maximum Altitude	Operating (with Rotational Hard Drives): 3,048 m (10,000 feet) Operating (with only Solid-State Drives): 5,000 m (16,404 feet) Non-operating: 12,192 m (40,000 feet) Maximum operating temperature is reduced as altitude increases. See Cooling for details.
	Dynamic	Shock Operating: ½-sine: 40g, 2-3ms (~62 cm/sec) Non-operating: ½-sine: 160 cm/s, 2-3ms (~105g) square: 422 cm/s, 20g Vibration Operating random: 0.5g (rms), 5-300 Hz, up to 0.0025g²/Hz Non-operating random: 2.0g (rms), 5-500 Hz, up to 0.0150 g²/Hz
	Cooling	Above 1524 m (5,000 feet) altitude, the maximum operating temperature is reduced by 1° C (1.8° F) for every 305 m (1,000 feet) increase in elevation, up to 3048 m (10,000 feet)
	NOTE:	System enduring or operating beyond the environmental requirement range is not recommended and may compromise system reliability permanently.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 854

System Technical Specifications

Physical Security and Serviceability

Access Panel	Tool-less Includes support information
Optical Drive	Tool-less, except for Screw-In carrier
Hard Drives	Tool-less, except for 2.5” ”bay
Expansion Cards	Tool-less
Processor Socket	Tool-less, except for the processor heatsink
Blue User Touch Points	Yes, on tool-less internal chassis mechanisms
Color-coordinated Cables and Connectors	Yes
Memory	Tool-less
System Board	Screw-In
Padlock Support	Yes (optional): Locks side cover and secures chassis from theft 0.22-in diameter padlock loop at rear of system
Cable Lock Support	Yes, Kensington Cable Lock (optional): Locks side cover and secures chassis from theft 3 mm x 7 mm slot at rear of system
Universal Chassis Clamp Lock Support	Yes (optional): Locks side cover and locks cables to chassis. Secures chassis from theft and allows multiple units to be chained together when used with optional cable Threaded feature at rear of system
Solenoid Lock and Hood Sensor	Yes (optional) The Solenoid Hood Lock eliminates the need for a physical key by making the chassis lockable through software and a password. You can also lock and unlock the chassis remotely over the network. The Sensor Kit detects when the access panel has been removed.
Rear Port Control Cover	No
CPUs and Heatsinks	A T-15 Torx or flat blade screwdriver is needed to remove the CPU heatsink before the CPU can be removed. CPU removal is tool-less
Internal Speaker	Yes
Power Supply Fans	70mm x 70mm x 25mm 4-wire PWM (non-serviceable)
Access Panel Key Lock	No
Integrated Chassis Handles	Rear Recessed Handle
Power Supply	Requires T15 Torx or flat blade screwdriver
PCI Card Retention	Yes, rear (all), middle (optional), front (full-length cards with extender)

Service, Support, and Warranty

On-site Warranty and Service[1]: Three-years, limited warranty and service offering delivers on-site, next business-day[2] service for parts and labor and includes free telephone support[3] 8am - –pm. Global coverage[2] ensures that any product purchased in one country and transferred to another, non-restricted country will remain fully covered under the original warranty and service offering. 24/7 operation will not void the HP warranty. Storage devices are not covered under warranty for 24/7 operation except for Enterprise class HDDs.

NOTE 1: Terms and conditions may vary by country. Certain restrictions and exclusions apply.
NOTE 2: On-site service may be provided pursuant to a service contract between HP and an authorized HP third-party provider, and is not available in certain countries. Global service response times are based on commercially reasonable best effort and may vary by country.
NOTE 3: Technical telephone support applies only to HP-configured, HP and HP-qualified, third-party hardware and software. Toll-free calling and 24x7 support service may not be available in some countries.
HP Care Pack Services extend service contracts beyond the standard warranties. Service starts from date of hardware purchase. To choose the right level of service for your HP product, use the HP Care Pack Services Lookup Tool at:

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 855

System Technical Specifications

http://www.hp.com/go/lookuptool. Service levels and response times for HP Care Packs may vary depending on your geographic location.

Certification and Compliance

Environmental Sustainability questions concerning:

- Ecolabels (EPEAT, TCO, etc.)
- ENERGY STAR, California Energy Commission (CEC)
- Compliance with Environmental legislation (EU ErP, China CECP, EU RoHS and other countries)
- Supply Chain Social Environmental Responsibility (SER) (conflict minerals; human rights, etc.)
- Product specific environmental features (material content, packaging content, recycled content, etc.)
- China Energy Label (CEL)
-

Please contact sustainability@hp.com

For country specific Regulatory Compliance approval documents or Regulatory and Safety questions concerning:

- Declarations of Conformity (for self-service, go to https://www.hp.com/uk-en/certifications/technical/regulations-certificates.html?jumpid=ex_r135_uk/en/any/corp/hpuk-mu_chev/certificates)
- GS Certificates
- Product Safety Certificates (UL, CB, BIS, etc.)
- EMC Certificates, Declarations of Conformity, or Certificates of Conformity (CE, FCC, ICES, etc.)
- CCC Certificates
- Ergonomics
-

Please contact techregshelp@hp.com

BIOS

BIOS 64-bit Services	BIOS supports 64-bit Operating systems only.
PCI 3.0 Support	Full BIOS support for PCI Express through industry standard interfaces.
ATAPI	ATAPI Removable Media Device BIOS Specification Version 1.0.
BBS	BIOS Boot Specification v1.01.(Not support)
WMI Support	WMI is Microsoft's'implementation of Web-Based Enterprise Management (WBEM) for Windows. WMI is fully compliant with the Distributed Management Task Force (DMTF) Common Information Model (CIM) and WBEM specifications.
BIOS Boot Spec 1.01+	Provides more control over how and from what devices the workstation will boot.(Not Support)
BIOS Power On	Users can define a specific date and time for the system to power on.
ROM Based Computer Setup Utility (F10)	Review and customize system configuration settings controlled by the BIOS.
System/Emergency ROM Flash Recovery with Video	Recovers system BIOS in corrupted Flash ROM.
Replicated Setup	Saves BIOS settings to USB flash device in human readable file (HpSetup.txt). BiosConfigurationUtility.exe utility can then replicate these settings on machines being deployed without entering Computer Configuration Utility (F10 Setup).
SMBIOS	System Management BIOS 3.4, for system management information.
Boot Control	Disables the ability to boot from removable media on supported devices.
Memory Change Alert	Alerts management console if memory is removed or changed.
Thermal Alert	Monitors the temperature state within the chassis. Three modes: • NORMAL - –ormal temperature ranges. • ALERTED - –xcessive temperatures are detected. Raises a flag so action can be taken to avoid

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 856

System Technical Specifications

	shutdown or provide for a smoother system shutdown. • SHUTDOWN - –xcessive temperatures are encountered. Automatically shuts down the computer without warning before hardware component damage occurs.
Remote ROM Flash	Provides secure, fail-safe ROM image management from a central network console.
ACPI (Advanced Configuration and Power Management Interface)	Allows the system to enter and resume from low power modes (sleep states). Enables an operating system to control system power consumption based on the dynamic workload. Makes it possible to place individual cards and peripherals in a low-power or powered-off state without affecting other elements of the system. Supports ACPI 6.0 for full compatibility with 64-bit operating systems.
Ownership Tag	A user-defined string stored in non-volatile memory that is displayed in the BIOS splash screen.
Remote Wakeup/Remote Shutdown	System administrators can power on, restart, and power off a client computer from a remote location.
Instantly Available PC (Suspend to RAM - –CPI sleep state S3)	Allows for very low power consumption with quick resume time.
Remote System Installation via F12 (PXE 2.1) (Remote Boot from Server)	Allows a new or existing system to boot over the network and download software, including the operating system.
ROM revision levels	Reports the system BIOS revision level in Computer Configuration Utility (F10 Setup). Version is available through an industry standard interface (SMBIOS and WMI) so that management SW applications can use and report this information.
System board revision level	Allows management SW to read revision level of the system board. Revision level is digitally encoded into the HW and cannot be modified.
Start-up Diagnostics (Power-on Self-Test)	Assesses system health at boot time with selectable levels of testing.
Auto Setup when new hardware installed	System automatically detects addition of new hardware.
Keyboard-less Operation	The system can be booted without a keyboard.
Localized ROM Setup	Common BIOS image supports System Configuration Utility (F10 Setup) menus in 15 languages with local keyboard mappings.
Asset Tag	The user or MIS to set a unique tag string in non-volatile memory.
Per-slot Control	Allows I/O slot parameters (option ROM enable/disable, bus latency) to be configured individually.
Adaptive Cooling	Control parameters are set according to detected hardware configuration for optimal acoustics.
Pre-boot Diagnostics	(Pre-video) critical errors are reported via beeps and blinks on the power LED.
UEFI Specification Revision	2.7B
ACPI	Advanced Configuration and Power Management Interface, Version 6.0
ATA (IDE)	AT Attachment 6 with Packet Interface (ATA/ATAPI-6), Revision 3b
CD Boot	“E“ Torito” ”ootable CD-ROM Format Specification Version 1.0
EDD	Enhanced Disk Drive Specification Version 1.1 BIOS Enhanced Disk Drive Specification Version 3.0(Not support)
EHCI	Enhanced Host Controller Interface for Universal Serial Bus, Revision 1.0
PCI	PCI Local Bus Specification, Revision 2.3 PCI Power Management Specification, Revision 1.1 PCI Firmware Specification, Revision 3.0, Draft .7
PCI Express	PCI Express Base Specification, Revision 2.0 PCI Express Base Specification, Revision 3.0 PCI Express Base Specification, Revision 4.0 PCI Express Base Specification, Revision 5.0 Ready
PMM	POST Memory Manager Specification, Version 1.01

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 857

Social and Environmental Responsibility

Eco-Label Certifications & Declarations

This product is low halogen except for configurations that include HP Z Turbo Quad Pro PCIe TLC SSD, CRU QX 428 & QX448 removable storage frames, ConnectX-6 DX Amphenol 10 & 25 Gb Transceivers, Broadcom 5720-2P NIC Card, power cords, cables, and peripherals. Service parts obtained after purchase may not be Low Halogen.

This product has received or is in the process of being certified to the following approvals and may be labeled with one or more of these marks:

- IT ECO declaration
- US ENERGY STAR®
- US Federal Energy Management Program (FEMP)
- EPEAT® Gold with Climate+ registered. See www.epeat.net for registration status and tier levels by country
- TCO Certified configurations available
- China Energy Conservation Program (CECP)
- China State Environmental Protection Administration (SEPA)
- Taiwan Green Mark
- Korea Eco-label
- Japan PC Green label*

Sustainable Impact Specifications

- Product Carbon Footprint (hp.com)
- Ocean-bound plastic in System FAN, CPU FAN and Speaker
- 50% post-consumer recycled plastic
- Low halogen PCAs
- Outside Box and corrugated cushions are 100% sustainably sourced and recyclable
- Molded Paper Pulp Cushion inside box is 100% sustainably sourced and recyclable
- 10% ITE-derived closed loop plastic
- Bulk packaging available
- Contains recycled metal
- 80 Plus® Gold power supplies available

System Configuration

The configuration used for the Energy Consumption and Declared Noise Emissions data for the Notebook model is based on a “Typically Configured Notebook”.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 858

System Technical Specifications

Energy Consumption (in accordance with US ENERGY STAR® test method)	115VAC, 60Hz	230VAC, 50Hz	100VAC, 50Hz
Normal Operation (Sort idle)	34.16 W	34.01 W	34.39 W
Normal Operation (Long idle)	32.77 W	32.74 W	33.15 W
Sleep	2.57 W	2.54 W	2.57 W
Off	0.67 W	0.68 W	0.67 W

NOTE:
Energy efficiency data listed is for an ENERGY STAR® compliant product if offered within the model family . HP computers marked with the ENERGY STAR® Logo are compliant with the applicable U.S. Environmental Protection Agency (EPA) ENERGY STAR® specifications for computers. If a model family does not offer ENERGY STAR® compliant configurations, then energy efficiency data listed is for a typically configured PC featuring a hard disk drive, a high efficiency power supply, and a Microsoft Windows® operating system.

Heat Dissipation*	115VAC, 60Hz	230VAC, 50Hz	100VAC, 50Hz
Normal Operation (Short idle)	116.8 BTU/hr	116.3 BTU/hr	117.6 BTU/hr
Normal Operation (Long idle)	112.1 BTU/hr	112 BTU/hr	113.4 BTU/hr
Sleep	8.8 BTU/hr	8.7 BTU/hr	8.8 BTU/hr
Off	2.3 BTU/hr	2.3 BTU/hr	2.3 BTU/hr

***NOTE:** Heat dissipation is calculated based on the measured watts, assuming the service level is attained for one hour.

Longevity and Upgrading

This product can be upgraded, possibly extending its useful life by several years. Upgradeable features and/or components contained in the

Spare parts are available throughout the warranty period and or for up to “5” years after the end of production.

Additional Information

- This product is in compliance with the Restrictions of Hazardous Substances (RoHS) directive - 2011/65/EC.
- This HP product is designed to comply with the Waste Electrical and Electronic Equipment (WEEE) Directive – 2002/96/EC.
- This product is in compliance with California Proposition 65 (State of California; Safe Drinking Water and Toxic Enforcement Act of 1986).
- This product is in compliance with the IEEE 1680 (EPEAT) standard at the Gold level, see www.epeat.net
- Plastics parts weighing over 25 grams used in the product are marked per ISO11469 and ISO1043.
- This product is 94.8% recycle-able when properly disposed of at end of life.

Packaging Materials

External:	PAPER/Corrugated	1214 g
	PAPER/Molded Pulp	890 g
Internal:	PLASTIC/Polyethylene low density - – DPE	40 g

The plastic packaging material contains at least 0.0% recycled content.

The corrugated paper packaging materials contains at least 62.5% recycled content.

System Technical Specifications

RoHS Compliance

HP Inc. complies fully with materials regulations. We were among the first companies to extend the restrictions in the European Union (EU) Restriction of Hazardous Substances (RoHS) Directive to our products worldwide through the HP GSE. HP has contributed to the development of related legislation in Europe, as well as China, India, and Vietnam.

We believe the RoHS directive and similar laws play an important role in promoting industry-wide elimination of substances of concern. We have supported the inclusion of additional substances—including PVC, BFRs, and certain phthalates—in future RoHS legislation that pertains to electrical and electronics products.

We met our voluntary objective to achieve worldwide compliance with the new EU RoHS requirements for virtually all relevant products by July 2013, and we will continue to extend the scope of the commitment to include further restricted substances as regulations continue to evolve.

To obtain a copy of the HP RoHS Compliance Statement, see HP RoHS position statement.

Material Usage

This product does not contain any of the following substances in excess of regulatory limits (refer to the HP General Specification for the Environment at http://www.hp.com/hpinfo/globalcitizenship/environment/supplychain/gen_specifications.html):

- Asbestos
- Certain Azo Colorants
- Certain Brominated Flame Retardants – may not be used as flame retardants in plastics
- Cadmium
- Chlorinated Hydrocarbons
- Chlorinated Paraffins
- Bis(2-Ethylhexyl) phthalate (DEHP)
- Benzyl butyl phthalate (BBP)
- Dibutyl phthalate (DBP)
- Diisobutyl phthalate (DIBP)
- Formaldehyde
- Halogenated Diphenyl Methanes
- Lead carbonates and sulfates
- Lead and Lead compounds
- Mercuric Oxide Batteries
- Nickel – finishes must not be used on the external surface designed to be frequently handled or carried by the user.
- Ozone Depleting Substances
- Polybrominated Biphenyls (PBBs)
- Polybrominated Biphenyl Ethers (PBBEs)
- Polybrominated Biphenyl Oxides (PBBOs)
- Polychlorinated Biphenyl (PCB)
- Polychlorinated Terphenyls (PCT)
- Polyvinyl Chloride (PVC) – except for wires and cables, and certain retail packaging has been voluntarily removed from most applications.
- Radioactive Substances
- Tributyl Tin (TBT), Triphenyl Tin (TPT), Tributyl Tin Oxide (TBTO)

System Technical Specifications

Packaging Usage

HP follows these guidelines to decrease the environmental impact of product packaging:

- Eliminate the use of heavy metals such as lead, chromium, mercury and cadmium in packaging materials.
- Eliminate the use of ozone-depleting substances (ODS) in packaging materials.
- Design packaging materials for ease of disassembly.
- Maximize the use of post-consumer recycled content materials in packaging materials.
- Use readily recyclable packaging materials such as paper and corrugated materials.
- Reduce size and weight of packages to improve transportation fuel efficiency.
- Plastic packaging materials are marked according to ISO 11469 and DIN 6120 standards.

End-of-life Management and Recycling

HP offers end-of-life HP product return and recycling programs in many geographic areas. To recycle your product, please go to: http://www.hp.com/go/reuse-recycle or contact your nearest HP sales office. Products returned to HP will be recycled, recovered or disposed of in a responsible manner.

The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard web site at: http://www.hp.com/go/recyclers. These instructions may be used by recyclers and other WEEE treatment facilities as well as HP OEM customers who integrate and re-sell HP equipment.

footnotes

- Percentage of ocean-bound plastic contained in each component varies by product
- Recycled plastic content percentage is based on the definition set in the IEEE 1680.1-2018 standard.
- External power supplies, WWAN modules, power cords, cables and peripherals excluded.
- 100% outer box packaging and corrugated cushions made from sustainably sourced certified and recycled fibers.
- Fiber cushions made from 100% recycled wood fiber and organic materials.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 871

Technical Specifications - Graphics

NVIDIA® T400 4GB Graphics	**Form Factor**	Single Slot, Low Profile (2.7" H x 6.1" L)
	Graphics Controller	Turing architecture Max Power: 30 Watts Cooling Solution: Active fan heatsink
	Bus Type	PCI Express 3.0 x16
	Memory	4GB GDDR6 Memory Memory Bandwidth: 80 GB/s Memory Interface: 64 bit
	Connectors	3x mDP (Mini DisplayPort™) 1.4 Connectors
	Max simultaneous displays	- 3x 3840 x 2160 @ 120Hz - 3x 5120 x 2880 @ 60Hz - supports Multi-Stream Transport (MST)
	Shading Architecture	DirectX 12 Shader Model 5.1
	Supported Graphics APIs	OpenGL 4.6 DirectX 12 Vulkan 1.2 API support includes: CUDA, OpenCL 1.2
	Available Graphics Drivers	Windows 10 64-bit Windows 11 64-bit Linux® 64-bit (selected Enterprise distributions) HP qualified drivers may be preloaded or available from the HP support Web site: http://welcome.hp.com/country/us/en/support.html
NVIDIA® T600 4GB Graphics*	**Form Factor**	Single Slot, Low Profile (2.7" H x 6.1" L)
	Graphics Controller	Turing architecture Max Power: 40 Watts Cooling Solution: Active fan heatsink
	Bus Type	PCI Express 3.0 x16
	Memory	4GB GDDR6 Memory Memory Bandwidth: 160 GB/s Memory Interface: 128 bit
	Connectors	4x mDP (Mini DisplayPort™) 1.4 Connectors
	Max simultaneous displays	- 4x 3840 x 2160 @ 120Hz - 4x 5120 x 2880 @ 60Hz - 2x 7680 x 4320 @ 60Hz - supports Multi-Stream Transport (MST)
	Shading Architecture	DirectX 12 Shader Model 5.1
	Supported Graphics APIs	OpenGL 4.6 DirectX 12 Vulkan 1.2 API support includes: CUDA, OpenCL 1.2
	Available Graphics Drivers	Windows 10 64-bit Windows 11 64-bit Linux® 64-bit (selected Enterprise distributions)

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 872

		HP qualified drivers may be preloaded or available from the HP support Web site: http://welcome.hp.com/country/us/en/support.html
		*May go End of Life in late 2022
AMD® Radeon™ RX 6400 4GB Graphics	**Form Factor**	Single slot, Low Profile (2.8" H x 6.3" L) Weight: 155g
	Graphics Controller	Radeon™ RX 6400 Max Power: 53W Cooling Solution: Active axial fan Architecture: RDNA™ 2
	Bus Type	PCI Express x4 Gen4
	Memory	Size: 4GB GDDR6 Interface: 64-bit Bandwidth: up to 128 GB/s
	Connectors	DP (DisplayPort™) 1.4 + HDMI 2.1
	Max simultaneous displays	- up to 4x 5120 x 2880 x 24 bpp @ 60Hz
	Shading Architecture	Microsoft DirectX 12 Shader Model 5.1
	Supported Graphics APIs	OpenGL® 4.6 DirectX® 12 Ultimate Vulkan™ 1.1 API support includes: OpenCL™ 2.2
	Available Graphics Drivers	Microsoft Windows 10 64-bit, Windows 11 64-bit HP qualified drivers may be preloaded or the latest prosumer graphics drivers are available from the AMD.com
	Notes	This is a Prosumer or Consumer graphics card, and not a Professional graphics card. As such, it does not have formal professional application validation, but is intended per AMD to function properly for game development, real-time engine, and many prosumer application workloads. Customers using Prosumer or Consumer graphic cards with axial fan cooling solutions are likely to experience higher acoustics in comparison with Professional graphic cards that use blower fan cooling.
NVIDIA® T1000 4GB Graphics	**Form Factor**	Single Slot, Low Profile (2.7" H x 6.1" L)
	Graphics Controller	Turing architecture Max Power: 50 Watts Cooling Solution: Active fan heatsink
	Bus Type	PCI Express 3.0 x16
	Memory	4GB GDDR6 Memory Memory Bandwidth: 160 GB/s Memory Interface: 128 bit
	Connectors	4x mDP (Mini DisplayPort™) 1.4 Connectors

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 873

Technical Specifications - Graphics

	Max simultaneous displays	- 4x 3840 x 2160 @ 120Hz - 4x 5120 x 2880 @ 60Hz - 2x 7680 x 4320 @ 60Hz - supports Multi-Stream Transport (MST)
	Shading Architecture	DirectX 12 Shader Model 5.1
	Supported Graphics APIs	OpenGL 4.6 DirectX 12 Vulkan 1.2 API support includes: CUDA, OpenCL 1.2
	Available Graphics Drivers	Windows 10 64-bit Windows 11 64-bit Linux® 64-bit (selected Enterprise distributions) HP qualified drivers may be preloaded or available from the HP support Web site: http://welcome.hp.com/country/us/en/support.html
NVIDIA® T1000 8GB Graphics	**Form Factor**	Single Slot, Low Profile (2.7” H x 6.1” L)
	Graphics Controller	Turing architecture Max Power: 50 Watts Cooling Solution: Active fan heatsink
	Bus Type	PCI Express 3.0 x16
	Memory	8GB GDDR6 Memory Memory Bandwidth: 160 GB/s Memory Interface: 128 bit
	Connectors	4x mDP (Mini DisplayPort™) 1.4 Connectors
	Max simultaneous displays	- 4x 3840 x 2160 @ 120Hz - 4x 5120 x 2880 @ 60Hz - 2x 7680 x 4320 @ 60Hz - supports Multi-Stream Transport (MST)
	Shading Architecture	DirectX 12 Shader Model 5.1
	Supported Graphics APIs	OpenGL 4.6 DirectX 12 Vulkan 1.2 API support includes: CUDA, OpenCL 1.2
	Available Graphics Drivers	Windows 10 64-bit Windows 11 64-bit Linux® 64-bit (selected Enterprise distributions) HP qualified drivers may be preloaded or available from the HP support Web site: http://welcome.hp.com/country/us/en/support.html
NVIDIA® RTX 2000 Ada	**Form Factor**	Half Height Dual Slot (2.7" Height x 6.7" Length)
	Max Power Consumption	70W

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 874

Technical Specifications - Graphics

	GPU Memory	16GB GDDR6 Memory Bandwidth: 224 GB/s Memory Width: 128-bit
	Connectors	4x Mini DisplayPort 1.4a
	Maximum Resolution	4x 4096 x 2160 @ 120 Hz 4x 5120 x 2880 @ 60 Hz 2x 7680 x 4320 @ 60 Hz
	Bus Type	PCI Exress 4.0 x8
	Avaliable Drivers	Windows 10 Windows 11
NVIDIA® RTX™ A2000 12GB Graphics	**Form Factor**	Low-Profile Double Slot (2.7” H x 6.1” L)
	Graphics Controller	Ampere architecture Power: 70 Watts Cooling: Active Fan Heatsink
	Bus Type	PCI Express 4.0 x16
	Memory	12GB GDDR6 memory Memory Bandwidth: 288 GB/s Memory Interface: 192 bit Support Error-correcting code (ECC)
	Connectors	4x mDP (Mini DisplayPort™) 1.4 Connectors
	Max simultaneous displays	4x 4096 x 2160 @ 120 Hz, 4x 5120 x 2880 @ 60 Hz 2x 7680 x 4320 @ 60 Hz
	Shading Architecture	Shader Model 6.5
	Supported Graphics APIs	OpenGL 4.6 DirectX 12 Vulkan 1.2 API support includes: CUDA, OpenCL 1.2
	Available Graphics Drivers	Windows 10 64-bit Windows 11 64-bit Linux® 64-bit (selected Enterprise distributions) HP qualified drivers may be preloaded or available from the HP support Web site: http://welcome.hp.com/country/us/en/support.html
NVIDIA® RTX 4000 Ada	**Form Factor**	Full-Height Single Slot (4.4” Height x 11.5” Length)
	Max Power Consumption	130W
	GPU Memory	20GB GDDR6 Memory Bandwidth: 360 GB/s Memory Width: 160-bit
	Connectors	4x DisplayPort 1.4a Requires: 1x 16-pin CEM 5 power connector (adapter may be needed)
	Maximum Resolution	4x @ 4096 x 2160 @ 120Hz 4x @ 5120 x 2880 @ 60Hz 2x @ 7680 x 4320 @ 60Hz

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 875

Technical Specifications - Graphics

	Bus Type	PCI Exress 4.0 x16
	Avaliable Drivers	Windows 10 Windows 11
NVIDIA® RTX™ A4000 16GB Graphics	**Form Factor**	Full Height Single Slot (9.5” Length)
	Graphics Controller	Ampere architecture Power: 140 Watts Cooling: Active Fan Heatsink
	Bus Type	PCI Express 4.0 x16
	Memory	16GB GDDR6 memory Memory Bandwidth: 448 GB/s Memory Interface: 256 bit Support Error-correcting code (ECC)
	Connectors	4x DP 1.4 Connectors
	Max simultaneous displays	4x 4096 x 2160 @ 120 Hz, 4x 5120 x 2880 @ 60 Hz, 2x 7680 x 4320 @ 60 Hz
	Shading Architecture	Shader Model 6.5
	Supported Graphics APIs	OpenGL 4.6 DirectX 12 Vulkan 1.2 API support includes: CUDA, OpenCL 1.2
	Available Graphics Drivers	Windows 10 64-bit Windows 11 64-bit Linux® 64-bit (selected Enterprise distributions) HP qualified drivers may be preloaded or available from the HP support Web site: http://welcome.hp.com/country/us/en/support.html
NVIDIA® RTX™ A4500 20GB Graphics	**Form Factor**	Full Height Double Slot (10.5” Length)
	Graphics Controller	Ampere architecture Power: 200 Watts Cooling: Active Fan Heatsink
	Bus Type	PCI Express 4.0 x16
	Memory	20GB GDDR6 memory Memory Bandwidth: 640 GB/s Memory Interface: 320 bit Support Error-correcting code (ECC)
	Connectors	4x DP 1.4 Connectors
	Max simultaneous displays	4x 4096 x 2160 @ 120 Hz, 4x 5120 x 2880 @ 60 Hz, 2x 7680 x 4320 @ 60 Hz
	Shading Architecture	Shader Model 6.5
	Supported Graphics APIs	OpenGL 4.6 DirectX 12 Vulkan 1.2

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 876

Technical Specifications - Graphics

		API support includes: CUDA, OpenCL 1.2
	Available Graphics Drivers	Windows 10 64-bit Windows 11 64-bit Linux® 64-bit (selected Enterprise distributions) HP qualified drivers may be preloaded or available from the HP support Web site: http://welcome.hp.com/country/us/en/support.html
NVIDIA® RTX™ A5000 24GB Graphics	**Form Factor**	Full Height Double Slot (10.5" Length)
	Graphics Controller	Ampere architecture Power: 230 Watts Cooling: Active Fan Heatsink
	Bus Type	PCI Express 4.0 x16
	Memory	24GB GDDR6 memory Memory Bandwidth: 768 GB/s Memory Interface: 384 bit Support Error-correcting code (ECC)
	Connectors	4x DP 1.4 Connectors
	Max simultaneous displays	4x 4096 x 2160 @ 120 Hz, 4x 5120 x 2880 @ 60 Hz, 2x 7680 x 4320 @ 60 Hz
	Shading Architecture	Shader Model 6.5
	Supported Graphics APIs	OpenGL 4.6 DirectX 12 Vulkan 1.2 API support includes: CUDA, OpenCL 1.2
	Available Graphics Drivers	Windows 10 64-bit Windows 11 64-bit Linux® 64-bit (selected Enterprise distributions) HP qualified drivers may be preloaded or available from the HP support Web site: http://welcome.hp.com/country/us/en/support.html
AMD® Radeon™ Pro W7600 8GB	**Form Factor**	Full-Height Single Slot (4.38" "eight x 9.5" "ength)
	Max Power Consumption	130W
	GPU Memory	8GB GDDR6 Memory Bandwidth: 288 GB/s Memory Width: 128-bit
	Connectors	4x DP 2.1 Requires : 1x 6-pin PCIe Aux Power
	Maximum Resolution	4x @ 3840x2160 (4K) 4x @ 5120x2880 (5K) 2x @ 7680x4320 (8K)
	Bus Type	PCI Express 4.0 x8

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 877

Technical Specifications - Graphics

	Available Graphics Drivers	Windows 10 Windows 11
	Form Factor	Full-Height Single Slot (4.38" ”eight x 8.5" ”ength)
MD® Radeon™ Pro W7500 8GB	**Max Power Consumption**	70W
	GPU Memory	8 GB GDDR6 Memory Bandwidth: 173 GB/s Memory Width: 128-bit
	Connectors	4x DP 2.1
	Maximum Resolution	4x @ 3840x2160 (4K) 4x @ 5120x2880 (5K) 2x @ 7680x4320 (8K)
	Bus Type	PCI Express 4.0 x8
	Available Graphics Drivers	Windows 10 Windows 11
AMD Radeon™ RX 6700 XT	**Form Factor**	Dual slot, Full Length (254mm L x 38mm W x 108.65mm H)
	Graphics Controller	AMD Radeon™ RX 6700 XT Graphics GPU: 2560 Navi2 Stream Processors Memory: 12GB GDDR6 Power: 230 Watts, Standard graphics 8pin + 6pin auxiliary power Cooling: Active, Dual Axial fan
	Bus Type	PCI Express 4.0 x16
	Connectors	3DP 1.4 + HDMI 2.1 Outputs
	Maximum Resolution	DisplayPort™ 1.4 with DSC: - up to 4x 5210 x 3200 x 24 bpp @ 60Hz, uncompressed - up to 7680 x 4320, compressed Display Outputs 3 DP + 1 HMDI
	Shading Architecture	Microsoft DirectX 12 Shader Model 6.1
	Supported Graphics APIs	OpenGL 4.6 DirectX 12 Feature Level 12_1 Vulkan 1.1 OpenCL 2.2
	Available Graphics Drivers	Windows 11 Linux® 64-bit (selected distributions) Typically, latest drivers will be available from amd.com

Notes: This is a Prosumer or Consumer graphics card, and not a Professional graphics card. As such, it does not have formal professional application validation, but is intended per AMD to function properly for game development, real-time engine, and many prosumer application workloads. Customers using Prosumer or Consumer graphic cards are likely to experience higher acoustics in comparison with Professional graphic cards. The higher acoustics observed with non-professional graphics is expected, as HP Workstations' designs do not have control in this area.

HP 9.5mm Slim DVD Writer	**Description**	9.5mm height, tray-load
	Mounting Orientation	Either horizontal or vertical
	Interface Type	SATA/ATAPI
	Dimensions (WxHxD)	128 x 9.5 x 127mm
	Supported Media Types	DVD+R DVD+RW

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 878

Technical Specifications - Graphics

	DVD+R DL DVD-R DL DVD-R DVD-RW CD-R CD-RW	
Disc Capacity	**DVD-ROM**	8.5 GB DL or 4.7 GB standard
Access Times	**Full Stroke DVD**	< 200 ms (seek)
	Full Stroke CD	< 200 ms (seek)
Maximum Data Transfer Rates	**CD ROM Read**	CD-ROM, CD-R Up to 24X CD-RW Up to 24X
	DVD ROM Read	DVD+RW Up to 8X DVD-RW Up to 8X DVD+R DL Up to 8X DVD-R DL Up to 8X DVD-ROM Up to 8X DVD-ROM DL Up to 8X DVD+R Up to 8X DVD-R Up to 8X
Power	**Source**	SATA DC power receptacle
	DC Power Requirements	5 VDC ± 5%-100 mV ripple p-p
	DC Current	5 VDC -< 800 mA typical, <1600 mA maximum
Operating Environmental (all conditions non-condensing)	**Temperature**	41° to 122° F (5° to 50° C)
	Relative Humidity	10% to 80%
	Maximum Wet Bulb Temperature	84° F (29° C)
Operating Systems Supported	Windows 11, Windows 10, Windows 7 Professional 64-bit, Windows Vista Business 64*, Windows 2000. Linux®.	
Kit Contents	HP SATA DVD Writer drive, installation guide.	
Approvals	USB-IF, WHQL, Compliant with USB Mass Storage Class Bulk only Transport Specification Rev. 1.0, Compliant Intel Front Panel I/O Connectivity Design Guide V. 1.3, FCC, CE, BSMI, C-Tick, VCCI, MIC, cUL, TUVT	

NOTE: Actual speeds may vary. No support for DVD-RAM (DVD Writer). Does not permit copying of commercially available DVD movies or other copyright protected materials. Intended for creation and storage of your original material and other lawful uses. Double Layer discs can store more data than single layer discs. However, double-layer discs burned with this drive may not be compatible with many existing single-layer DVD drives and players.

HP 9.5mm Slim DVD-ROM Drive	**Description**	9.5mm height, tray-load	
	Mounting Orientation	Either horizontal or vertical	
	Interface Type	SATA / ATAPI	
	Dimensions (WxHxD)	128 x 9.5 x 127mm	
	Disc Capacity	**DVD-ROM**	Single layer: Up to 4.7 GB Double layer: Up to 8.5 GB

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 879

HP SD Media Card Reader	**Description**	USB3.0-SD4.0 **NOTE:** actual throughput is USB2.0.
	Interface Type	• Support USB 2.0 LPM function • Support USB 3.0 U1/U2/U3 Power saving mode • Support USB 3.0 LTM function.
	Dimensions (WxHxD)	Dedicated slot in front bezel (orderable option)
	Supported Media Types	i. Secure Digital Card (SD) ii. Secure Digital Support up to 2TB iii. Secure Digital HC (SDHC) iv. Secure Digital XC (SDXC) v. Support SD USH50 mode vi. miniSD *1 vii. miniSDHC*1 viii. MicroSD*1 ix. MicroSDHC*1 x. MicroSDXC*1 **NOTE:** "*1" means Adapter Needed

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 880

Technical Specifications - Graphics

Operating Systems Supported	No driver is required for this device. Native support is provided by the operating system. Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows 10 is automatically updated, which is always enabled. ISP fees may apply and additional requirements may apply over time for updates. See http://www.microsoft.com. See http://www.microsoft.com/windows/windows-7/ for details.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 881

Technical Specifications - Networking and Communications

Integrated Intel® I219LM PCIe GbE Controller (Intel® vPro® with Intel® AMT 16.0[1])	**Connector**	RJ-45
	Cabling	Twisted pair up to 100m
	Controller	Intel® I219LM GbE platform LAN connect networking controller
	Memory	3 KB Tx and 3KB Rx FIFO packet buffer memory
	Data Rates Supported	10/100/1000 Mbps
	Compliance	802.1as/1588, 802.1p, 802.1Q, 802.3, 802.3ab, 802.3az, 802.3i, 802.3u, 802.3z
	Bus Architecture	PCI Express and SMBus
	Data Transfer Mode	PCIe-based interface for active state operation (S0 state) and SMBus for host and management traffic (Sx low power state)
	Power Requirement	Requires 3.3V (integrated regulators for core Vdc)
	Boot ROM Support	Yes
	Network Transfer Mode	Full-duplex; Half-duplex
	Network Transfer Rate	10BASE-T (half-duplex) 10 Mbps 10BASE-T (full-duplex) 20 Mbps 100BASE-TX (half-duplex) 100 Mbps 100BASE-TX (full-duplex) 200 Mbps 1000BASE-T (full-duplex) 2000 Mbps
	Management Capabilities	vPro®, WOL, auto MDI crossover, PXE, Muti-port teaming, RSS, ACPI, Advanced cable diagnostic, loopback modes, AMT 16.0 support, Circuit Breaker, VLAN, Multicast Listener Discovery (MLD)

[1]Requires activation and a system with a corporate network connection, an Intel® AMT enabled chipset, and network hardware and software. For notebooks, Intel AMT may be unavailable or limited over a host OS-based VPN, when connecting wirelessly, on battery power, sleeping, hibernating, or powered off. Results dependent upon hardware, setup, and configuration. For more information, visit: https://www.intel.com/content/www/us/en/architecture-and-technology/intel-active-management-technology.html

HP 1-Port 1GbE Flex IO NIC	**Connector**	RJ-45
	Cabling	1GbE over Category 5e (or better) up to 100m
	Controller	Realtek RTL8153
	Data Rates Supported	10/100/1000 Mbps
	Compliance	802.3 (LAN) 802.3u (100BASE-TX) 802.3ab (1000BASE-T) 802.3x (Ethernet Flow Control) 802.1Q (Virtual LAN) 802.3az (Energy Efficient Ethernet)
	Bus Architecture	USB
	Power Requirement	Requires 3.3V (integrated regulators for core Vdc)
	Boot ROM Support	Yes
	Network Transfer Mode	Full-duplex; Half-duplex
	Network Transfer Rate	10BASE-T (half-duplex) 10 Mbps 10BASE-T (full-duplex) 20 Mbps 100BASE-TX (half-duplex) 100 Mbps

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 882

Technical Specifications - Networking and Communications

		100BASE-TX (full-duplex) 200 Mbps 1000BASE-T (full-duplex) 2000 Mbps
	Operating Temperature	32° to 131° F (0° to 55° C)
	Dimensions (HxW)	1.5 in x 1.5 in. x 0.75 in (3.81 cm x 3.81 cm x 1.9 cm)
	Operating System Driver Support	Windows 11 64-bit Windows 10 64-bit Linux®

Intel® X550-T2 2-Port 10GbE NIC	**Connector**	Dual-port RJ-45
	Cabling	10GbE: Cat6a (or better) up to 100m 5GbE and below: Cat5e (or better) up to 100m
	Controller	Intel® Ethernet Controller X550
	Network Transfer Rates Supported	10GbE, 5GbE, 2.5GbE, 1GbE, 100MbE
	Data Path Width	PCIe Gen3x4
	Power Requirement	11.2W (typical) 13.0 (Maximum)
	Operating Temperature	32° to 131° F (0° to 55° C)
	Dimensions (HxW)	5.1 x 2.7 in (without brackets)
	Operating System Driver Support	Windows 11 64-Bit Windows 10 64-bit Linux®
	Kit Contents	• Intel® X550-T2 2-Port 10GbE NIC with standard height bracket attached • Low-profile bracket • Product Literature

NVIDIA Mellanox ConnectX-6 DX Dual Port 10/25GbE SFP28 NIC	**Connector**	Dual-port SFP28
	Cabling	Transceiver with Multi-Mode Fiber OM3 or OM4)
	Controller	ConnectX-6 Dx
	Network Transfer Rates Supported	1/10/25 GbE
	Data Path Width	PCIe Gen4x8
	Power Requirement	19.74W Maximum power available through SFP28 port: 2.5W (each port)
	Operating Temperature	32° to 131° F (0° to 55° C)
	Dimensions (HxW)	6.22in. x 2.67in (158mm x 68mm)
	Operating System Driver	Windows 11 64-Bit Windows 10 64-bit Linux®
	Kit Contents	• NVIDIA Mellanox ConnectX-6 SFP28 25GbE NIC with standard height bracket attached • Low-profile bracket • Product Literature

NOTE: The NVIDIA Mellanox ConnectX-6 DX network adapter requires either a PCIeG4 x4 or PCIeG4 x8 slot (electrical connection) to have full performance with two 25GbE SFP28 transceivers installed in the network adapter. When the network adapter is installed in a PCIeG3 x4 slot, the performance will

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 883

be limited when installing two 25GbE SFP28 transceivers or installing a 25GbE SFP28 transceiver plus a 10GbE SFP+ transceiver

Intel® I350-T4 4-Port 1GbE NIC	**Connector**	4 RJ-45
	Cabling	Cat5e (or better) up to 100m
	Controller	Intel® Ethernet I350 Controller
	Network Transfer Rates Supported	1GbE, 100MbE, 10MbE
	Data Path Width	PCIe Gen2.1x4
	Power Requirement	5W (typical)
	Operating Temperature	32° to 131° F (0° to 55° C)
	Dimensions (HxW)	2.75 x 5.5 inches (without brackets)
	Operating System Driver Support	Windows 11 Windows 10 Linux®
	Kit Contents	• Intel® I350-T4 4-Port 1GbE NIC with standard height bracket attached • Low-profile bracket • Product Literature
HP Flex 1GbE Fiber LC Single Port	**Connector**	Fiber
	Cabling	1GbE over Category OM1 (or better) up to 100m
	Controller	Microchip LAN7801
	Data Rates Supported	100/1000 Mbps
	Compliance	IEEE 802.1p priority encoding/tagging (QoS, CoS) IEEE 802.1q VLAN tagging IEEE 802.3x flow control
	Bus Architecture	USB
	Power Requirement	Requires 3.3V (integrated regulators for core Vdc)
	Boot ROM Support	Yes
	Network Transfer Mode	Full-duplex; Half-duplex
	Network Transfer Rate	100BASE-X (half-duplex) 100 Mbps 1000BASE-X (half-duplex) 1000 Mbps 1000BASE-X (full-duplex) 2000 Mbps
	Operating Temperature	32° to 158° F (0°C to 70°C)
	calvin	1.5 in x 1.7 in. x 0.75 in (3.84 cm x 4.3 cm x 1.9 cm)
	Operating System Driver Support	Windows 11 64-Bit Windows 10 64-bit Linux®
Intel® I225-T1 1-Port 2.5GbE NIC	**Connector**	RJ-45
	Cabling	Cat5e (or better) up to 85m
	Controller	Intel® Ethernet I225 Controller
	Network Transfer Rates Supported	2.5GbE, 1GbE, 100MbE, 10MbE

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 884

A empresa **Torino Informática Ltda**, inscrita no CNPJ **03.619.767/0001-91** sediada na RUA RITA DE CARVALHO MONTEIRO, 120, RETIRO SÃO JOÃO, SOROCABA, SP - CEP 18085-750 com filial inscrita no CNPJ **03.619.767/0005-15** situada a Avenida 600, s/n, Quadra 15, Módulo 10, Setor Industrial, TIMS, Serra, ES, CEP 29161-419, é um **PARCEIRO AUTORIZADO HP, PARA COMPRA DIRETA DE PRODUTOS DA HP**, estando apto a comercializar as linhas de produtos HP de nossa fabricação descritas abaixo.

Declaramos ainda que a TORINO INFORMÁTICA LTDA. é o parceiro de serviços do programa AMPLIFY, autorizado a prestar serviço de assistência técnica dos produtos que comercializa no telefone 0800 201-5666.

Produtos:

B20A5LS#AK4 – HP Elite Mini 800 G9 – Garantia padrão do fabricante
67V68AV#TMP – Z2 Tower G9 – Garantia padrão do fabricante
9Z0P1AV#TMP – EliteBook 640 G11 – Garantia padrão do fabricante
9A816AV#TMP – ZBook Power 16 inch G11 – Garantia padrão do fabricante

Declaramos ainda que, o produto **B20A5LS#AK4** – HP Elite Mini 800 G9:

- Além de possuir equipamentos com configurações padrão de fábrica a HPI realiza customizações para atendimento as necessidades dos clientes. Para atendimento a este edital a CONTRATADA fará as solicitações de customização à HP de modo a atender plenamente as exigências edilícias. Estas customizações deverão estar descritas na proposta comercial emitida pela CONTRADA. As declarações a seguir, se aplicam aos modelos de equipamento mencionados, independentemente das customizações a serem realizadas;
- Informações técnicas básicas como modelo do processador, capacidade de memória instalada, capacidade e tipo do dispositivo de armazenamento, versão do sistema operacional e garantia padrão de fábrica estarão descritas na proposta comercial emitida pela CONTRADA;
- Modelo de equipamento ofertado é a mais recente geração disponibilizada pela HP com comercialização no Brasil;
- A HP disponibiliza a ferramenta HP Support Assistant que permite a verificação e instalação das últimas atualizações de todas as ferramentas e drivers disponibilizadas pela HP para o equipamento. Sendo capaz de monitorar o sistema, realizar diagnósticos, emitir alertas e ajudar a reparar erros do sistema, ajudando assim a manter a saúde e segurança do sistema. Permite verificar o status da garantia pela ferramenta;

JCAJ

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 890

- Possui BIOS da HP, desenvolvida pela HP, em conformidade com a especificação minima UEFI 2.7 (http://www.uefi.org/) e capturáveis pela aplicação de inventário como por exemplo SCCM (System Center Configuration Manager), Landesk, Microsoft End Point Manager, etc;
- Possui BIOS com descrição do modelo, número de série e campo de registro de número de patrimônio com extensão mínima de 15 dígitos, todos gravados em memória não volátil e sendo estas capturáveis por aplicações de inventario como por exemplo SCCM (System Center Configuration Manager), Landesk, Microsoft End Point Manager, etc;
- Possui BIOS com interface gráfica com navegação utilizando mouse ou teclado, disponível em mais de 3 idiomas (por exemplo: português, espanhol, inglês etc.);
- Possui BIOS atualizável com opção de recuperação de falha, a partir de arquivo de recuperação no disco rígido ou USB externa;
- Possui BIOS com suporte à verificação de integridade, através do recurso HP Sure Start;
- As atualizações da BIOS, quando necessárias, são disponibilizadas no site da HP Inc.;
- Possui BIOS implementada em "flash ROM" atualizável diretamente pelo microcomputador, utilizando memória não volátil e reprogramável, Plug and Play, entregue na versão mais atual disponibilizada pela HP. Podendo ser atualizada por software de gerenciamento remoto;
- Possui BIOS com capacidade de habilitar / desabilitar portas USB;
- Possui BIOS com possibilidade de configuração de senhas para Power On, Administrador e unidade de armazenamento;
- Possui BIOS com suporte à tecnologia de previsão/contingenciamento de falhas de disco rígido S.M.A.R.T habilitada;
- Possui BIOS com suporte a boot por pendrive ou unidade de armazenamento externo, conectado a uma porta USB 2.0 ou superior;
- Possui BIOS compatível com o padrão mínimo ACPI 6.0. E também compatível com os padrões: DMI, SNMP, WMI, SMBIOS;
- Possui BIOS em conformidade com a normativa NIST 800-147 e NIST 800-193 (HP Sure Start);
- Possui a ferramenta HP Secure Erase integrada na BIOS, que possibilita apagar de forma definitiva e irrecuperável todos os dados da unidade de armazenamento, permitindo o descarte seguro de seus equipamentos (NIST 800-88);
- Possui BIOS com ferramenta de diagnóstico UEFI de componentes internos de hardware (processador, memória, unidade de armazenamento, áudio, teclado, rede, placa mãe, portas USB e vídeo). Acessível via BIOS ou teclas de atalho (F1...F12). A mensagem de erro é suficiente para abertura de chamado em garantia;
- Possui sistema de monitoramento de temperatura controlada pela BIOS, adequado ao processador, fonte e demais componentes internos ao gabinete;
- Possui recurso para realizar downgrade de BIOS e replicação de configurações de BIOS em escala utilizando um arquivo referência ou via Powershell;
- Possui placa mãe fabricada e desenvolvida pela HP, exclusiva para o modelo, com o nome da HP identificado na mesma;
- Possui placa mãe com capacidade de desligamento do vídeo e da unidade de armazenamento após tempo determinado pelo usuário e reiniciar por acionamento de teclado ou pela movimentação do mouse e possui função de economia de energia;
- Possui chip TPM integrado, acompanhado de drivers e a ferramenta nativa do Windows (tpm.msc) para utilização do chip e possibilitando a utilização de todos os recursos de segurança e criptografia (A ferramenta tpm.msc é fornecida com os equipamentos adquiridos com o Sistema Operacional Windows 10 / 11 Pro);
- O chipset é do mesmo fabricante do processador, com tecnologia que permite que o sistema retome rapidamente do estado de hibernação tanto para unidades de armazenamento do tipo SATA e do tipo PCIe;
- Sempre que o equipamento for inicializado, será mostrado no monitor de vídeo o nome da HP;
- Possuem os mesmos padrões de cores, sendo o preto ou cinza escuro a cor predominante e com o logotipo da HP impresso;
- Possui acabamento interno composto de superfícies não cortantes;
- O gabinete possui tratamento anticorrosivo;

JCAJ

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 891

- O gabinete possui base/superfície antiderrapante;
- Possui gabinete feito em liga metálica e front bezel de ABS
- O equipamento pode funcionar na posição horizontal ou vertical.
- Possui afixado no gabinete do equipamento, o Selo Certificado de Autenticidade (COA – Certificate of Authenticity) do software Windows na versão instalada e com serial de ativação do sistema operacional gravado no BIOS, quando adquirido com o sistema operacional Windows 11 conforme descrito na proposta comercial;
- O fluxo do ar interno segue as orientações do fabricante do microprocessador;
- Possui tecnologia implementada que controle o nível de desempenho do processador automaticamente, ajustando dinamicamente a frequência e a voltagem a cada a necessidade requerida pela atividade do momento para que seja otimizada a autonomia de bateria do equipamento;
- Possui suporte a implementação de tecnologia dual-channel para a memória RAM;
- As unidades de armazenamento disponíveis para fabricação do modelo, possuem suporte à tecnologia de segurança SMART e NCQ;
- Todos os conectores das portas de entrada/saída são identificados por cores ou símbolos, de acordo com o padrão PC'99 System Design Guide;
- Possui controladora de áudio onboard, com entrada e saída de áudio estéreo (combo jack), capaz de reproduzir os sons gerados pelo sistema (como músicas e beeps de alerta de diagnósticos), e está conectado diretamente a placa mãe sem uso de adaptadores, com suporte a 16bits;
- O sistema de áudio onboard possui a possibilidade de desativação por software ou automaticamente quando houver conexão com a caixa de som ou fone de ouvido;
- Possui controladora de vídeo integrada, com suporte a múltiplos monitores (mínimo de 2) onde para maiores quantidades estará descrito na proposta comercial emitida pela CONTRATADA. Os monitores podem operar simultaneamente, de forma estendida ou espelhada
- Possui controladora de vídeo integrada com capacidade de alocar no mínimo 1.5GB de memória de vídeo, compartilhada de forma dinâmica com a memória RAM. Possui suporte para DirectX 12 e Open GL 4.5 e compatibilidade do driver com o padrão WDDM (Windows Display Driver Model);
- Possui controladora de rede Gigabit Ethernet 10/100/1000 Mbps com reconhecimento automático da velocidade da rede, com capacidade de operar no modo full-duplex, autosense, plug and play, com suporte ao protocolo SNMP, totalmente configurável por software, com suporte a VLAN, com suporte a PXE 2.1 e com função Wake-On-Lan instalada e em funcionamento. Com conector RJ-45 com LEDs de diagnostico;
- Possui interface de comunicação wireless integrada desde que a CONTRATADA incluía este item na proposta comercial. Esta placa wireless tem suporte aos padrões 802.11ax, 802.11ac, 802.11a, 802.11b, 802.11g e 802.11n, com suporte aos protocolos 802.11i (WLAN security, TKIP e AES), WPA, WPA2, WEP 64 e 128, IEEE 802.11 (Wired Equivalent Privacy), IEEE 802.1x. Com certificado de homologação válido da ANATEL, e no Wi-fi Certified Aliance. O ajuste da potência é de acordo com a recepção do sinal, de forma a proporcionar economia de bateria;
- Possui teclado da HP, desde que a CONTRATADA inclua este item na proposta comercial. Teclado HP com com todos os caracteres da língua portuguesa incluindo Ç, com teclado numérico embutido, com teclas Windows Logo (acesso ao menu iniciar), com LEDs indicativos de “caps lock” e “num lock”. A impressão sobre as teclas é do tipo permanente, não apresentando desgaste por abrasão ou uso prolongado. Possui sistema de proteção contra derramamento acidental de pequenas quantidades de líquidos. Possui sistema para ajuste de inclinação e cabo USB de no mínimo 1.5m. Não possui teclas dedicadas de funções multimedia, desligar, hibernar ou standby.
- Possui mouse óptico da HP, desde que a CONTRATADA incluía este item na proposta comercial. Mouse HP com conector USB, cabo com comprimento mínimo de 1.8m, com resolução de 1000dpi, com 03 botões (esquerdo, direito e central próprio para rolagem (scrol)), formato ergonômico e de conformação ambidestra;
- Fonte externo com ajuste automático 100~240v / 50-60Hz (bivolt), suficiente para suportar todas as configurações do equipamento conforme as especificações técnicas contidas no catálogo técnico do mesmo, permitindo o funcionamento por no mínimo 10 horas por dia e 5 dias por semana;
- Possui cabo de energia para a fonte de alimentação de acordo com o novo padrão ABNT (NBR 14136), com comprimento minimo de 1,5m (total fonte mais cabo de energia);

JCAJ

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 892

- Todos os componentes do produto são novos (sem uso, reforma ou recondicionamento) e estão em linha de fabricação;
- Pertence a linha corporativa da HP;
- A HP possui programas de Logística Reversa (https://www.hp.com/br-pt/hp-information/sustainable-impact/planet-product-recycling.html);
- São bens constituídos em parte, por material reciclado, atóxico, biodegradável e atendem a diretiva RoHS;
- Todos os itens e seus acessórios são novos, não recondicionados, de primeiro uso, em pleno estado de funcionamento, livres de arranhões, amassados, frisagens, furações, fitas adesivas, marcas, falhas de fabricação ou qualquer outro procedimento ou emprego de materiais inadequados que adaptem forçadamente o equipamento ou suas partes que sejam fisicamente ou logicamente incompatíveis;
- As unidades dos equipamentos serão entregues devidamente acondicionadas em embalagens individuais adequadas, utilizando sempre que possível de materiais recicláveis, de forma a garantir a máxima proteção durante o transporte e a armazenagem;
- Cada equipamento possui um número de série único, afixado em local visível em etiqueta de difícil remoção ou impresso a laser, constando a marca, o modelo e o número de série do equipamento e também na embalagem;
- A HP possui pagina na Internet no qual pelo número de série é possível verificar o início e fim do período de garantia do equipamento;
- Os drivers, softwares e sistema operacional fornecido com o equipamento da HP estão disponíveis para download no site da HP, permitindo a instalação e recuperação do sistema operacional ao padrão de fábrica.
- A HP disponibiliza a ferramenta HP Cloud Recovery que permite realizar o download dos Drivers e do Sistema Operacional de forma automatizada para gerar pendrive de reinstalação;
- É disponibilizada documentação técnica necessária à instalação e operação do equipamento em português;
- A HP Disponibiliza “Central de atendimento telefônico” com número de telefone 0800 ou Whatsapp para abertura de chamado, em dias úteis, (segunda-feira a sexta-feira), em horário comercial (das 8h às18h) e “Central de atendimento via sistema web” para abertura de chamado 24x07, (domingo a domingo), a qualquer horário (das 00:00h às 23:59h);
- A HP Mantém os registros dos chamados que foram abertos, mantendo as informações que foram registradas sobre o mesmo;
- A ferramenta Web de abertura de chamados da HP permite que o cliente a visualize e acompanhe os chamados abertos anteriormente;
- Possui garantia padrão de fábrica de 01 ano para reposição de peças, mão de obra, com atendimento "on-site", conforme descrito na proposta comercial emitida pela CONTRATADA;
- Permite a extensão de garantia para 03, 04 ou 05 anos para reposição de peças, mão de obra, para o monitor, com atendimento do tipo "on-site" através de aquisição da CONTRADA de carepack de extensão de garantia, devendo descrever em sua proposta comercial a descrição da extensão da garantia (HP Carepack);
- A assistência técnica “on-site” será realizada, durante todo o período de garantia dos equipamentos, pela própria HP ou por empresa de Assistência Técnica Autorizada da HP, a fim de que sejam mantidos válidos todos os direitos oriundos da garantia;
- Durante o prazo de garantia será substituída sem ônus para a contratante, a parte ou peça defeituosa, salvo quando o defeito for provocado por uso inadequado dos equipamentos;
- Certificado de Garantia é válido em todo o território nacional;
- Abertura do equipamento para limpeza, adição de memória ou SSD pela CONTRATANTE não implicará em perca da garantia desde que não cause mau uso. A garantia da HP não cobrirá o suporte destas peças.

Declaramos ainda que, o produto **67V68AV#TMP** – Z2 Tower G9:

JCAJ

- Além de possuir equipamentos com configurações padrão de fábrica a HPI realiza customizações para atendimento as necessidades dos clientes. Para atendimento a este edital a CONTRATADA fará

as solicitações de customização à HP de modo a atender plenamente as exigências edilícias. Estas customizações deverão estar descritas na proposta comercial emitida pela CONTRADA. As declarações a seguir, se aplicam aos modelos de equipamento mencionados, independentemente das customizações a serem realizadas;

- Informações técnicas básicas como modelo do processador, capacidade de memória instalada, capacidade e tipo do dispositivo de armazenamento, versão do sistema operacional e garantia padrão de fábrica estarão descritas na proposta comercial emitida pela CONTRADA;
- Modelo de equipamento ofertado é a mais recente geração disponibilizada pela HP com comercialização no Brasil;
- A HP disponibiliza a ferramenta HP Support Assistant que permite a verificação e instalação das últimas atualizações de todas as ferramentas e drivers disponibilizadas pela HP para o equipamento. Sendo capaz de monitorar o sistema, realizar diagnósticos, emitir alertas e ajudar a reparar erros do sistema, ajudando assim a manter a saúde e segurança do sistema. Permite verificar o status da garantia pela ferramenta;
- Possui BIOS da HP, desenvolvida pela HP, em conformidade com a especificação minima UEFI 2.7 (http://www.uefi.org/) e capturáveis pela aplicação de inventário como por exemplo SCCM (System Center Configuration Manager), Landesk, Microsoft End Point Manager, etc;
- Possui BIOS com descrição do modelo, número de série e função de registro de número de patrimônio com extensão mínima de 15 dígitos, todos gravados em memória não volátil e sendo estas capturáveis por aplicações de inventario como por exemplo SCCM, Landesk, Microsoft End Point Manager, etc;
- Possui BIOS com interface gráfica com navegação utilizando mouse ou teclado, disponível em mais de 3 idiomas (por exemplo: portugues, espanhol, inglês etc.);
- Possui BIOS atualizável com opção de recuperação de falha, a partir de arquivo de recuperação no disco rígido ou USB externa;
- Possui BIOS com suporte à verificação de integridade, através do recurso HP Sure Start;
- As atualizações da BIOS, quando necessárias, são disponibilizadas no site da HP Inc., com atualização via download na internet diretamente na interface de configuração da BIOS também;
- Possui BIOS implementada em “flash ROM” atualizável diretamente pelo microcomputador, utilizando memória não volátil e reprogramável, Plug and Play, entregue na versão mais atual disponibilizada pela HP. Podendo ser atualizada por software de gerenciamento remoto;
- Possui BIOS com capacidade de habilitar / desabilitar portas USB;
- Possui BIOS com possibilidade de configuração de senhas para Power On, Administrador e unidade de armazenamento;
- Possui BIOS com suporte à tecnologia de previsão/contingenciamento de falhas de disco rígido S.M.A.R.T habilitada;
- Possui BIOS com suporte a boot por pendrive ou unidade de armazenamento externo, conectado a uma porta USB 2.0 ou superior;
- Possui BIOS compatível com o padrão minimo ACPI 6.0, E também compatível com os padrões: DMI, SNMP, WMI e SMBIOS;
- Possui BIOS em conformidade com a normativa NIST 800-147 e NIST 800-193 (HP Sure Start);
- Possui a ferramenta HP Secure Erase integrada na BIOS, que possibilita apagar de forma definitiva e irrecuperável todos os dados da unidade de armazenamento, permitindo o descarte seguro de seus equipamentos (NIST 800-88);
- Possui BIOS com ferramenta de diagnóstico UEFI de componentes internos de hardware (processador, memória, unidade de armazenamento, áudio, teclado, rede, placa mãe, portas USB e vídeo). Acessível via BIOS ou teclas de atalho (F1...F12). A mensagem de erro é suficiente para abertura de chamado em garantia;
- Possui sistema de monitoramento de temperatura controlada pela BIOS, adequado ao processador, fonte e demais componentes internos ao gabinete;
- Possui recurso para realizar downgrade de BIOS e replicação de configurações de BIOS em escala utilizando um arquivo referência ou via Powershell;
- Possui placa mãe fabricada e desenvolvida pela HP, exclusiva para o modelo, com o nome da HP identificado na mesma;

JCAJ

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 894

- Possui placa mãe com capacidade de desligamento do vídeo e da unidade de armazenamento após tempo determinado pelo usuário e reiniciar por acionamento de teclado ou pela movimentação do mouse e possui função de economia de energia;
- Possui chip TPM integrado, acompanhado de drivers e a ferramenta nativa do Windows (tpm.msc) para utilização do chip e possibilitando a utilização de todos os recursos de segurança e criptografia (A ferramenta tpm.msc é fornecida com os equipamentos adquiridos com o Sistema Operacional Windows 10 / 11 Pro);
- O chipset é do mesmo fabricante do processador, com tecnologia que permite que o sistema retome rapidamente do estado de hibernação tanto para unidades de armazenamento do tipo SATA e do tipo PCIe;
- Sempre que o equipamento for inicializado, será mostrado no monitor de vídeo o nome da HP;
- Possuem os mesmos padrões de cores, sendo o preto ou cinza escuro a cor predominante e com o logotipo da HP impresso;
- Possui acabamento interno composto de superfícies não cortantes;
- O gabinete possui tratamento anticorrosivo;
- O gabinete possui base/superfície antiderrapante;
- Possui gabinete feito em liga metálica e front bezel de ABS
- O equipamento pode funcionar na posição horizontal ou vertical.
- Possui afixado no gabinete do equipamento, o Selo Certificado de Autenticidade (COA – Certificate of Authenticity) do software Windows na versão instalada e com serial de ativação do sistema operacional gravado no BIOS, quando adquirido com o sistema operacional Windows 11 conforme descrito na proposta comercial;
- O fluxo do ar interno segue as orientações do fabricante do microprocessador;
- Possui processador da geração mais recente fabricada pela HP no Brasil para este modelo de desktop de uso corporativo;
- Possui tecnologia implementada que controle o nível de desempenho do processador automaticamente, ajustando dinamicamente a frequência e a voltagem a cada a necessidade requerida pela atividade do momento para que seja otimizada a autonomia de bateria do equipamento;
- Possui suporte a implementação de tecnologia dual-channel para a memória RAM;
- As unidades de armazenamento disponíveis para fabricação do modelo, possuem suporte à tecnologia de segurança SMART e NCQ;
- Todos os conectores das portas de entrada/saída são identificados por cores ou símbolos, de acordo com o padrão PC'99 System Design Guide;
- Possui controladora de áudio onboard, com entrada e saída de áudio estéreo (combo jack), capaz de reproduzir os sons gerados pelo sistema (como músicas e beeps de alerta de diagnósticos), e está conectado diretamente a placa mãe sem uso de adaptadores, com suporte a 16bits;
- O sistema de áudio onboard possui a possibilidade de desativação por software ou automaticamente quando houver conexão com a caixa de som ou fone de ouvido;
- Possui controladora de rede Gigabit Ethernet 10/100/1000 Mbps com reconhecimento automático da velocidade da rede, com capacidade de operar no modo full-duplex, autosense, plug and play, com suporte ao protocolo SNMP, totalmente configurável por software, com suporte a VLAN, com suporte a PXE 2.1 e com função Wake-On-Lan instalada e em funcionamento. Com conector RJ-45 com LEDs de diagnostico;
- Possui interface de comunicação wireless integrada desde que a CONTRATADA incluía este item na proposta comercial. Esta placa wireless tem suporte aos padrões 802.11ax, 802.11ac, 802.11a, 802.11b, 802.11g e 802.11n, com suporte aos protocolos 802.11i (WLAN security, TKIP e AES), WPA, WPA2, WEP 64 e 128, IEEE 802.11 (Wired Equivalent Privacy), IEEE 802.1x. Com certificado de homologação válido da ANATEL, e no Wi-fi Certified Aliance. O ajuste da potência é de acordo com a recepção do sinal, de forma a proporcionar economia de bateria;
- Possui teclado da HP, desde que a CONTRATADA inclua este item na proposta comercial. Teclado HP com com todos os caracteres da língua portuguesa incluindo Ç, com teclado numérico embutido, com teclas Windows Logo (acesso ao menu iniciar), com LEDs indicativos de “caps lock” e “num lock”. A impressão sobre as teclas é do tipo permanente, não apresentando desgaste por abrasão ou uso prolongado. Possui sistema de proteção contra derramamento acidental de

JCAJ

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 895

pequenas quantidades de líquidos. Possui sistema para ajuste de inclinação e cabo USB de no mínimo 1.5m. Não possui teclas dedicadas de funções multimedia, desligar, hibernar ou standby.

- Possui mouse óptico da HP, desde que a CONTRATADA incluía este item na proposta comercial. Mouse HP com conector USB, cabo com comprimento mínimo de 1.8m, com resolução de 1000dpi, com 03 botões (esquerdo, direito e central próprio para rolagem (scrol)), formato ergonômico e de conformação ambidestra;
- Fonte externo com ajuste automático 100~240v / 50-60Hz (bivolt), suficiente para suportar todas as configurações do equipamento conforme as especificações técnicas contidas no catálogo técnico do mesmo, permitindo o funcionamento por no mínimo 10 horas por dia e 5 dias por semana;
- Possui cabo de energia para a fonte de alimentação de acordo com o novo padrão ABNT (NBR 14136), com comprimento total de no minimo 1.5m;
- Todos os componentes do produto são novos (sem uso, reforma ou recondicionamento) e estão em linha de fabricação;
- Pertence a linha corporativa da HP;
- A HP possui programas de Logística Reversa (https://www.hp.com/br-pt/hp-information/sustainable-impact/planet-product-recycling.html);
- São bens constituídos em parte, por material reciclado, atóxico, biodegradável e atendem a diretiva RoHS;
- Todos os itens e seus acessórios são novos, não recondicionados, de primeiro uso, em pleno estado de funcionamento, livres de arranhões, amassados, frisagens, furações, fitas adesivas, marcas, falhas de fabricação ou qualquer outro procedimento ou emprego de materiais inadequados que adaptem forçadamente o equipamento ou suas partes que sejam fisicamente ou logicamente incompatíveis;
- As unidades dos equipamentos serão entregues devidamente acondicionadas em embalagens individuais adequadas, utilizando sempre que possível de materiais recicláveis, de forma a garantir a máxima proteção durante o transporte e a armazenagem;
- Cada equipamento possui um número de série único, afixado em local visível em etiqueta de difícil remoção ou impresso a laser, constando a marca, o modelo e o número de série do equipamento e também na embalagem;
- A HP possui pagina na Internet no qual pelo número de série é possível verificar o início e fim do período de garantia do equipamento;
- Os drivers, softwares e sistema operacional fornecido com o equipamento da HP estão disponíveis para download no site da HP, permitindo a instalação e recuperação do sistema operacional ao padrão de fábrica.
- A HP disponibiliza a ferramenta HP Cloud Recovery que permite realizar o download dos Drivers e do Sistema Operacional de forma automatizada para gerar pendrive de reinstalação;
- É disponibilizada documentação técnica necessária à instalação e operação do equipamento em português;
- A HP Disponibiliza “Central de atendimento telefônico” com número de telefone 0800 ou Whatsapp para abertura de chamado, em dias úteis, (segunda-feira a sexta-feira), em horário comercial (das 8h às18h) e “Central de atendimento via sistema web” para abertura de chamado 24x07, (domingo a domingo), a qualquer horário (das 00:00h às 23:59h);
- A HP Mantém os registros dos chamados que foram abertos, mantendo as informações que foram registradas sobre o mesmo;
- A ferramenta Web de abertura de chamados da HP permite que o cliente a visualize e acompanhe os chamados abertos anteriormente;
- Possui garantia padrão de fábrica de 01 ano para reposição de peças, mão de obra, com atendimento "on-site", conforme descrito na proposta comercial emitida pela CONTRATADA;
- Permite a extensão de garantia para 03, 04 ou 05 anos para reposição de peças, mão de obra, para o monitor, com atendimento do tipo "on-site" através de aquisição da CONTRADA de carepack de extensão de garantia, devendo descrever em sua proposta comercial a descrição da extensão da garantia (HP Carepack);
- A assistência técnica “on-site” será realizada, durante todo o período de garantia dos equipamentos, pela própria HP ou por empresa de Assistência Técnica Autorizada da HP, a fim de que sejam mantidos válidos todos os direitos oriundos da garantia;

JCAJ

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 896

- Durante o prazo de garantia será substituída sem ônus para a contratante, a parte ou peça defeituosa, salvo quando o defeito for provocado por uso inadequado dos equipamentos;
- Certificado de Garantia é válido em todo o território nacional;
- Abertura do equipamento para limpeza, adição de memória ou SSD pela CONTRATANTE não implicará em perca da garantia desde que não cause mau uso. A garantia da HP não cobrirá o suporte destas peças.

Declaramos ainda que, o produto **9Z0P1AV#TMP** – EliteBook 640 G11:

- Além de possuir equipamentos com configurações padrão de fábrica a HPI realiza customizações para atendimento as necessidades dos clientes. Para atendimento a este edital a CONTRATADA fará as solicitações de customização à HP de modo a atender plenamente as exigências edilícias. Estas customizações deverão estar descritas na proposta comercial emitida pela CONTRADA. As declarações a seguir, se aplicam aos modelos de equipamento mencionados, independentemente das customizações a serem realizadas;
- Informações técnicas básicas como modelo do processador, capacidade de memória instalada, capacidade e tipo do dispositivo de armazenamento, versão do sistema operacional, tamanho da tela do notebook e garantia padrão de fábrica estarão descritas na proposta comercial emitida pela CONTRADA;
- Modelo de equipamento ofertado é a mais recente geração disponibilizada pela HP com comercialização no Brasil;
- A HP disponibiliza a ferramenta HP Support Assistant que permite a verificação e instalação das últimas atualizações de todas as ferramentas e drivers disponibilizadas pela HP para o equipamento. Sendo capaz de monitorar o sistema, realizar diagnósticos, emitir alertas e ajudar a reparar erros do sistema, ajudando assim a manter a saúde e segurança do sistema. Permite verificar o status da garantia pela ferramenta;
- Possui BIOS da HP, desenvolvida pela HP, em conformidade com a especificação minima UEFI 2.7 (http://www.uefi.org/) e capturáveis pela aplicação de inventário como por exemplo SCCM (System Center Configuration Manager), Landesk, Microsoft End Point Manager, etc;
- Possui BIOS com descrição do modelo, número de série e campo de registro de número de patrimônio com extensão mínima de 15 digitos, todos gravados em memória não volátil e sendo estas capituraveis por aplicações de inventario como por exemplo SCCM, Landesk, Microsoft End Point Manager, etc;
- Possui BIOS com interface gráfica com navegação utilizando mouse ou teclado, disponível em mais de 3 idiomas (por exemplo: português, espanhol, inglês etc.);
- Possui BIOS atualizável com opção de recuperação de falha, a partir de arquivo de recuperação no disco rígido ou USB externa;
- Possui BIOS com suporte à verificação de integridade, através do recurso Hp Sure Start;
- As atualizações da BIOS, quando necessárias, são disponibilizadas no site da HP Inc., com atualização via download na internet diretamente na interface de configuração da BIOS também;
- Possui BIOS implementada em “flash ROM” atualizável diretamente pelo microcomputador, utilizando memória não volátil e reprogramável, Plug and Play, entregue na versão mais atual disponibilizada pela HP. Podendo ser atualizada por software de gerenciamento remoto;
- Possui BIOS com capacidade de habilitar / desabilitar portas USB, webcam, microfone, WiFi;
- Possui BIOS com possibilidade de configuração de senhas de Setup para Power On, Administrador e unidade de armazenamento;
- Possui BIOS com suporte à tecnologia de previsão/contingenciamento de falhas de disco rígido S.M.A.R.T habilitada;
- Possui BIOS com suporte a boot por pendrive ou unidade de armazenamento externo, conectado a uma porta USB 2.0 ou superior;
- Possui BIOS compatível com o padrão mínimo ACPI 6.0. E também compatível com os padrões: DMI, SNMP, WMI, SMBIOS;
- Possui BIOS em conformidade com a normativa NIST 800-147 e NIST 800-193 (HP Sure Start);

no mínimo 1.5GB de memória de vídeo, compartilhada de forma dinâmica com a memória RAM. Possui suporte para DirectX 12 e Open GL 4.5 e compatibilidade do driver com o padrão WDDM (Windows Display Driver Model);

- Possui controladora de rede Gigabit Ethernet 10/100/1000 Mbps com reconhecimento automático da velocidade da rede, com capacidade de operar no modo full-duplex, autosense, plug and play, com suporte ao protocolo SNMP, totalmente configurável por software, com suporte a VLAN, com suporte a PXE 2.1 e com função Wake-On-Lan instalada e em funcionamento. Com conector RJ-45 com LEDs de diagnostico;
- Possui interface de comunicação wireless integrada, com suporte aos padrões 802.11ax, 802.11ac, 802.11a, 802.11b, 802.11g e 802.11n, com suporte aos protocolos 802.11i (WLAN security, TKIP e AES), WPA, WPA2, WEP 64 e 128, IEEE 802.11 (Wired Equivalent Privacy), IEEE 802.1x. Com certificado de homologação válido da ANATEL, e no Wi-fi Certified Aliance. O ajuste da potência é de acordo com a recepção do sinal, de forma a proporcionar economia de bateria;
- Possui teclado da HP integrado, com todos os caracteres da língua portuguesa incluindo ç, com 83 teclas, com teclado numérico embutido na fileira superior, com teclas Windows Logo (acesso ao menu iniciar), com LEDs indicativos de “caps lock”. A impressão sobre as teclas é do tipo permanente, não apresentando desgaste por abrasão ou uso prolongado e com sistema de proteção contra derramamento acidental de líquidos;
- Possui dispositivo apontador integrado, do tipo “touchpad”, integrado no gabinete, com dois botões integrados e uma área para a função “scroll” (botão de rolagem), com suporte a múltiplos gestos tais como pinça e zoom;
- Fonte externo com ajuste automático 100~240v (bivolt), suficiente para suportar todas as configurações do equipamento conforme as especificações técnicas contidas no catálogo técnico do mesmo, permitindo o funcionamento por no mínimo 10 horas por dia e 5 dias por semana;
- Possui cabo de energia para a fonte de alimentação de acordo com o novo padrão ABNT (NBR 14136), com comprimento minimo de 1,5m (total fonte mais cabo de energia);
- Todos os componentes do produto são novos (sem uso, reforma ou recondicionamento) e estão em linha de fabricação;
- Pertence a linha corporativa da HP;
- A HP possui programas de Logística Reversa (https://www.hp.com/br-pt/hp-information/sustainable-impact/planet-product-recycling.html);
- São bens constituídos em parte, por material reciclado, atóxico, biodegradável e atendem a diretiva RoHS;
- Todos os itens e seus acessórios são novos, não recondicionados, de primeiro uso, em pleno estado de funcionamento, livres de arranhões, amassados, frisagens, furações, fitas adesivas, marcas, falhas de fabricação ou qualquer outro procedimento ou emprego de materiais inadequados que adaptem forçadamente o equipamento ou suas partes que sejam fisicamente ou logicamente incompatíveis;
- As unidades dos equipamentos serão entregues devidamente acondicionadas em embalagens individuais adequadas, utilizando sempre que possível de materiais recicláveis, de forma a garantir a máxima proteção durante o transporte e a armazenagem;
- Cada equipamento possui um número de série único, afixado em local visível em etiqueta de difícil remoção ou impresso a laser, constando a marca, o modelo e o número de série do equipamento e também na embalagem;

- Possui controladora de vídeo integrada ou dedicada conforme descrito na proposta comercial da CONTRATADA, com suporte a até 03 monitores simultaneamente (terceiro monitor através da porta USB tipo C), de forma estendida ou espelhada. Possui suporte para DirectX 12 e Open GL 4.5 e compatibilidade do driver com o padrão WDDM (Windows Display Driver Model);
- Possui interface de comunicação wireless integrada, com suporte aos padrões 802.11ax, 802.11ac, 802.11a, 802.11b, 802.11g e 802.11n, com suporte aos protocolos 802.11i (WLAN security, TKIP e AES), WPA, WPA2, WEP 64 e 128, IEEE 802.11 (Wired Equivalent Privacy), IEEE 802.1x. Com certificado de homologação válido da ANATEL, e no Wi-fi Certified Aliance. O ajuste da potência é de acordo com a recepção do sinal, de forma a proporcionar economia de bateria;
- Possui teclado da HP integrado, com todos os caracteres da língua portuguesa incluindo ç, com 83 teclas, com teclado numérico embutido na fileira superior, com teclas Windows Logo (acesso ao menu iniciar) e Aplicação (acesso ao menu de atalhos, equivalente ao botão direito do mouse), com LEDs indicativos de “caps lock”. A impressão sobre as teclas é do tipo permanente, não apresentando desgaste por abrasão ou uso prolongado e com sistema de proteção contra derramamento acidental de líquidos;
- Possui dispositivo apontador integrado, do tipo “touchpad”, integrado no gabinete, com dois botões integrados e uma área para a função “scroll” (botão de rolagem), com suporte a múltiplos gestos tais como pinça e zoom;
- Fonte externo com ajuste automático 100~240v / 50-60Hz (bivolt), suficiente para suportar todas as configurações do equipamento conforme as especificações técnicas contidas no catálogo técnico do mesmo, permitindo o funcionamento por no mínimo 10 horas por dia e 5 dias por semana;
- Possui cabo de energia para a fonte de alimentação de acordo com o novo padrão ABNT (NBR 14136), com comprimento minimo de 1,5m (total fonte mais cabo de energia);
- Todos os componentes do produto são novos (sem uso, reforma ou recondicionamento) e estão em linha de fabricação;
- Pertence a linha corporativa da HP;
- A HP possui programas de Logística Reversa (https://www.hp.com/br-pt/hp-information/sustainable-impact/planet-product-recycling.html);
- São bens constituídos em parte, por material reciclado, atóxico, biodegradável e atendem a diretiva RoHS;
- Todos os itens e seus acessórios são novos, não recondicionados, de primeiro uso, em pleno estado de funcionamento, livres de arranhões, amassados, frisagens, furações, fitas adesivas, marcas, falhas de fabricação ou qualquer outro procedimento ou emprego de materiais inadequados que adaptem forçadamente o equipamento ou suas partes que sejam fisicamente ou logicamente incompatíveis;
- As unidades dos equipamentos serão entregues devidamente acondicionadas em embalagens individuais adequadas, utilizando sempre que possível de materiais recicláveis, de forma a garantir a máxima proteção durante o transporte e a armazenagem;
- Cada equipamento possui um número de série único, afixado em local visível em etiqueta de difícil remoção ou impresso a laser, constando a marca, o modelo e o número de série do equipamento e também na embalagem;
- A HP possui página na Internet no qual pelo número de série é possível verificar o início e fim do período de garantia do equipamento;

JCAJ

- Os drivers, softwares e sistema operacional fornecido com o equipamento da HP estão disponíveis para download no site da HP, permitindo a instalação e recuperação do sistema operacional ao padrão de fábrica.
- A HP disponibiliza a ferramenta HP Cloud Recovery que permite realizar o download dos Drivers e do Sistema Operacional de forma automatizada para gerar pendrive de reinstalação;
- É disponibilizada documentação técnica necessária à instalação e operação do equipamento em português;
- A HP Disponibiliza “Central de atendimento telefônico” com número de telefone 0800 ou Whatsapp para abertura de chamado, em dias úteis, (segunda-feira a sexta-feira), em horário comercial (das 8h às18h) e “Central de atendimento via sistema web” para abertura de chamado 24x07, (domingo a domingo), a qualquer horário (das 00:00h às 23:59h);
- A HP Mantém os registros dos chamados que foram abertos, mantendo as informações que foram registradas sobre o mesmo;
- A ferramenta Web de abertura de chamados da HP permite que o cliente a visualize e acompanhe os chamados abertos anteriormente;
- Possui garantia padrão de fábrica de 01 ano para reposição de peças, mão de obra, com atendimento "on-site", conforme descrito na proposta comercial emitida pela CONTRATADA;
- Permite a extensão de garantia para 03, 04 ou 05 anos para reposição de peças, mão de obra, com atendimento do tipo "on-site" através de aquisição da CONTRADA de carepack de extensão de garantia, devendo descrever em sua proposta comercial a descrição da extensão da garantia (HP Carepack);
- A assistência técnica “on-site” será realizada, durante todo o período de garantia dos equipamentos, pela própria HP ou por empresa de Assistência Técnica Autorizada da HP, a fim de que sejam mantidos válidos todos os direitos oriundos da garantia;
- Durante o prazo de garantia será substituída sem ônus para a contratante, a parte ou peça defeituosa, salvo quando o defeito for provocado por uso inadequado dos equipamentos;
- Certificado de Garantia é válido em todo o território nacional;
- Abertura do equipamento para limpeza, adição de memória ou SSD pela CONTRATANTE não implicará em perca da garantia desde que não cause mau uso. A garantia da HP não cobrirá o suporte destas peças.

Durante o período de garantia do Produto HP, a Fabricante HP responsabiliza-se pela garantia no prazo e condições padrão HP, conforme especificado no termo de garantia que acompanha o Produto HP e no manual técnico do Produto HP.

Serviços adicionais ao especificado na garantia padrão da Fabricante HP poderá ser adquiridos pelo Parceiro HP, com prazos e condições customizados.

B20A5LS#AK4 – HP Elite Mini 800 G9 – Carepack adicional – **U7925E** - HP 5-year Next Business Day Onsite Desktop Hardware Support.

67V68AV#TMP – Z2 Tower G9 – Carepack adicional – **UA935E** - HP 5-year Next Business Day Response Onsite Workstation Hardware Support.

9Z0P1AV#TMP – EliteBook 640 G11 – Carepack adicional – **UA6A3E** - HP 5-year Next Business Day Response Onsite Notebook Hardware Support.

9A816AV#TMP – ZBook Power 16-inch G11 – Carepack adicional – **U85RBE** - HP 5y Onsite Mobile Workstation Support.

Declaramos que os equipamentos fabricados pela HP são novos, que não foram submetidos a uso, nem recondicionamento, ressalvados os testes de fábrica.

HP WOLF SECURITY

HP Secure Erase for SSDs & HDDs

Safely and effectively erase sensitive data

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 922

HP Secure Erase is a critical resource for IT

IT administrators are tasked with protecting sensitive data on business PCs, even after devices are recycled, disposed of, or reprovisioned. HP Secure Erase[1] makes it easy to sanitize local magnetic hard disk drives (HDDs) or solid-state drives (SSDs) to industry standards before disposal or recycling.

TABLE OF CONTENTS

Local storage sanitation– an important last step in the PC lifecycle	2
Erasing SSDs vs. HDDs	2
Conclusion	3

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 923

Local storage sanitation—an important last step in the PC lifecycle

In an environment where sensitive user information is under attack at every stage of the system lifecycle, ensuring that data can be securely erased from a data storage device is paramount. Information can be vulnerable if left on a storage drive when a system is recycled, disposed of, or reprovisioned for another user. Properly sanitizing storage drives according to industry standards is a critical step in the PC lifecycle.

In addition to meeting industry standards for data erasure in standard magnetic hard disk drives (HDDs), HP has taken the additional step of extending HP Secure Erase to also support industry-standard Solid State Drives (SSDs). HP Secure Erase is a standard feature in all HP business notebooks, supporting the methods outlined in the National Institute of Standards and Technology Special Publication 800-88. Manufacturers of industry standard SSDs approved for use in HP business notebook products have verified that running HP Secure Erase on their SSDs fully removes all user data so that it cannot be recovered.

Erasing SSDs vs. HDDs

Using HP Secure Erase on standard HDDs, data is overwritten using a data-removal algorithm that writes multiple patterns on every sector, cluster, and bit of the hard drive. This process is documented in the Department of Defense (DOD) 5220.22-M Chapter 8 specification.[2] This overwrite-based process is only effective on standard HDDs. Writing a predetermined data pattern to a NAND flash-based SSD does not result in an empty drive. Instead it results in a drive full of data that must be erased before new user data can be written, which massively shortens the service life.

INDUSTRY-STANDARD DISK SANITATION

To securely erase all user data from an SSD and restore the drive to a fresh-out-of-box (FOB) performance state, the National Institute of Standards Technology (NIST) supports the following commands that meet the minimum guideline for media sanitization of SSDs (NIST SP800- 88 Rev.[1]).

Block Erase is a function enabled only in SATA SSDs, using the ATA command BLOCK ERASE EXT. Block Erase will instruct the SSD controller to apply an erase voltage to all NAND cells of the device (including any cells which form blocks that have been retired, re-allocated, involved in garbage collection or

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 924

over-provisioning, or are part of a reserved pool of spare blocks). This functionality provides a very fast, complete and robust erasure of the SSD.

Crypto Erase is a function enabled only in SATA SSDs. Using the ATA command CRYPTO SCRAMBLE EXT, this function removes the encryption key effectively making it impossible to reconstruct any of the data on the storage device. Crypto Scramble is implemented on both HDD and SSD SED devices.

Block Erase and Crypto Erase Sanitize Operation is a function enabled only in PCIe NVMe SSDs. NVMe does not follow conventional ATA feature sets. Instead, NVMe devices support a sanitization function, inside their FORMAT NVM command structure that includes BLOCK ERASE SANITIZE and CRYPTO ERASE SANITIZE operation. So, by setting some specific bits in this command structure, a function similar to Secure Erase can be carried out.

WHAT DATA IS NOT ERASED?

After deploying HP Secure Erase on an SSD, all data in the user space is completely and irretrievably erased, and every block in the user space is ready to accept new host-written data, which moves the drive to its highest performance state (FOB).

However, some data must be left in place, including data required for normal drive operation: SSD firmware copies that reside in the NAND, all SMART data, and retired NAND block mapping tables.

CONCLUSION

Writing or overwriting data to drive is the accepted practice of securely eliminating data from an HDD. However, in the case of NAND flash-based SSDs, overwriting is redundant, unnecessary, and a potentially insecure method of eliminating data.

By using HP Secure Erase, users can ensure that SSDs are completely sanitized and meet the minimum industry standards. HP Secure Erase is easily enabled through the standard F10 BIOS setup process on most HP business PCs.

LEARN MORE AT HP.COM/WOLFSECURITYFORBUSINESS

HP WOLF SECURITY

[1] For the methods outlined in the National Institute of Standards and Technology Special Publication 800-88 “Clear” sanitation method. Secure Erase does not support platforms with Intel® Optane™. HP Secure Erase does not support platforms with Intel® Optane.

[2] Specification 5220.22-M no longer exists. The DoD has subsequently decided that secure information must be destroyed to remain secure. The NIST guidelines restate in clear terms that a two-person rule (read human verification) shall be implemented but did not establish guidelines on the method of sanitization (it could be a single wipe with dual human verification, or a single destruction with the same).

Conclusion 24

Appendix A - HP Sure Start, Gen by Gen 25

Appendix B - System Management Mode (SMM) Overview 26

Appendix C - NIST SP 800-193: Platform Resiliency Guidelines 27

Introduction

HP Sure Start is a comprehensive security and advanced resilience firmware solution. Going well beyond system BIOS protection, HP Sure Start protects against firmware attacks and/or accidental corruption for the majority of boot-critical system firmware.

With little or no interruption to user productivity, HP Sure Start can automatically detect, stop, and recover from attacks or corruption without IT intervention. Every time the PC powers on, HP Sure Start automatically validates the integrity of the firmware to help ensure that the PC is safeguarded from malicious attacks. Once the Operating System is running on the PC, runtime intrusion detection constantly monitors memory. In the case of an attack, the PC can self-heal using an isolated "golden copy" of the firmware in minutes.

Why is firmware protection important?

As our world becomes more connected, cyber-attacks are targeting client device firmware and hardware with increasing frequency and sophistication. Tools and techniques to attack firmware were once theoretical and thought only to be available to nation-states. Such tools and techniques have since been shown to not only exist, but to be readily available in the public domain.

The critical device firmware (HP BIOS, HP Endpoint Security Controller firmware, Intel Management Engine Firmware, AMD Security Processor Firmware, etc.) is an attractive target for attackers because of the potential advantages a successful breach could provide:

Persistence: Firmware resides in a nonvolatile memory on the circuit board and can't be removed simply by erasing the hard drive.

Control: Firmware executes at the highest privilege level—outside of the OS domain— which enables the possibility of OS-independent malware.

Stealth: Firmware occupies a region of memory that is completely inaccessible to the operating system and system software; since it can't be scanned by antivirus it may never be detected.

Difficulty of recovery: All these aspects make it extremely difficult to recover from this type of infection without resorting to a service event that includes a system board replacement.

The ideal solution to protect devices against this type of attack is designed from the hardware up, using “cyber resiliency” principles. These principles acknowledge that it is extremely difficult, if not impossible, to foresee and prevent every possible attack. The ideal solution not only provides enhanced protection of the firmware, but also includes a hardware rooted ability to both detect a successful attack and recover from it.

HP Sure Start provides superb firmware protection

HP Sure Start is HP’s unique and groundbreaking approach to provide advanced firmware protection and resiliency to HP PCs. It uses hardware enforcement via the HP Endpoint Security Controller (HP ESC) to provide protection of the BIOS and other critical platform firmware that reaches well beyond the industry standard and ensures that the system will only boot Genuine HP BIOS and other critical firmware. Additionally, if HP Sure Start detects tampering with BIOS, other critical firmware, or runtime System Management Mode (SMM) BIOS code, it can recover using a protected backup copy.

Summary of HP Sure Start features:

HP platform firmware authenticity enforcement and tamper protection
HP Endpoint Security Controller hardware enforcement of the system boot, so only authentic and unmodified critical firmware and HP BIOS are loaded.

Firmware health monitoring and compliance
Logging of firmware health-related events via isolated HP Endpoint Security Controller; presents the platform firmware state along with any anomalies that could indicate thwarted attacks.

Self-healing
Automatic repair of HP BIOS and other critical firmware corruption, using the HP Endpoint Security Controller isolated backup copy of HP BIOS and other critical firmware.

BIOS setting protection
Extension of the HP Endpoint Security Controller protection of the BIOS code to include HP ESC backup and integrity-checking of all user or admin- configured BIOS settings.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 929

Runtime Intrusion Detection
Ongoing monitoring of critical BIOS code in runtime memory (SMM) while the OS is running.

Secure boot keys protection
Significantly enhanced protection of databases and keys stored by the BIOS that are critical to the integrity of the OS secure boot feature versus standard UEFI BIOS implementation.

Protected storage
Strong cryptographic methods to store BIOS settings, user credentials, and other settings in the HP Endpoint Security Controller hardware to provide integrity protection, tamper detection, and confidentially protection for that data.

Intel® Management Engine firmware protection
Full backup, integrity monitoring, and recovery services for Intel Management Engine firmware and critical data. Fully compliant with all NIST 800-193 resilience requirements.

AMD Secure Processor firmware protection
Full backup, integrity monitoring, and recovery services for AMD Secure Processor firmware and critical data. Fully compliant with all NIST 800-193 resilience requirements.

Manageability
Administrator management of HP Sure Start capabilities with the Manageability Integration Kit (MIK) plug-in for Microsoft® System Center Configuration Manager (SCCM).

Direct Memory Access (DMA) Protection
Utilizes the I/O Memory Management Unit (IOMMU) to provide hardware protection against attacks to system memory via DMA capable thunderbolt devices. Also enables support for Microsoft. "Kernel DMA Protection for Thunderbolt™ 3" (Win10 RS4 and forward). HP Sure Start Gen6+ also extends support for protection against DMA attacks beyond external thunderbolt devices to include DMA attacks via internal slots.

For a summary of capabilities added in each generation of HP Sure Start, see Appendix A.

Third-party security certification

The HP Endpoint Security Controller hardware used in HP Sure Start has undergone third- party security assessment and has been certified to provide hardware enforcement so that only authorized firmware can start on the target PC.[1]

Assurance that a security solution works as stated is a critical piece of any purchase decision related to security products. And because a reputation for quality can only go so far, HP has exposed the HP Endpoint Security Controller inner workings for review and testing by an independent and accredited laboratory to validate that it works as claimed per publicly available criteria, methodology, and processes.

Cyber-resilient design

Not only does HP Sure Start provide enhanced BIOS protection beyond the industry standard approach, but it is designed from the hardware up to provide unmatched platform cyber-resilience to ensure critical device firmware recovery even in the event of a breach or destructive attack.

All HP Sure Start Gen6+ systems include the ability to recover from a completely erased system flash. The system flash contains the majority of the boot critical firmware elements that are required to boot the system and have reasonable functionality. Those boot critical elements include system BIOS, HP Endpoint Controller firmware, video BIOS, Intel Descriptor Region firmware, AMD Secure Processor firmware, and Intel Management Engine firmware. If any one of these firmware elements in the system flash becomes corrupted in a manner that renders that subsystem non-functional, the system will be unable to boot. With an HP Sure Start Gen5+ system, all these components are restored from the HP Sure Start private flash in order to ensure that the system does not become non-operational due to firmware attack or corruption.

HP business PCs with HP Sure Start exceed the National Institute of Standards and Technology (NIST) Platform Firmware Resiliency guidelines (Special Publication 800- 193) for host processor boot firmware and other critical platform device firmware, as discussed in Appendix C. NIST SP 800-193 is one of the leading public sector efforts to formalize requirements for cyber-resilient platforms. For more details about HP Sure Start and NIST 800-193, see Appendix C.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 931

HP Sure Start – Supported models

HP introduced Sure Start in 2013. Since that time, HP has enhanced Sure Start and expanded the number of products that include it. HP Sure Start is available on many HP business PCs, including Pro and Elite, platforms, Workstations, Thin Clients, and Point of Sale Systems (RPOS). HP Sure Start is available on both Intel and AMD platform in this lineup.

Architectural overview and capabilities

HP Sure Start consists of two major architectural components:

- HP Endpoint Security Controller running HP Sure Start firmware
- HP Sure Start BIOS working in conjunction with the HP Endpoint Security Controller hardware and firmware.

Firmware integrity verification - The core of HP Sure Start

The HP Endpoint Security Controller (HP ESC) is the first device in the system to execute firmware when the system powers on, active well before the system boots. The HP ESC activities include, but are not limited to, monitoring the system power button and power sequencing, then start of the host CPU execution when the user presses the power button.

When power is first applied to the platform (before the system is turned on), the HP ESC validates that its own firmware is authentic HP code before loading and executing the code. The HP ESC hardware uses industry-standard, strong cryptographic methods to perform the integrity verification. The method employs a 2048-bit HP RSA public key contained within internal permanent read-only memory. Therefore, the HP ESC is the built-in hardware-based Root of Trust (RoT) for the platform, used to validate its firmware and the HP BIOS before they are executed. This hardware Root of Trust protects against firmware replacement attacks regardless of their deployment method and serves as the foundation upon which HP platform security is built.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 932

Figure 1:
Firmware integrity verification process

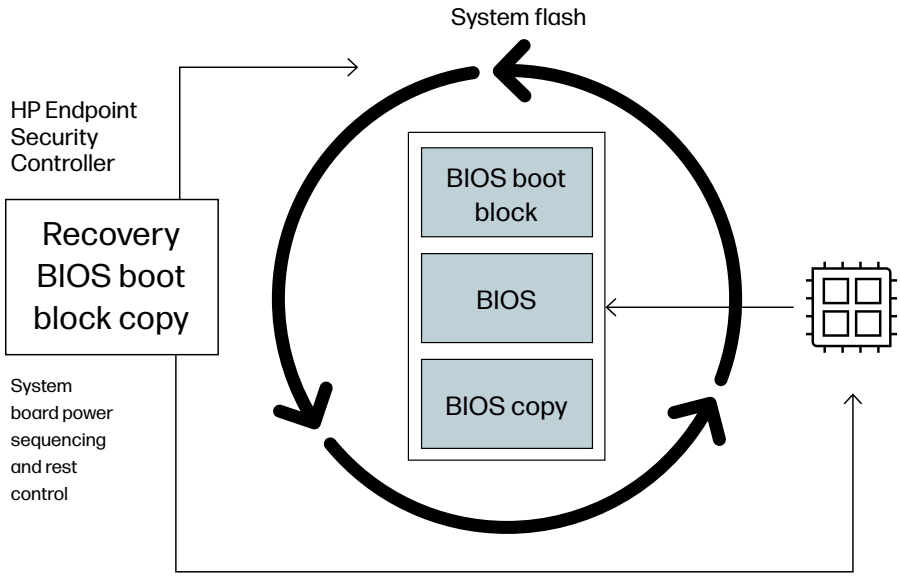

Figure 1 illustrates the firmware integrity verification process. Once the HP ESC authenticates and starts executing the HP Sure Start firmware, that firmware uses the same strong cryptographic operations to verify the integrity of the system flash BIOS boot block. If a single bit is invalid, the HP ESC replaces the system flash contents with its own copy of the HP BIOS boot block that is stored within an isolated nonvolatile memory (NVM) dedicated to the HP ESC.

The HP Sure Start design ensures that all the firmware and BIOS code running on both the HP ESC and the host CPU is the code HP intended to be on the device.*

The system flash BIOS boot block is the foundation of the HP BIOS. The HP ESC hardware ensures that the BIOS boot block is the first code that the CPU executes after a reset. Once the HP ESC determines that the BIOS boot block contains authentic HP code, it allows the CPU to begin executing code and the system to boot as it normally would.

The HP ESC also checks the integrity of the system flash boot block code each time the system is turned off or put into a hibernate or sleep mode. Since the CPU is powered off in each of these states and the CPU is therefore required to re-execute BIOS boot block code to resume, it is crucial to re-verify the integrity of the BIOS boot block each time before the CPU starts at power-on to check for tampering.

Additionally, for HP Intel models, HP Sure Start checks the integrity of the system flash BIOS boot block every 15 minutes while the system is running[2].

* Note:
The system flash boot block integrity checking, and any needed recovery performed by the HP ESC, take place while the host CPU is off. Therefore, from a user point of view, the entire operation takes place when the system is still off, in sleep mode, or hibernate mode.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 933

Machine-unique data integrity

The HP ESC and BIOS work together to provide advanced protection of factory-configured critical variables unique to each machine that are intended to be constant over the life of any specific platform. In the factory, a backup copy of this variable data is saved in the HP ESC nonvolatile memory store. The backup is made available to the HP Sure Start BIOS component on a read-only basis to perform integrity checking of the data on every boot. If any setting in the shared flash is different from the factory settings, the HP Sure Start BIOS components will automatically restore the data in the System Flash from the backup copy provided by the HP ESC.

Descriptor region

For HP Intel models, HP Sure Start protects the descriptor region of the system flash. Unique to Intel architecture, the descriptor region contains critical configuration parameters that are sampled by the Intel Core™ logic at reset and used thereafter to configure the Core logic. The descriptor region also includes partitioning information for the system flash that is used by the Intel Core logic to determine where the BIOS region resides within the flash and therefore where their CPU retrieves code for execution from reset. HP Sure Start monitors the integrity of this region and recovers it to the intended configuration in the event of tampering or corruption.

Network controller protection

In addition, for HP Intel models, HP Sure Start protects the network controller (NIC) settings contained with the system flash. Some HP customers have use cases that require legitimate changes to factory configured NIC settings. Therefore, HP Sure Start does not prevent changes to NIC settings by default. Instead, HP Sure Start provides a feature that, when enabled, warns the user that NIC settings have changed. In addition, HP Sure Start provides a method to restore the NIC settings to factory values. Protected settings include the MAC address, the Pre-boot Execution Environment (PXE) settings, and the remote initial program load (RPL). This restoration is possible via a read-only backup copy protected by the HP ESC.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 934

BIOS setting protection

As previously described, HP Sure Start verifies the integrity and authenticity of the HP BIOS code. Since this code is static after it is created by HP, digital signatures can be used to confirm both attributes of the code. The dynamic and user-configurable nature of BIOS settings, however, create additional challenges to protecting those settings. Digital signatures cannot be generated by HP and used by the HP Sure Start ESC hardware to verify those settings.

HP Sure Start BIOS setting protection provides the capability to configure the system so the HP ESC hardware is used to back up and check the integrity of all the BIOS settings preferred by the user.

When this feature is enabled on the platform, all policy settings used by BIOS are subsequently backed up and an integrity check is performed on each boot to ensure that none of the BIOS policy settings have been modified. If a change is detected, the system uses the backup from the HP Sure Start-protected storage to automatically revert to the user-defined setting.

The HP Sure Start BIOS setting protection feature generates events to the HP Sure Start ESC hardware when an attempt to modify the BIOS settings is detected. The event is logged in the HP Sure Start audit log, and the local user will receive a notification from BIOS during boot.

HP SureStart - Protected storage

Protected storage rooted in the HP Endpoint Security Controller hardware provides the highest level of protection for BIOS/firmware data and settings protected by HP Sure Start. HP Sure Start-protected storage is designed to provide confidentiality, integrity, and tamper detection even if an attacker disassembles the system and establishes a direct connection to the nonvolatile storage device on the circuit board.

Data integrity

The integrity of the dynamic data stored in nonvolatile memory by firmware and used to control the state of various capabilities is critical to the security posture of the overall platform. Dynamic data includes all BIOS settings that can be modified by the end user or administrator of the device. Examples include (but are not limited to) boot options such as the secure boot feature, BIOS administrator password and related policies, Trusted Platform Module–state control, and HP Sure Start policy settings.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 935

Any successful attack that bypasses the existing access restrictions designed to prevent unauthorized modifications to these settings could defeat the platform security. As an example, consider a scenario where an attacker makes an unauthorized modification to the secure boot state to disable it without being detected. In this scenario, the platform would boot the attacker's root kit before the OS starts, without the user's knowledge.

Industry-standard Unified Extensible Firmware Interface (UEFI) BIOS does implement access restrictions that should prevent unauthorized modifications to these variables, and HP implements these just like the rest of the PC industry. However, given the risks a breach of these mechanisms poses to the platform, HP Sure Start provides secondary defenses that are stronger than the baseline industry standard.

BIOS settings and other dynamic data used by firmware to control the state that is protected by HP Sure Start are stored in the isolated nonvolatile memory of the HP Endpoint Security Controller that is not directly accessible to software running on the host CPU.

Additionally, the HP ESC creates and appends unique integrity measurements each time a data element is stored in this nonvolatile memory store. The integrity measurements are based on a strong cryptographic algorithm (hashed-based message authentication code utilizing SHA-256 hashing) that is rooted to a secret contained within the HP ESC. The secret is unique to each HP ESC, such that each controller generates a unique integrity measurement given an identical element. When the data element is read back from the nonvolatile memory, the HP ESC recalculates the integrity measurement for that data element and compares it to the integrity measurement that is appended to the data. Any unauthorized changes to the data in the nonvolatile memory store result in a mis-compare. Using this approach, the HP ESC can detect tampering with data elements stored in the nonvolatile memory store.

Data confidentiality

For many of the data elements stored by the platform, maintaining confidentiality is critical. Examples include BIOS administrator password hashes, user credentials, and secrets optionally stored by firmware on behalf of the user for firmware-based features such as HP Sure Run and HP Sure Recovery.

Protection of these secrets is challenging when industry-standard UEFI BIOS approaches are used, since the nonvolatile storage is typically readable by software running on the host processor. HP Sure Start–protected storage is intended to provide much greater protection of this confidential data than a standard UEFI BIOS implementation.

In addition to a separate isolated storage, HP Sure Start leverages the Advanced Encryption Standard (AES) hardware block contained within the HP ESC to perform AES-256 encryption on all confidential data elements stored in the HP Sure Start nonvolatile memory, in addition to the data integrity measurements for those elements. The encryption key used is unique to each HP ESC and never leaves that controller, so data encrypted by any individual HP ESC component can only be decrypted by that same HP ESC.

Secure boot keys protection

Compared to the industry-standard UEFI secure boot implementation, HP Sure Start provides enhanced protection of the UEFI secure boot key databases that are stored by the firmware. These variables are critical to proper operation of the UEFI secure boot feature that verifies integrity and authenticity of the OS bootloader before allowing it to start at boot.

HP Sure Start protects UEFI secure boot key databases by maintaining a master copy in HP Sure Start–protected storage.

Any authorized modifications to the UEFI standard secure boot key databases by the OS during runtime are tracked by HP Sure Start and applied to the master copy by the HP ESC. HP Sure Start then uses the master copy in HP Sure Start– protected storage to identify and reject any unauthorized changes to the UEFI standard secure boot keys databases.

This capability, enabled by default, covers the following databases:

- Signature database (db)
- Revoked signatures database (dbx)
- Key Enrollment Key (KEK)
- Platform Key (PEK) updated dynamically at runtime by the OS

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 937

Runtime Intrusion Detection (RTID)

On each boot, the BIOS code starts execution from flash memory at a fixed address. This is known as the BIOS boot code and provides capabilities needed before the OS starts. However, a portion of BIOS remains in DRAM that is needed to provide advanced power- management features, OS services, and other OS-independent functions while the OS is running. This BIOS code, referred to as System Management Mode (SMM) code, resides in a special area within the DRAM that is hidden from the OS. We also refer to this code as "runtime" BIOS code in the context of HP Sure Start's Runtime Intrusion Detection feature. (For more details on SMM and how it works, please see Appendix B.)

The integrity of SMM code is critical to the client device security posture. HP Sure Start checks to make sure HP SMM BIOS code is intact at OS start. By adding new protection capabilities and/or providing a means to detect any attack to that code, Runtime Intrusion Detection provides mechanisms to ensure that the SMM BIOS code remains intact while the OS is running.

Figure 2

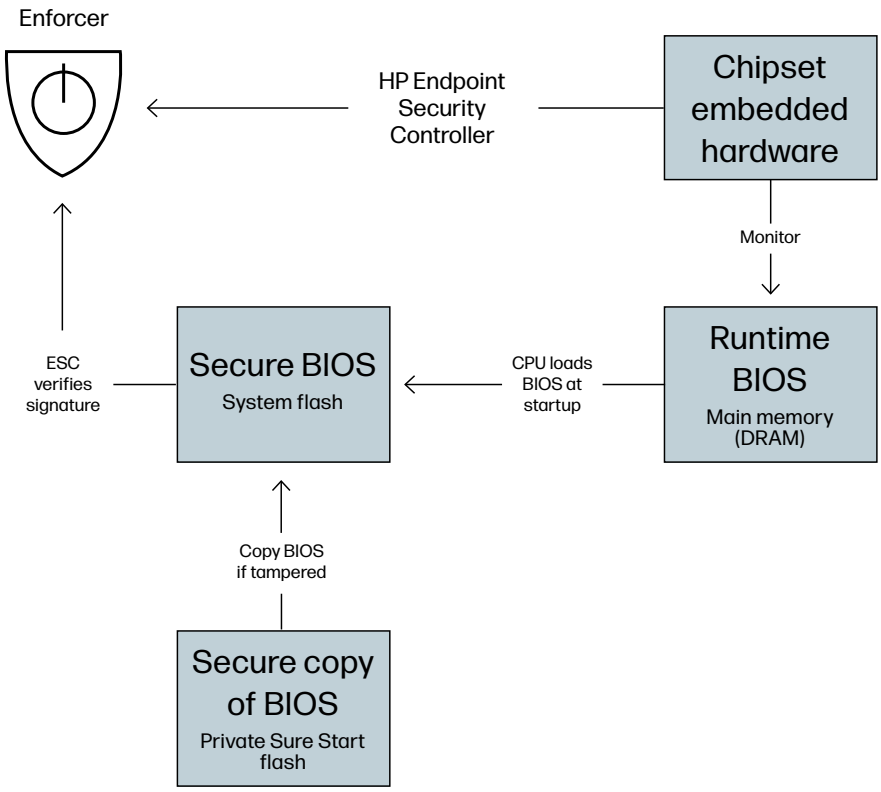

Figure 2:
Runtime Intrusion Detection uses specialized hardware embedded within the platform chipset to monitor SMM code for any changes.

Runtime Intrusion Detection architecture

The RTID feature utilizes specialized hardware in the platform chipset to detect anomalies in the Runtime HP SMM BIOS. Detection of any anomalies results in a notification to the HP Endpoint Security Controller, which can take the configured policy action independent of the CPU.

Intel® Management Engine firmware protection

All HP Sure Start Gen6+ systems include the ability to fully recover from corrupted Intel Management Engine firmware and/or critical data associated with the Intel Management Engine subsystem.

In those systems that include support for HP Sure Recover with Embedded Reimaging, HP Sure Start Gen6+ is able to recover the entire Intel Management Firmware using a copy of Intel Management engine firmware stored on the Embedded Reimaging device on the system board with no additional dependencies.

On HP Sure Start Gen6+ systems that do not support Embedded Reimaging, HP Sure Start uses a copy of the Intel Management firmware that is included on the system EFI partition on the primary mass storage device for full recovery.

In the event that the Intel Management Engine firmware update has been removed from the EFI partition, HP Sure Start Gen6+ will only perform a partial recovery of the Intel Management Engine firmware and/or critical data from the HP Sure Start private flash that will enable the system to operate with reasonable functionality. In order to fully restore all functionality provided the Intel Management Engine Firmware, it will be necessary to apply an update to the intel Management Firmware Engine firmware which will restore the full recovery image to the EFI partition.

Customers that deploy their own OS images need to take some additional steps to ensure that HP Sure Start Gen6+ can fully recover the Intel Management Engine Firmware with complete autonomy. Those steps include creating a system EFI partition that is at least 360MB, and applying an HP Intel Management Engine firmware update package.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 939

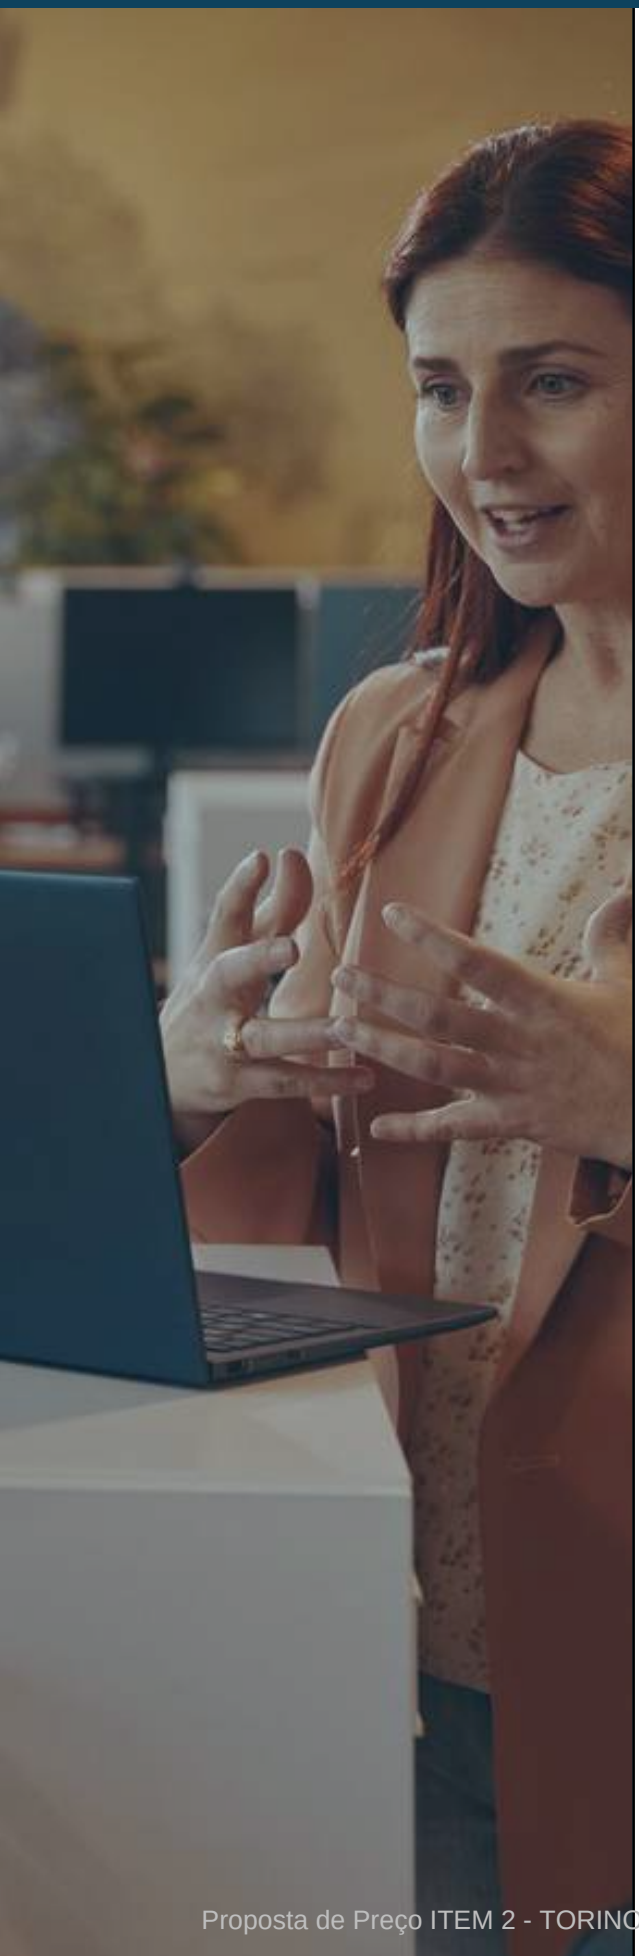
AMD® Secure Processor protection

All HP Sure Start Gen6+ systems include the ability to fully recover from corrupted AMD Secure Processor firmware and/or critical data associated with the AMD Secure Processor subsystem.

HP Sure Start Gen6+ is able to recover the entire AMD Secure Processor subsystem using a copy of AMD Secure Processor firmware stored within the HP Endpoint Security Controller isolated non-volatile memory with no additional dependencies.

Smart Flash

HP Sure Start Gen6+ adds Smart Flash technology which can dramatically reduce the time required for firmware updates and Sure Start firmware recovery operations. With Smart Flash, the HP Endpoint Security Controller will only modify those portions of the flash are corrupted (recovery) or changed (update) for both the HP Endpoint Security Controller backup copies of firmware and the primary copies of firmware in the primary flash.update package.



HP Endpoint Security Controller runtime intrusion detection

Starting from HP Sure Start Gen6+, the HP Endpoint Security Controller firmware utilizes a hardware Memory Protection Unit within the HP Endpoint Security Controller to detect, block, and log an event in the event of any unauthorized attempt to modify the run-time HP Endpoint Security Controller run-time code or critical data.

FIPS 140-3 Certification

FIPS (Federal Information Processing Standards Publication 140-3, is a standard developed by the National Institute of Standards and Technology (NIST) and defines the security requirements for cryptographic modules used in various IT products. HP's ESC, beginning with Sure Start Gen 7, has received level 1 certification (FIPS 140-3 Certificate), which ensures that the cryptography used in these modules provides a secure environment for the processing of sensitive information.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 940

SPI Host Interface Monitoring

The HP ESC now integrates SPI (Serial Peripheral Interface) Protocol Analyzer hardware, which enables HP Sure Start Gen7 to protect the system against malicious/unauthorized activity on the SPI bus. The SPI bus is the interface between the CPU and system flash memory holding the system firmware and settings (such as HP UEFI BIOS, Intel CSME firmware, AMD Security Processor firmware, and more). The HP ESC SPI protocol analyzer is also connected to this SPI bus and configured by HP Sure Start to monitor and analyze the SPI bus traffic in real time to identify and block malicious transactions to the SPI flash.

User notifications, event logging, and policy management

HP Sure Start end user notifications

Under normal operating conditions, HP Sure Start is invisible to the user. When HP Sure Start identifies a problem, recovery operations are automatic, using the default settings with no end user or IT interaction usually required.

Users may see runtime notifications in the event of a BIOS integrity problem detected via the HP Sure Start Dynamic Protection or the Runtime Intrusion Detection features while the OS is running[2]. If any significant event is detected or action is taken, HP Sure Start displays a warning message via Windows® notifications on the next boot. HP Notifications Software is required to enable the viewing of these Windows notifications.

HP Sure Start event logging

The HP Endpoint Security Controller records critical events related to the firmware/BIOS code and data monitored by HP Sure Start. These events are stored within the Sure Start nonvolatile memory store. When HP Notifications software is installed, the events are copied from the HP ESC to the Windows Event Viewer[3] to facilitate access to these events by the local user as well as the customer's preferred manageability agent.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 941

The following events trigger the HP Notifications Software to gather all events from the HP Sure Start subsystem and ensure that the Windows Event Viewer is updated with any events that are not already recorded there:

- Windows Boot
- Windows Resume from Sleep/Hibernate
- HP Sure Start with dynamic protection runtime event notifications
- HP Sure Start Runtime Intrusion Detection (RTID)

HP Notifications Software populates HP Sure Start events into a unique "HP Sure Start" application event log. Only HP Sure Start events will be included in this log. The Windows Event Viewer path to the HP Sure Start events is the following: System Tools/Event Viewer/ Applications and Services Logs/HP Sure Start.

The Windows Event Viewer level categories related to HP Sure Start events are defined in Table 1. The events are populated into Windows Event Viewer in the order that they were generated by HP Sure Start. The oldest event in the HP Sure Start subsystem is added to the Windows Event Viewer first and the most recent event is added last.

The timestamp for each Windows Event Viewer entry is the time it was added to that log, NOT the time the event occurred. Each Sure Start Windows Event Viewer entry includes detailed data within the event details, which includes the timestamp of the actual occurrence.

Note: Events are persistent in the HP Endpoint Security Controller even after being copied to the Windows Event Viewer. If the Windows Event Viewer is cleared, the HP Notifications Software application will replace all HP Sure Start entries on the next event that triggers it to check for HP Sure Start event logs.

Table 1:
Types of HP Sure Start Windows Event Viewer events protection and resiliency

Event Level	Definition
Info	Events that are expected to occur during the normal course of operation (e.g., updating the BIOS).
Warning	Unexpected events that have occurred but were fully recovered from by HP Sure Start and no user/admin action is required for the platform to be fully operational. These events are anomalous operations that the user/admin may want to investigate further, especially if there is a trend of these events across multiple machines.
Error	Events that require the admin/HP service to act on the platforms to fully recover.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 942

HP Sure Start provides superb firmware protection

Out of the box, the HP system BIOS enables and optimizes HP Sure Start policies for the typical user. Since HP Sure Start is enabled by default, the typical user is protected by HP Sure Start without having to modify the settings. For advanced users, the system BIOS provides some control of HP Sure Start behavior, using policy settings in the (F10) BIOS Setup. Unless otherwise noted, these settings and functions are located under Security/BIOS Sure Start.

Note: Policies are stored within the HP ESC nonvolatile memory that is not directly accessible by the host CPU; therefore, a reboot is required before any Sure Start settings take effect.

The following HP Sure Start settings and functions are available:

- Verify Boot Block on Every Boot
- BIOS Data Recovery Policy
- Network Controller Configuration Restore (Intel only)
- Prompt on Network Controller Configuration Change (Intel only)
- Dynamic Runtime Scanning of Boot Block (Intel only)
- HP Sure Start BIOS Setting Protection
- HP Sure Start Secure Boot Keys Protection
- Enhanced HP Firmware Runtime Intrusion Prevention and Detection (Intel only)
- HP Firmware Runtime Intrusion Detection (AMD only)
- HP Sure Start Security Event Policy
- HP Sure Start Security Event Boot Notification
- Lock BIOS Version
- Save/Restore MBR of System Hard Drive
- Save/Restore GPT of System Hard Drive
- Boot Sector (MBR/GPT) Recovery Policy
- DMA Protection
- DMA Pre-boot Protection

Verify Boot Block on Every Boot

HP Sure Start always verifies the integrity of the system flash BIOS boot block before resuming from sleep, hibernate, or power-off. When set to enable, HP Sure Start will also verify the integrity of the boot block on each warm boot (Windows restart). The trade-off to consider is faster restart time versus more security. The default setting of this feature is set to “Disable”.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 943

BIOS Data Recovery Policy

When set to Automatic, HP Sure Start automatically repairs the BIOS or the Machine Unique Data when necessary. When set to Manual, HP Sure Start requires a special key sequence to proceed with the repair. In the case of an issue with the boot block code, the system will refuse to boot, and a unique blink sequence will flash on the system LED. The system LED that lights may vary by platform and by instance. In the case of an issue with the Machine Unique Data, the system will display a message on the screen. The key sequence required, and the blink sequence displayed, vary depending whether the system is a notebook, a desktop, or a tablet. Manual mode is useful to users who can perform forensics on the system flash contents before repair. Typical users are not encouraged to use manual mode. The default setting of this feature is set to “Automatic”.

Network Controller Configuration Restore (Intel only)

When selected, HP Sure Start immediately restores the network controller configuration to factory defaults.

Prompt on Network Controller Configuration Change (Intel only)

HP provides a factory-defined network controller configuration which includes the MAC address. When this setting is set to enable, the system monitors the state of the network controller configuration and prompts the user in the event of a change from the factory-configured state. The default setting of this feature is set to “Disable”.

Dynamic Runtime Scanning of Boot Block (Intel only)

When in the default setting of enable, HP Sure Start periodically checks the integrity of the BIOS boot block while the OS is running. When in the disable setting, HP Sure Start only checks the integrity before a boot or resume from sleep or hibernate.

HP Sure Start BIOS Setting Protection

The BIOS setting protection policy is disabled by default. To enable the feature, the owner/administrator of the client device should first configure all BIOS policies to the preferred setting. The owner/ administrator also must configure a BIOS setup administrator password.

Once that is completed, the BIOS setting protection policy should be changed to “Enable.” At this point, a backup copy of all BIOS settings is created in the HP Sure Start–protected storage. Going forward, none of the BIOS settings can be modified locally or remotely. On each boot, the BIOS policy settings are verified to be in the desired state, and if there is any discrepancy, the BIOS settings are restored from the HP Sure Start–protected storage.

To modify a BIOS setting, the BIOS administrator password must be provided and BIOS setting protection subsequently disabled, at which point changes can be made to the BIOS settings.

HP Sure Start Secure Boot Keys Protection

With this setting at the factory default of enable, HP Sure Start provides enhanced protection of the secure boot databases and keys used by BIOS to verify the integrity and authenticity of the OS bootloader before launching it at boot. When set to “Disable”, only standard UEFI secure boot variable protection is used, and no backup copy is kept by the HP Sure Start subsystem.

HP Firmware Runtime Intrusion Prevention and Detection (RTID)

The RTID feature is enabled by default for all platforms shipped from the HP factory. There is no need for the end customer/administrator to enable or otherwise deploy the feature to take advantage of HP Sure Start RTID. The RTID feature can be optionally be set to “Disable” by the platform owner/ administrator.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 945

HP Sure Start Security Event Policy

This BIOS policy setting controls what action is taken when HP Sure Start detects an attack or attempted attack while the OS is running. There are three possible configurations for this policy:

- Log event only: When this setting is selected, the HP ESC logs detection events, which can be viewed in the Applications and Services Logs/HP Sure Start path of the Microsoft Windows Event Viewer[4].
- Log event and notify user: This is the default setting. When this setting is selected, the HP ESC logs detection events, which can be viewed in the Applications and Services Logs/HP Sure Start path of the Microsoft Windows Event Viewer. Additionally, the user is notified within Windows that the event occurred[5].
- Log event and power off system: When this setting is selected, the HP ESC logs detection events, which can be viewed in the Applications and Services Logs/HP Sure Start path of the Microsoft Windows Event Viewer. Additionally, the user is notified within Windows that the event occurred, and that system shutdown is imminent.

HP Sure Start Security Event Boot Notification

This BIOS policy setting controls whether HP Sure Start warnings and error messages that are displayed when the system is booted require the local user to acknowledge the error before the boot continues. With the default Require Acknowledgement setting, the system halts with the error message displayed. The local user must press a key to continue the boot. If changed to Time out after 15 seconds, the message is displayed, but the boot process continues automatically after the message is displayed for 15 seconds.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 946

Lock BIOS Version

In the (F10) BIOS setup, this feature is located in Main/Update System BIOS.

When set to “Disable”, you can update the BIOS using any supported process. When the HP ESC detects a valid boot block update in the system flash, it updates the backup copy of the boot block.

When set to “Enable”, all HP BIOS update tools refuse to update the BIOS. In addition, HP Sure Start protects the BIOS from attempts to change the BIOS version by removing the system flash via an unauthorized method. The HP ESC records the locked-down version of BIOS. When the HP ESC detects that the BIOS in the system flash changed, the HP ESC overwrites the BIOS boot block with the HP ESC copy of the boot block. The HP ESC copy of the boot block executes and recovers the remainder of the correct version of the BIOS. The default setting of this feature is “Disabled”.

Save/Restore MBR of System Hard Drive and Save/Restore GPT of System Hard Drive

In the (F10) BIOS setup, this feature is located in Security/Hard Drive Utilities. Only one of these capabilities is available, depending on the partition type of the primary drive (GPT or MBR), as detected by HP Sure Start.

When set to “Enable”, HP Sure Start maintains a protected backup copy of the MBR/GPT partition table from the primary drive and compares the backup copy to the primary on each boot. If a difference is detected, the user is prompted and can choose to recover from the backup to the original state, or to update the protected backup copy with the changes. The Boot Sector (MBR/GPT) Recovery Policy can optionally be used to remove the user decision for the action taken in the event of a discrepancy found by HP Sure Start.

When set to “Disable” (default), no MBR/GPT protection is provided by HP Sure Start.

Boot Sector (MBR/GPT) Recovery Policy

When set to Local User Control (default) the user is prompted for the action to take when HP Sure Start detects a change in the MBR/GPT partition table. When set to Recover in the event of corruption, HP Sure Start automatically restores the MBR/GPT to the saved state any time differences are encountered.

DMA Protection

When set to "Enable" (default), HP firmware configures the IO Memory Management Unit (IOMMU) to block DMA (Direct Memory Access) by peripheral devices per the Pre- Boot DMA Protection setting while in the BIOS pre-boot environment. The BIOS will also configure the system appropriately to enable Microsoft Kernel DMA protection for Thunderbolt 3 which takes over management of the IOMMU at OS start time to provide the same protections from DMA attacks in the OS environment.

Pre-boot DMA Protection

When set to "All PCI-e Devices", HP firmware configures the IO Memory Management Unit (IOMMU) to block DMA (Direct Memory Access) by peripheral devices per the Pre-Boot DMA Protection setting while in the BIOS pre-boot environment. Available options and defaults vary as shown in the table below.

Table 2:
Pre-boot DMA protection options and defaults

Notebook with Thunderbolt support	Notebook without Thunderbolt support	Desktop with Thunderbolt support	Desktop without Thunderbolt support
Thunderbolt Only	Disabled	Thunderbolt Only	Disabled
All PCI-e devices (Default) (Recommended)	All PCI-e devices (Default) (Recommended)	All PCI-e devices (Recommended)	All PCI-e devices (Recommended)
-	-	All PCI-e devices (Default)	All PCI-e devices (Default)

Remote management of HP Sure Start policy controls

Out of the box, HP Sure Start policies are optimized for the typical user. Since HP Sure Start is enabled by default, there is no need for the remote administrator to take any action to enable ("deploy") HP Sure Start. If a remote administrator wants to modify HP Sure Start policy settings, the same Windows Management Instrumentation (WMI) APIs or HP BIOS Configuration Utility scripts that are used to manage other platform BIOS policies can be used to manage HP Sure Start policies. In addition, administrators can remotely manage HP Sure Start capabilities with the Manageability Integration Kit (MIK) plug-in for Microsoft System Center Configuration Manager (SCCM).

Also, administrators can remotely manage HP Sure Start capabilities and view HP Sure Start events with the Manageability Integration Kit (MIK) plug-in for Microsoft System Center Configuration Manager (SCCM).

Conclusion

HP Sure Start delivers these key benefits:

- Uninterrupted productivity: HP Sure Start maintains business continuity in the event of an attack or accidental corruption by eliminating downtime waiting for an IT/Service event.
- Lower cost: HP Sure Start's ability to recover automatically reduces calls to the IT Help Desk and enhances productivity, which ultimately helps lower the maintenance cost for the platform.
- Peace of mind: HP Sure Start has multiple security features that run across a wide variety of software and hardware platforms.

Protect critical BIOS firmware from malware with the industry-leading firmware intrusion detection and automatic repair offered by HP Sure Start, available on many HP business PCs, including Pro and Elite platforms, Workstations, Thin Clients, and Retail Point of Sale (RPOS) PCs.

Appendix A - Sure Start, Gen by Gen

HP introduced Sure Start in 2014. Since that time, HP has enhanced Sure Start and expanded the number of products that use it. The table below provides a summary of the capabilities that were added with each generation.

Table 3:
Sure Start, Gen by Gen

Generation	Release Date	Capabilities Added
HP Sure Start	2013	▪ Firmware and BIOS authenticity enforcement, with the ability to self-heal ▪ Firmware monitoring and compliance
HP Sure Start with Dynamic Protection	2015	▪ Windows Event Viewer support ▪ Dynamic Protection (for select Intel products)
HP Sure Start Gen3 (select intel products)[6]	2017	▪ Runtime Intrusion Detection ▪ BIOS setting protection ▪ Manageability Integration Kit (MIK) plug-in for Microsoft SCCM
HP Sure Start Gen4[7]	2018	▪ Protected storage—strong cryptographic methods to store BIOS settings, user credentials, and other settings in the HP Endpoint Security Controller hardware to provide integrity protection, tamper detection, and confidentiality protection for that data ▪ Secure boot database protection—enhanced protection of databases and keys stored by BIOS that are critical to the integrity of the OS secure boot feature versus standard UEFI BIOS implementation ▪ On Intel platforms, enhanced protection and recovery of the Intel Management Engine Firmware for any failures that occur across updates or failure of main Intel ME firmware ▪ Third-party security certification of HP Endpoint Security Controller—testing by an independent and accredited laboratory to validate that the HP ESC hardware core functionality works as claimed per publicly available criteria, methodology, and processes[1] ▪ HP business PCs with HP Sure Start exceed the NIST Platform Firmware Resiliency guidelines (Special Publication 800-193) for host processor boot firmware and other critical platform device firmware, as discussed in Appendix C.
HP Sure Start Gen5[8]	2019	▪ Full back-up, integrity monitoring, and recovery services for of Intel Manageability Engine firmware including main firmware and boot critical portions of code and data. ▪ DMA Protection for attacks via Thunderbolt devices
HP Sure Start Gen6[9]	2020	▪ Smart flash ▪ Enhanced DMA protection for attacks via internal devices slots ▪ HP Endpoint Security Controller run-time Intrusion detection ▪ AMD Secure Processor firmware protection
HP Sure Start Gen7[10]	2023	▪ FIPS 140-3 Certification ▪ SPI Host Interface monitoring

Appendix B

System Management Mode (SMM) Overview

System Management Mode (SMM) is an industry-standard approach used for PC advanced power-management features and other OS-independent functions while the OS is running. While the SMM term and implementation is specific to x86 architectures, many modern computing architectures use a similar architectural concept.

SMM is configured by the BIOS at boot time. The SMM code is populated into the main (DRAM) memory. Then BIOS uses special (lockable) configuration registers within the chipset to block access to this area when the microprocessor is not executing in an SMM context. At runtime, entry into SMM mode is event-driven. The chipset is programmed to recognize many types of events and timeouts. When such an event occurs, the chipset hardware asserts the System Management Interrupt (SMI) input pin. At the next instruction boundary, the microprocessor saves its entire state and enters SMM.

As the microprocessor enters SMM, it asserts a hardware output pin, SMI Active (SMIACT). This pin serves notice to the chipset hardware that the microprocessor is entering SMM. An SMI can be asserted at any time, during any process operating mode, except from within SMM itself. The chipset hardware recognizes the SMIACT signal and redirects all subsequent memory cycles to a protected area of memory (sometimes referred to as the SMRAM area), reserved specifically for SMM. Immediately after receiving the SMI input and asserting the SMIACT output, the microprocessor begins to save its entire internal state to this protected memory area.

After the microprocessor state has been stored to SMRAM memory, the special SMM handler code that also resides in SMRAM (placed there by system BIOS at boot time) begins to execute in a special SMM operation mode. While operating in this mode, most hardware and memory isolation mechanisms are suspended, and the microprocessor can access virtually all resources in the platform to enable it to perform required tasks. The SMM code completes the required task, and then it's time to return the microprocessor to the previous operating mode. At that point, the SMM code executes the Return from System Management Mode (RSM) instruction to exit SMM. The RSM instruction causes the microprocessor to restore its previous internal state data from the copy saved in SMRAM upon SMM entry. Upon completion of RSM, the entire microprocessor state has been restored to the state just prior to the SMI event, and the previous program (OS, applications, hypervisor, etc.) resumes execution right where it left off.

Appendix C

NIST SP 800-193: Platform Firmware Resiliency Guidelines

Released in May 2018, the NIST SP 800-193: Platform Firmware Resiliency Guidelines describe guidelines for security mechanisms to protect platform firmware against unauthorized changes, detect unauthorized changes that occur, and recover from these unauthorized changes.

These guidelines outline three different resiliency properties:

1. Protected: meets all Protection and Secure Update requirements
2. Recoverable: meets all Detection and Recovery requirements
3. Resilient: meets all Protection, Detection, and Recovery requirements

Of these three properties, Resilient is the strongest, providing the most benefit to HP Customers.

HP Sure Start Gen3+ meet and exceed all Resilient guidelines in NIST SP 800-193 for host processor boot firmware, also known as the UEFI BIOS. Further, HP Sure Start Gen3 and subsequent generations progressively expand the number of other firmware based Critical Platform Device Firmware that are protected per NIST 800-193 requirements, as shown in Table 3.

Prior NIST guidelines for BIOS security

NIST SP 800-193 goes beyond NIST SP 800-147, which only addressed protection and the secure update of the platform's UEFI BIOS. All generations of HP Sure Start along with all generations of HP BIOSphere support NIST SP 800-147.

NIST SP 800-193 also goes beyond NIST SP 800-155, which outlined security components and guidelines to establish a secure BIOS integrity measurement and reporting chain. Likewise, all generations of HP Sure Start along with all generations of HP BIOSphere support NIST SP 800-155.

NIST SP 800-193 Critical Platform Devices in HP Commercial PCs

NIST SP 800-193 acknowledges that the definition of Critical Platform Devices can vary. Critical Platform Devices are defined in section 3.2 (Resiliency Properties):

"For a platform as a whole to claim resiliency to destructive attacks, the set of platform devices necessary to minimally restore operation of the system, and sufficient to restore reasonable functionality, should themselves be resilient. We call this set of devices critical platform devices. The particular resiliency properties may vary from platform-to-platform."

For that reason, it is important to define this set of devices and applicable firmware for HP Commercial PCs. NIST SP 800-193 provides a reference platform architecture in Section 2 along with a list of devices which are "often critical to the normal and secure operation of a platform." The table below provides a mapping to each of those devices/subsystems to the applicable firmware components in the HP Commercial Notebook PCs.

Note that each customer environment should be evaluated to determine whether there are additional peripheral devices that are critical to restore reasonable functionality specific to the customer's deployment.

Table 4:
Critical Platform Device Firmware Protected by HP Sure Start or other technology.

NIST SP 800-193 Platform Architecture Reference	HP Commercial PC critical platform device firmware	Protected by
1. Embedded Controller (EC)/ Super I/O (SIO) 4. Host Processor 6. Graphics Processing Unit (GPU) when implemented as Unified Memory Architecture (UMA) 8A. Host Controller (HC) for mass storage device 10. Host Processor Boot Firmware 11. Platform Runtime Firmware 12. Power Supply 14. Fans	HP ESC firmware HP UEFI BIOS firmware	HP Sure Start Gen3+
2. Trusted Platform Module (TPM)	Discrete TPM component firmware[1]	TPM
3. Baseboard Management Controller (BMC)/ Management Engine (ME)	Intel Management Engine firmware or AMD Secure Processor firmware	HP Sure Start Gen5+ HP Sure Start Gen6+
5. Network Interface Controller (NIC)	Intel integrated GbE NIC firmware[2]	HP Sure Start Gen3+
7. Serial Peripheral Interface (SPI) Flash	Intel Descriptor firmware	HP Sure Start Gen3+
8A. Hard Disk Drive (HDD)/Solid State Drive (SSD)	HDD/SSD firmware[3]	N/A[4]
9. Embedded MultiMediaCard (eMMC) / Universal Flash Storage (UFS)	N/A[4]	N/A[4]
13. Glue Logic (CPLD's, FPGA's)	N/A[4]	N/A[4]

1. This component is not critical to boot of the platform.
2. This component is not critical to minimally restore operation of the system but is required to establish Ethernet connectivity in environments where that connectivity is deemed critical to platform resiliency.
3. Mass storage devices are outside the scope of this document. Resiliency capabilities vary by storage supplier and by storage device. Not all suppliers or devices currently meet all Resiliency requirements in 800-193.
4. No devices of this type are included.

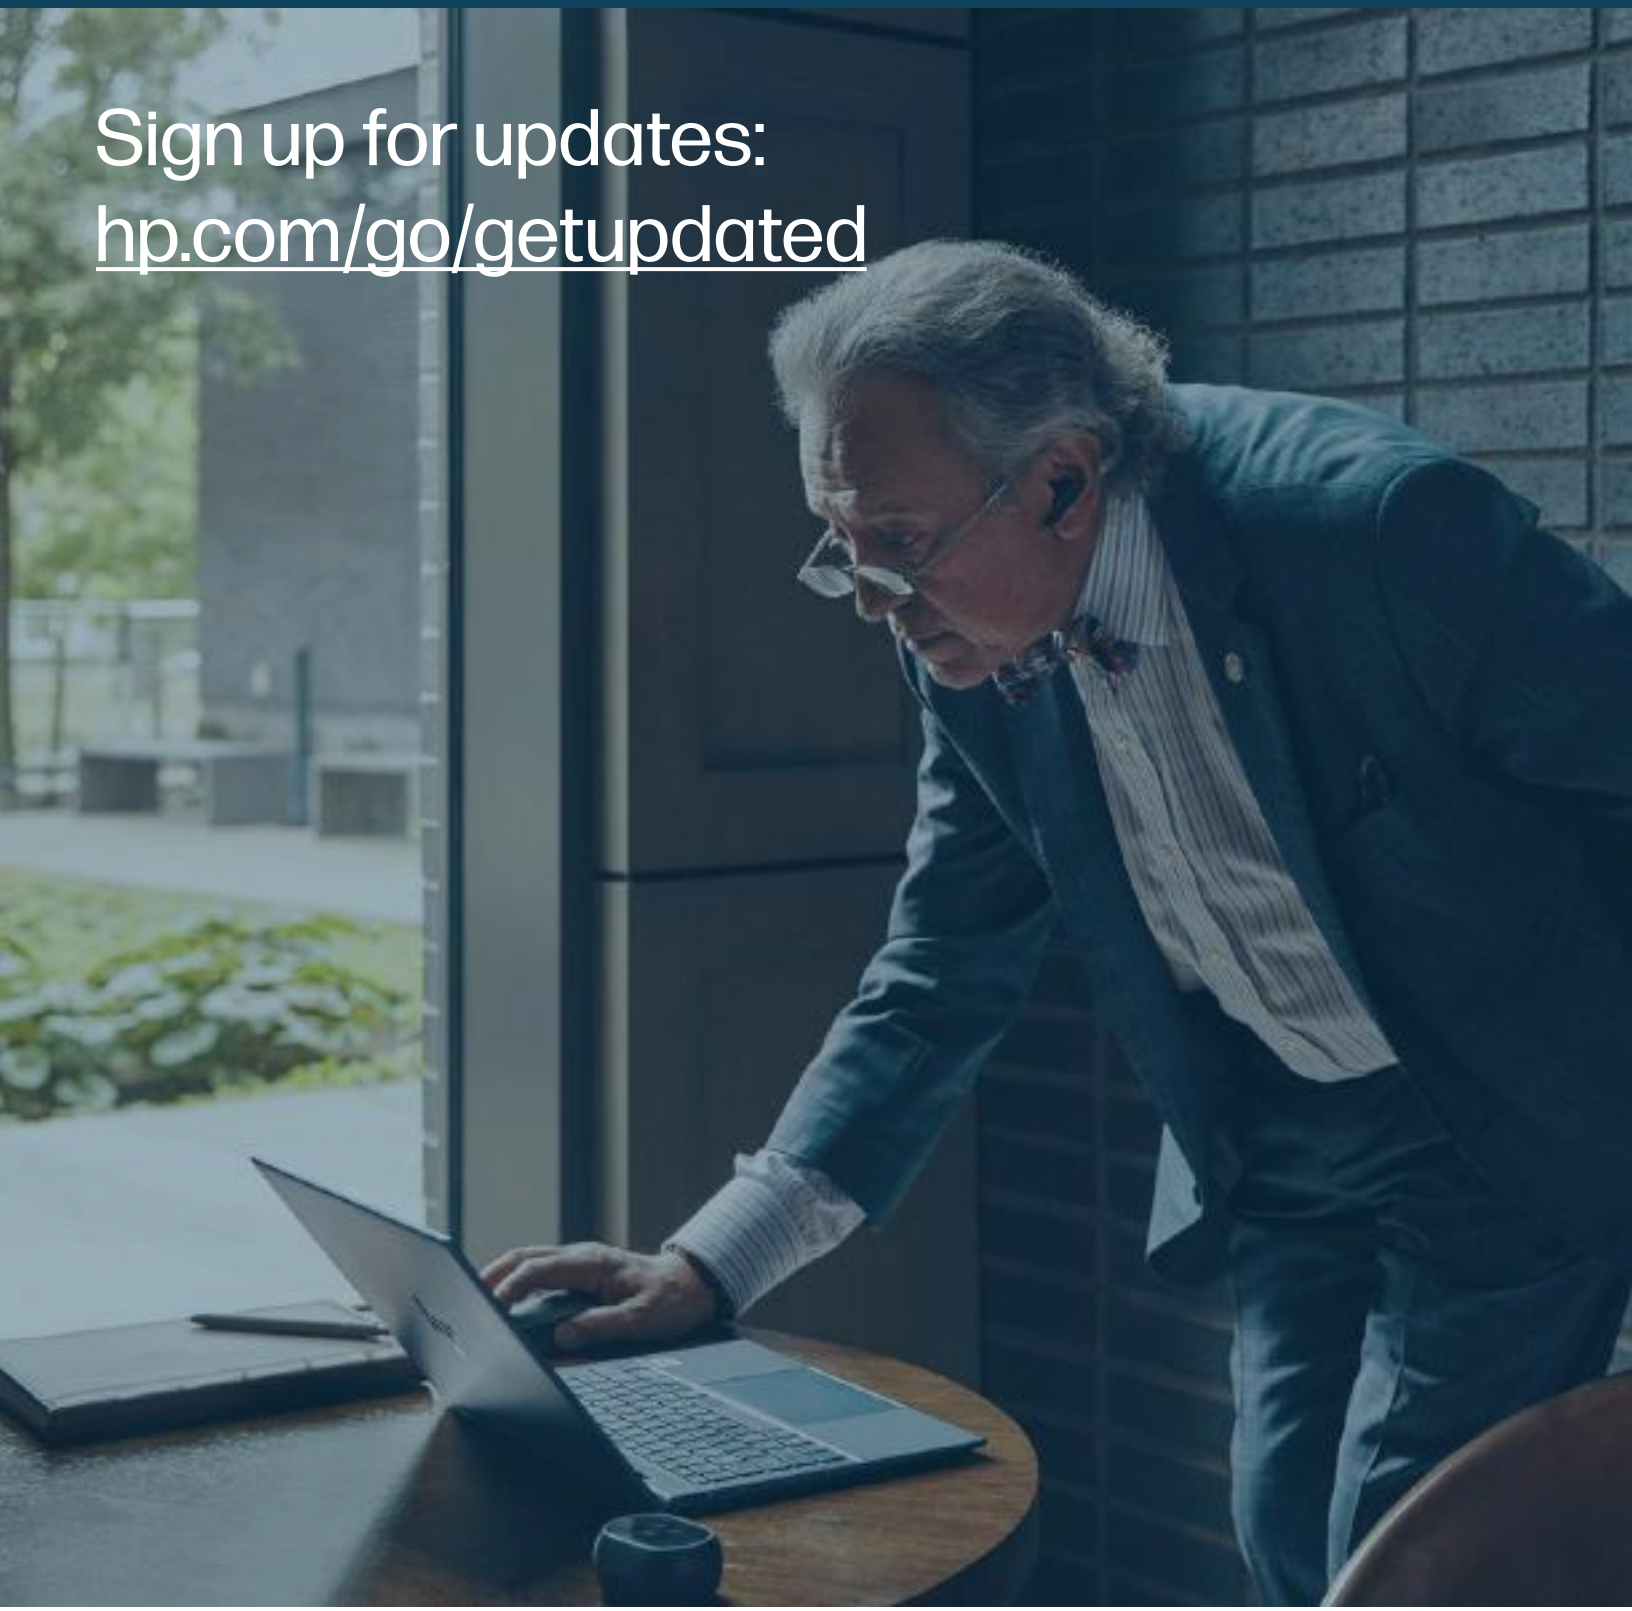
Acronyms

- BIOS
  Basic Input/Output System (aka host processor boot firmware)
- CPU
  Central processing unit
- ESC
  HP Endpoint Security Controller
- Gen3+
  Applies to HP Sure Start Gen3, Gen4, Gen5, Gen6, and Gen7
- Gen4+
  Applies HP Sure Start Gen4, Gen5, Gen6, and Gen7
- Gen5+
  Applies HP Sure Start Gen5, Gen6, and Gen7
- Gen6+
  Applies only to HP Sure Start Gen6, and Gen7
- HMAC
  Hash-based message authentication code
- HW
  Hardware
- OS
  Operating system
- POST
  Power-On Self-Test
- RoT
  Root of Trust (defined in NIST SP 800-193)
- RTD
  Root of Trust for Detection (defined in NIST SP 800-193)
- RTRec
  Root of Trust for Recovery (defined in NIST SP 800-193)
- SMM
  System Management Mode
- UEFI
  Unified Extensible Firmware Interface

Table 5:
Required functions for Host Processor Boot Firmware.

The table below provides a summary of each function described by NIST SP 800-193.

NIST SP 800-193	HP Sure Start	
Roots of Trust (Section 4.1)	Meets all Resiliency Requirements	▪ Gen3+ uses a hardware-based RoT (the HP ESC) with immutable boot firmware, which cryptographically verifies subsequent firmware before launching it, creating a Chain of Trust. ▪ Gen3+ includes a key store and approved digital signing algorithms based on FIPS 186-4 to verify the digital signature of firmware update images. ▪ Gen3+ uses authenticated update, detection, and recovery mechanisms, which are anchored in Gen3+'s HW-based RoT.
Protection and Update of Mutable Code (Section 4.2.1)	Meets all Resiliency Requirements	▪ Gen3+ uses an authenticated update mechanism anchored in Gen3+'s ▪ HW-based RoT. ▪ Firmware update images are digitally signed by HP's code signing service (HP Secure Sign) and verified by Gen3+ prior to updating. ▪ Gen3+ integrity protects the HP ESC and UEFI flash regions, so that only its authenticated update mechanism or a secure local update through physical presence can modify those flash regions. ▪ Gen3+ has no known authenticated update bypass mechanisms and contains the ability to prevent rollback to earlier authentic firmware images with known security vulnerabilities.
Protection of Immutable Code (Section 4.2.2)	Meets all Resiliency Requirements	▪ Gen3+ uses a hardware-based RoT (the HP ESC) with immutable boot firmware.
Runtime Protection of Critical Platform FW (Section 4.2.3)	Meets all Resiliency Requirements	Critical Platform Firmware executing in volatile storage (RAM) runs and: ▪ Ceases its operation prior to the loading of system software. That is, it runs during POST and stops before the OS is loaded. ▪ is protected from system software using SMM protections enforced by the CPU.
Protection of Critical Data (Section 4.2.4)	Meets all Resiliency Requirements	▪ Gen4+ Critical Data, such as Secure Boot authenticated variables, are only modifiable through defined APIs provided by device firmware. These APIs employ a mechanism to authenticate that the data is originating from an authorized source before applying the change. ▪ Gen4+ Critical Data, such as per-platform unique factory configuration settings, are only modifiable through defined APIs provided by device firmware. These APIs employ a mechanism to authenticate that the request is originating from an authorized HP service provider before they allow the change. ▪ Gen4+ Critical Data, such as BIOS settings that can be configured in the field, are only modifiable through defined APIs. These APIs are accessed only via a system administrator who has configured the BIOS administrator password. ▪ Gen3+ factory default settings, which are not per- platform-specific, employ the same protection as the code. This includes integrity and authenticity verification via digital signature. These setting updates are controlled and protected in the same manner as the firmware.



Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 956

NIST SP 800-193	HP Sure Start	
Detection of Corrupted Code (Section 4.3.1)	Meets all Resiliency Requirements	▪ A successful attack on the platform firmware will not impact Gen3+'s RTD. The RTD is maintained in a private flash area inaccessible to the system software that might compromise the platform firmware. ▪ Firmware code is validated by Gen3+'s RTD using approved digital signature algorithms and cryptographic hashes.
Detection of Corrupted Critical Data (Section 4.3.2)	Meets all Resiliency Requirements	▪ A successful attack on the Active Critical Data will not impact Gen3+'s RTD. The RTD is maintained in a private flash area inaccessible to the system software that might compromise Active Critical Data. ▪ Gen3+ can save and validate critical data through use of digest hashes prior to using that critical data, and Gen3+ can initiate a recovery of the critical data if corruption is detected.
Recovery of Mutable Code (Section 4.4.1)	Meets all Resiliency Requirements	▪ Gen3+'s ESC implements the recovery capability. ▪ A successful attack on the platform firmware will not impact Gen3+'s RTRec. The RTRec is maintained in a private flash area inaccessible to the system software that might compromise the platform firmware. ▪ Gen3+'s RTRec has access to a locally stored copy of the platform's UEFI image in its private flash area, which is inaccessible to (protected from) system software. ▪ Gen3+ can update the locally stored authentic UEFI image in its private flash area through an Authenticated Update mechanism.
Recovery of Critial Data (Section 4.4.2)	Meets all Resiliency Requirements	▪ Gen3+'s ESC implements the recovery capability. ▪ A successful attack on Active Critical Data will not impact Gen3+'s RTRec. The RTRec is maintained in a private flash area inaccessible to the system software that might compromise Active Critical Data. ▪ Gen3+ can recover critical data back to factory defaults including per-platform-specific data that is backed up in isolated & protected storage. ▪ Gen3+ can recover non-per-platform-specific defaults from the backup BIOS image stored in isolated and protected storage. ▪ Gen3+ does not use policies included as part of Critical Data to restore critical data.
Logging and notification	Exceeds all Resiliency Requirements	▪ Gen3+ will notify user of corruption and log the event. ▪ Gen3+'s detection mechanism is capable of logging events when corruption ▪ is detected Gen3+ will notify user of a recovery event and log the event. ▪ Gen3+'s detection mechanism is capable of logging events when a recovery action has taken place.
Policy-based controls	Exceeds all Resiliency Requirements	▪ Gen3+'s detection mechanism has policies which control the action taken by the Runtime Detection.

NIST SP 800-193	HP Sure Start	
Automatic or manual recovery options	Exceeds all Resiliency Requirements	▪ Gen3+ Runtime Detection can initiate a recovery process automatically or after notification of detection corruptions to the user. ▪ Gen3+ can automatically perform its recovery operations without user interaction or it may require user approval, dependent on policy setting. ▪ Gen3+ gains approval from the user before replacing the current Critical Data, based on recovery policy setting. ▪ Gen3+ can recover Critical Data back to a last-known good state. ▪ Gen3+ gains approval from the user before replacing the current Critical Data, based on recovery policy setting.
Local or remote IT Recovery	Exceeds all Resiliency Requirements	▪ Gen3+ can automatically perform its recovery operations without user interaction or may require user approval, dependent on policy setting.
Rollback pre-vention	Exceeds all Resiliency Requirements	▪ Gen3+ and the UEFI boot block both have controls in place to protect against recovery to an earlier firmware version with security weaknesses.
Runtime intru-sion detection	Exceeds all Resiliency Requirements	▪ NIST SP 800-193 is silent on what happens to firmware once it is loaded from nonvolatile storage (flash) into volatile storage (RAM) for execution. Gen3+ provides runtime intrusion detection of UEFI SMM code loaded into SMM RAM.
Physical attack detection	Additional Functionality not required in NISTSP800-193	▪ Gen4+ provides protection against physical attacks to the protected backup copy of dynamic critical data. ▪ AES encryption is used on a per-component unique key to provide confidentiality of private data. In addition, HMAC integrity measurements provide tamper prevention/detection of those keys.

1. The HP Sure Start controller hardware has been certified per the CSPN certification framework.
2. HP Sure Start with Dynamic Protection is available on HP Elite products equipped with 6th generation Intel Core processors and higher.
3. HP Sure Start end user notifications and pushing of HP Sure Start events to OS event viewer support is limited to Windows Operating system. These features are not supported in Linux.
4. HP Notification Software must be installed to view HP Sure Start events in the Windows Event Viewer.
5. HP Notification Software must be installed to receive notifications.
6. HP Sure Start Gen3 is available on HP Elite products equipped with Intel 7th generation processors.
7. HP Sure Start Gen4 is available on HP Elite and HP Pro 600 products equipped with 8th generation Intel or AMD processors.
8. HP Sure Start Gen5 is available on select HP PCs with Intel processors. See product specifications for availability.
9. HP Sure Start Gen6 is available on select HP PCs.
10. HP Sure Start Gen7 is available on select HP PCs.

HP Z2 G9 Tower Workstation (Core i7-12700K)

Desktop system certified with Ubuntu

Release

- ### Ubuntu 20.04 LTS 64 Bit

  Pre-installed in some regions with a custom Ubuntu image that takes advantage of the system's hardware features and may include additional software. Standard images of Ubuntu may not work well, or at all.

  #### Kernel

  This system was tested with 20.04 LTS, running the 5.14.0-1018-oem kernel.

  #### BIOS

  HP: U50 Ver. 01.01.00 (UEFI)

  #### Hardware

Network	Intel Corp. I210 Gigabit Network Connection Ethernet Server Adapter I210-T1 pci (8086:1533 103c:0003) Intel Corp. Ethernet Connection (17) I219-LM pci (8086:1a1c 103c:895c)
Processor	Intel Corp. 12th Gen Intel(R) Core(TM) i7-12700K
Video	nVidia GA102GL [RTX A5000] pci (10de:2231 103c:147e)
Wireless	Intel Corp. Alder Lake-S PCH CNVi WiFi Wi-Fi 6 AX201 160MHz pci (8086:7af0 8086:0094)

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 968

HP's Compliance with Restriction of Hazardous Substances (RoHS) Legislation in the EU and other jurisdictions

(Rev 14c September 2019)

HP Inc
1501 Page Mill Road
Palo Alto, CA 94304-1112
www.hp.com

HP is committed to compliance with all applicable laws and regulations, including material restriction requirements under the European Union Recast RoHS Directive 2011/65/EU, otherwise known as EU RoHS 2, as amended by Directive 2015/863/EU and RoHS legislation in other jurisdictions such as China's Management Methods for Restricted Use of Hazardous Substances in Electrical and Electronic Products, otherwise known as China RoHS, and the materials restriction requirements of India's E-Waste Management Rules, 2016.

HP believes that legislation, like EU RoHS 2, plays an important role in promoting industry-wide transition to restrict substances of concern. In general, the restriction of any substance should take into account the following key items:

- Global harmonization of the legislation content and implementation requirements
- Substance risk assessment, including a clear understanding of the environmental impacts of alternative substances
- Clear identification of what substances (vs. broad classes or categories) are to be restricted
- Clear identification of when alternative technologies are proven and readily available
- Appropriate lead time to allow the industry to transition
- Substances that are not used or found in final products should not be included in the restrictions
- Material application exemptions should be allowed for the use of restricted substances in applications where current substitution is not technically feasible
- Inclusion of maximum concentration values setting de minimis levels below which the relevant substances may be present

HP believes other substances should be considered for inclusion in future RoHS legislation. This includes the restriction of polyvinyl chloride (PVC) and brominated flame retardants (BFRs) from electrical and electronic products (EEE). HP believes PVC and BFRs should be the focus for the restriction of chlorine (Cl) and bromine (Br) from electrical and electronic products, where technically feasible. HP's reasons for focusing on PVC and BFRs are:

- PVC and BFRs cover 99% of the uses for Cl and Br in electronics;
- Given the high percentage usage, these substances have the highest impact;
- Restriction of these substances where technically feasible would substantially accomplish the goal to eliminate Cl and Br from electronic products

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 969

In order to make these material transitions in all the many types of products in the industry, HP believes restriction under RoHS legislation is possible. However, some critical issues would need to be overcome or addressed by specific exemptions, including technical issues for certain applications, availability of environmentally preferable alternatives, and ability to maintain high recycled content as substances are restricted.

Our continued voluntary goal is to apply the EU RoHS 2 substance and exemption requirements outside the EEA (and other countries that are tracking EU compliance dates) on a worldwide basis within 6 months of each of the EU's various legal compliance dates for virtually all HP branded new products in the scope of EU RoHS 2, except where it is widely recognized that there is no technically feasible alternative (as indicated by an exemption under the EU RoHS Directive).

HP began proactively eliminating substances of concern in the early 1990s. The HP Materials and Chemical Management Policy guides how we specify materials and chemicals for use in products, packaging, and manufacturing processes. For key milestones see our Green Chemistry Timeline.

In early 2003, a company-wide RoHS team was formed to manage all aspects of HP's global response to RoHS legislation around the world. HP's initiative to address RoHS legislation is part of the company's Design for Sustainability program, which includes advancing materials innovation to improve environmental and human health impacts. For more information, see the materials innovation section of HP's Sustainable Impact Report.

HP continues to plan for further "RoHS like" legislations in other jurisdictions and will meet any additional requirements that arise. HP complies with the requirements of all the RoHS legislations currently in effect (including those specifically listed under Compliance Status below). HP's Compliance Verification is based on our risk analysis of restricted substances entering the supply chain and includes technical documentation outlined in the European Union's EN 50581:2012 standard and the International IEC 63000:2018 standard.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 970

HP's Compliance Status to EXISTING RoHS Legislation:

Europe, Middle East and Africa

European Union and European Economic Area

- HP products [1] comply with EU Directive 2011/65/EU of 8 June 2011 as amended by EU Directive 2015/863 of 31 March 2015 and including amendments to the exemptions in Annex III.

Switzerland

- HP products [1] comply with the Swiss Ordinance on the Reduction of Risks relating to the Use of Certain Particularly Dangerous Substances, Preparations and Articles, otherwise known as the Swiss Chemical Risk Reduction Ordinance, ORRChem, as of May 18, 2005 (as amended)

Ukraine

- HP products [1] comply with the substance restrictions in Ukraine's "Technical Regulation on Restriction of the use of certain hazardous substances in electrical and electronic equipment, approved by Decree of the Cabinet of Ministers of Ukraine dated 10 March, 2017 No. 139", otherwise known as Ukraine RoHS which came into effect on 22 September 2017 and repealed Technical Regulation on the restriction of the use of certain hazardous substances in electrical and electronic equipment, approved by Decree of the Cabinet of Ministers of Ukraine dated December 3, 2008 No. 1057.

Serbia

- HP products [1] comply with Serbia's WEEE and RoHS "Regulations on the List of Electrical and Electronic Products, Measures Banning and Restricting the Recovery of Electrical and Electronic Equipment Containing Hazardous Materials, and the Methods and Procedures for Managing Waste from Electrical and Electronic Products" that entered into force on January 4, 2011. RoHS restrictions apply to equipment placed on the market on or after July 1, 2011.

Turkey

- HP products [1] comply with Turkey's "Regulation on Waste Electronic and Electrical Equipment" (WEEE) which came into effect on May 22, 2012 and incorporates the rules for the Restriction of Certain Hazardous Substances in Electrical and Electronic Equipment", otherwise known as Turkey RoHS.

Bosnia-Herzegovina

- HP products [1] comply with Bosnia-Herzegovina's "Regulation of Restrictions of Use of Certain Dangerous Substances in Electrical and Electronic Equipment (RoHS Regulation 50/15) was published in Official Gazette of Republic of Srpska 50/15", otherwise known as Bosnia-Herzegovina RoHS which came into effect on June 1, 2016.

UAE

- HP products [1] comply with UAE's "Cabinet Decision No. 10/2017 to control hazardous materials in electrical and electronic devices (RoHS) OG No. 614 of 27.04.2017 (officially published and came to power on 16.05.2017)", otherwise known as UAE RoHS which came into effect on January 1, 2018.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 971

Asia

China

- HP products [1] comply with China's, "Management Methods for Restricted Use of Hazardous Substances in Electrical and Electronic Products", otherwise known as China RoHS which came into effect on July 1, 2016. And comply with "Catalog of Electrical and Electronic Products that have met the standard in Limited Use of Hazardous Substances (Batch one) which comes into effect on Nov 1, 2019.

India

- HP products [1] comply with the material restrictions of India's legislation "E-waste Management Rules, 2016", otherwise known as India RoHS which came into effect on October 1, 2016.

Korea

- HP products [1] comply with Korea's legislation "The Act on Resource Circulation of Electrical and Electronic Equipment and Vehicles", otherwise known as Korea's RoHS which came into effect on January 1, 2008. You can find HP's Korean RoHS declarations at: http://www8.hp.com/us/en/hp-information/environment/msds-specs-more.html.

Vietnam

- HP products [1] comply with Vietnam's legislation "Circular 30/2011/TT-BCT: Temporarily regulating the permitted limits for a number of hazardous substances in electric and electronic products", otherwise known as Vietnam RoHS which came into effect on December 1, 2012. You can find HP's Vietnam RoHS declarations at: http://www8.hp.com/us/en/hp-information/environment/msds-specs-more.html

Japan

- HP products [1] comply with the labeling requirements set out in Japan's "The Marking of Presence of the Specific Chemical Substances for Electrical and Electronic Equipment" (JIS-C-0950), otherwise known as J-MOSS which came into effect on July 1, 2006. You can find HP's J-MOSS declarations at http://www8.hp.com/us/en/hp-information/environment/msds-specs-more.html

Singapore

- HP products [1] comply with Singapore's "Environment Protection and Management Act (Chapter 94A) Environmental Protection and Management Act (Amendment of Second Schedule) Order 2016", otherwise known as Singapore RoHS which came into effect on June 1, 2017.

Taiwan BSMI

- HP products [1] comply with Taiwan's "CNS 15663 Guidance to reduction of the restricted chemical substances in electrical and electronic equipment released by Bureau of Standards, Metrology and Inspection (BSMI), MOEA through notification dated 29 December 2015 added the requirement for RoHS labelling to BSMI certification requirement." Otherwise known as Taiwan BSMI RoHS which came into effect as of July 1, 2017.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 972

Americas

California

- HP products [1] comply with California's, "Electronic Waste Recycling Act of 2003 (Senate Bill 20) substance restrictions", otherwise known as California RoHS which came into effect on January 1, 2007.

New Jersey

- HP products [1] comply with New Jersey's "Electronic Waste Recycling Act" (Senate Bill 2144), otherwise known as New Jersey RoHS which came into effect on 1 January 2011.

Worldwide

- HP continues to achieve its internal voluntary goal to meet the substance restrictions of the EU RoHS legislation on a worldwide basis, except where it is widely recognized that there is no technically feasible alternative (as indicated by an exemption under the EU RoHS Directive), for virtually all HP branded products in scope of EU Directive 2011/65/EU as amended.

Notes:
[1] HP products that are both in scope and put on the market in the given jurisdiction.

About Annex B2
Annex B2 reflects Product environmental attributes relevant for Computers and Computer Monitors. The following items from the ECMA-370 Main body are not shown in the template:
P4.1 – P4.3 Consumable materials
P9.1 TEC and Print speed
P10.2 - P10.3 Chemical emissions from printing products
P11.1 - P11.3 Consumable materials for printing products.

Product environmental attributes - Legal requirements		**Requirement met**		
Item		Yes	No	n.a.
P1	**Hazardous substances and preparations**			
P1.1*	Products do comply with current European RoHS Directive. (See legal reference and NOTE B1)	☒	☐	
P1.2*	Products do not contain Asbestos (see legal reference). Comment: Legal reference has no maximum concentration value.	☒	☐	
P1.3*	Products do not contain Ozone Depleting Substances: Chlorofluorocarbons (CFC), hydrobromofluorocarbons (HBFC), hydrochlorofluorcarbons (HCFC), Halons, carbontetrachloride, 1,1,1-trichloroethane, methyl bromide (see legal reference). Comment: Legal reference has no maximum concentration values.	☒	☐	
P1.4*	Products do not contain more than; 0,005% polychlorinated biphenyl (PCB), 0,005% polychlorinated terphenyl (PCT) in preparations (see legal reference).	☒	☐	
P1.5*	Products do not contain more than 0,1% short chain chloroparaffins (SCCP) with 10-13 carbon atoms in the chain containing at least 48% per mass of chlorine in the SCCP (see legal reference).	☒	☐	
P1.6*	Parts with direct and prolonged skin contact do not release nickel in concentrations above 0,5 μg/cm²/week (see legal reference). Comment: Max limit in legal reference when tested according to EN1811:2011-5.	☒	☐	☐
P1.7*	REACH Article 33 information about substances in articles is available at (add URL or mail contact): REACH Article 33 Declarations (hp.com)	☒	☐	☐
P2	**Batteries**			
P2.1*	If the product contains a battery or an accumulator, the battery/accumulator is labeled with the disposal symbol. Information on proper disposal is provided in user manual. (See legal reference)	☒	☐	☐
P2.2*	Batteries or accumulators do not contain more than 0,0005% of mercury or 0,002% of cadmium. (See legal reference)	☒	☐	☐
P2.3*	Batteries and accumulators are readily removable. (See legal reference)	☐	☐	☒
P2.4*	Documentation includes the number of cycles the (secondary) battery can withstand. (See legal reference)	☒	☐	☐
P2.5*	When internal batteries of a notebook computer cannot be “accessed and replaced by a nonprofessional user”, the related text is present and legible on the external packaging (see legal reference)	☒	☐	☐
P3	**Conformity verification & Eco design (ErP)**			
P3.1*	The product is CE-marked to show conformance with applicable legal requirements (see legal reference). The Declaration of Conformity can be requested at (add link or e-mail address): http://www8.hp.com/uk/en/certifications/technical/regulations-certificates.html sustainability@hp.com	☒	☐	☐
P3.2*	The product complies with the applicable Eco design requirements for energy-related products, (see legal reference). Required information is; ☐ given in item P15 or added to this document, ☒ available at (add URL): https://h22235.www2.hp.com/hpinfo/globalcitizenship/environment/productdata/europeErPLot3desktop-pc.html	☒ ☒	☐ ☐	☐ ☐
P5	**Product packaging**			
P5.1*	Packaging and packaging components do not contain more than 0,01% lead, mercury, cadmium and hexavalent chromium by weight of these together.	☒	☐	
P5.2*	The packaging materials are marked with abbreviations and numbers indicating the nature of the material(s) used (see legal reference).	☒	☐	☐
P5.3*	The product packaging material is free from ozone depleting substances as specified in the Montreal Protocol (see legal reference). Comment: Legal reference has no maximum concentration values.	☒	☐	☐
P6	**Treatment information**			
P6.1*	Information for recyclers/treatment facilities is available (see legal reference).	☒	☐	☐

NOTE B1 Restriction applies to the homogeneous material, unless other specified and expressed in weight %. Stating “Yes” means that the product is compliant with the mandatory requirements.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 975

Model number *	*Z2 Tower G9*	**Logo**

Item	*=mandatory to fill in. Additional information regarding each item may be found under P14.	Yes	No	n.a.
P7	**Design** **Disassembly, recycling**			
P7.1*	Parts that have to be treated separately are easily separable	☒	☐	☐
P7.2*	Plastic materials in covers/housing have no surface coating.	☒	☐	☐
P7.3*	Plastic parts > 100 g consist of one material or of easily separable materials.	☒	☐	☐
P7.4*	Plastic parts > 25 g have material codes according to ISO 11469 referring ISO 1043-4.	☒	☐	☐
P7.5	Plastic parts are free from metal inlays or have inlays that can be removed with commonly available tools.	☒	☐	☐
P7.6*	Labels are easily separable. (This requirement does not apply to safety/regulatory labels).	☒	☐	☐
	Product lifetime			
P7.7*	Upgrading can be done e.g. with processor, memory, cards or drives	☒	☐	☐
P7.8*	Upgrading can be done using commonly available tools	☒	☐	☐
P7.9	Spare parts are available after end of production for: **5** years			☐
P7.10	Service is available after end of production for: **5** years			☐
	Material and substance requirements			
P7.11*	Product cover/housing material type (e.g. plastics, metal, aluminum): Material type: ***steel*** Material type: Material type:			
P7.12	Insulation materials of external electrical cables are PVC free.	☐	☒	☐
P7.13	Insulation materials of internal electrical cables are PVC free.	☒	☐	☐
P7.14	External plastic casing/cover parts > 25 g contain no more than 0,1% weight (1000 ppm) bromine and 0,1% weight (1000 ppm) chlorine attributable to brominated flame retardants, chlorinated flame retardants, and polyvinyl chloride or 0,3% weight (3000 ppm) bromine and 0,3% weight (3000 ppm) chlorine in parts containing more than 25% post-consumer recycled content.	☒	☐	☐
P7.15	Printed circuit boards, PCBs (without components) are low halogen: all ☐ PCBs > 25 g ☒ are low halogen as defined in IEC 61249-2-21. (See [5]NOTE B2)	☒	☐	☐
P7.16	Flame retarded plastic parts > 25 g in covers / housings are marked according ISO 1043-4: Marking: ***>PBT+PET-GF30FR(40)<***	☒	☐	☐
P7.17	Alt. 1: Chemical specifications of flame retardants in printed circuit boards > 25 g (without components): TBBPA (additive) ☐, TBBPA (reactive) ☐ (See NOTE B3), Other; chemical name: , CAS #: Alt. 2: Chemical specifications of flame retardants in printed circuit boards (without components) > 25 g according ISO 1043-4: ***>PBT+PET-GF30FR(40)<***	☐ ☒	☐ ☐	☐ ☐
P7.18	Alt. 1: Flame retarded plastic parts > 25 g contain the following flame retardant substances/preparations in concentrations above 0,1%: 1. Chemical name: , CAS #: (See NOTE B4) 2. Chemical name: , CAS #: " 3. Chemical name: , CAS #: " Alt. 2: Chemical specifications of flame retardants in plastic parts > 25 g according ISO 1043-4: ***>PBT+PET-GF30FR(40)<***	☐ ☒	☐ ☐	☐ ☐
P7.19	In plastic parts > 25 g, flame retardant substances/preparations above 0,1% are used which have been assigned the following Risk phrases; and Hazard statements: The source(s) for these classifications is/are found at (add URL(s)): ***http://echa.europa.eu/web/guest/information-on-chemicals/cl-inventory-database*** (See note B5)	☐	☐	☒

GENERAL NOTE Standard references should direct to the latest version of a standard. If an older version of a standard is used, section P15 shall be used for explanation.

NOTE B2 IEC 61249-2-21 defines maximum limits of 900 ppm for each of the substances chlorine and bromine and a maximum limit of 1500ppm of these substances combined. The standard does not address fluorine, iodine and astatine which are included in the group of halogens.

NOTE B3 and B4 A Guidance document on Chemical substances is available; see http://www.ecma-international.org/publications/standards/Ecma-370.htm.

NOTE B5 If a certain substance has been assigned a certain risk phrases / hazard statement in the referenced source, this does not necessarily mean the substance has been tested for all of the hazards referred to by a certain customer.

P7 ***Product Upgradability and Reparability***

The following table is provided in accordance with IEEE 1680.1-2018[6] criterion 4.4.2.5.

feature	Available [1]	Repairable [2]	Replaceable [3]	Upgradeable [4]
processor	Y	Y	Y	Y
main memory	Y	Y	Y	Y
mass storage (internal)	Y	Y	Y	Y
wireless networking	Y	Y	Y	Y
integrated graphics	Y	Y	N	N
discrete graphics	Y	Y	Y	Y
display panel	N	N/A	N/A	N/A
integrated keyboard	N	N/A	N/A	N/A
batteries	Y	Y	Y	Y
power supply	Y	Y	Y	Y
fan assemblies	Y	Y	Y	Y
speaker(s) (internal)	Y	Y	Y	Y
camera	N	N/A	N/A	N/A
touchpad	N	N/A	N/A	N/A
I/O connectors and external power connector	Y	Y	Y	Y
readers [5]	Y	Y	Y	Y

Table notes:
[1] Y* = feature is available, but may not be included in every configuration
[2] Product can be repaired (returned to fully functional state) if feature fails.
[3] Feature can be replaced using only commonly available tools without soldering or de-soldering. Y* = replacement may require replacing an assembly to which the feature is attached.
[4] Base feature may be upgraded by replacing it with a higher performance module or by expanding capacity through use of expansion slots. NOTE: This evaluation does not
account for situations in which the initial configuration purchased is already maximized. Contact HP Sales or an HP authorized reseller to determine the availability of upgrade parts and method to obtain them in your geography.
[5] This feature category includes readers such as fingerprint readers, smart card readers, and other read-only devices, but excludes read/write devices.

The product herewith complies with the requirements of the Radio Equipment Directive 2014/53/EU, the Ecodesign Directive 2009/125/EC, the RoHS Directive 2011/65/EU and carries the CE-marking accordingly.

US ONLY: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Additional Information:

1) **This product is assigned a Regulatory Model Number which stays with the regulatory aspects of the design. The Regulatory Model Number is the main product identifier in the regulatory documentation and test reports, this number should not be confused with the marketing name or the product numbers.**
2) **The Notified Body TIMCO Engineering, Inc. with number 1177 issued the EU-type examination certificate with ID: E1177-211569 according to Annex III, for the essential requirement of article 3.2 of the RED Directive**
3) **This product was tested in a typical HP environment.**

Este producto cumple con los requisitos de la directiva RED 2014/53/UE, la Directiva sobre diseño ecológico 2009/125/CE, la Directiva RoHS 2011/65/UE y lleva la marca CE.

SÓLO PARA EE.UU.: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Información Adicional:

1) **A este producto se asigna un número de modelo regulatorio que cumple con los aspectos regulatorios del diseño. El número de modelo normativo es el identificador principal del producto en la documentación reglamentaria e informes de ensayo, este número no se debe confundir con el nombre comercial o los números del producto.**
2) **El organismo notificado TIMCO Engineering, Inc. con número 1177 ha efectuado una evaluación de la conformidad (de acuerdo con el anexo III, debido a que faltan normas armonizadas) y expedido el certificado de examen UE de tipo: E1177-211569**
3) **Este producto se ha probado en un entorno típico de HP.**

Το παρόν προϊόν συμμορφώνεται με τις απαιτήσεις του η Οδηγία RED 2014/53/ΕΕ, η Οδηγία για τον οικολογικό σχεδιασμό 2009/125/ΕΚ, η Οδηγία RoHS 2011/65/ΕΕ και φέρει τη σήμανση CE.

Μόνο για τις ΗΠΑ: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Πρόσθετες πληροφορίες:

1) **Αυτό το προϊόν έχει εκχωρηθεί ένας ρυθμιστικός αριθμός μοντέλου που μένει με τις ρυθμιστικές πτυχές των σχεδιασμό. Ο αριθμός Ρυθμιστική μοντέλου είναι το κύριο αναγνωριστικό του προϊόντος με την κανονιστική τεκμηρίωση και εκθέσεις δοκιμών, ο αριθμός αυτός δεν πρέπει να συγχέεται με την εμπορική ονομασία ή τους αριθμούς προϊόντος.**
2) **Ο κοινοποιημένος οργανισμός TIMCO Engineering, Inc. με αριθμός 1177 πραγματοποίησε αξιολόγηση της συμμόρφωσης (σύμφωνα με το παράρτημα III, λόγω της λείπουν εναρμονισμένων προτύπων) και εξέδωσε το πιστοποιητικό εξέτασης τύπου ΕΕ: E1177-211569**
3) **Αυτό το προϊόν έχει δοκιμαστεί σε ένα τυπικό περιβάλλον HP.**

Forordning (EF) nr. 617/2013
EN 62623:2013
Forordning (EF) nr 1275/2008
EN 50564:2011
IEC 62301:2011

RoHS
EN IEC 63000:2018

Produktet overholder kravene iRED-direktivet 2014/53/EU, direktivet om miljøvenligt design 2009/125/EC, RoHS-direktivet 2011/65/EU og bærer CE-mærket i overensstemmelse hermed.

KUN FOR USA: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Yderligere information:

1) **Dette produkt er tildelt et lovpligtigt modelnummer, som forbliver de lovgivningsmæssige aspekter af den design. Det lovpligtige modelnummer er det vigtigste produkt-id i den lovgivningsmæssige dokumentation og testrapporter, bør dette antal ikke forveksles med navn markedsføringen eller varenumre.**
2) **Det bemyndigede organ TIMCO Engineering, Inc. med nummer 1177 har foretaget en vurdering af overholdelsen (i henhold til bilag III, på grund af manglende harmoniserede standarder) og udstedt EU-typeafprøvningsattest: E1177-211569**
3) **Dette produkt blev testet i en typisk HP-miljø i forbindelse med en HP host system.**

  - IEC 62301:2011

RoHS
- EN IEC 63000:2018

Navedeni proizvod je u skladu sa zahtevima RED Direktive 2014/53/EU, Ekodizajn Direktive 2009/125/EC, RoHS Direktive 2011/65/EU i prema tome nosi oznaku CE.

SAMO ZA SAD: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Dopunske Informacije:

1) **Ovom proizvodu je dodeljen regulatorni broj modela koji ostaje u skladu sa regulatornim aspektima dizajna. Regulatorni broj modela je glavni identifikator proizvoda u regulatornoj dokumentaciji i izveštajima o ispitivanju, ovaj broj ne treba mešati sa marketinškim nazivom ili brojevima proizvoda.**
2) **Imenovano telo TIMCO Engineering, Inc. sa brojem 1177 izvršilo je ocenjivanje usaglašenosti (prema prilogu III nedostaju harmonizovani standardi) i izdalo je EU potvrdu o ispitivanju br.ID: E1177-211569**
3) **Ovaj proizvod je testiran u tipičnom HP okruženju.**

VETËM PËR SH.B.A.: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Informacion shtese:

1) **Këtij produkti i është caktuar një Numër Modeli Rregullator i cili qëndron me aspektet rregullatore të modelit. Numri i Modelit Rregullator është identifikuesi kryesor i produktit në dokumentacionin rregullator dhe raportet e provave, ky numër nuk duhet të ngatërrohet me emrin e marketingut ose numrat e produkteve.**
2) **Organi i njoftuar TIMCO Engineering, Inc. numër 1177 ka kryer një vlerësim të konformitetit (sipas Aneksit III, për shkak të mungesës së standardeve të harmonizuara) dhe ka lëshuar një certifikatë të provimit të tipit BE: E1177-211569**
3) **Ky produkt u testua në një mjedis tipik HP.**

HP Z2 Tower G9 Workstation Desktop PC ENERGY STAR

Product Summary:

Product Type:	**Workstation**
Registered In:	**Brazil**
Manufacturer:	**HP**
EPEAT Tier:	**Gold**
Registration Date:	**2022-02-23**
Product Status:	**Active**
Exceptions:	**Configurations that are not ENERGY STAR qualified do not meet required criterion 4.5.1.1. Configurations that include the HP Healthcare Wired Keyboard and Mouse or the HP USB Keyboard and Mouse Healthcare Edition do not meet optional criterion 4.1.4.1**

All unique product identifiers existing for this product may not be listed here. If the unique product identifier you are looking for is not listed, please contact EPEAT at EPEAT@GEC.org.

EXPORT PRODUCT SUMMARY

EPEAT Tier Score Detail

For a product to be listed on the EPEAT Registry, it must, at a minimum, meet the applicable “required” criteria. Click here to see a list of the required criteria for this product category.

This product has met the necessary required criteria.

Along with required criteria, products can also meet optional criteria and score optional points. It is not required for a product to achieve any optional points.

Proposta de Preço ITEM 2 - TORINO INFORMÁTICA LTDA. (1661825) SEI 2025.001317 / pg. 1063

Products that meet all required criteria and achieve **less than 50%** of the optional points are rated at **EPEAT Bronze**

Products that meet all required criteria and achieve **50 - 74%** of the optional points are rated at **EPEAT Silver**

Products that meet all required criteria and achieve **75 - 100%** of the optional points are rated at **EPEAT Gold**

The optional criteria for this product category and optional points achieved by this product are listed below.

Optional Criteria	Scores
4.1 Substance Management	12 / 16
4.2 Materials Selection	3 / 3
4.4 Product longevity/life-cycle extension	1 / 2
4.5 Energy Conservation	1 / 2
4.7 Packaging	2 / 2
4.8 Life cycle assessment and carbon footprint	6 / 6
4.9 Corporate Environmental Performance	9 / 9
4.10 Corporate social responsibility	4 / 6
TOTAL OPTIONAL CRITERIA SCORE:	**38 / 46**

Please note that it is not required for a product to achieve any optional points.

Some optional criteria may not be applicable to a product. Optional criteria that are not applicable (N/A) to the product are not included in the Total Optional Criteria Score, and are not reflected above.

For any questions, comments, or feedback regarding the EPEAT Registry, please contact us.

Observações / *Observations:*

1. A validade deste Certificado de Conformidade está atrelada à realização das avaliações de manutenção e tratamento de possíveis não conformidades de acordo com as orientações da UL do Brasil Certificações previstas no RAC específico. Para verificação da condição atualizada de regularidade deste Certificado de Conformidade deve ser consultado o banco de dados de produtos e serviços certificados do Inmetro.
   The validity of this Certificate of Conformity is linked to the performance of maintenance assessments and treatment of possible non-conformities in accordance with the guidelines of UL do Brasil Certifications provided for in the specific Conformity Assessment Regulation. To check the updated condition of regularity of this Certificate of Conformity, the Inmetro database of certified products and services must be consulted.

2. Este certificado aplica-se aos equipamentos (produtos) idênticos ao protótipo avaliado e certificado, manufaturados na(s) unidade(s) fabril(is) mencionada (s) acima.
   This certificate applies to the products that are identical to the prototype investigated, certified and manufactured at the production site mentioned in this certificate.

3. Qualquer alteração no produto, incluindo a marcação, invalidará o presente certificado, salvo se o solicitante informar por escrito à UL do Brasil Certificações sobre esta modificação, a qual procederá à avaliação e decidirá quanto à continuidade da validade do certificado.
   Any non-authorized changes performed in the product, including marking, will invalidate this certificate. UL do Brasil Certificações must be notified about any desired change. This notification will be analyzed by UL do Brasil Certificações that will decide about certificate force.

4. Esta autorização está vinculada a um contrato e para o escopo acima citado.
   This license is related to a commercial proposal and to the scope above cited.

alt.	Interchangeable	Interchangeable	3.5 A max., 6.0 Vdc min. It (Itrip) = 7.0 A.	IEC 60730-1:2013 +A11, Clause 15, 17 and Annex J, UL 1434 ed.1	Verify by other cert. body, UL
Metal Chassis	Interchangeable	Interchangeable	Sheet steel or steel, thickness 0.91 mm min.	--	--

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 1100

			See Enclosures- Diagrams 4-01 for details.		
Metal Handle (x2)	Interchangeable	Interchangeable	Metal.	--	--
Power Supply Cord (optional)	Interchangeable	Interchangeable	Detachable. Types NISP-2, NISPE-2, NISPT-2, SP-2, SPE-2, SPT-2, SP-3, SPE-3, SPT-3, SV, SVE, SVO, SVOO, SVT, SVTO, SVTOO, SJ, SJE or SJT. 240 Vac min., 1.5 m min. and 2.4 m max. long, rated VW-1, one end with grounding type NEMA 5-15P or NEMA 6-15P, the other end with an appliance coupler. No. 14 AWG min.	UL 817 ed.2	UL
Interconnecting Cable (optional)	Interchangeable	Interchangeable	Detachable, 3.05 m long max., 30 V min., 80 °C min., suitable for external use, jacketed, VW-1 or FT-1.	UL 758, ed.3 or UL 444, ed.5 or UL 1863 ed.4	UL
Certification Marks, Rating Label and Grounding/ Warning Label Materials	CCL Design (Suzhou) Co Ltd (Worldmark)	3311T-E2a	Used in combination with Printer/ Ribbon DPW3000-140-450. Affixed to the metal surface.	UL 969 ed.5	UL (MH20595)
alt.	Interchangeable	Interchangeable	70 °C min.	UL 969 ed.5	UL
Plastic Bezel/ Plastic Panel, (front, top)	UR Materials Industry (Shenzhen) Co Ltd	210	HB min., 60 °C min., thickness 1.6 mm min.	UL 94 ed.6	UL (E323548)
alt.	Ineos Styrolution Group Gmbh	GP-22	HB min., 80 °C min., thickness 1.6 mm min.	UL 94 ed.6	UL (E108538)
alt. Plastic Bezel/ Plastic Panel, (front)	Interchangeable	Interchangeable	HB min., 60 °C min., thickness 1.6 mm min.	UL 94 ed.6	UL
Blank Panel (optional, when Removable Storage Modules, ODD not provided)	Sabic Innovative Plastics US L L C	925(GG)	V-2 min., 120 °C min., thickness 0.8 mm min.	UL 94 ed.6	UL (E121562)
PCB	Interchangeable	Interchangeable	V-1 min., 105 °C min.	UL 796 ed.11	UL
CPU Fan Duct Frame,	UR Materials Industry (Shenzhen)	Fliger 300	Plastic part (V-2 min., 60 °C min., thickness	UL 94 ed.6	UL (E323548)

Monitor Série P

27P2Q

27”

Especificações gerais

Tela	27" Widescreen IPS
Resolução	1920 x 1080 FHD
Brilho	300 cd/m²
Contraste dinâmico	50.000.000:1
Contraste estático	1.000:1
Ângulo de visão	H: 178° | V: 178°
Taxa de atualização	75 Hz
Tempo de resposta	4 ms
Tecnologia de sincronização	Adaptive-Sync
Conexão	1x VGA | 1x DVI | 1x HDMI 1.4 (HDCP 1.4) | 1x DisplayPort 1.2 (HDCP 1.4) | 4x USB 3.2 (1x Fast Charging) | 1x USB-B (Upstream) | 1x Saída de Áudio | 1x Entrada de Áudio
Base ajustável	Altura: 150 ± 5mm | Giro: 175° ± 5° | Inclinação: -5°/35° | Pivô: -90°~90° (bidirecional)
Alto-falantes	Sim - 2 x 2W
VESA	Sim - 100 x 100 mm

Especificações da tela

Tamanho do painel	27"
Tamanho da imagem visível (diagonal)	68,47 cm
Tipo de painel	IPS
Proporção de tela	16:9
Formato de tela	Widescreen
Curvatura	Não
Iluminação do painel	W-LED
Resolução máxima	VGA/DVI: 1920 x 1080 @ 60 Hz HDMI 1.4/DP 1.2: 1920 x 1080 @ 75 Hz
Pixel Pitch	0,3114 (H) x 0,3114 mm (V)
Densidade de pixel	81,59 PPI
Tipo de tela	Antirreflexivo
Bit	6 bits + FRC
Brilho	300 cd/m²
sRGB	120,9%
Relação de contraste dinâmico	50.000.000:1
Relação de contraste estático	1.000:1
Frequência nativa do painel	75 Hz
Tempo de resposta	4 ms
Ângulo de visão	H: 178° | V: 178°
Frequência de varredura	VGA/DVI/HDMI 1.4/DP 1.2: 30-85 kHz (H) VGA/DVI/HDMI 1.4/DP 1.2: 48-75 Hz (V)
Suporte de cores	Maior que 16 milhões

Ergonomia

VESA	Sim - 100 x 100 mm
Base ajustável	Altura: 150 ± 5mm Giro: 175° ± 5° | Inclinação: -5°/35° Pivô: -90°~90° (bidirecional)

Conexões e recursos

Conectores	1x VGA | 1x DVI | 1x HDMI 1.4 (HDCP 1.4) | 1x DisplayPort 1.2 (HDCP 1.4) | 4x USB 3.2 (1x Fast Charging) | 1x USB-B (Upstream) | 1x Saída de Áudio | 1x Entrada de Áudio
Alto-falantes	Sim - 2 x 2W
HDR	HDR Mode (Simulação)
Tecnologias	Adaptive-Sync, Low Blue Mode e Flicker-free
Compatibilidade	Windows, MAC, Linux
Plug & Play	DDC/CI, Windows 10 & Windows 8/8.1, MAC OS
Controles manuais	Source+Auto; Volume+Image Ratio/ Right; Clear Vision+Clear Vision Demo/ Left; Menu; Power
Função OSD (On Screen Display)	Sim - Português e outros idiomas
Destaque	Base ajustável até 15 cm de altura | Painel IPS | HDMI e DisplayPort | HUB USB | Certificações B2B

Dimensões, peso e embalagem

Dimensões monitor com base (L x A x P)	613,6 x 394,5 ~ 544,5 x 200,1 mm
Dimensões monitor sem base (L x A x P)	613,6 x 369,5 x 51,1 mm
Dimensões embalagem (L x A x P)	690 x 595 x 160 mm
Peso sem embalagem (com base)	5,49 kg
Peso sem embalagem (sem base)	3,8 kg
Peso com embalagem	7,6 kg
Itens inclusos na embalagem	Cabo de força brasileiro NBR 14136, cabo VGA, cabo DP, cabo USB, certificado de garantia, base e monitor

Energia

Fonte	Interna - 100~240V - 50/60 Hz; 1,5 A
Consumo	Ligado: 60 Watts (máximo), Ligado: 20 Watts (típico), Stand-by < 0,5 Watt, Off < 0,3 Watt

Outros

Cor predominante do produto	Preto
Cor predominante da base	Preto
Sugestão de descrição	Monitor AOC 27" IPS Base Ajustável DP Hub USB 27P2Q
Garantia	3 anos
Código EAN	7898620271992
Classificação fiscal (NCM)	8528.52.00
CEST	21.068.00
PPB	Portaria Interministerial SEPEC/ME/ SEXEC/MCTI nº 58, de 09.10.2020
Local de fabricação	Brasil

Certificações

Normas e certificações	EPA, EPEAT, TCO, GS, ISO 9241-307, EU RoHS DOC, Embalagem com material reciclável, CB, CE, FCC, California CEC, cCSAus, Win 8/8_1, Win 10, EAC (CU), Ukraine Safety, Antirroubo Kensington, HDCP 1.4 para HDMI e DisplayPort

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 1110

DECLARATION FROM MANUFACTURER

To whom it may concern,

We declare that the product with below model no. produced by our company comply with:

European RoHS DIRECTIVE 2011/65/EU & （EU）2015/863 (on the restriction of the use of certain hazardous substances in electrical and electronic equipment) and its related exemption.

Model No: 27P2Q

Signature: Alice.Jin

Name: Alice.Jin

Title: Environmental Engineer

Company: TPV Electronics (Fujian) Co., Ltd.

Date: 2023/11/10

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 1111

Due to planned maintenance, the EPEAT registry is expected to be offline between 5pm ET- 5:30pm ET on 12/16/24 and 12/17/24

COMPUTERS & DISPLAYS

Product Summary:

Product Type:	Monitors
Registered In:	Brazil
Manufacturer:	AOC International (Europe) B.V.
EPEAT Tier:	Silver
Registration Date:	2023-08-18
Product Status:	Active
EPEAT Climate+:	Achieved 2023-10-27
Exceptions:	Disassembly instructions, exploded diagram, spare parts to avoid injury to end users.

European Article Number(s): 4038986187329

All unique product identifiers existing for this product may not be listed here. If the unique product identifier you are looking for is not listed, please contact EPEAT at EPEAT@GEC.org.

EXPORT PRODUCT SUMMARY

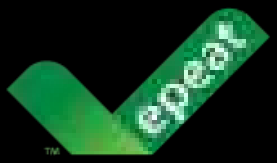
EPEAT Tier Score Detail

For a product to be listed on the EPEAT Registry, it must, at a minimum, meet the applicable "required" criteria. Click here to see a list of the required criteria for this product category.

This product has met the necessary required criteria.

Along with required criteria, products can also meet optional criteria and score optional points. It is not required for a product to achieve any optional points.

Products that meet all required criteria and achieve **less than 50%** of the optional points are rated at **EPEAT Bronze**	Products that meet all required criteria and achieve **50 - 74%** of the optional points are rated at **EPEAT Silver**	Products that meet all required criteria and achieve **75 - 100%** of the optional points are rated at **EPEAT Gold**



The optional criteria for this product category and optional points achieved by this product are listed below.

	Optional Criteria	Scores
+	4.1 Substance Management	12 / 16
+	4.2 Materials Selection	3 / 3
+	4.4 Product longevity/life-cycle extension	2 / 2
+	4.5 Energy Conservation	0 / 2
+	4.7 Packaging	0 / 2
+	4.8 Life cycle assessment and carbon footprint	5 / 6
+	4.9 Corporate Environmental Performance	4 / 9
+	4.10 Corporate social responsibility	6 / 6
	TOTAL OPTIONAL CRITERIA SCORE:	**32 / 46**

Please note that it is not required for a product to achieve any optional points.

Some optional criteria may not be applicable to a product. Optional criteria that are not applicable (N/A) to the product are not included in the Total Optional Criteria Score, and are not reflected above.

For any questions, comments, or feedback regarding the EPEAT Registry, please contact us.

Observações / *Observations:*

1. A validade deste Certificado de Conformidade está atrelada à realização das avaliações de manutenção e tratamento de possíveis não conformidades de acordo com as orientações da UL do Brasil Certificações previstas no RAC específico. Para verificação da condição atualizada de regularidade deste Certificado de Conformidade deve ser consultado o banco de dados de produtos e serviços certificados do Inmetro.
   The validity of this Certificate of Conformity is linked to the performance of maintenance assessments and treatment of possible non-conformities in accordance with the guidelines of UL do Brasil Certifications provided for in the specific Conformity Assessment Regulation. To check the updated condition of regularity of this Certificate of Conformity, the Inmetro database of certified products and services must be consulted.

2. Este certificado aplica-se aos equipamentos (produtos) idênticos ao protótipo avaliado e certificado, manufaturados na(s) unidade(s) fabril(is) mencionada (s) acima.

CARACTERÍSTICAS NOMINAIS / *RATINGS: AC 100-240V, 50/60Hz; 1.5A, Class I; IP20*

Normas aplicáveis / *Applicable standards:*
IEC 60950-1: 2005 (Second Edition) + Am1:2009 + Am2:2013, CISPR 22:2008 (modified) Class B, CISPR 24: 2010, IEC 61000-3-2: 2014, IEC 61000-3-3 : 2013, IEC 61000-4-2: 2008, IEC 61000-4-3: 2010, IEC 61000-4-4: 2012, IEC 61000-4-5: 2005, IEC 61000-4-6: 2013, IEC 61000-4-8: 2009, IEC 61000-4-11: 2004

LISTA DE COMPONENTES CRÍTICOS / LIST OF CRITICAL COMPONENTS:

Componente/ Component	Fabricante/ *Manufacturer*	Tipo/Modelo *Type/Model*	Características técnicas/ *Technical data*	Norma/ *Standard*	Marca de conformidade/ *Mark(s) of conformity*
LCD Panel for 21.5'' model	TPV	TPM215HW**-****** (*can be 0-9, A-Z or blank)	21.5'' panel with LED backlight The declared power consumption is 19.35W and backlight input voltage is 41.6V in specification.	IEC 60950-1	Tested in equipment
(Alternative)	AUO	M215HTN** (*can be 0-9, A-Z or blank)	21.5'' panel with LED backlight The declared power consumption is 15.54W and backlight input voltage is 38.4V in specification.	IEC 60950-1	Tested in equipment
(Alternative)	CHIMEI INNOLUX	M215H**-*** (*can be 0-9, A-Z or blank)	21.5'' panel with LED backlight The declared power consumption is 16.97W and backlight input voltage is 34.65V in specification.	IEC 60950-1	Tested in equipment
(Alternative)	L&T	BM215WF*-**** (*can be 0-9, A-Z or blank)	21.5'' panel with LED backlight The declared power consumption is 16.3W and backlight input voltage is 51.2V in specification.	IEC 60950-1	Tested in equipment
(Alternative)	L&T	LM215WF*-**** (*can be 0-9, A-Z or blank)	21.5'' panel with LED backlight The declared power consumption is 14.35W and backlight input voltage is 45.0V in specification.	IEC 60950-1	Tested in equipment
(Alternative)	BOE	HR215WU*-*** (* can be 0-9, A-Z, a-z for marketing purpose)	21.5 inch TFT type, with LED back light, power consumption: 24.87W; LED Array Voltage: 41.6V.	IEC 60950-1	Tested in equipment
(Alternative)	BOE	HM215WU*-*** (* can be 0-9, A-Z, a-z for marketing purpose)	21.5 inch TFT type, with LED back light, power consumption: 17.19W; LED Array Voltage: 51.2V.	IEC 60950-1	Tested in equipment
(Alternative)	SAMSUNG	LTM215HT** (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 15.82W; LED Array Voltage: 52.8V	IEC 60950-1	Tested in equipment
(Alternative)	AUO	M215HW** (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 17W; LED Array Voltage: 52.8V.	IEC 60950-1	Tested in equipment
(Alternative)	CHIMEI	M215H*-L** (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 12.55W; LED Array Voltage: 41.V.	IEC 60950-1	Tested in equipment
(Alternative)	LG Display	LM215WF* (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 16.0W; LED Array Voltage: 57.6V.	IEC 60950-1	Tested in equipment
(Alternative)	CPT	CLAA215FA** (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 14.6W; LED Array Voltage: 41.6V.	IEC 60950-1	Tested in equipment
(Alternative)	BOE	HT215F**-*** (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 16.56W; LED Array Voltage: 54.4V.	IEC 60950-1	Tested in equipment
(Alternative)	AUO	T215HVN**** (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 16.55W; LED Array Voltage: 54.4V.	IEC 60950-1	Tested in equipment

CARACTERÍSTICAS NOMINAIS / *RATINGS: 100-240Vac, 50/60 Hz, 1.5 A; Class I; IP20*

Normas aplicáveis / *Applicable standards:*
IEC 60950-1: 2005 + A1:2009 + A2:2013; CISPR 32 : 2012, CISPR 24: 2010, IEC 61000-3-2: 2014, IEC 61000-3-3: 2013, IEC 61000-4-2: 2008, IEC 61000-4-3:2006+A1: 2007+A2: 2010, IEC 61000-4-4: 2012, IEC 61000-4-5: 2014, IEC 61000-4-6: 2013, IEC 61000-4-8: 2009, IEC 61000-4-11: 2004

LISTA DE COMPONENTES CRÍTICOS / LIST OF CRITICAL COMPONENTS:

Componente/ Component	Fabricante/ *Manufacturer*	Tipo/Modelo *Type/Model*	Características técnicas/ *Technical data*	Norma/ *Standard*	Marca de conformidade/ *Mark(s) of conformity*
LCD Panel for 18.5 inch model	TPV	TPM185B*-****** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 11.4W and backlight input voltage is 35.2V in specification.	IEC 60950-1	Tested in equipment
	AUO	M185XW** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 10.2W and backlight input voltage is 36V in specification.	IEC 60950-1	Tested in equipment
	AUO	M185XTN** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 7.8W and backlight input voltage is 25.2V in specification.	IEC 60950-1	Tested in equipment
	BOE	HM185WX*-*** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 10.68W and backlight input voltage is 32V in specification.	IEC 60950-1	Tested in equipment
	CHIMEI INNOLUX	M185B**-*** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 11.11W and backlight input voltage is 27.2V in specification.	IEC 60950-1	Tested in equipment
	L&T	LM185WH*-**** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 12.8W and backlight input voltage is 51.2V in specification.	IEC 60950-1	Tested in equipment
	SAMSUNG	LTM185AT** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 11.9W and backlight input voltage is 35.2V in specification.	IEC 60950-1	Tested in equipment
	TPV	TPM185WH* (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 11.8W and backlight input voltage is 38.5V in specification.	IEC 60950-1	Tested in equipment

LISTA DE COMPONENTES CRÍTICOS / LIST OF CRITICAL COMPONENTS:

Componente/ Component	Fabricante/ *Manufacturer*	Tipo/Modelo *Type/Model*	Características técnicas/ *Technical data*	Norma/ *Standard*	Marca de conformidade/ *Mark(s) of conformity*
LCD Panel	TPV	TPT320B*-****.* (* can be 0-9, A-Z, a-z, "-" or blank)	32 inch panel with LED backlight The declared power consumption is 47.35W and backlight input voltage is 50.4V in specification.	--	Tested in equipment
Alt.	TPV	TPT315B*-****.* (* can be 0-9, A-Z, a-z, "-" or blank for marketing purpose only)	31.5 inch panel with LED backlight The declared power consumption is 35.14W and backlight input voltage is 47.6V in specification.	--	Tested in equipment
Plastic enclosure	LOTTE ADVANCED MATERIALS CO LTD	SD-0150(+), VH-0810(+), VE-0812(+), NH-1000T(+)(&), GC-0700(+++)(RR28), GC-0700A(RR), GC-0750(+)(RR70), GC-1017(+)(RR30), VE-1890(+), BF-0675(+), BF-0670(+), NH-1017(p), NH-1017T, NH-1017SG(+), BF-0677(+), HS-7000(+), HG-0760(+), NE-1030(+), HR-1360(+), LX-0951(+), LX-0957(+), TH-1100(+), TN-1100(+)	HB or better, 1.5mm thickness min. 60°C	UL 94	UL (E115797)
Alt.	GRAND PACIFIC PETROCHEMICAL CORP	D-150, D-1000, D-1000A	HB or better, 1.5mm thickness min. 60°C	UL 94	UL (E88637)
Alt.	CHI MEI CORPORATION	PA-757(+), PH-88, PA-756S	HB or better, 1.5mm thickness min. 60°C	UL 94	UL(E56070)
Alt.	ALBIS PLASTIC GMBH	GP-35, GP-22, 495F	HB or better, 1.5mm thickness min. 60°C	UL 94	UL (E80168)
Alt.	COVESTRO DEUTSCHLAND AG [PC RESINS]	FR3000 series, FR3005 series	HB or better, 1.5mm thickness min. 60°C	UL 94	UL (E41613)
Alt.	LG CHEM LTD	HF350(#), HF380(m), HF380NS, HF380(#), HF-380(#), HF-380(m), HF-380, HF-380NS, HF380X, AF312T1, AF342T1, LUPOY GN-5001TF(#), GN-5001RFD, LUPOY GN-5008HF(#), LUPOY GP-5008BF(#), SE750(#), XG568(#), XG569(#), GP-1000L, GP-1000F(#), SE750(#), LUPOY GN-5001RF(T)	HB or better, 1.5mm thickness min. 60°C	UL 94	UL (E67171)
Alt.	GRAND PACIFIC PETROCHEMICAL CORP	D-150, D-1000, D-1000A	HB or better, 1.5mm thickness min. 60°C	UL 94	UL (E98529, E244324)
Alt.	CHI MEI CORPORATION	PA-757(+), PH-88, PA-756S	HB or better, 1.5mm thickness min. 60°C	UL 94	UL (E345434)

CERTIFICATE OF CONFORMITY

This Certificate indicates that the Applicant has satisfied the Intertek requirements for the application of the EPA ENERGY STAR Mark to the model(s) described in the Product(s) Covered section of the referenced Compliance Report when made in accordance with the conditions set forth in the Energy Efficiency Certification Agreement, the Certification Report and the Program Manual. This certificate is issued subject to the Applicant attaining, and remaining in, compliance with any separate EPA ENERGY STAR Program requirements necessary for use of the ENERGY STAR Mark. This document is the property of Intertek Testing Services and is not transferable.

3rd-party Report Issuing Office: INTERTEK TESTING SERVICES LTD., SHANGHAI

Control Number: *4002603* **Authorized by:** Giovanna Daimondi

for L. Matthew Snyder, Certification Manager

This document supersedes all previous Certificate of Conformity for the noted Report Number.

This Certificate is for the exclusive use of Intertek's Client and is provided pursuant to the agreement between Intertek and its Client. Intertek's responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this Certificate. Only the Client is authorized to copy or distribute this Certificate. Any use of the Intertek name or one of its marks for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek. The observations and test results referenced from this Certificate are relevant only to the sample tested.

4.0 Critical Components

Photo #	Item no.[1]	Name	Manufacturer/ trademark[2]	Type / model[2]	Technical data and securement means	Mark(s) of conformity [3]
1	1	LCD panel	TPV	TPM270WF1	27 inch,TFT type,with LED backlight	NR
3	2	Main Board	TPV	715G9494	I/P: 19Vdc, 2.5A 715G9494 is tested type.	NR
4	3			715G9483		NR
5	4			715G9496		NR
6	5	Power Board	TPV	715G7610	I/P:AC100-240V,50/60Hz,1.5A; O/P:max.19Vdc,2.5A	NR

NOTES:

1) Not all item numbers are indicated (called out) in the photos, as their location is obvious.

2) “Various“ means any type, from any manufacturer that complies with the "Technical data and securement means" and meets the "Mark(s) of conformity" can be used.

3) Indicates specific marks to be verified, which assures the agreed level of surveillance for the component. "NR" - indicates: a) Unlisted and only visual examination is necessary or b) marks are not required to be verified.

5.0 Critical Unlisted CEC Components

Periodic Evaluation of Critical Unlisted Components by the Intertek Component Evaluation Centers (CEC) is not required under the INTERTEK ENERGY STAR Program.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 1280

6.0 Critical Features
Critical Features/Components - An essential part, material, subassembly, system, software, or accessory of a product that has a direct bearing on the product's conformance to applicable requirements of the ENERGY STAR® Program Requirements. Listed Component - A component part, which has been previously Listed or Certified by an accredited Certification Organization with no restrictions and is used in the intended application within its ratings. Recognized Component - A component part, which has been previously evaluated by an accredited certification body with restrictions and must be evaluated as part of the basic product considering the restrictions as specified by the Conditions of Acceptability. Unlisted Component - A part that has not been previously evaluated to the appropriate designated component standard. It may also be a Listed or Recognized component that is being used outside of its evaluated Listing or component recognition.
Construction Details - For specific construction details, reference should be made to the photographs and descriptions. All dimensions are approximate unless specified as exact or within a tolerance. In addition to the specific construction details described in this Report, the following general requirements also apply.
1. Product Safety Compliance - NA
2. EMI Compliance - NA
3. Schematics - NA
4. Installation, Operating and Safety Instructions - Instructions for installation and use of this product are provided by the manufacturer. Refer to Illustration No.1-2 for details.
5. Package Markings - NA
6. Warranty Information - NA
7. Marking Label - Refer to Illustration No.3.for details.

Safety

National Conventions

The following subsections describe notational conventions used in this document.

Notes, Cautions, and Warnings

Throughout this guide, blocks of text may be accompanied by an icon and printed in bold type or in italic type. These blocks are notes, cautions, and warnings, and they are used as follows:

NOTE: A NOTE indicates important information that helps you make better use of your computer system.

CAUTION: A CAUTION indicates either potential damage to hardware or loss of data and tells you how to avoid the problem.

WARNING: A WARNING indicates the potential for bodily harm and tells you how to avoid the problem. Some warnings may appear in alternate formats and may be unaccompanied by an icon. In such cases, the specific presentation of the warning is mandated by regulatory authority.

Connecting the Monitor

Cable Connections In Back of Monitor and Computer.

27E1H

27P1

1. Power
2. HDMI
3. DVI
4. Analog (D-Sub 15-Pin VGA cable)
5. DP
6. Audio in
7. Earphone out
8. USB upstream
9. USB downstream
10. USB charging

To protect equipment, always turn off the PC and LCD monitor before connecting.

1. Connect the power cable to the AC port on the back of the monitor.
2. Connect one end of the 15-pin D-Sub cable to the back of the monitor and connect the other end to the computer's D-Sub port.
3. (Optional – Requires a video card with HDMI port) - Connect one end of the HDMI cable to the back of the monitor and connect the other end to the computer's HDMI port.
4. (Optional – Requires a video card with DVI port) - Connect one end of the DVI cable to the back of the monitor and connect the other end to the computer's DVI port.
5. (Optional – Requires a video card with DP port) - Connect one end of the DP cable to the back of the monitor and connect the other end to the computer's DP port.
6. (Optional – Requires a video card with USB port) - Connect one end of the USB cable to the back of the monitor and connect the other end to the computer's USB port.
7. (Optional)Connect the audio cable to audio in port on the back of the monitor.
8. Turn on your monitor and computer.
9. Video content supporting resolution: VGA/DVI/HDMI/DP.

If your monitor displays an image, installation is complete. If it does not display an image, please refer Troubleshooting.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 1287

10.0 General Information

The Applicant has agreed to produce products in accordance with the requirements of this report and to maintain compliance with all ENERGY STAR Product Specification requirements.

Changes to Product Design / Alternate Components

As part of this agreement, the Applicant also has agreed to notify Intertek and to request authorization prior to making any changes to the product (including but not limited to using alternate parts, components or materials) which may effect compliance with the ENERGY STAR Product Specification. Those parts, components or materials identified as critical have been listed in Section 4.0 of this report.

Product Surveillance

Under this Program, market surveillance is conducted on an annual basis. For each Product Type defined in the EPA ENERGY STAR Program, Intertek will select 10% of those certified products for Verification Testing in accordance with the requirements of the EPA ENERGY STAR Product Specification.

The primary source for products under Verification Testing will be the retail market. Applicants whose products are selected for Verification Testing are required to provide a list of locations where the product might be obtained. The Applicant is responsible for the cost of procurement and the Verification Tests. Should products not be readily available on the retail market, the Applicant is required to provide access to distribution warehouses to allow selection of those products. Should the product not be available on the retail market or if procurement from the retail market is not feasible, then alternate arrangements for Verification Testing will be made by the Intertek Certification Body.

As a general rule under the Verification Testing requirements, the products must achieve energy values within 5% of the required Tier Limit.

Compliance with ENERGY STAR Product Specifications under Verification Testing

Products found non-compliant with ENERGY STAR Product Specification under Verification Testing, will be reported to the EPA within 48 hours and the product removed from the ENERGY STAR Program. If it is determined during Verification Testing that changes have been made to product design or critical components, the Certification Body may increase Verification Testing frequency of those products.

10.1 Evaluation of Unlisted Components

Because Unlisted Components are uncontrolled, and they do not fall under a third party follow up program, Intertek may require these components to be tested and/or evaluated at least once annually, more often for certain components, as part of the independent certification process. The Unlisted Components in Section 5.0 require testing and/or evaluation as indicated.

Note to Intertek Follow Up Inspector: The Component Evaluation Center, CEC, will notify you in writing when these components must be selected and sent to the CEC for re-evaluation

Ship the samples to:
Intertek Testing Services Shanghai Limited
ETL Component Evaluation Center
Building No. 86, 1198 Qinzhou Road (North)
Shanghai 200233, China
Attn: Ms. Angela Han
Sample Disposition: Due to the destructive nature of the testing, all samples will be discarded at the conclusion of testing unless, the manufacturer specifically requests the return of the samples. The request for return must accompany the initial component shipment.

Proposta de Preço ITEM 2 - TORINO INFORMATICA LTDA. (1661825) SEI 2025.001317 / pg. 1288

11.0 Manufacturing and Production Tests

Manufacturing and Production tests are not required under the INTERTEK ENERGY STAR Program. However, Intertek encourages the use of such ongoing product testing to ensure compliance with the EPA ENERGY STAR Product Specifications.

1. A validade deste Certificado de Conformidade está atrelada à realização das avaliações de manutenção e tratamento de possíveis não conformidades de acordo com as orientações da UL do Brasil Certificações previstas no RAC específico. Para verificação da condição atualizada de regularidade deste Certificado de Conformidade deve ser consultado o banco de dados de produtos e serviços certificados do Inmetro./
   The validity of this Certificate of Conformity is linked to the performance of maintenance assessments and treatment of possible non-conformities in accordance with the guidelines of UL do Brasil Certifications provided for in the specific Conformity Assessment Regulation. To check the updated condition of regularity of this Certificate of Conformity, the Inmetro database of certified products and services must be consulted.

2. Este certificado aplica-se aos equipamentos (produtos) idênticos ao protótipo avaliado e certificado, manufaturados na(s) unidade(s) fabril(is) mencionada (s) acima./
   This certificate applies to the products that are identical to the prototype investigated, certified and manufactured at the production site mentioned in this certificate.

3. Qualquer alteração no produto, incluindo a marcação, invalidará o presente certificado, salvo se o solicitante informar por escrito à UL do Brasil Certificações sobre esta modificação, a qual procederá à avaliação e decidirá quanto à continuidade da validade do certificado./
   Any non-authorized changes performed in the product, including marking, will invalidate this certificate. UL do Brasil Certificações must be notified about any desired change. This notification will be analyzed by UL do Brasil Certificações that will decide about certificate force.

4. Esta autorização está vinculada a um contrato e para o escopo acima citado./
   This license is related to a commercial proposal and to the scope above cited.

CARACTERÍSTICAS NOMINAIS / *RATINGS: AC 100-240V, 50/60Hz; 1.5A, Class I; IP20*

Normas aplicáveis / *Applicable standards:*
IEC 60950-1: 2005 (Second Edition) + Am1:2009 + Am2:2013, CISPR 22:2008 (modified) Class B, CISPR 24: 2010, IEC 61000-3-2: 2014, IEC 61000-3-3 : 2013, IEC 61000-4-2: 2008, IEC 61000-4-3: 2010, IEC 61000-4-4: 2012, IEC 61000-4-5: 2005, IEC 61000-4-6: 2013, IEC 61000-4-8: 2009, IEC 61000-4-11: 2004

LISTA DE COMPONENTES CRÍTICOS / LIST OF CRITICAL COMPONENTS:

Componente/ Component	Fabricante/ *Manufacturer*	Tipo/Modelo *Type/Model*	Características técnicas/ *Technical data*	Norma/ *Standard*	Marca de conformidade/ *Mark(s) of conformity*
LCD Panel for 21.5'' model	TPV	TPM215HW**-****** (*can be 0-9, A-Z or blank)	21.5'' panel with LED backlight The declared power consumption is 19.35W and backlight input voltage is 41.6V in specification.	IEC 60950-1	Tested in equipment
(Alternative)	AUO	M215HTN** (*can be 0-9, A-Z or blank)	21.5'' panel with LED backlight The declared power consumption is 15.54W and backlight input voltage is 38.4V in specification.	IEC 60950-1	Tested in equipment
(Alternative)	CHIMEI INNOLUX	M215H**-*** (*can be 0-9, A-Z or blank)	21.5'' panel with LED backlight The declared power consumption is 16.97W and backlight input voltage is 34.65V in specification.	IEC 60950-1	Tested in equipment
(Alternative)	L&T	BM215WF*-**** (*can be 0-9, A-Z or blank)	21.5'' panel with LED backlight The declared power consumption is 16.3W and backlight input voltage is 51.2V in specification.	IEC 60950-1	Tested in equipment
(Alternative)	L&T	LM215WF*-**** (*can be 0-9, A-Z or blank)	21.5'' panel with LED backlight The declared power consumption is 14.35W and backlight input voltage is 45.0V in specification.	IEC 60950-1	Tested in equipment
(Alternative)	BOE	HR215WU*-*** (* can be 0-9, A-Z, a-z for marketing purpose)	21.5 inch TFT type, with LED back light, power consumption: 24.87W; LED Array Voltage: 41.6V.	IEC 60950-1	Tested in equipment
(Alternative)	BOE	HM215WU*-*** (* can be 0-9, A-Z, a-z for marketing purpose)	21.5 inch TFT type, with LED back light, power consumption: 17.19W; LED Array Voltage: 51.2V.	IEC 60950-1	Tested in equipment
(Alternative)	SAMSUNG	LTM215HT** (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 15.82W; LED Array Voltage: 52.8V	IEC 60950-1	Tested in equipment
(Alternative)	AUO	M215HW** (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 17W; LED Array Voltage: 52.8V.	IEC 60950-1	Tested in equipment
(Alternative)	CHIMEI	M215H*-L** (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 12.55W; LED Array Voltage: 41.V.	IEC 60950-1	Tested in equipment
(Alternative)	LG Display	LM215WF* (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 16.0W; LED Array Voltage: 57.6V.	IEC 60950-1	Tested in equipment
(Alternative)	CPT	CLAA215FA** (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 14.6W; LED Array Voltage: 41.6V.	IEC 60950-1	Tested in equipment
(Alternative)	BOE	HT215F**-*** (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 16.56W; LED Array Voltage: 54.4V.	IEC 60950-1	Tested in equipment
(Alternative)	AUO	T215HVN**** (* can be 0-9, A-Z and blank, for marketing purpose only)	21.5 inch TFT type, with LED back light, power consumption: 16.55W; LED Array Voltage: 54.4V.	IEC 60950-1	Tested in equipment

June 5, 2027

Appendix D **(Modelo/Model: 185LM000**)**

CARACTERÍSTICAS NOMINAIS / *RATINGS: 100-240Vac, 50/60 Hz, 1.5 A; Class I; IP20*

Normas aplicáveis / *Applicable standards:*
IEC 60950-1: 2005 + A1:2009 + A2:2013; CISPR 32 : 2012, CISPR 24: 2010, IEC 61000-3-2: 2014, IEC 61000-3-3: 2013, IEC 61000-4-2: 2008, IEC 61000-4-3:2006+A1: 2007+A2: 2010, IEC 61000-4-4: 2012, IEC 61000-4-5: 2014, IEC 61000-4-6: 2013, IEC 61000-4-8: 2009, IEC 61000-4-11: 2004

LISTA DE COMPONENTES CRÍTICOS / LIST OF CRITICAL COMPONENTS:

Componente/ Component	Fabricante/ *Manufacturer*	Tipo/Modelo *Type/Model*	Características técnicas/ *Technical data*	Norma/ *Standard*	Marca de conformidade/ *Mark(s) of conformity*
LCD Panel for 18.5 inch model	TPV	TPM185B*-****** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 11.4W and backlight input voltage is 35.2V in specification.	IEC 60950-1	Tested in equipment
	AUO	M185XW** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 10.2W and backlight input voltage is 36V in specification.	IEC 60950-1	Tested in equipment
	AUO	M185XTN** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 7.8W and backlight input voltage is 25.2V in specification.	IEC 60950-1	Tested in equipment
	BOE	HM185WX*-*** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 10.68W and backlight input voltage is 32V in specification.	IEC 60950-1	Tested in equipment
	CHIMEI INNOLUX	M185B**-*** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 11.11W and backlight input voltage is 27.2V in specification.	IEC 60950-1	Tested in equipment
	L&T	LM185WH*-**** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 12.8W and backlight input voltage is 51.2V in specification.	IEC 60950-1	Tested in equipment
	SAMSUNG	LTM185AT** (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 11.9W and backlight input voltage is 35.2V in specification.	IEC 60950-1	Tested in equipment
	TPV	TPM185WH* (*can be 0-9, A-Z or blank)	18.5 inch panel with LED backlight The declared power consumption is 11.8W and backlight input voltage is 38.5V in specification.	IEC 60950-1	Tested in equipment

CARACTERÍSTICAS NOMINAIS / *RATINGS:* I/P: 19VDC, 1.31A Class Ⅲ; IP20

Normas aplicáveis / *Applicable standards:*
IEC 60950-1: 2005 + A1:2009 + A2:2013; CISPR 32 : 2015, CISPR 24:2010/A1:2015, IEC 61000-3-2: 2014, IEC 61000-3-3: 2013, IEC 61000-4-2: 2008, IEC 61000-4-3:2006+A1: 2007+A2: 2010, IEC 61000-4-4: 2012, IEC 61000-4-5: 2014, IEC 61000-4-6: 2013, IEC 61000-4-8: 2009, IEC 61000-4-11: 2004

LISTA DE COMPONENTES CRÍTICOS / LIST OF CRITICAL COMPONENTS:

Componente/ Component	Fabricante/ *Manufacturer*	Tipo/Modelo *Type/Model*	Características técnicas/ *Technical data*	Norma/ *Standard*	Marca de conformidade/ *Mark(s) of conformity*
LCD Panel	TPV	TPM215*** (*can be 0-9, A-Z or blank for marketing purpose).	21.5 inch TFT LCD (power consumption: 9.3W; LED array voltage: 31V)	IEC 60950-1	Tested in equipment
(Alternative)	BOE	H*215***-*** (*can be 0-9, A-Z or blank for marketing purpose).	21.5 inch TFT LCD (power consumption: 19.4W; LED array voltage: 54.4V)	IEC 60950-1	Tested in equipment
(Alternative)	BOE	M*215***-*** (*can be 0-9, A-Z or blank for marketing purpose).	21.5 inch TFT LCD (power consumption: 10.9W; LED array voltage: 52.7V)	IEC 60950-1	Tested in equipment
(Alternative)	L&T	BM215W**-**** (*can be 0-9, A-Z or blank for marketing purpose).	21.5 inch TFT LCD (power consumption: 16.3W; LED array voltage: 51.2V)	IEC 60950-1	Tested in equipment
(Alternative)	L&T	LM215W**-**** (*can be 0-9, A-Z or blank for marketing purpose).	21.5 inch TFT LCD (power consumption: 14.25W; LED array voltage: 52.7V)	IEC 60950-1	Tested in equipment
(Alternative)	CHIMEI INNOLUX	M215H**-**** (*can be 0-9, A-Z or blank for marketing purpose).	21.5 inch TFT LCD (power consumption: 18.3W; LED array voltage: 34.1V)	IEC 60950-1	Tested in equipment
(Alternative)	INNOLUX	M215H**-**** (*can be 0-9, A-Z or blank for marketing purpose).	21.5 inch TFT LCD (power consumption: 16.53W; LED array voltage: 36.66V)	IEC 60950-1	Tested in equipment
(Alternative)	LG Display	LM215**** (*can be 0-9, A-Z or blank for marketing purpose).	21.5 inch TFT LCD (power consumption: 16.21W; LED array voltage: 51.2V)	IEC 60950-1	Tested in equipment
(Alternative)	SAMSUNG	LTM215**** (*can be 0-9, A-Z or blank for marketing purpose).	21.5 inch TFT LCD (power consumption: 13.62W; LED array voltage: 48.2V)	IEC 60950-1	Tested in equipment
